Colonel Lewis said,—In the name of the regiment and myself I beg to return our grateful acknowledgments for the distinguished honour your Royal Highness has done us in proposing our healths, and to His Royal Highness the Commander-in-Chief and all present for the flattering way in which the toast has been received. The eloquent and graphic account your Royal Highness has given of your regimene leaves me nothing to add but that the contemplation of thd gallant deeds it has performed during the last two hundre years, in which it has taken a conspicuous part in every co n tinental war, and never failed to win additional laurels to the British arms, and the feeling that our names are associated, as it were, with heroes whose memories will ever be cherished with veneration and gratitude by the British nation, may well make every officer present, now serving, or whoever has served in your Royal Highness's regiment, feel doubly proud of belonging to so distinguished a corps. I shall very soon be called upon to resign my proud command, and I therefore take this opportunity of assuring your Royal Highness that the great and kind interest you always evince in everything connected with your regiment is most fully appreciated by all your officers, and, for myself, I can only add that I shall ever retain a deep and grateful sense of the kindness your Royal Highness has so unvaryingly shown me since I have had the honour of commanding your regiment.

The Prince Consort,—Gentlemen, the toast which I have now to propose to you is "The Health of the Prince of Wales and the rest of the Royal Family." The Prince of Wales joined the Army at the age of 17, a year and a-half ago, but his studies up to the present time have not enabled him to take any military duties upon himself. While at Edinburgh last year he, however, availed himself of the presence of the 16th Lancers to make himself acquainted with the evolutions of cavalry and to learn his drill.

The toast was drunk with the usual honours.

The Prince Consort,—Gentlemen, I beg that you will now drink to our sister Service, the Navy. The wooden walls of Old England now constitute, as they always have done, the chief defence of our country, the protection of our commerce, and the link which binds together our vast and widely-scattered empire. Modern science has effected greater changes in that service than in perhaps any other human pursuit; and foreign nations are starting with us, as it were, from the same point of departure in the common race of naval preparation. But there is that confidence in Englishmen, in their superiority on the unstable element, which has a powerful influence in maintaining their pre-eminence, and gives us a sure guarantee of future successes. I would only express my opinion, in which I trust most of those here will agree, that that Service has at no time been in higher state of efficiency than at present.

The Prince Consort.—Gentlemen, you will be all anxious now to drink to the Army—that Army of which the brigade of Guards, and this regiment in it, form an integral part—integral not only from its organisation, but from its feeling and spirit. The country has no less reason to be proud of its Army than of its Navy. And, although in mere point of numbers, it cannot boast of any superiority over others, or even of an equality with them, in proportion to our population, our Army yields to none in those qualities of courage, discipline, and endurance which form the best characteristics of soldiers. The duties which that Army has to perform, in times of peace as well as of war, are such as I make bold to state no other army in the world could discharge; and although it may be the fashion to say that this nation is not a military nation, I totally disbelieve that any other country, could produce an Army like ours, composed as it is entirely of volunteers. Gentlemen, in drinking to the Army I beg to couple with the toast "The Health of my dear relative our gallant Commander-in-Chief," who is indefatigable in his exertions to maintain and, where possible, even to improve the efficiency of that Army.

The Duke of Cambridge, who was received with cheers, said,—On the part of the Army, and in my own name, I rise to return thanks for the compliment you have been kind enough to pay us. Believe me, I am always especially proud of having my name coupled with that of the British Army. As your illustrious chairman has most justly remarked, although in comparative numbers we cannot hold our heads against the great continental armies with which we are in the habit of coping, still I am happy to think that in reputation, in honour, in discipline, and in courage, we are second to none of them. Gentlemen, I have the honour of addressing you in a double capacity—as one of the colonels of the brigade of Guards, and as a Line Officer at the head of the British Army; and all I can say is, that I most cordially assent to the observations which fell from your chairman, to the effect that there ought to be, as I believe there is, but one universal feeling of mutual affection and respect between the Guards and the Line. I cannot conceive how any other sentiment than that could exist, when I remember the great deeds performed by the brigade of Guards, of which we have to-night had so admirable a description. On the other hand, if the Guards turn to the achievements of the rest of the Service, they will see that regiment after regiment of the Line has been invariably joined with them on their own most memorable fields. Gentlemen, the spirit of the Army is kept up by the *esprit du corps* of regiments, and I am convinced there is not a regiment in the Service which is not as proud of its achievements as you are of yours. That is the feeling which ought to animate the different corps of an army, and as long as our Army is composed of regiments which can boast so brilliant a history as ours, as long as we find success after success thus emblazoned on their arms, I am persuaded that one sentiment of mutual esteem and veneration must leaven the whole mass of infantry, cavalry, artillery, and engineers. I can assure you, sir, and all my gallant friends and comrades, whether civilians or military men, who now surround me, that it is with an earnest desire to foster that good feeling which I trust will ever prevail that I have attempted to carry on the duties of the Service, and while I have the honour to hold my present position it shall be my constant endeavour to unite and blend the various branches of the Army harmoniously together, confident that in that manner, and in that manner only, I shall

Digitized by Google

be performing my duty to my Sovereign and my country. Gentlemen, I cannot sit down without briefly bearing my personal testimony to the gallantry I saw displayed by your regiment in a recent campaign. I refer at this moment to the Grenadier Guards only, because it is the regiment I am now addressing; but it is only just to add that the same feeling also pervaded the entire brigade of Guards, and, indeed, the whole Army on that memorable occasion. And as long as that undaunted courage and spirit which I then witnessed among you survives I am sure you will have reason to be proud of the regiment to which you belong and of the Service of which it forms so distinguished a part. Gentlemen, permit me again to thank you for the honour you have done the Army, and to express my gratification in being present as a guest at this most interesting banquet.

The Prince Consort.—Gentlemen, we are honoured to-day by the presence of the other regiments, both of infantry and cavalry, who constitute the Household troops, whose services live with yours in history, and render them truly worthy to form the body-guard of the Sovereign of these realms. I painfully feel the absence of one whose name is associated with the glories of the Guards in many a well-fought field. I allude to General John Byng, Earl of Strafford, who was lately removed from this temporary scene to an eternal and better world, and whose memory will ever be cherished by his brother officers. Gentlemen, I propose to couple this toast with the name of that distinguished and gallant General, Viscount Combermere, now the last surviving officer who was present with the Grenadiers at the battle of Lincelles.

Viscount Combermere.—In the name of Her Majesty's Household Brigade of Cavalry, I beg to return my most humble and heartfelt thanks to the illustrious Prince in the chair for the flattering manner in which he was graciously pleased to propose our healths. It is only upon few occasions that Her Majesty's Household Cavalry have been or can be employed; but upon those occasions, I believe, they have always done their duty to the satisfaction of those under whom they served. I am happy to tell you that the brigade is at present in a very efficient state, and if ever it should again be called upon to take the field I am certain it will maintain the character it has already acquired. It may be great presumption in me to add anything to what has been so well said by your Royal Highness in praise of the Grenadier Guards, but I may be allowed, as a very old officer, to mention that, having known this regiment during the campaigns of 1793 and 1794, and having then had the honour of serving, not in, but with, the 1st Regiment of Guards, I can speak to the gallantry it displayed. My recollection extends as far back as the battle of Lincelles, when the 1st Regiment of Guards distinguished itself under that eminent commander, General Lake. The regiment also distinguished itself on various subsequent occasions. It would be ridiculous in me, after what has fallen from your Royal Highness, to touch upon its more modern history, further than to say that in the Peninsula, at Waterloo,—in short, wherever they have been employed,—the Grenadier Guards have always rendered the most efficient and eminent services. It was my intention to do myself the honour of proposing the health of the Grenadier Guards, but your Royal Highnesses have completely taken the wind out of my sails. But I may at least venture, in conclusion, to wish every prosperity to His Royal Highness the Colonel of the Grenadier Guards, and to his distinguished and splendid regiment.

At this stage of the proceedings their Royal Highnesses the Prince Consort and the Commander-in-Chief quitted the hall, accompanied by their respective suites. The vacant chair was then filled in turn by Colonel Lindsay and by Colonel Lewis, the commandant of the regiment.

Colonel Lindsay, M.P., proposed "The Health of the Coldstream and Fusilier Guards," coupling with the toast the name of Lord Rokeby, the commander of the brigade of Foot Guards in the Crimea.

Lord Rokeby, in responding, eulogised the firmness and constancy with which the brigade endured all the privations of a terrible Crimean winter, as well as the gallantry which it had uniformly evinced in action. The corps was now in an admirable condition, and animated by the highest spirit. The noble lord concluded by giving "The Health of Colonel Lindsay," whose unceasing exertions to promote the interests of both officers and men could not, he said, be overestimated.

Colonel Lindsay, in acknowledging the compliment, said that while endeavouring, in his peculiar position, in conjunction with General Drummond, to uphold the interests of the brigade when seriously threatened, he had never been unmindful of the just claims of the rest of the Service. Passing to the exploits of their regiment in the field, he could not forget that on that day 45 years ago was fought the battle of Quatre Bras. On that occasion their third battalion had halted on a march of 27 miles towards the scene of action, and was quietly cooking its dinner when it heard guns firing in the distance. It immediately suspended its culinary operations and advanced to the wood of Boissu, out of which it drove the French, and held the wood in spite of all the enemy's efforts during the remainder of the day. At that memorable event there were present with the regiment two distinguished officers whose healths he would now ask them to drink—viz., Lord Grantley and Mr. Robert Bruce, of Kenneth.

Lord Grantley, in responding, remarked that although there were very few of his old comrades now left, he was sure they would all be ready to buckle on their swords again in defence of their Queen and country.

Colonel Lewis gave the next toast, "The only three surviving Colonels who had commanded the Grenadier Guards—viz., General Stanhope, General Wood, and General Ridley."

General Stanhope said that he and his two comrades accounted it a high honour to have commanded that regiment, but unfortunately they had all been pitchforked out of it. He had himself been connected with the corps for 39 years, and during the whole of that time the conduct of no individual officer or man had ever given him any serious uneasiness.

General Wood, although he had been consigned to the dusty shelf, amid ploughs, shepherds' crooks, and everything that was the scorn of a professional soldier, could still look upon that assemblage with gratification and without envy. Whatever changes in the Service might ensue—and he believed great changes were impending—he trusted that nothing would occur that could alienate the *élite* of the British Army and nation from the Grenadier Guards. For himself, he saw no escape from the dreary shelf to which he had referred; but he must endeavour to make himself as comfortable there as he could, looking, perhaps, to have his solitude enlivened, or at least mitigated, by the companionship of some old comrade who might find himself in the same situation.

General Ridley confessed himself deficient in the philosophic resignation just expressed by his gallant friend. However invidious it might seem to say as much in the presence of the excellent officer now in command of the regiment, he must own that he greatly coveted his position.

The acting Grenadier officers having next pledged their retired brethren in a bumper,

Colonel Lindsay said, the company ought not to separate without drinking another toast, which had special claims on their attention. The example he was about to follow was set by a very high authority, the late General Sir C. Napier. The best of officers at times made mistakes in action, and then they looked—and generally not in vain—to the bravery and self-reliance of their men to extricate them from their difficulty. He had much pleasure in proposing "The Non-commissioned Officers and Privates of the regiment."

The distinguished party then broke up.

SERVICES OF THE GRENADIER GUARDS.

The following *précis* of the services of the Grenadier Guards has been made by a distinguished officer of the regiment, and will serve to illustrate several allusions in the speeches of the evening:—

This regiment originates from the King's two Royal Regiments of Guards raised by Charles II.—one, while an exile in foreign countries—the other, shortly after the Restoration. The regiment raised by the exiled monarch while abroad in Flanders was composed entirely of a gallant and faithful band of English Royalists, who flocked round his standard when he raised it early in 1656, with the intention of endeavouring to recover his kingdom. He gave the command of it to Lord Wentworth. It was present with the Spanish army throughout the campaign of 1657 against the French, under Turenne; and in 1658, on the 14th of June, distinguished itself greatly at the "battle of the Downs," in which it lost several officers and many men—thus early giving evidence of the same unflinching gallantry and steadiness by which the regiment has ever since been characterised; for although the Spanish army with which it served was completely overthrown and driven from the field, the gallant Royalists of Wentworth's regiment refused to retire or quit the post which had been entrusted to them by their future sovereign, James, Duke of York, declining any terms, when surrounded by the victorious French army, and only surrendering upon conditions dictated by themselves. The remains of this regiment continued in various towns in Flanders until after the Restoration, shortly after which they were sent to Dunkirk, and Lord Wentworth, on the 26th of August, 1660, received a second commission from the King as their colonel. In June, 1661, the 12 companies of which it was composed were increased to 100 men each, making a regiment of 1200 men, and they continued doing garrison duty in Dunkirk with three other infantry regiments (part of the old army of the Commonwealth) until the autumn of 1662, when Charles II., upon the occasion of the sale of Dunkirk, brought his "Royal Regiment of Guards" to England and disbanded the rest of the garrison.

While Charles II. was quietly disbanding, under an Act of Parliament, the 35,000 men whom he found in arms on his return to England, he issued, on the 23rd of November, 1660, to Colonel John Russell, brother to the Duke of Bedford, a commission to raise another regiment of Royalists, to consist of 12 companies of 100 men each, which he called his own "Royal Regiment of Guards." This regiment clustered and combined round the King the many Royalist officers in England who had received commissions from Charles I. to raise regiments of cavalry and infantry during the civil wars. These old tried cavaliers were chiefly selected by Charles II. himself as the captains of the several companies of his newly-raised regiment of Guards. On the breaking out of the quickly suppressed insurrection known as that of the "Fifth Monarchy men," which led to a cessation in disbanding the old army of the Commonwealth, and enabled the King to embody Monk's regiment of Coldstreams as his Guards, the "King's Regiment"—Lord Wentworth's—naturally became the "First;" for, in accordance with the strict letter of the Act passed in September of the previous year the Coldstreams were formally disbanded on the 14th of Feb., 1661, as a regiment forming part of the old army of the Commonwealth; and in token of their disembodiment they all laid down their arms before the commissioners appointed, and took them up again as the Lord General's (Monk's) Regiment of Guards. The King's Royal Regiment of Guards, under Lord Wentworth, at Dunkirk, dates its re-establishment from the 26th August, 1660; the King's Royal Regiment of Guards, under Colonel Russell, was formed 23rd November, 1860—which dates are the earliest of the formation of any regiment of infantry in the British Army; and they are the dates of the formation of the present Grenadier Guards. At the breaking out of the Dutch war early in 1665, the King's Regiment of Guards, under Colonel Russell, was about to be increased, but Lord Wentworth dying at the same period (Feb. 28, 1665), Charles II. deemed it advisable to incorporate Lord Wentworth's Royal Regiment of Guards with the King's Regiment of Guards under Colonel Russell, thereby constituting one corps of the two regiments, with 24 companies of 100 men each. In 1678 four Grenadier companies were added to the regiment, and four light infantry companies in 1793.

Such is the history of the formation and original constitution of the regiment. It obtained its present title of "Grenadier Guards," as well as other important privileges it possesses, in the year 1815, by the following authority:—

"War Office, 29th July, 1815.

"The Prince Regent, as a mark of his royal approbation of the distinguished gallantry of the brigade of Foot Guards in the victory of Waterloo, has been pleased, in the name and on the behalf of His Majesty, to approve of all the ensigns in the three regiments of Foot Guards having the rank of lieutenants, and that such rank shall be attached to all the future appointments to ensigncies in the Foot Guards in the same manner as the lieutenants in these regiments obtain the rank of captain.

"His Royal Highness has also been pleased to approve of the 1st Regiment of Foot Guards being made a regiment of Grenadiers, and styled the 'First, or Grenadier, Regiment of Foot Guards,' in commemoration of their having defeated the Grenadiers of the French Imperial Guard on this memorable occasion."

Nor were these honours lightly won by what might have been the incidental rush and impulse of a single battle in one short campaign, for in the Duke of Wellington's dispatches (4th March, 1811) His Grace specially exempts the brigade of Guards, of which the 1st Regiment formed a distinguished portion, from attendance at certain military punishments, because, during the two years it had been under his command, "not only no soldier had been brought to trial, but not one had been confined in a police guard;" and at Barossa (24th March, 1811) he authenticates Lieutenant-General Graham's mention of the Guards "gloriously maintaining the high character of the Household troops," and concludes his famous Waterloo dispatch by declaring this brigade to "have set an example that was followed by all."

The valour and the endurance of the Grenadier Guards in the Crimean campaign are fresh in the remembrance of all—known to all the steady forward march and the onward rush that cleared the heights of Alma and swept the Russians staggering from their guns—known the desperate fight in the darkness, mist, and rain of the gloomy morning at Inkerman—known the "frequent graves on the plateau" of the camp—the long suffering, the sickness, the starvation of that fatal Christmas. The undaunted bravery of the Grenadier Guards is a matter of history—it is, as Sir John Hope has said, "a bravery that knows not how to yield; that no circumstances can appal, and that must always and inevitably ensure victory when victory is to be obtained by the exertion of any human means."

Historical Memoranda of the Regiment.

Dutch War.—1665.—Part of the regiment (300 men) was on board the fleet during the war, and was present in the engagements of the 3rd of June and 3rd of August, 1665. Another draft embarked for an expedition to Guinea.

1666.—Were present in the naval engagements of the 1st, 2nd, 3rd, and 4th of June, and 25th and 27th July in this year.

1671.—Some companies of the regiment, under Major Rolleston, were quartered at Rochester to defend that part of the country in case of attack by the enemy's fleet against Sheerness and Chatham. In May, 1672, several detachments of the regiment were also embarked on the fleet, and were in the engagement of the 28th of May, 1672. Five companies were on board.

1672.—Two more companies were sent to France, forming part of a "royal regiment" which Charles lent to Louis XIV., to serve in the French army in the wars against the Emperor. They remained in the French king's service from 1672 to the 8th of April, 1674. Drafts from each company were embarked on board the fleet during the war.

1676.—Two companies of the regiment were sent out to Virginia to put down an insurrection. They formed part of a regiment of 1000 men, under Captain Jefferies, of the 1st Regiment of Guards. Captain Jefferies died there, and the object of the expedition having been attained, these troops returned to England in March, 1678.

1678.—Owing to the introduction of grenadier companies into the Army, the 1st Guards were increased by four companies to 28 companies in January, 1678. A detachment on board the Rupert and Centurion. The Rupert had an action with the Turks on the 20th March, 1678.

1679.—Twelve companies sent over to Flanders. This battalion was commanded by Major Clarke. They were quartered at Brussels in August, 1678, and were there at the time the battle of St. Denis was fought. These twelve companies returned home in March, 1679, and the several companies of the regiment were quartered in London, Windsor, the Tower, Landguard, and Tilbury Fort.

1680.—A detachment of 250 men of the regiment embarked for Tangier, and arrived most opportunely, with others, to the relief of the town. Several engagements took place against the Moors, which were always crowned with success; but owing to the expenses attending the keeping up of the garrison, the town was abandoned in 1684, and the Guards returned to England on the 12th of April of that year.

1685.—On the occasion of the Duke of Monmouth's invasion of England two battalions of six companies each of the 1st Guards were sent to the west of England, and were present at the battle of Sedgemoor, in which they lost several killed, and between 50 and 60 wounded.

1689.—The revolution took place in December, 1688; and early in the following year, in consequence of the assistance given by France to the late King James the Second, King William declared war against France, amongst other troops two battalions of the 1st Foot Guards were, in March 1689, ordered over to Flanders; but only a small detachment of them proceeded. The English troops were commanded by the Earl of Marlborough, and were assembled on the Sambre. They were present throughout the campaign.

1691.—A battalion of eight companies (the 2nd battalion) sailed for Flanders in January, 1691.

1692-3.—A second battalion of the same regiment was sent over to Flanders in 1692. The confederate armies amounted at first to between 50,000 and 60,000 men. No general action took place during the first year's campaign. The regiment was present at the battle of Steinkirk on the 3rd of August, 1692. Also at the battle of Landen in 1693; and served throughout the campaigns against the French in Flanders up to the peace of Ryswick in 1697. It was present at the siege of Namur and its capture. The allies lost during the siege 12,000 men.

1696.—In consequence of an expected invasion and insurrection in 1696 the two battalions of the 1st Guards in Flanders were sent early in 1696 to England. One of them remained in England, the other returned to Flanders in April till the end of the war, arriving in England in November, 1697.

Digitized by Google

1701.—During all the campaigns of Marlborough's wars in Flanders and Germany, the 1st Guards bore a part.

SPAIN.—1702.—A detachment of the regiment was sent to Spain: was present and took part in the capture and burning of Spanish galleons in Vigo Bay in 1702, and another detachment reinforced the garrison of Gibraltar in 1704. On their arrival the French and Spaniards were forced to raise the siege, and Gibraltar has ever since remained a British possession. They were at the sieges and capture of Barcelona and Valencia, and the battle of Almanza.

1702-3.—In the Low Countries the regiment was present at the sieges of Venloo, Ruremonde, Stevenswaert, Liege, Huy, Bonn, and Limburg.

1704.—They took a distinguished part in the attack of the heights of Schellenberg on the 2nd July, and were the only regiment of Guards present at the celebrated battle of Blenheim, also at the sieges of Ulm and Landau.

1705.—They forced the French lines.

1706.—They were at the battle of Ramilies, and the sieges of Ostend, Menin, Dendermonde, and Ath.

1708.—They were at the battle of Oudenarde, and the sieges of Lille, Tournay, and Ath. In this year another battalion of the regiment was sent over to Holland.

1709.—The regiment was at the battle of Malplaquet.

1710.—At the sieges of Mons, Douai, Bethune, St. Venant, and Aire.

1711.—At the siege of Bouchain.

1712.—At the siege of Quesnoy and occupation of Dunkirk. Returned from Flanders 26th March, 1713.

There were no foreign wars in which the 1st Guards bore a part during the latter part of Queen Anne's reign, nor during the whole reign of George I.; but on every occasion of an attempt of the Pretender or his adherents to overthrow the present dynasty, the Guards were held in readiness to march to the threatened points of attack.

1713.—A detachment was sent in December to Rochester, to aid in quelling the mutinous conduct of some marines.

1714.—The whole 28 companies of the regiment were, for the first time, all quartered in London.

1719.—A battalion of 7 companies, under Lieut.-Colonel Guise, joined the expedition of Lord Cobham to Vigo. They sailed in September, reached Vigo, and returned to England in November of the same year.

1727.—A battalion of 10 companies of the regiment embarked for and reached Gibraltar in April, 1727. This battalion returned to London in May, 1728.

1739.—In December six regiments of marines were to be raised, and 120 corporals and privates were ordered to be drafted from the Guards to be made sergeants in them.

1743.—In May a detachment was ordered to Barnet to suppress a mutiny of some Highlanders ordered on foreign service. The war of the Austrian succession, which lasted from 1742 to 1748, enabled the Guards, by seeing more active service, to add fresh laurels to their colours.

1742.—The 1st battalion of the 1st Guards sailed for Holland in May.

1743—On the 16th June it was present at the battle of Dettingen.

1745.—On 30th April the Guards, under the Duke of Cumberland, were present, and nobly sustained their valour, at the battle of Fontenoy, breaking through the enemy's centre, and driving Louis XV. from the position he had taken up; but owing to the failure of the Austrians and Dutch, the allied army eventually retired, protected by the Household Brigade. Shortly after the battle of Fontenoy the Guards were brought back to England owing to the attempt of the Pretender.

1745.—The 1st battalion of the 1st Guards disembarked in the river, 23rd September, and shortly after marched to Lichfield to repel the invader, who had marched as far as Derby. The Pretender retreated, and the Guards returned to London on the 26th December. A detachment of volunteers from the Guards pursued the Pretender as far as Carlisle.

1746.—On 10th September the 3rd battalion of the 1st Guards embarked on a secret expedition, sailed on the 10th October for the Bay of Biscay, and returned to Plymouth on the 19th of October.

1747.—On the 29th January the 2nd battalion of the 1st Guards embarked at Gravesend for Wilhelmstadt and took part in the campaign this year. It was present at the battle of Val.

1748.—The treaty of Aix-la-Chapelle concluded the war, and the 2nd battalion returned to England in December.

THE SEVEN YEARS' WAR.—War again broke out between France and England in 1756, in consequence of the French having overrun the Electorate of Hanover and other causes.

1758.—Two squadrons were fitted out, and 16 battalions joined the expedition to make a descent on the coast of France. The 1st battalion of the 1st Guards embarked. The expedition landed, first, in the Bay of Cancalle; then, re-embarking, landed near and took Cherbourg; again re-embarking, they landed in the Bay of St. Cas. After marching a short distance in the interior, it was determined to re-embark. The embarkation was covered by the Grenadiers of the Guards and half battalion of the 1st Regiment of Guards—about 1500 men. The Coldstreams and the rest of the Army had embarked; but the covering party suffered great losses, having fired away all their ammunition.

1760.—The Guards also took part in the campaigns of 1760, '61, and '62, under the Marquis of Granby. The 2nd battalion of the 1st Guards embarked for Germany in July. The 3rd battalion of the regiment proceeded to Portsmouth and embarked on the 25th October, forming part of an expedition intended against the coasts of France. In December the expedition was countermanded, and the 3rd battalion returned to London. The 2nd battalion took part in the battles of Zierenberg and Campden.

1761.—In the battle of Kirchdekern.

1762.—In the battle of Gravenstein, and in the actions on the Fulda and at Amonebourg. The seven years' war was concluded this year, and the 2nd battalion of the 1st Guards returned to England. Peace with foreign countries continued now for several years, but the Guards were frequently employed in putting down disturbances at home.

AMERICAN WAR.—In 1775 the American war broke out, and in March, 1776, a provisional battalion of 1000 men from the three regiments of Guards was sent across the Atlantic. This battalion took its share in all the campaigns which followed, including the assault and capture of Fort Washington in 1776; the battles of Brandywine and Germanstown in 1777; the battle of Freehold Courthouse, and the action at Fairfield in 1778, and the sacking of Norwalk and Greenfield in 1779. In March, 1779, further detachments from the three regiments of Guards proceeded to North America, and additional detachments proceeded again in January, 1781.

1780.—In the meantime the Guards took a conspicuous part in the action at Young's House. They were present at the crossing of the Catawba, and they took part in the battle of Guildford Courthouse, under Lord Cornwallis. The accounts of the period describe the Guards as having on every occasion distinguished themselves when before the enemy. The war generally, however, was not successful, and it terminated in October, 1781, by Lord Cornwallis being obliged to surrender himself and his army. The detachments of the three regiments of Guards returned to England in 1783-84.

1783.—A peace of 10 years succeeded, during which the Guards were on more than one occasion called upon to put down civil commotions.

WARS OF THE FRENCH REVOLUTION.—The French Revolution broke out in 1789; but it was not till after the French had beheaded their king that England engaged in any continental war. In February, 1793, the French invaded the Netherlands, and an English army, under the Duke of York, proceeded abroad to join the Austrians and Prussians. The 1st battalion of all three regiments, and a fourth battalion, made up of the grenadiers of the three regiments, embarked on the 25th February, under Major-General Lake, and joined the allies, near Tournay, on the 25th of April. The 1st battalion of the 1st Guards, and the rest of the brigade, took part in the affair in the wood at St. Amand, at the attack on the camp at Famars, and at the siege and capture of Valenciennes. On the 18th of August, the 1st battalion of the 1st Guards deployed and led the attack upon the enemy's position at Lincelles, supported by the other battalions of the brigade. No other troops took part in this attack, and the Guards were allowed to inscribe the name of "Lincelles" on their colours.

1794.—In the following year large drafts were sent out (766 men for the brigade) to join the service battalions; and the light companies of the 2nd battalions were also dispatched in July to Flanders. The 1st Guards were present in this campaign at the capture of Vaux and in the actions at Roubaix and Rhenen—at the first-mentioned battle the allies were above 170,000 strong. The Guards greatly distinguished themselves on the 26th of April, in the action near Troixville, where the enemy, 30,000 strong, were completely defeated with great slaughter. Notwithstanding these successes, the British army, during the winter of 1794-5, retreated to Bremen, and suffered much from the inclemency of the weather. During the retreat all attacks of the enemy were defeated.

1795.—The army finally embarked at the mouths of the Elbe and Weser, and the Guards returned to England.

1799.—The third battalion of the 1st Guards and the grenadier battalion of the brigade embarked in August for Holland, forming part of an expedition under Sir Ralph Abercromby. They were present in the actions at the disembarkation at Helder Point and St. Martin, and at the battles of Bergen and Alkmaar. The army returned to England in October of the same year.

1806.—The 1st and 3rd battalions of the 1st Guards formed part this year of the expedition to Sicily.

1807.—A brigade of Guards accompanied the expedition under Lord Cathcart to Denmark.

PENINSULAR WAR.—In 1808 a battalion of the 1st Guards joined Sir John Moore in Spain, upon the breaking out of the Peninsular war; and in January, 1809, was present at the battle of Corunna.

1809.—An expedition, of which the 1st Guards formed a part, was sent to the island of Walcheren.

1810.—The 3rd battalion of the 1st Guards was at Cadiz, under Lieutenant-General Gillham.

1811.—The 3rd battalion highly distinguished itself at the battle of Barossa, and was present at the affair at the bridge of Seville.

1812.—The 1st and 2nd battalions were present throughout the campaign of 1812.

1813.—Took part in the several actions in the Pyrenees, in the storming and capture of St. Sebastian, in the attack on the heights of San Marcial, at the passage of the Bidassoa, in the battles of Nive and the Nivelle, and in 1814 at the passage of the Adour and investment of Bayonne.

1814.—In this year the 2nd battalion of the 1st Guards was present at the attack on Bergen op-Zoom.

1815.—The 2nd and 3rd battalions proceeded to the Low Countries, and took part in the battle of Waterloo. They were subsequently present at the taking of Peronne and at the occupation of Paris, forming part of the army of occupation till 1818.

1826.—A long peace succeeded the wars of the French Revolution, but in 1826 the 1st battalion Grenadier Guards formed part of an expedition to Portugal, returning in 1828.

1838.—The 2nd battalion was sent on an expedition to Canada, where it remained 4½ years, returning in 1842.

1854.—A brigade of Guards was the first to leave England on the breaking out of the war against the Russians. The 3rd battalion Grenadier Guards formed part of that brigade. After being quartered at Malta, and encamped at Scutari and in the plains of Varna, with the rest of the army, it landed in the Crimea, Sept. 14, 1854, and took part in the whole campaigns of 1854-55-56, sharing in the duties of the siege of Sebastopol, and being actively engaged in the battles of the Alma, Inkerman, and Balaklava. The 3rd battalion returned to England in June, 1856.

SCOTS FUSILIER GUARDS.

On Tuesday evening at Willis's Rooms a festival was held to commemorate the 200th anniversary of the Scots Fusilier Guards, who were constituted a regiment in 1660, at the epoch of the restoration of Charles II. The dinner was held in the grand ball-room, which was appropriately decorated for the occasion. His Royal Highness the Duke of Cambridge, the Colonel of the regiment, presided. Viscount Combermere, Lord Rokeby, Sir Richard Airey, General Knollys, Sir J. Yorke Scarlett, General Sir Charles Yorke, Colonel Parker, Colonel Lewis, Colonel Lord F. Paulet, Mr. F. Cox, Mr. H Cox, Mr. C. Hammersley, Sir John Kirkland, Mr. Ouvry, Mr J. E. A. Dolby, the Earl of Mountcharles, Mr. Greville, and Lord Earlsfort, the last three the officers of the day forming the Queen's Guard, were invited to be present, and attended on the occasion.

The officers of the regiment present were—Colonel Ridley (commanding the corps), Colonel Francis Seymour, C.B., Colonel de Bathe, Colonel Dalrymple, Lieut.-Colonel Wilkinson, Lieut.-Colonel Hepburn, Lieut.-Colonel White, Lieut.-Colonel Fletcher, Lieut.-Colonel Hon. W. Scarlett, Lieut.-Colonel Gipps, Lieut.-Colonel Neville, Lieut.-Colonel Tottenham, Lieut.-Colonel Hon. R. Charteris, Lieut.-Colonel Farquharson, Lieut.-Colonel Campbell, Lieut.-Colonel Hon. R. Mostyn, Captain Stracey, Captain Shelley, Captain Hon. C. R. Hay, Captain Beaumont, Captain Knox, Captain Cooper, Captain Peel, Captain Erskine, Captain Sharp, Captain Elphinstone, Captain Hon. L. Massey, Captain Rous, Captain Gordon, Captain Hon. W. R. Trefusis, Captain Ford, Captain White, Captain Bowden, Captain Stephenson, Captain Rooke, Lieutenant the Marquis of Tullibardine, Lieutenant Sir Robert Cunliffe, Lieutenant Hon. H. Fraser, Lieutenant C. J. Shore, Lieutenant Speirs, Lieutenant Garden Campbell, Lieutenant Harford, Lieutenant Barnes, Lieutenant Dalzell, Lieutenant the Earl of Dunmore, Lieutenant Smith, Dr. Robinson, Dr. Bostock, Rev. L. W. Browne, Mr. Allen, Mr. Smith, Mr. Perry, Mr. Elkington.

The following ex-officers of the regiment were also present:—General Sir J. Aitchison, General Sir Edward Bowater, Sir Seymour Blane, Sir Charles Hamilton, Lieut.-Colonel Astley, Hon. W. F. Byng, Lieut.-Colonel Bathurst, Major W. G. Bulwer, General Colville, Captain Colville, Captain Glegg, Lieut.-Colonel Holder, Colonel the Hon. A. N. Hood, Colonel Hawkins, Mr. W. H. Judd, Colonel Kingscote, C.B., Lieut.-General Knollys, Colonel Brownlow Knox, M.P., Captain Cumberland, Colonel Fitzroy Campbell, Captain E. Clayton, Captain Damer, General Dixon, Captain the Hon. H. Duncan, Colonel Des Vœux, Lieut.-General Fitzgerald, Captain Fortescue, Lieut.-Colonel the Hon. A. Fraser, Major Greville, Major Gage, Lieut.-Colonel F. Seymour, Lieut.-Colonel the Hon. Strange Jocelyn, the Earl of Listowel, Lieut.-General Sir G. B. L'Estrange, Lieut.-Colonel Gundy, Lieut.-Colonel Lloyd Lindsay, Lieut.-Colonel Westenra, Colonel the Hon. A. Liddell, Lieut.-Colonel F. Lushington, Honourable E. Lyttelton, Lieut.-Colonel Lord James Murray, Lieutenant-Colonel Moorsom, Lieut.-Col. Meyrick, Sir Beresford M'Mahon, Lieut.-Colonel Mure, Mr. G. Onslow, Colonel the Hon. Sir Charles Phipps, Captain F. H. Powell, Lieut.-Colonel Paget, Lieutenant W. Peel, Mr. Hastings Russell, Hon. R. Rowley, Lieut.-Colonel Romilly, Lord Rokeby, Lieut.-Colonel Stracey, Viscount Strathallan, Mr. T. Richardson, Major Shuckburgh, Colonel the Hon. S. Scott, Captain Shaw Stewart, Major-General Seymour, Mr. J. G. T. Sinclair, Colonel Tyrwhitt, Lieut.-Colonel Wheatley, General Walker, C.B., Colonel Fordyce Buchan, &c.

On the removal of the cloth,

The Duke of Cambridge rose and said,—Gentlemen, the first toast I have to give you is one which is always responded to with cordiality in every society of Englishmen, and I am quite certain it will be received in the most loyal manner by this assembly. I have to propose to you "the Health of Her Majesty the Queen."

The toast was drunk amid enthusiastic cheers.

The Duke of Cambridge.—Gentlemen, I now offer to you "the Health of His Royal Highness the Prince Consort, the Prince of Wales, and the rest of the Royal Family." I would only remind you that the Scots Fusilier Guards have been honoured by having the Prince Consort for their Colonel, that illustrious Prince having been my predecessor. The Prince of Wales I am happy to say is a member of our profession, having entered the Army about a year ago.

The toast was drunk amid loud cheers.

The Duke of Cambridge.—Gentlemen, I have now to give you "the Army and Navy," and I need hardly remind you that the Guards are an integral portion of the British Army. It is, therefore, our first duty to do honour to the Army, but, as good soldiers, we must also feel an interest in the sister Service. Anything that will advance the prosperity of the Army and Navy must be hailed with satisfaction by us Guardsmen. We are now honoured by the presence of one of the most distinguished officers of the British Army, whether we consider his length of service, or the great achievements with which his name is associated. I believe there is not an officer who has been present at more general actions than my gallant friend Lord Combermere, and if we, who are still active members of the profession, want a bright example, we have only to look to him, feeling sure that if we follow in his footsteps our career will be both honourable to ourselves and useful to our country. Gentlemen, I trust that the Army and Navy are in as efficient a state as it is possible to attain. We live in times when it is most essential that those Services should be fully adequate to the discharge of any duties which the country may require them to undertake; and, unless they are kept up in time of peace, when the moment of trial comes we shall find ourselves at a serious disadvantage. If any emergency should find us unprepared—and I trust it never may—it would be the greatest misfortune to the world, and the greatest discredit to this country. I believe, however, that the stout hearts and noble feeling of the British people are now equal to what they ever have been, and I am persuaded that all classes, military or civil, anxiously desire the prosperity of the Army and Navy. Gentlemen, I give you "the health of the Army and Navy," coupling with the toast the name of Field-Marshal Lord Combermere.

Lord Combermere.—I beg to return my most sincere thanks to His Royal Highness the Commander-in-Chief for the flattering manner in which he has proposed this toast, and to you for the cordiality with which you have responded to it. I have to congratulate the Army and the country upon having at the head of the Service the Illustrious Duke, who has distinguished himself by his coolness and bravery in the field, by his great exertions and ability in the conduct of the division under his command, both before and during the siege of Sebastopol, as also by his devotion in his present high position to the welfare of the Service over which he presides. The Illustrious Duke is heart and soul a soldier. He is acquainted with every department and every rank in the Service, he enjoys the confidence of his Sovereign, and the affection and esteem not only of every officer and soldier

Digitized by Google

in the British Army, but of every loyal and good subject of Her Majesty. Gentlemen, I propose to you "the Health of the Illustrious Duke," and long may he continue to be the head of the Army, both for his own honour and the benefit of the nation.

The toast was drunk amid enthusiastic cheering.

The Duke of Cambridge.—Gentlemen, if anything could be more agreeable to me than another in the mode in which the last toast has been given it is the fact that it has emanated from so distinguished a general as my excellent and gallant friend; and although he has been good enough to speak of me in terms of praise far beyond my deserts, still, as a soldier, and more especially considering my responsible and very arduous position at the head of the Army, I feel deeply sensible of his kindness. The labours of that position are much lightened by the co-operation and support I have invariably received in my endeavours to improve the condition of all ranks and every branch of the Service. I may possibly have occasion sometimes to find fault, but I can truly say that, while the occasions for blame are the exception, those in which I am called upon to bestow praise are the rule. My only desire is to see the Army efficient, and if a kind feeling exists towards me on the part of the Service I can only say that I cordially reciprocate it; for I don't deny that it is to me the greatest pleasure and satisfaction to be of use to that Service to which I am devoted, and for which I would sacrifice everything I possess in the world. Gentlemen, the next toast which I have upon my list is, no doubt, one which you are all anticipating. You are aware that this is the 200th anniversary of the formation of the Scots Fusilier Guards, and it is to commemorate this event that the officers now serving in the regiment have to-night met those who have left it and probably returned to the position of civilians, in order to cement the bonds of that good feeling and affection which such an occasion should inspire. It is an interesting fact of itself that this regiment should have existed uninterruptedly for two centuries; but I attribute much more meaning than that to this assemblage, for I believe that its object is to show that the *esprit de corps* of the Scots Fusilier Guards is such as to render it desirable that we should mark occasions like this by handing down the good name of this regiment to posterity as our forefathers have handed it down to us. After all, gentlemen, what is it that makes an army efficient, whether it be for peace or war? It is a sentiment of honour—a regard for the cloth which we wear—a respect for the corps with which we are associated; and it is that feeling which enables each particular regiment and division of the Service to perform great achievements, to triumph over great difficulties, and to raise itself in the estimation of the country and of the world. Such, I firmly believe, is the spirit that animates the whole British Army, and, whether it be the regiments comprising the brigade of Guards, or any other portion of the Service, all have but one feeling—a desire to sustain their own reputation and to uphold the renown of the nation to which they belong. Let me turn for a moment to the annals of this and the other regiments constituting the brigade of Guards. This regiment, which was raised in times of public difficulty, was formed out of the corps known as the Scotch Guards, but it received its present organisation in the year 1660. From that time forward until now this and the other two regiments of Foot Guards have been employed upon every service in which any other part of Her Majesty's Army has been engaged; and it is one of the proud distinctions of the brigade that upon all occasions in which the Army has been sent into the field, a portion of the brigade has gone with it. Although you live in a great metropolis, where you may, perhaps, be supposed to perform easier duties than some of your comrades, the moment when called upon for action your brigade has always shone conspicuous for heroism and endurance. The privilege of being sent on active service is one of which this brigade may be justly proud, and which I am sure you will always know how to appreciate. It is unnecessary for me to go through the details of the great services of your regiment, whether under a Marlborough or a Wellington. The corps, however, had the honour and advantage of being in the Peninsula as long, if not longer, than any other part of the Army, and therefore I need not say it bore its part in all the great actions of those memorable campaigns. At Waterloo the prowess of the brigade of Guards was again pre-eminent. Then came a period of prolonged peace; and although it might have been thought that we should have been little prepared for the great events which suddenly burst upon Europe, I am happy to say that, in spite of its long inaction, our Army upheld its ancient fame in the arduous and trying campaigns in the Crimea, where the brigade of Guards not only shared every hardship, but were foremost in the fight. I can congratulate you and the two other regiments of the brigade on what I saw with my own eyes on that occasion; and let me add, that if I admired the brigade of Guards before I was associated with them in that campaign, I then learnt to admire them in a tenfold measure. I do not forget that I owe much of my present position to the conduct of the brigade of Guards, and I am happy to have this opportunity to assure you that I fully appreciate the distinction conferred upon me, and shall ever feel the greatest pride at having had the brigade under my immediate command. It is one of the greatest compliments that can be paid to a soldier to have the colonelcy of so distinguished a corps entrusted to him; and I can only hope that the sentiments which animate me towards this splendid regiment are equally entertained by them towards myself. I shall not now detain you longer, but will only assure you that I regard as a happy idea the sentiment which led to our assembling on this interesting occasion. I rejoice to see these meetings kept up, and I believe that they tend largely to the maintenance of that good feeling which exists, not only among the different corps of the Army, but likewise among the people out of doors. For remember that in this assembly a large proportion of those I am addressing have ceased to belong to the regiment. Yet you have met together this evening, and why? Because you still retain the deep feeling of attachment to your own regiment which you have carried with you into civil life. In a country like ours such feelings are most valuable; the more they are fostered the better for the interest of the Army, and, in my humble opinion, for the community at large. I must not forget that we have here my excellent second in command, Colonel Ridley. Having had experience of his qualification as an officer and a gentleman, a friend and a companion, I am delighted to have him as my lieutenant in command of this regiment. The manner in which you have received his name, confirms me in the opinion that he is a very popular commanding officer. I confess I am one of those who think it advantageous that a man should get on well with his neighbour, though some persons entertain a different opinion, my own only desire is that, as he has a fine regiment, while retaining his popularity he should also preserve its efficiency. I believe the regiment is very efficient now, and if he has the talent of combining the perfect discipline of the corps with the good opinion of its members, I shall be glad at his continuing to occupy the post which he now so ably fills. Gentlemen, I give you the toast of the evening—"Health and prosperity to the Scots Fusilier Guards," and I couple with it the name of Colonel Ridley.

Colonel Ridley briefly returned thanks in his own name and on behalf of his regiment.

Sir J. Y. Scarlett then proposed, "the Health of the Household Brigade of Cavalry," coupling with it the name of Lord Combermere.

Lord Combermere acknowledged the toast, passing a high eulogium upon the services of the Scots Fusilier Guards in the campaigns of 1793 and 1794.

Sir Edward Bowater proposed "the Brigade of Foot Guards," which was responded to by Lord Rokeby.

The "Health of the Guests" was then given by General Knollys, and acknowledged by General Airey, after which His Royal Highness left the chair and the company dispersed.

SERVICES OF THE SCOTS FUSILIER GUARDS.

The Scots Fusilier Guards owes its origin to a regiment raised in Scotland by General Monk, which formed a portion of the army of the Restoration, and, with the Coldstreams, was incorporated as Royal Guards in 1660 or early in 1661; a commission having been issued for that purpose to its first colonel, George, Earl of Linlithgow, nephew of that stout old loyalist, the Earl of Callander, who had commanded the forces raised in Scotland with the intent of rescuing King Charles from the hands of the Parliamentary army under Oliver Cromwell. The Earl of Linlithgow, who had suffered greatly in following the fortunes of Charles II., received as a reward the command of the Horse Guards and also of this Scots Regiment of Guards, and held them both jointly until 1681, when he, somewhat anomalously, as would be thought at present, resigned them for the appointment of Justice-General of Scotland. For a long period, and until placed in the English establishment in 1681 as the "Third Guards," the regiment was known under the title of "The Scots Guards," and with that designation it has never failed worthily to support the ancient heroic character and soldierly valour of Scotland. With the other regiments of Guards they shared the long continuous glories of the wars under Marlborough from 1689 to 1696, returning home only in consequence of a threatened invasion of this country by France. In 1709 they fought at Almenara and Saragossa, in the war of the Spanish succession, and throughout the whole of the century won laurels on every field—at Dettingen, even at Fontenoy, and finally at Lincelles in 1793, serving intermediately against the French in America from 1778 to 1782. They were present and assisted in the daring landing at Alexandria in 1800, and mainly contributed to the success of the fierce engagement in which Abercromby fell. Hastening from the East to the remote North, they were present at Copenhagen in 1807, and in December, 1808, they embarked with Sir John Cradock's expedition to take up the fight after Sir John Moore's retreat, and bore their standards triumphantly across the Peninsula. They partook of the glories of the passage of the Douro, and the capture of Oporto, of Talavera, where their too eager advance almost endangered the fortunes of the day; of Fuentes d'Onor, of Ciudad Rodrigo, of Salamanca, of Vittoria, of the Bidassoa, of St. Jean de Luz, and of the Nive; and even of the last and lamentable battle before Bayonne. One portion of them also, in 1811, winning extra laurels at Barossa, and another, in 1813, at the storming of Bergen-op-Zoom, and the siege of Antwerp. Of their conduct at Waterloo we have the testimony of an eye-witness, General Sir Digby Mackworth, who, in a letter written on the same night by the bedside of Lord Hill, describes the never-to-be-forgotten repulse of the French Imperial Guards, in which they took part. In 1854 the Scots Fusiliers were called upon to take part in the Russian war. Throughout the severe duty of this campaign the Scots Fusiliers distinguished themselves by a steady and disciplined endurance, equalled only by their ardent zeal and valour. They suffered without murmuring, as they fought without flinching, and returned home after the capture of Sebastopol to be respected as well as honoured by their countrymen. The title of Fusiliers, as applied to this regiment, is of late origin, having been conferred upon them by His Majesty King William IV. in 1831, and may be considered appropriate, as in the Prussian and other foreign armies a Fusilier is regarded as a light infantry soldier; each third battalion of a regiment, which in these armies consists of three battalions, is a light infantry battalion, in which relation the Scots Fusiliers, as the 3rd Regiment of Guards, may be considered as standing in relation to the whole brigade.

The following royal and distinguished personages have from time to time commanded this gallant regiment:—

George Earl of Linlithgow	1660
James Douglas	1684
Charles Ramsey	1691
William Marquis of Lothian	1709
John Earl of Dunmore	1713
John Earl of Rothes	1752
William Duke of Gloucester, K.G., ...	1767
John Earl of Loudoun...	1770
John Duke of Argyll	1782
William Frederick Duke of Gloucester, K.G.,	1806
George Duke of Gordon	1834
George James Earl of Ludlow	1836
H.R.H. Prince Albert	1842
H.R.H. the Duke of Cambridge, K.G. ...	1852

Historical Memoranda of the Regiment.

1689.—One battalion embarked for the Netherlands, under the Earl of Marlborough (afterwards the great duke), and was engaged at the battle of Walcourt in August of that year.

1690.—At the battle of Fleuris.

1691.—At the siege of Mons, where the rank of lieut.-colonel was first granted to the captains of the regiment by His Majesty King William III.

1692.—The regiment took part in the battle of Steinkirk.

1693.—Took part in the battle of Landen.

1694.—Quartered at Bruges.

1695.—Took part in the siege of Namur, where the regiment was highly distinguished.

1696.—One battalion returned to England, to assist in repelling a threatened French invasion.

1697.—This battalion re-embarked for Flanders, and formed part of the army of Brabant. After the peace of Ryswick both battalions returned to Scotland.

1709.—A battalion embarked for Spain, and took part in the battles of Almenara in July, and Saragossa in August of that year, at which latter battle 30 standards and colours were taken by the British.

1742.—One battalion embarked at Woolwich for Flanders, and were engaged at Dettingen in 1743, Fontenoy in 1745, and Laffeld (on the Val) in 1747.

Detachments of the regiment served in America from 1778 to 1782.

1793.—One battalion at the battle of Lincelles.

1799.—One battalion in Holland.

1800.—One battalion at Ferrol, Vigo, and Cadiz. In the same year, one battalion embarked at Cork, in August for Egypt, and took part in the action at the landing on the 8th March, 1801, and the battle of Alexandria on the 21st of the same month. This battalion returned to England in December the same year.

1805.—A battalion in Hanover.

1807.—A battalion in Copenhagen.

1808.—The 1st battalion embarked for the Peninsula, and served there till July, 1814. Present at the passage of the Douro and capture of Oporto, and the battle of Talavera in 1809; Busaco in 1810; Fuentes d'Onor in 1811; siege of Ciudad Rodrigo, battle of Salamanca, and capture of Madrid, in 1812; battle of Vittoria, passage of the Bidassoa, attack on the heights of St. Jean-de-Luz, and battle of the Nive, in 1813; passage of the Adour, investment of, and repulse of sortie from, Bayonne, in 1814.

1811.—Three companies of the 2nd battalion embarked for Spain, and took part in the battle of Barossa, under General Graham (afterwards Lord Lynedoch).

1813.—Six companies of the 2nd battalion embarked for the Netherlands, and were at the siege of Antwerp and storming of Bergen-op-Zoom.

1815. The 2nd battalion took part in the battles of Quatre Bras and Waterloo.

1827 and 1828.—The 2nd battalion served in Portugal.

1854.—The battalion embarked for the East, 28th February, and served throughout the Crimean campaign, taking part in the battles of Alma, Inkerman, and the siege of Sebastopol.

On Wednesday the 200th anniversary of the formation of the Scots Fusiliers, or 3rd Regiment of Guards, was celebrated at the Crystal Palace. The whole of the men comprising the first and second battalions were treated to a grand dinner in the transept, to which upwards of 1400 sat down. During the dinner the band of the regiment played several martial airs with great spirit, and the officers looked on with satisfaction at the happy scene before them. The transept presented a gay and brilliant appearance, and was decorated with flags bearing the names of the several victories in which the regiment had fought and conquered. There was a large attendance of visitors, who crowded the galleries and the hall overlooking the scene. The repast, provided by Mr. Strange, of the Crystal Palace, was both substantial and abundant, the men being supplied not only with malt liquors, but also a liberal quantity of wine.

The feasting having terminated, "The Health of her Most Gracious Majesty the Queen" was drunk enthusiastically with three times three, after which the National Anthem was played by the band. "The Health of the Prince Consort and the rest of the Royal Family" was drunk with the same manifestations of attachment, and with musical honours. The next toast given was "The Duke of Cambridge," the commanding officer of the regiment, coupled with the other officers; and it was drunk most heartily, with three times three and one cheer more, and musical honours.

Colonel Ridley, in returning thanks, said he was desired by the Duke of Cambridge to express his regret that he was not able to be present on that occasion. He (Colonel Ridley) was in hopes that His Grace would have been able to be there after attending Her Majesty's levee, but as he had not arrived he supposed he could not come, and therefore it devolved on him to thank them for the very handsome manner in which they had drunk His Grace's health. For himself and his brother officers he would say that it was gratifying to them to have brought the men there on the present occasion, and they were pleased to see them all so happy and comfortable. If they looked around they would see the names of the many battles which they had fought and won for this country, and should they ever be called upon again to fight they would maintain that high standing of excellence which had been transmitted to them by their predecessors, and they would increase the list of glorious names that had been handed down to them by those who had held their places in times gone by.

The gallant colonel had scarcely concluded when it was announced that the Duke of Cambridge had arrived, upon which the cheering became tremendous. His Grace entered, and walked up and down between the tables, and the greeting he received was most enthusiastic.

The health of General Lord Rokeby was then drunk with great warmth of feeling.

His Lordship, in returning thanks, said after the very long time he had been in the regiment—a period now of over 45 years—he could not do otherwise than look upon the men as his children, and he felt that affection for them that a parent would feel for his offspring. He thanked them for the honour they had done him in drinking his health.

The health of General Walker was next given, to which the gallant general briefly responded.

The Duke of Cambridge then said he understood that just

Digitized by Google

before he entered they had drunk his health, and he was sorry he was not there at the time to return thanks, but he was there then to return them thanks for the manner in which they had done it. He was very much gratified to see them so happy and enjoying themselves on the 200th anniversary of their formation. He was proud to be their colonel, for he was sure they would ever do honour to themselves and their officers.

The Guards then proceeded to the grounds, where the athletic sports commenced, but a heavy shower of rain which fell shortly afterwards destroyed nearly all their pleasure. In the course of the evening Mr. Coxwell made an ascent in his balloon, Mars. The fountains of "the upper system" were put into play, and the scene from the balcony was one of the most delightful that the imagination could picture.

THE VOLUNTEER REVIEW.

MEMORANDUM.

HORSE GUARDS, S.W., JUNE 18.

Her Majesty the Queen having signified that it is her pleasure to review the Volunteer Rifle Corps in the vicinity of London, in Hyde Park, at 4 o'clock p.m., on the 23rd of June, the following directions will be observed on that occasion :—

"1. The Queen will leave Buckingham Palace at half-past 3 o'clock p.m.

"2. The Staff attending Her Majesty will assemble within the iron rails in front of the Palace at 3 p.m., and the *cortége* will be formed as follows—viz. :

"1st. A detachment of Life Guards, preceded by an officer of the Quartermaster-General's Department.

"2nd. The Queen's led horses, if any.

"3rd. The Commander-in-Chief's Aides-de-Camp, if present.

"4th. The Aides-de-Camp to the Queen.

"5th. The Deputy-Adjutant-Generals, the Deputy-Quartermaster-General, the Eqerries in Waiting to the Queen.

"6th. The Adjutant-General, — the Quartermaster-General,—the Military Secretary to the General Commanding-in-Chief.

"7th. The General Commanding-in-Chief, if present.

"8th. Princes of the blood.

"9th. The Sovereign.

"10th. The Gold Stick and Master of the Horse.

"11th. The Lords-Lieutenant of the counties to which the Volunteers present belong, mounted and in uniform.

"12th. The Assistant-Adjutant-Generals, the Assistant-Quartermaster-Generals, Deputy-Assistants.

"13th. Detachment of Life Guards.

"3. The Queen will enter the Park at Hyde Park Corner Gate, and enter the enclosure near the Achilles statue.

"4. A royal salute will be fired by the Artillery, commencing when Her Majesty enters the archway on Constitution Hill.

"5. The Volunteers will salute when Her Majesty arrives at the Royal standard, opposite the centre of the line of contiguous columns, drawn up facing the Grosvenor Gate.

"6. After receiving the salute, Her Majesty will drive down the line from right to left, escorted as before.

"7. When Her Majesty returns to the Royal standard, the Volunteers will march past in quick time in open column of companies, and reform in contiguous quarter distance columns on the original ground. During the marching past, the Staff in attendance upon Her Majesty and the Lords-Lieutenant will be drawn up opposite the Royal standard on either side of the band.

"8. The line of contiguous columns, being reformed, will advance and salute.

"9. Her Majesty will leave the ground in the same order as she entered it.

"10. The Royal Artillery will salute as Her Majesty leaves Hyde Park.

"11. The ground will be kept by the regiment of Life Guards and 10th Hussars, off duty, and two battalions of Foot Guards; the cavalry under command of the Inspector-General of Cavalry, and the Foot Guards under the Field Officer in Brigade Waiting.

"12. A Guard of Honour from the Foot Guards will be stationed at the Royal standard.

"13. No equestrians, except the Staff who form Her Majesty's *cortége* and the Staff of Volunteers reviewed, will be permitted to enter the enclosure.

"14. None but the Royal carriages will be permitted to enter the enclosure.

"15. The public will be admitted to the stands to be erected, by tickets from the Secretary of State for War.

"16. Officers on foot, in uniform, will be admitted between the line of stands and the marching past line.

"17. All spectators are to be required to stand in rear of the troops marking the square, which must be kept perfectly clear.

"18. Orders immediately affecting the troops reviewed will be given by the officers in command.

"By command,
"JAMES YORKE SCARLETT, Adjutant-General."

WAR OFFICE, JUNE 18.

The following arrangements will be made with regard to those Corps of Volunteers which will be conveyed to London by railway for the Royal review on the 23rd inst. :—

"1. The corps should be at the railway station half-an-hour before the time assigned for the train to start.

"2. If the size of the station will admit of it, the corps should be formed up in line, facing the carriages; otherwise it may be formed up outside the station.

"3. Having ascertained the number of compartments and their respective accommodation, the commanding officer will tell off his line into corresponding sections, and will wheel these sections forward, and march them to their several carriages, under the guidance of their officers and non-commissioned officers.

"4. The Volunteers will form single file on entering the carriages, and when seated will hold the rifle upright between the knees, the pouch being drawn round to the front of the body.

"5. The same order is to be observed in quitting the train.

"6. The time of arrival in London should be about noon.

"7. There will be a Staff-Officer on duty at each terminus, who will communicate orders to the Commanding Officer of every corps as it arrives, and a police-constable will be appointed to guide it by a prescribed route to the battalion or brigade of which the corps is to form part.

"DE GREY AND RIPON."

WAR OFFICE, 22nd June, 1860.

The following will be the distribution of the staff officers who have been placed by His Royal Highness the General Commanding in Chief at the disposal of the Secretary of State for War, for duty at the undermentioned railway stations on the 23rd inst. :—Captain Carleton, Paddington Station; Major Barnard, Euston Square; Major Gooch, King's Cross; Captain Frecth, London Bridge.

These officers will be furnished with lists of the several corps that are to arrive at their respective stations in the course of the morning of the 23rd, and they will place themselves in communication with the railway and police authorities at the stations with a view to regulating the disposal of the corps as they arrive, so as to prevent confusion or crowding at any spot, and to arrange for their formation into battalions and subsequent march through London, under guidance of the police, who will lead each battalion up to the flags of its brigade.

Many corps, coming from considerable distances, will require time for refreshment after arrival, and staff officers will consider any such requisitions with reference to the proper hour for marching to the Park. The orders of the staff officers, so far as they do not interfere with the railway or police arrangements, are to be implicitly obeyed by officers commanding corps of Volunteers.

The greatest demand upon the exertions of the staff officers will be upon the return of the corps to the stations after the review; it will be late in the evening; the men will be tired and anxious to get to the trains, and the corps may arrive simultaneously.

Care is to be taken, in conjunction with the railway and police authorities, not to allow more than one corps at a time to be upon a platform; and the corps are therefore to be carefully distributed as they arrive at the station, so as not to interfere with each other's movements, or become mingled.

DE GREY AND RIPON.

WAR OFFICE, JUNE 21.

The following distribution of those Volunteer Corps which will take part in the Royal Review on the 23rd inst. is approved, subject to such subsequent modifications as His Royal Highness the General Commanding-in-Chief may think fit to adopt.

TO TAKE POST ON THE RIGHT OF THE LINE.

1ST DIVISION.

Lieut.-General Sir J. F. Love, K.C.B., K.H., Commanding.

1. Corps are not on any account to deviate from the prescribed routes, which will be kept open by the police; and it is of the utmost importance that each battalion should march at the appointed hour in order that it may reach the Park before 2·30 p.m., where a temporary line of contiguous columns will be formed and arms piled upon ground marked out in rear of the intended alignment by flags, distinguished as follows:—

Red and White ...	Marked	M. V. for	Mounted Volunteers.
Blue	,,	A. B. ,,	Artillery Brigade.
Red	,,	1 B. ,,	1st Brigade.
White and Blue	,,	2 B. ,, 2d ,,	
Black	,,	3 B. ,, 3d ,,	
Yellow	,,	4 B. ,, 4th ,,	
Green	,,	5 B. ,, 1st ,,	2nd Div.
White	,,	6 B. ,, 2nd ,,	,,
Red and Yellow	,,	7 B. ,, 3rd ,,	,,
Green and Red	,,	8 B. ,, 4th ,,	,,

2. Corps entering the Park by the Albert-gate will proceed across Rotten-Row, past the head of the Serpentine, and across the carriage-drive, entering the enclosure immediately opposite.

Corps entering by Hyde Park-gate will enter the enclosure at once by the Achilles Statue, keeping to the left along the hurdles in the direction of the wood, where the first line will be formed.

Corps entering by Cumberland-gate will march by the road inside the Park, parallel to Uxbridge-road, turning into the enlosure opposite Albion-street.

Corps entering by Victoria-gate will proceed across the Park in the direction of the Magazine.

3. At 3 P.M. the Brigade-Majors will proceed, accompanied by the Battalion Aides, to take up the ground for their respective brigades on the alignment for review; on the completion of this duty they will return to their brigades and lead them into line by echelon of battalions from the right.

4. The Volunteers will remain silent and steady in their ranks, attentive to the words of command given by their own Battalion Commanders, upon which they are to act alone; all other commands given by the Commander-in-Chief and the commanders of divisions and brigades being precautionary only.

Officers commanding corps are to warn their men that spontaneous cheering is forbidden, and that their marching and demeanour must be orderly and soldierlike.

5. Care is to be taken that the dress and appointments of the Volunteers in their respective corps are to be uniform. If great coats are carried by corps they are to be folded regimentally, and not to be worn at any time during the review.

6. The bands of Volunteer Corps will not play during the review.

7. A distinct order of march will be issued for corps leaving the Park after the review, from which there is to be no deviation, in consequence of police arrangements.

8. Officers commanding corps will give to the officers commanding their respective battalions accurate states of their respective corps according to the accompanying form; these are to be given to the Majors of Brigade.

FIELD STATE OF THE UNDERMENTIONED CORPS OF VOLUNTEERS REVIEWED BY HER MAJESTY, LONDON, 23RD JUNE, 1860.

Description of Corps and Head-Quarters.	Officers.	Non-Com. Officers.	Privates.	Total.

Commanding,
DE GREY AND RIPON.

Colonel Walker, on promotion; Vice-Admiral Sir Provo Wallis; Major J. W. Perry Watlington, M.P.; Lieutenant C. E. Webber, on return from India; Lieutenant Wedderburn; Lieutenant F. A. Whish; Lieutenant E. H. Wickham, on appointment to the Royal Artillery; Lieut.-Colonel F. G. Wilkinson, on promotion and return from India; Major Osborn Wilkinson; Lieutenant G. F. Wilkinson; Major-General Williams, on promotion; Captain A. W. Williams; Lieutenant and Adjutant L. V. Williams; Captain A. N. Wilson, on promotion and return from India; Mr. W. Wise, on appointment as a Gentleman-at-Arms; Lieutenant A. D. Wodehouse; Ensign Woodmas; Ensign Woodward; Lieutenant H. C. Wright; Ensign the Hon. T. T. Wynne, on appointment to Rifle Brigade; Lieutenant C. B. Wynne; Ensign William R. M. Wynne.

THE INDIAN ARMY, LOCAL AND NATIVE.

(From a Correspondent.)

(*Continued from page* 410.)

Having thus disposed of two important items, economy and safety, to our own satisfaction, and we trust to that of our readers, in favour of the organisation of a local European army, we proceed to examine the remaining point, that of efficiency—that is, whether efficiency is best attained by a local army, or by one formed entirely from the Line. We believe the conclusion to be reached will be similar to that at which we arrived in the first two instances, that a local European army is the one best calculated to preserve, not merely military efficiency, but to secure for the purposes of general administration a body of men who, from local knowledge and experience, will be able to render important services to the country, as has hitherto proved to be the case. We freely recognise the advantage of a portion of the army of India being formed from the Line. A wholesome emulation is promoted, the two armies acting reciprocally on each other; stagnation of ideas, so hard to resist in that enervating climate, is opposed by freshly imported activity and energy of thought; all improvements in the military system which otherwise might not travel to India are conveyed to that country by successive regiments newly arrived, an English tone is preserved and promoted.

The efficiency of the local European army in the field and before the enemy has been so fully admitted that we are saved from useless iteration. The artillery, particularly the Horse Artillery of the three presidencies, and the Fusiliers of Madras and Bengal, will preserve an undying reputation. In point of gallantry there can be little difference between two armies of the same nation, but we believe it to be indisputable that a well-seasoned local regiment has immense advantages in the field over a corps freshly arrived from Europe. One is full of health and vigour, fit for any service or exposure; the other is feeble, sickly, requiring great management, and if under the necessity of suffering severe exposure or fatigue, has soon an immense per-centage unfit for duty. We remember reading an account of two regiments in one of the late campaigns caused by the mutiny which had been acting together towards the southern part of the Bengal presidency. One of these two corps had recently arrived from England, and having been forced to undergo some rough work, was reduced to great exhaustion. The other was the *Bengal Fusiliers*, a local European regiment, composed of well seasoned, tough soldiers, well bronzed by many an Indian summer's sun. Their casualties from sickness, undergoing the same exposure, was trifling. It is narrated in a history of a campaign against Hyder Ali in 1782, that a regiment which had but recently landed from England lost in forty days from illness, through insufficient field equipment, so many men as to be disabled from service. The least experience of India will satisfy everyone how inevitable are such results.

Such examples ought not to be lost on us. It probably requires half a dozen years to acclimatise a Queen's regiment, and place it on the same level of efficiency as a local Indian corps, and four years afterwards it ought to be on its way back to England.

It is no uncommon practice among the officers of the Royal army to make a boast, which is even repeated in Parliament, of the superior discipline which they affirm distinguishes the Royal service in comparison with the local European forces of India. We repudiate the allegation of any inferiority. In all likelihood the discipline in both armies is identical; still we cannot help thinking that gross insubordination is rather less common in India than in this country. Large camps are frequently formed in India, yet we doubt if any instance can be produced where two regiments commence a sort of action in camp,* or if any local European regiment ever exhibited such a want of discipline as was shown by a Royal corps in Afghanistan; or like what we have lately seen in that famous corps, the Royal Marines; or like the military disturbance at Greenwich described in the Army and Navy Gazette of the 14th of April last, in which men of the Artillery, Marines, Military Train, and Militia, were mixed up. In proportion to numbers, court-martials are not more common among the officers of the Indian army than among the officers of the Royal forces, and we may add that until within the last year or two that a corrective has been administered by H. R. H. the present Commander-in-Chief, irregularity was more common, or at all events more prominent and public among the junior branches of the Royal army than among the corresponding ranks of the Indian service. During the height of the war in the Crimea, it is said that the table of the Commander-in-Chief was covered with the resignations of officers eager to return home. No such incident has happened in the Indian army: indeed it could not happen, because to an Indian officer his profession is his bread. We think that here was shown a lack of that discipline and military tone of which there is too great a readiness to impute a deficiency in the Indian army. Our object in these allusions is simply to put in a true light, and defend from unjust accusation, a body of men on whom a heavy misfortune has fallen. It is not our words alone that establish the fact of the discipline of the Indian army; the admirable conduct of the very men who gave some colour to these imputations has shone forth under the most trying circumstances. We allude of course to those soldiers of the Indian army, one thousand of whom, with their wives and children, were crowded into a transport fit only to hold four hundred persons, and launched on the wide ocean, we might almost say without food or raiment. Did they then show a want of discipline? One thousand soldiers fresh from the campaigns and slaughter of the mutiny, and therefore we may assume with the bonds of discipline somewhat slackened, instead of breaking out into tumult and outrage as most men would, to say nothing of soldiers, bore their sufferings with a patience and fortitude of which there are not many examples; and to maintain order and authority, actually nominated non-commissioned officers from their own body. In affirmation of our remarks we cannot do better than quote a portion of the words of the Army and Navy Gazette, "All honour, then, to that system of the late East India Company's army, which afforded the most abundant proof of discipline under the most trying circumstances.

"We do not pretend to uphold the soldiers of the late Company as superior to those of Her Majesty's Service; but we venture to say they have on most occasions, whether in peace or in war, shown themselves equal to any troops of the Crown."

In short, we return to our first position on this subject, —that, in point of discipline, the two armies are much alike. It may be, and indeed is, an exaggeration to assert, like a Member of the House of Commons, that all the great successes of India have been achieved by officers of the Indian army; yet we may permit ourselves to remark, without much fear of being taxed with error, that nearly all the great reverses of India have been supplied by commanders from the Royal service. Conspicuous among them Monson and Elphinstone, the commanders in the first Nepaul War; Lake, at Bhurtpore; Bailley and Braithwaite, in the wars against Hyder and Tippoo; may be counted among the unlucky commanders of the Indian army; still, theirs were honourable defeats, sustained against overwhelming numbers, and fighting admirably. Putting aside the Great Duke himself, Sir Eyre Coote, and Sir Charles Napier, and, perhaps, Sir Henry Havelock, we cannot call to mind any commander of true eminence. On the Indian side may be counted Lawrence, Clive (who began his career in the Indian military service), Goddard, Auchterlory, Nott, Pollock. There are no doubt many other successful and highly meritorious names among the royal officers, who, be it remembered, generally preserved for themselves a monopoly of command. But, even these, such as Lake, Cornwallis, Gough, Monroe, derived all their staff, their quartermaster-generals, their adjutant-generals, their commissariat, their engineers, their artillery—all exclusively from the Indian army. Victories are not gained by a commander alone; he is, or ought to be, the master-mind; still, the worth or otherwise of the adjuncts mentioned above are all-important items in the scale of chances when the results of a battle or of a campaign are to be calculated. Foremost among these is the commissariat, which, if in the Indian army it is open to the imputation of being costly, has at all times ably fulfilled its prime duty, that of feeding the army. Its value has been so far recognised, that one of the chief elements of its successful administration—that of nominating men of military experience to the subordinate offices—has been, since the Crimean war, adopted by the Royal army. They have not as yet had the wisdom to follow the example of India, and apply this rule to the chief of that department. Sixty thousand soldiers were suddenly, though successively landed in Bengal, and instantly sent away hundreds of miles. Every arrangement was conducted smoothly, without embarrassment, without confusion. What more can be said of the efficiency of local military management? Change the system, expel the men of the local service, throw everything into the hands of Royal officers; fill all the military departments from their ranks, and can we assure ourselves that we shall have changed for the better?

Should the nation decide on the maintenance of a local European army, we think we have supplied evidence to show that it will possess in India a force able and ready to do its duty. The past and its results are our guide for the future. Local management has hitherto secured a career of unbounded success both at home and abroad—that is, in India and out of India. The foreign expeditions from India have been conducted with a foresight and evidence of military skill and combination which admit of comparison with similar undertakings under home supervision. Egypt, the Mauritius, Persia, Afghanistan, Burmah, China, afford instances in which the administrative capacity of the Indian military departments may be honourably quoted.

There are many other topics on which we might dwell with advantage, were we not forestalled by the excellent and argumentative speech of Mr. Buxton in the House of Commons on the 29th of March, which we strongly urge on the attention of those persons whose voices may influence the decision of this question. That gentleman showed in forcible language the advantages of a permanent local force over a transitory army. In the former, the officers and men are bound up with India, and make it their home or a career to independence and reputation; while in the latter, the superior officers are from age unfit for, or averse to, a new occupation; the wealthy officers quit their regiments, and the younger portion never forget that ten years will conclude their exile; consequently they want that stimulus which has produced such excellent results over the local army, and supplied the Government with so many able men for the execution of the civil and political administration of India. The local officers commence their Indian vocation from early youth, and acquire their knowledge of the languages and peoples of India in the first vigour of youth; while in the other instance the officers will, in the majority of cases, have made some advance in years, and will generally require to begin their Oriental education at the age it ought to have been nearly concluded. Mr. Buxton reminds us of the objections to an army, the head of which would not be the Governor-General, but another functionary, devoid of knowledge or interest in the affairs of, and residing three thousand miles from India, depriving the former personage of an amount of prestige, and in a manner dividing an authority which ought to be reserved exclusively to the supreme governor.

At the same debate the Secretary of State for India declared that it was quite true he had been prepared to maintain a local European army in India; but that important events had happened since then, and that the fact of ten thousand men simultaneously taking their discharge could not be passed over in coming to a decision on the subject. The right of these soldiers to their discharge is conceded; and when they adopt this opinion, the Government turns round and impeaches their discipline or their loyalty. If the Indian army is to be amalgamated, or in other words annihilated, let it be on genuine grounds, the general interest of the empire, and of India; but let it not be to shield the errors of those whose experience should have taught them that the true way to govern an army is by justice and consistency, not by erecting one standard for one body and a different one for another, not by blowing hot and blowing cold as convenience or caprice dictates.

* One was a militia regiment.

THE BOMBAY ARMY.

Two General Orders of interest have been issued, the one by General Rose, on his returning from the Bombay command to assume the command-in-chief in India, the other by General Mansfield, on assuming the command at Bombay. The following is General Rose's Order:—

"By order of Her Most Gracious Majesty, I am about to leave this command.

"It was in the field that I first joined the Bombay Army, and in the conflict for the rights of my country and of civilisation that it won my esteem.

"I estimate at all its value the honour of having commanded, brief as has been the period, an army which stands so high in military traditions, and which in the last three eventful years has earned for itself fresh pages in the brilliant chronicles of Indian armies.

"It was a Bombay force which in 1856 landed on the coast of Persia, subdued in a few gallant actions her whole sea-board, won a peace, and then hastened back to take an honourable part against the rebellion in India.

"Major-General Sir Henry Roberts, K.C.B., in 1857, with most inefficient means, and before the rebel cause had been discouraged by defeats, subdued revolt in Rajpootana, and afterwards, in command of a field force, dealt it a severe blow by capturing Kotah, with its numerous artillery. At a later period, Sir Henry Roberts gave a serious repulse to the cleverest of the insurgent traitors, Tantia Topee.

"Columns of the Bombay Army, under Major-General Sir John Michel, K.C.B., routed in several actions the force under the same leader, took all their artillery, pursuing them in marches of unusual length and rapidity till they lost their leader and broke up. Nor can I forget the weak division, incomplete in every requisite except resolution and discipline, which with no other aid but a portion of the Hyderabad Contingent, fought its way in 1858 from Western India to the frontiers of Bengal, planting their colours in every hostile camp and fort which opposed their line of march.

"So small was this column, so far had it advanced, and so hard was it pressed, that it could not afford a reserve; the tide of war closed around it from every side, sickness was in the camp; marching by night and fighting by day in a summer sun had prostrated many and weakened all, the intense heat even rendered useless a great portion of the arms and ammunition of the European infantry.

"But nothing could prostrate the spirit of the Central India Field Force. Their devotion never allowed them to think that they could be beaten; their discipline told them that they must obey their orders to take Calpee and join the Bengal Army, no matter at what sacrifice. They never yielded, they always advanced till they won the Jumna, and on the banks gave their hands to their gallant comrades of the Bengal Army.

"Calpee was the fruits of this hard-fought-for union.

"During the short period I have held the chief command of this army I have done my best for its improvement.

"Let military improvements in its broadest acceptation be your watchword—all the armies of the world are striving for improvement. We ought not to be behind-hand. Whenever and wherever our Queen and country call us, we must be ready.

"All cannot be clever; but all can be disciplined. Devotion goes hand in hand with discipline. A disciplined soldiery is the pride of the profession, the safeguard of public order, and a bulwark of their country's rights.

"I know no partialities, no distinctions, except those which belong to merit. Be he the highest or the humblest in my command, it is the same to me; let him show me his patent of merit, I will do my best to obtain for him the patent of his reward. I am about to obey the orders of the Queen to assume the command of Her Majesty's forces in India, on the departure of the present most distinguished Commander-in-Chief. I owe this distinction, perhaps the greatest to which an officer can aspire, less to my own merits than to those of my gallant troops, and to the kindness of a most gracious Sovereign, whose sympathies accompany her sailors and soldiers to the furthest limits of Her Majesty's vast possessions.

"I part from the Bombay Army as true and tried friends. Whilst I wish them a sincere farewell I can say that I have known no greater gratification than to acknowledge services of meritorious officers and soldiers, and to obtain for them a just recompense.

"I am directed to hand over the command of this army to Lieut.-General Sir William Mansfield, K.C.B., whose name is well known in India. I do so with the utmost confidence. It would be out of place in me to extol his services, which have been so highly eulogised by a better and higher authority—His Excellency Lord Clyde, who has won a reputation in every quarter of the globe.

"I am extremely indebted to Major Stock, Acting Adjutant-General of the Army, for his very zealous and efficient assistance.

"I learnt when in command of a field force to know Lieut.-Colonel Phayre's value as a Quartermaster-General of the Army. He never acknowledges difficulties; he overcomes them.

"Colonel Somerset, Deputy Adjutant-General of her Majesty's Forces, has performed his duties entirely to my satisfaction.

"Colonel Skinner's lucid interpretation of military law, and the justice of his views in all matters relating to it has been very useful to me.

"I am grateful to Colonel Rowland for the ability with which he has conducted his important duties, and for the zeal with which he has seconded my wish to introduce improvement into his noble arm.

Digitized by Google

"Dr. Rooke, Inspector-General of Hospitals, has addressed to me valuable reports on sanataria and the amelioration of the medical department. I fully concur in the opinions which he expresses, and I have done my utmost to have them carried into effect.

"All reports of the army will be made to Lieut.-General Sir William Mansfield, K.C.B., from the date of my embarkation for Calcutta.

(Signed) "H. Rose, Lieut.-General,
Commander-in-Chief."

Sir W. Mansfield, K.C.B., in his address to the Bombay army on his assumption of office as commander-in-chief, says:—

"His present connection with the Bombay army is the more gratifying to him as he is well acquainted with its high character for discipline and conduct to the field, as illustrated in many arduous contests, and more especially in the late brilliant campaigns conducted by His Excellency Lieut.-General Sir Hugh Rose, G.C.B., who is about to assume the command of Her Majesty's forces in India; by Major-General Sir H. G. Roberts, and Major-General Sir J. Michel. He trusts that these great qualities of a military body will not suffer while the army of Bombay is under his command, and he relies on the officers commanding divisions, brigades, and regiments for that cordial co-operation which will best vouch for them. It will be borne in mind that the more intelligent the obedience of an army, the more perfect, the more certain is its discipline; that is to say, that when men thoroughly understand the laws and regulations under which they exist as soldiers, they become alive to their necessity, and to the just spirit in which those laws and regulations have been formed. If properly instructed, British soldiers are commanded without difficulty and with but little punishment. To the regimental officers does it chiefly belong to impart the due instruction with patience, temper, and firmness, and thus to maintain the highest description of discipline—that which is founded on unerring, but at the same time intelligent, obedience to the laws and regulations enacted and ordered from time to time for the better government of Her Majesty's forces. Above all, let the officers of every rank recollect that, important as the duties of parade may be, they form but a very small part of military existence, and of those objects, common alike to the men under their command and to themselves, about which the men have a right to expect information and instruction."

Sir W. Mansfield closes his address with hopes soon to have it in his power to inspect the troops at the several stations and to make their personal acquaintance.

ROYAL NAVAL SCHOOL, NEW CROSS.

The annual distribution of medals, cadetships, and other prizes, took place on Tuesday, in the great school-room, before a large assemblage of visitors and friends of the Institution, including many old scholars. The chair was occupied by the President, Admiral Bowles, C.B., supported by Sir George Back, Colonel Longden, R.M., Captain Willoughby, R.N., Major Shewen, R.M., Major Onslow, R.M., Major Sayer, R.M., &c.

The school-room was decorated with flags, evergreens, flowers, and various devices of great taste and ingenuity, the flags having been kindly lent for the occasion by Captain Crang, R.N. (H.M.S. Dreadnought), Duncan Dunbar, Esq., E. F. Leeks, Esq., and Messrs. Somes. At the end of the room, exhibited on screens, were the various productions of the pupils in civil and military drawing, many of them exhibiting considerable talent, creditable both to the students and their instructors.

The chairman in a short opening address, referred, amongst other subjects to the very satisfactory nature of the examiners' reports. The Rev. Dr. Major, of King's College, was classical examiner; the Rev. F. W. Vinter, of the Royal Military College, Sandhurst, mathematical; the Rev. S. Marzial, examiner under the Council of Military Education, French; and Dr. Bernays, of King's College, German. Their reports having been read by Mr. Eames, the secretary, the chairman with the assistance of Dr. Chambers, the head master, distributed the prizes as follows:—

Prize List.—Midsummer, 1860.

First School—Class 1. Morris (1), the gold medal; 1st in classics, 1st in mathematics, 2nd in French. Wynne (1), classical silver medal, classics, mathematics, and French. Hubback (1), mathematical silver medal; mathematics, classics, and French. Stringer (1), "Schiller's Works;" German, French, and mathematics.—Poore, Kitson, "Wordsworth's Greece;" history and geography.—Class 2. Stephens, "Journey to the Pacific;" classics and mathematics. Laverty, "German Ballads;" German and mathematics.—Class 3. Hall, "Porter's Knights of Malta;" classics and history. Trench, "Russell's Diary;" German, classics, and history.

Second School—Class 1. Ferris, "Wanderings of an Artist;" classics. Fagan, "Lamartine's Poetial Works;" mathematics and French. Grabbs, "Guizot's Oliver Cromwell;" French and history. Miller (1), "German Tales;" German.—Class 2. Duris, W., "M'Clintock's Voyages;" classics. Burr (1), "Owen's Palæontology;" mathematics. Paget, "La Fontaine's Fables;" French and history.—Class 3. Forbes, Molière's Works; classics and French. Lillicrap, "Chemistry of Common Life;" mathematics. Allan, "Guizot's Representative Government;" French and classics. Kellock, J., "Hunting-Grounds of the Old World;" history and Geography. Beard (1), Corneille's Works; classics and French. Hubback (2), "Somerville's Physical Geography;" mathematics.—Class 5. Dyer, "Napier's Peninsular Battles;" mathematics.

Third School—Class 1.—Festing (1), "Lord Dufferin's Letters;" classics. Tweedy, "Ward's Telescope Teachings;" mathematics. Carey, "Kirby and Spence's Entomology;" French. Crookes, "Herschel's Astronomy;" French. Acklam, "Forster's Arrest of the Five Members;" history, classics, and French.—Class 2. Roberts (1), "Smiles's Self-Help;" classics. Collier, "Peaks and Passes;" mathematics. Brand, W. E., "Layard's Nineveh;" French.—Class 3. Agassiz, "My Schools and Schoolmasters;" classics. Hornidge, "Boyd's Naval Cadet;" mathematics. Jones, O., "Ree's Lucknow;" French and history. Johnson, H., "Knowledge is Power;" French. Class 4. Forsyth, "How we spent the Autumn;" for general improvement. Dawson, 2nd, "Darwin's Voyage;" for general improvement.

The Cookney Silver Medals for Industry and Good Conduct, Poore, Leak (1), Dent (1).

Writing Prizes.—2nd School: Hill—Kraph's Travels. 3rd School: Walter, 2nd—Innes' Scottish History. Marine Cadetship: Mathias. 1st Naval Cadetship and Yarborough Scholarship: G. Smith. 2nd Naval Cadetship: E. H. M. Davis. Lord Clarence Paget's Naval Cadetship: J. H. Orlebar.

Drawing Prizes.—1st Class: Wynne (1), 1st prize. Stephens, 2nd prize. Poore, 3rd prize. 2nd Class: Fox, 1st prize. Norcock, 2nd prize. 3rd Class: Toms, 1st prize. Troughton, 2nd prize.

Honourable Mention—Cards of Merit.

Classics.	Mathematics.	French.	German.	History and Geography.
First School.				
Class 1—				
Kitson	Kitson	Conydon		
Class 2—				
Caiger	Bore		Downing	
Class 3—

Boxer (2)				
Lewis				

The gallant chairman mentioned that in the various competitive examinations for both Services, the students educated at the school during the past, as in former years, had highly distinguished themselves. Amongst these were Mr. J. G. Gamble (the gold medallist of last year), who gained in October last, by public competition, a mathematical Demyship at Magdalen College, Oxford, of 75*l.* per annum for five years; Mr. Hardy M'Hardy, who had distinguished himself in 1854, by gaining the prize naval cadetship, or "Yarborough scholarship," had passed for a lieutenant at the Naval College in March last under the Admiralty Circular of 23rd February, 1857, and obtained a first-class certificate, which from being at that time an honour unprecedented since the adoption of the new regulation, he was at once promoted to be lieutenant; Mr. E. Goldsmith had passed as Queen's cadet, in his examination for the Army; Mr. S. H. B. Northcote had gained one of ten Marine cadetships, open to public competition; Mr. W. E. N. Holbrook and Mr. G. F. Pengelley, who received the prize Marine cadetships at midsummer last, passed at the head of their competitors in the examination at Portsmouth; and Mr. H. J. Robilliard, the recipient of the "Yarborough scholarship" in 1858, who passed first for a cadetship, also came out of the "Britannia" at the head of the list. Lord Clarence Paget having placed at the disposal of the council a naval cadetship for competition amongst the pupils, it was awarded to Mr. J. H. Orlebar, who has since passed at the Naval College, second of the candidates of his own age. General Sir Henry Floyd had requested and received the permission of the council to erect a tablet in the school chapel to the memory of his son, who was educated here, and died whilst serving on board Her Majesty's ship, Marlborough.

The gallant admiral concluded his address by impressing in a very earnest manner on his young hearers the necessity for pursuing, in order to obtain distinction, a steady, sober, and religious life.

The school appears to be in a thriving condition, and has assumed a position of national importance, from the fact that a large portion of the pupils are educated for the public service.

The dormitories in this establishment are deserving of much commendation. They are large, very lofty, and well ventilated. A large lantern is suspended from the centre of each, in which there is always during the night, a brilliant light burning. A junior master is attached to each room, and sleeps in a part of it partially screened off, but he is so placed that he can command at will a full view of the boys committed to his charge.

The clerk of the weather appeared to have a peculiar spite against those whose probable future destiny it will be to contend with his vagaries. The rain fell with a steady down pour the whole morning; but the spirits of the boys rose above all damping influences, and the cheers which they gave the successful pupils, their masters, and the council, were hearty and exhilarating. The severity of the day appeared also to have imparted a keen edge to the appetites of the relatives and friends, the majority of whom belonged to the fair sex, who attended on the occasion, and who did ample justice to a substantial lunch which was laid out in the library.

Channel Fleet Regatta.—This regatta by the boats of the Channel Fleet took place on Wednesday at St. Margaret's Hope, under the patronage of Vice-Admiral Sir Charles Fremantle, K.C.B., Rear-Admiral John E. Erskine, and Rear-Admiral George Elliot. The weather was splendid, and the turn-out of spectators was prodigious, in vessels of every description.

OFFICERS FROM THE RANKS.

A discussion took place in the House of Commons on Monday, upon the subject of the position of officers promoted from the ranks as regards counting their non-commissioned service towards retiring allowance, and selling their commissions. The subject was introduced by Mr. M'Evoy, who said the Secretary of State for War, in defending a recent appointment, had stated that it would be a cowardly and shabby thing if he were to pass over an officer who was perfectly qualified for the post in his gift, merely because he held a place at Court. He was now about to afford the right hon. gentleman an opportunity of proving his ingenuousness in that remark. A practice had grown up of late years of giving an increased number of commissions to deserving non-commissioned officers, and the present Commander-in-Chief had done more in this respect than many of his predecessors. But while men were thus promoted, it was not fair that their new position should place them in circumstances of embarrassment. A man, after perhaps 25 years' service, on being promoted from the ranks, was not allowed to make this the ground of a claim towards a pension, though by a rule of the War Office, for which he could not find any authority, it was the custom to allow him to count half his previous service. A man entering the Army at twenty years of age, and obtaining his commission at 45, after enduring all the fatigues and hardships of his profession, was in no condition to commence a new term of service before he could look forward to the enjoyment of a full retiring allowance. Quartermasters and paymasters—on what ground he was unable to say—were allowed to count the whole of their previous service. To the argument that the latter could not expect promotion, was to be opposed the fact that men ordinarily obtained their commissions at an age when they could not expect to rise higher than the command of a company. The sum produced by the half-pay of a captain and the investment of the price of his commission was insufficient to support him in the position to which he was entitled; and a case had come to his knowledge in which an officer who had received his promotion in the manner referred to, applied for the post of recruiting officer, for which he was perfectly eligible, but was unable to obtain it, because he was not allowed to count his former service. The cost to the State of the change which he advocated would be trifling; the aggregate amount would not, he believed, exceed the pay of one general officer. The hon. gentleman concluded by moving that an humble address be presented to Her Majesty, praying that she would be graciously pleased to order that those officers in the Army who have been promoted from the ranks might be allowed to reckon their previous services in the ranks in the same manner as is now permitted to paymasters and quartermasters, so as to enable them to avail themselves of the 30th section of the Royal Warrant of the 14th day of October, 1858, which regulates the retirement of combatant officers in the Army and Ordnance corps.

Colonel Dunne seconded the motion.

Mr. S. Herbert sympathised with all the hon. member had stated as to this class of officers, but he thought the hon. member did not draw a sufficient distinction between the non-commissioned officers who rose to the rank of lieutenant and captain, and those who were made paymasters. The post required special qualifications; there were very few men qualified to be paymasters. The peculiar advantages given to all officers who rose from the ranks should also be considered. He was not certain that the promotion was always an advantage; but he thought they should always keep that reward open. In many cases, commissioned officers regretted their promotion; but look at the advantages given to men who rose from the ranks. From commissioned officers a rigid examination was required at each step; they must possess a certain amount of attainments. In the case of officers promoted from the ranks this rule was broken through. They also received sums of 100*l.* and 150*l.* for an outfit; a commissioned officer when promoted received nothing. Again, a non-commissioned officer receiving a commission was allowed to count every two years of his service in the ranks as one year's service towards his officer's commission; and if he sold his commission he was allowed to take 100*l.* for every year he had held it. It should be recollected there was a very great difference between non-commissioned and commissioned service. One was the service that obeyed; the other the service that commanded. The service that commanded required the higher qualifications; the whole distinction between the ranks rested on the additional value given to the officer above the man. He could not say it would be wise to make the alteration the hon. and gallant member required.

Colonel Dickson said that officers who rose from the ranks were most frequently made adjutants; he could not agree with the Secretary for War that the duties of an adjutant required inferior qualifications to those of a paymaster. On the contrary, no officer in a regiment had a more difficult duty to perform. Yet an adjutant was not allowed to sell his commission; he only got 100*l.* for each year he had held it. A non-commissioned officer if promoted to the rank of lieutenant, and holding his commission for three years only got 300*l.* for it on retiring, though its value was 1100*l.*

Colonel Lindsay thought it was wise to give non-commissioned officers the opportunity of rising from the ranks. He did not say it was usual for non-commissioned officers to wish to obtain commissions, or that any large degree of promotion from the ranks was called for. If the hon. and gallant member divided the House he should support the motion. The boon, which was, after all, a very trifling one, might, he thought, be granted without any injury to the Service.

Mr. M'Evoy's amendment was, however, notwithstanding the weight of military authority and reasoning in its favour, negatived without a division.

Commander Scott, R.N., inventor of the muzzle-loading rifle gun, at present undergoing a course of experimental proofs at Shoeburyness, was on Thursday appointed as additional commander to the flag-ship Fisgard, at Woolwich.

Printed by Joseph Smith, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the County of Surrey, at the office of Messrs. Bradbury & Evans, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street North, Strand, in the county of Middlesex.—Saturday, June 23, 1860.

notice of the authorities, who will have to decide whether the Royal Commission's recommendations are to be adopted or not. It will be seen that Colonel Adair's plan for "six artillery districts of defence," anticipates that same view, as put forth by a younger officer, in the last *Cornhill Magazine*. The very stations are almost identical. Bearing upon the proposals of the Royal Commission for extensive immoveable fortifications, which the enemy would of course avoid with a certainty, in proportion to their strength, Colonel Adair, we will venture to say, almost demonstrates:

"1st. That invasion on an unprecedented scale is possible.

"2nd. That the existing resources of the country are able to defeat invasion without recourse to extraordinary means.

"3rd. That the principal element of defence is a continuous preparation and training of the Militia Army of reserve, effective in its simplicity." [This was before the Volunteer movement, which only strengthens the argument, now.]

"4th. That, while the immoveable *cordon defensif* is the worst of all means of defence,

"5th. A mobilised system of defence, acting by interior lines of operation, is the most effectual.

"6th. That by adopting the Militia [and Volunteer] service into a recognised position in the military system of the empire, its efficiency may be permanently and cheaply increased to any extent.

"And 7th. That the nature of the defence to be maintained, so suitable to the genius of the English people, requires the training of an efficient body of Artillery, of Militia [and Volunteers].

We only add that these conclusions are also supported by the weight of evidence in the Royal Commissioners' own Blue Book, which is not in favour of their recommendations in too many and most important respects.

Colonel Warre, of the 57th Regiment, is, we understand, to be attached to the personal Staff of Sir Hugh Rose, the new Commander-in-Chief in India.

The Staff of Sir George Clerk, the new Governor of Bombay, consists of Major Coley, 10th Bombay Native Infantry, Military Secretary; Major Clerk, Rifle Brigade, and Captain Ellis, 33rd Regiment, Aides-de-Camp.

The Colonelcy of the 2nd West India Regiment, vacated by the death of Sir Robert Harvey, remains to be filled up. As seniority on the General list forms so important a consideration in selecting for these posts, we presume (passing some Guards' generals who have not seen service and are not likely to be appointed, as well as some officers from the cavalry), that Major-General Frith, who has some service in the field to show, will probably succeed to the vacancy.

Colonel Haythorne, of the 1st Royal Regiment, has been appointed Adjutant-General of the Army in India, in succession to Colonel the Earl of Longford. Colonel Haythorne is esteemed one of the most accomplished officers of his rank, and no more excellent appointment to this important office could well be made. He had been designated to the post of Chief of the Staff to Sir Hope Grant, commanding the China Expedition, but that appointment will not now be filled up.

We believe it is probable that Sir Alfred Horsford' on assuming the duties of Deputy-Adjutant-General, will be succeeded as head of the Recruiting Department at the Horse Guards, by Colonel Hope Graham, of the 59th Regiment, a zealous and excellent officer.

The approximate number of Volunteers in existence on the 1st of June, is estimated officially at 122,367 men.

No successor to General Gascoigne in the command of the Dublin district has yet been named. The gallant general leaves on the 1st of July.

The Channel Fleet is ordered from Leith to Yarmouth, there to await orders. It is rumoured in naval circles that the Fleet is destined to take part in a great naval demostration at Spithead next month, previous to the departure of the Prince of Wales for Canada, and afterwards to accompany the Prince across the Atlantic.

Mr. Strickland, an active officer of the department, has been appointed to the commissariat charge of the Windward and Leeward Islands, with the rank of Deputy-Commissary-General.

A committee, of which Sir F. Nicolson is the head, has been appointed to report on Mr. Hale's rockets and explosive preparations. Many distinguished officers consider that we have unduly neglected rockets as war-engines; and, unquestionably, if we could add to their destructiveness reasonable certainty of direction, and security to the users, they would be most formidable. Mr. Hale has been struggling long, but, as recent returns would show, not quite unsuccessfully to secure some share of Government attention for his improvements.

By the deaths of Generals John Mackenzie and Sir Robert Harvey the following Army promotions will take place; Lieut.-Generals Sir John Bell, Colonel of the 4th Foot, and Sir S. B. Auchmuty, Colonel of the 7th Fusiliers, to be Generals; Major-Generals H. G. Broke, Colonel of the 88th Regiment, and P. E. Craigie, Colonel of the 31st Regiment, to be Lieut.-Generals; Colonels Gold, 65th Regiment, and C. A. Lewis, Grenadier Guards, to be Major-Generals; Lieut.-Colonels Sulivan, 5th Lancers, and M'Gee, 3rd West India Regiment, to be Colonels; and Majors H. C. C. Somerset (Staff-office of Pensioners) and Francis Carey, 26th Regiment, to be Lieut.-Colonels in the Army.

The death of General Mackenzie, which we record in our obituary, removes the name of the oldest officer from the roll of the British Army, and the officer who has now attained the position of senior is General Sir James Watson, Colonel of the 14th Regiment, whose first commission is dated, June 24, 1783, just 77 years ago. General Mackenzie became an officer in the Army as far back as the 1st of January, 1778.

Lieut.-Colonel R. Stuart Baynes, formerly of the 8th Regiment, has been appointed Deputy Assistant-Adjutant-General at the Horse Guards, in succession to Colonel Brook Taylor, now commanding a brigade at Aldershot. Major Pearson has undertaken the Militia duties formerly discharged by Colonel Taylor.

We find the following passage in a letter published by one of our contemporaries this week:—

"General Knollys recently requested an extra brigadier at the camp at Aldershot. The Horse Guards have, with characteristic favour, arranged that an officer of the Guards should be appointed. To effect this they send a battalion of the Guards from London to the camp, and, as they must necessarily be brigaded with the Line, and as no Linesman can command the Guards, it, of course, entails the necessity of an officer of the Guards acting as brigadier. This is most unfair to the Army; because the Guards have opportunities when two battalions are in London of commanding brigades in the field, and which occurs almost every year; whereas the officers of the Line have seldom or ever that chance. At the camp at the Curragh last year a young Guardsman, who happened to be stationed there with the Fusilier Guards, had the command of a brigade. Now, sir, every regiment must and does feel a great jealousy towards the Guards, and dispute and deny their pretensions to that extreme degree of favour and affection which is shown them by the court and military authorities."

We must say we do not think either this argument or its illustration very happy. The general complaint against the Guards is, that in time of peace they are not made to go through regular duty like the Line, and attaching a battalion to the force at Aldershot for a month or two in the summer is a very wholesome step, which certainly ought not to be impugned by military reformers. Nor can we see the least harm in a colonel of the Guards having the opportunity of learning the work of a brigadier, for which he receives no pay. The writer is wrong in saying that a Linesman cannot command a Guardsman, though it seldom happens that one of the same army rank does, in consequence of the superior regimental rank which the Guards enjoy. With regard to the young Fusilier Guardsman who commanded a brigade at the Curragh ast year, the case is not very strong in support of the argument of the writer, for the young Guardsman in question was universally allowed to be one of the smartest and most capable brigadiers seen at the Curragh camp since its institution.

HOUSE OF COMMONS.—FRIDAY.

THE ARMY.

Colonel Dickson, who had given notice of his intention to call the attention of the Secretary for War "to the present state of the Army in the United Kingdom, urged the importance of having correct information as to the numerical force of the Army. He had seen it stated that we had only 33,000 men in return for an expenditure of fifteen millions. That estimate was very erroneous. According to a return recently laid before the House, the regular Army amounted to 102,080; the embodied Militia to 15,911; the disembodied Militia to 117,991; the Yeomanry Cavalry to 15,002; the enrolled Pensioners to 15,000, and the Volunteer Rifle and Artillery Corps to 122,367, making a total of 323,259. He looked upon the Yeomanry Militia and the Volunteer corps as a reserve force merely, and need apply his observations to the regular army alone. The regular army, as already stated, amounted 102,080, from which it was necessary to make these deductions:—officers, 4080; sick, at 6 per cent., 6000; one-third of the depôts as inefficient, 11,000; absentees, 5000. After these deductions, there remained an effective force of 76,000: a very respectable force in time of peace. The probable distribution of this force might be thus stated:—garrisons and artillery, 7574; engineers, 1000; cavalry, 1000; depôt battalions, 22,000; Scotland and Ireland 15,000; hospital corps, 686; making a total of 57,760. This left a manœuvering army of 28,240. Now, although this might be sufficient in time of peace, yet, looking to the fortifications which were about to be undertaken and the possibility of an outbreak on the continent, it was evident that prudence required this country to support a powerful force, in order to maintain the dignity and safety of the country. In his opinion it was desirable to raise 20,000 additional men, and that could be done without any considerable increase of expenditure. Without forming new regiments, but by adding to the number of men now existing, 20,000 additional men might be got at an expense of 600,000*l*. We were about to lay out a large sum on fortifications, but where were the men to man them? If he had to choose between fortifications without men, or men without fortifications, he would unhesitatingly prefer the latter.

Mr. Sidney Herbert said he was somewhat alarmed when he saw the gallant officer's notice of motion, for the "state of the army" was a very large question; he was therefore glad to find that the gallant member had confined himself to the numerical part of the subject. Nothing could be more absurd than the statement to which the gallant officer had referred, namely, that the country had only about 30,000 soldiers in return for an expenditure of 15,000,000*l*. There was no close connexion between the sums noted for the estimates, and the number of men. In some years, when the money voted was diminished, the number of men was increased. The cost of the soldier was not much greater now than at a period often referred to as characterised by great economy. In 1835-6 the soldier cost 81*l*.; and now, after the immense addition which had been made to the comforts of the Army, the soldier cost only 94*l*. In the main, he concurred in the opinion expressed by the gallant officer, that the Volunteer corps, the disembodied Militia, and the Yeomanry, should be considered as a reserve force. As regarded the Volunteers, they were entitled to the highest praise for the attention which they had paid to their duties. When those corps were established it was said that they would never attend to drill. Never was prophecy more completely falsified, for they had been most punctual and assiduous in their attention to drill under very disadvantageous circumstances, for they had scarecly been out a single day in which they had not been wet to the skin. The present amount of our forces was not a fixed but a growing number. There were seven battalions of infantry and one regiment of cavalry on the seas. It ought also to be borne in mind that ten thousand men had been diverted for the Chinese expedition. As he stated on moving the estimates, this was an exceptional year. It had been thought better to expend a certain amount of money in material rather than on men. Henceforth we could turn our attention to the augmentation of our forces. But it would then be necessary to increase the amount of barrack accommodation, which, at present, was deficient to the extent of twenty thousand men. Building was now going on, and the result would be an improvement in the condition of the soldier.

SIR C. WOOD AND THE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The valuable service you have rendered to that part of Her Majesty's service, which may be termed "the Indian Army," induces me to solicit the insertion of the few following lines.

In Sir C. Wood's speech, 12 June, 1860, on the proposed amalgamation of the European troops in India, he says: "It does not necessarily imply any change in the Native Army. I think it ought, but it is probable that the Native Army will continue to be officered as it now is. I do not think that is the way it should be officered; but on that point I will not now enter." He then goes on to state "his conviction that the Native Army, cavalry and infantry, should be under what is called the irregular system," and he gives as a reason "that it would be cheaper."

Now, I must say, that I consider "the European officers the very life and soul of the Indian Army, and consequently the main prop of our Eastern Empire." These are the words of a very intelligent writer, evidently well acquainted with the subject. In support of my views I will quote a sentence from a very elaborate minute of the late Lord Metcalfe. "The Indian Army, although it be taken under the Crown, must, nevertheless, continue in some respects a separate body—that is, it must be officered as at present by officers brought up in its own bosom. Officers from the European branch of His Majesty's Army ought not to be transferred to the direct command of Native Troops: but officers from the Indian Army might be allowed to purchase, or to be removed into the European Army. The Staff in India, and the employment now held exclusively by Company's officers, ought to be common to both branches of the King's Army."

These extracts are taken from Hayes' Selections of the Papers of Lord Metcalfe, p. 172. The whole minute, as well as a minute on "the officering of the Indian Army, January 19, 1829," at page 295 of the same work, will be found well worth perusal. Though a civilian, Lord Metcalfe, from the earliest period of his service, had been intimately conversant with military life, and perhaps no civilian, and very few military men were better qualified to form an opinion on the native army.—I am, &c. G. B. P.

The half-yearly inspection of the Kerry Militia, by Major-General the Hon. A Dalzell, took place in the Tralee Barracks on Saturday last. The gallant general was received with the usual salute. Then the regiment under the command of Lieut.-Colonel the Hon. D. B. de Moleyns, marched past in slow and quick time. Major Crosbie, Captain Leslie, Captain and Adjutant Spring, and Lieutenant Wren were severally called upon to put the regiment through some battalion movements, and some light infantry and company drill—all of which were performed with a steadiness and precision equally creditable to officers and men. The books of the regiment were next examined, and also the men's rooms during dinner-hour. After this the whole of the officers were assembled and examined on the musketry regulations in the presence of the general, by Captain O'Callaghan, district inspector of musketry, who expressed himself much pleased with the answering. The strength of the regiment is now 700, having got over 80 recruits since its arrival here, besides re-enlisting several men whose five years' period of service had expired. Their conduct is everything that could be desired, and General Dalzell expressed the utmost satisfaction at their condition.

The officers of the Royal Lancashire Artillery had a farewell dinner at the Adelphi Hotel, Liverpool, on the 14th inst., on which occasion they presented to Captain and Adjutant William Campbell a handsome gold watch and chain, as a testimonial of their great regard for his personal character and valuable services. The officers present were Lieut.-Colonel Atchison; Majors Middleton and Williams; Captains Furnival, Moore, Holmes, and Foster; Lieutenants Atchison, Christie, Harrison, Wood, Johnson, and Skivding; Paymaster Dawes; Quartermaster Blain; Drs. Betham and Mitchinson; and Dr. Ferguson, late of the regiment.

NATIONAL DEFENSIVE MEASURES.*

We are glad that when Colonel Kennedy read a paper on "National Defensive Measures" at the Royal United Service Institution, some three months ago, he did not rest content with the very limited publicity thus given to his views, but that he has thought fit to reproduce his remarks in a form which enables others than the members of that admirable Institution to have an opportunity of becoming acquainted with them.

It would have been a pity if so much careful study of the subject, and the ability which he displays in its treatment had been doomed to survive only in the pages of the United Service Institution Journal; and we shall always be glad to receive any suggestions on national defence which have the practical value of those in the pamphlet before us.

In the first few pages, Colonel Kennedy dwells mainly on the importance of preserving our naval superiority. "British commerce on the high seas, which is the very breath of our nostrils, as it sustains the existence and progress of 206,000,000 of British subjects, can only be protected by the Navy," he says, at page 2; and, a few passages further on, he adds, "the first line of defence for the home empire must likewise be the British Navy" (p. 3); and accordingly he urges very strongly an increase of our fleet, the only limit to such increase, he says, being the prudential one of what it may cost; and, in order that the burden may not become insupportable, at the same time as he recommends the strengthening of our naval position by the required numerical increase of steam ships of war, he by no means wishes the *personnel* to be permanently enlarged, but would organise, as a certain and rapid means of manning our fleets, a "copious reserve force of seamen," always "equal to the difference between England's lowest peace establishment and the complement required to man every effective ship in the Navy" (p. 6).

He then goes on: "The objects of a general defensive system for England must be—1st. To be able to man as large a fleet with as much rapidity as any combination of hostile states can bring against us. 2nd. To leave the great mass of the Navy disposable, if required, for the protection of commerce and the colonies, reserving only a strong channel fleet as a first line of defence for Great Britain and Ireland. 3rd. To establish so overwhelming an internal organisation of land forces as shall render the home empire perfectly secure against external aggression, even in the absence of the channel fleet. 4th. To accomplish these results effectually at the smallest possible cost" (p. 6). And, having disposed of the naval portion of the question, he comes to the land forces.

The regular Army he seems to think it would be impossible and undesirable to increase to the strength requisite to meet the condition of the case; and the Militia he equally sets aside, both Services involving too great an outlay. But, there is another force still—the Volunteers; and on these Colonel Kennedy pins his faith. The development to a much greater extent than at present of the Volunteer movement is, he considers, the only plan to be adopted, if we would render our national defensive measures complete and effective. Having enumerated the several reasons which have brought him to this conclusion, the gallant colonel proceeds:—"A limited number of skirmishers would be a mere delusion; Volunteers, to be effectual as a reinforcement to our regular troops, must be organised in battalions and brigades. They must be able to act in solid bodies, and to meet in line the best foreign troops" (p. 8). This is strictly a soldier's view of the case; but we cannot help looking upon it, on the whole, as a sensible one, for, however much one may be inclined to doubt the practicability of bringing Volunteers to this perfection, few persons will be inclined to dispute the desirability of approaching them as near to it as possible, and any measure tending to promote such a result is to be commended.

The remaining pages of the pamphlet are devoted to pointing out how the organisation and enrolment of the 500,000 Volunteers, whom our author considers necessary, may be effected. To effect this object more readily, he divides Great Britain into twelve great divisions, coincident with the registration and census arrangements, ten of which are English, one Welsh, and one Scottish.

Our space will not admit of our enumerating the different divisions, which are, however, arranged with considerable skill, and after a careful and laborious study of the subject and its details; in a series of elaborate tables occupying from twelve to thirteen pages, the reader can discover at a glance the quota of men, in proportion to adult males, which any particular place would, according to this scheme, be expected to furnish; the average proportion of Volunteers that Colonel Kennedy would seek to obtain is about one-tenth the adult males, giving, as above stated, a total of about 500,000 men, the annual cost of whom he estimates at 1,000,000*l.*, or 2*l.* per man; and he says, "if one-tenth of the able-bodied men devote their spare time and trouble gratuitously to the service of the State, it is not too much to expect that the remaining nine-tenths should furnish the small amount of money required for the general objects of organisation, if the Government itself should hesitate to do so" (p. 13), while the 2*l.* per man who serves, levied upon those who do not serve, would be, as the colonel justly observes, "but a nominal rating."

Our author goes into some further details respecting the arrangements necessary for drill, and which will be found both interesting and instructive; and he refers to the practice established in most Volunteer corps of demanding the payment of an entrance fee and annual subscription only to deprecate it, as tending to exclude the working classes, and to cripple the movement.

Such is an outline of the plan proposed in this very meritorious pamphlet. We hope we have said enough to make such of our readers as may be interested in the subject anxious to become better acquainted with it by a perusal of the pamphlet itself.

We may fitly conclude our notice with Colonel Kennedy's opinions about fortifications. It will be seen that he is little likely to hail with satisfaction the report of the Defence Commissioners. "Startling projects are whispered of costly fortresses, involving an expenditure of 10,000,000*l.* or 20,000,000*l.* England is precisely the country where fortresses would be least applicable. They would lock up our valuable, but too scanty, troops, who would be required to operate actively in the field against their foe, wherever he may present himself; and lamentable indeed will be our case if we ever give an enemy time to sit down before a British fortress" (p. 15).

* *National Defensive Measures.* Their necessity, description, organisation, and cost. A paper read at the Royal United Service Institution, March 16th, 1860; and extracted from the Journal of the Institution, vol. iv. By Lieut.-Colonel J. P. Kennedy, formerly an officer of the Royal Engineers. (London, 1860.)

COURT MARTIAL IN INDIA.

Extract from Division Orders by Lieutenant Colonel E. Amsinek, commanding, dated Head Quarters, 20th April, 1860.

At a European General Court-Martial, held at St. Thomas' Mount on the 4th of April, 1860, Second Captain John Ramsay James Robertson, of the 5th battalion of Artillery, was arraigned on the following charges, viz.:

First Charge. For highly insubordinate and un-officer-like conduct in having addressed a note dated Dorunda, 10th July, 1859, to Captain Edward Holbeche Couchman, Assistant-Adjutant-General of the Madras Artillery, containing among other passages the following:

"I had meantime joined under the impression (a most wild and unfounded one) that the brigadier" meaning the brgadier-commandant of artillery, "could not really intend to do me the injustice of permanently posting me to this detachment," meaning the detachment of the C company, 5th battalion at Dorunda. "I now write to tell you that I have no intention of carrying on the duty of this detachment, and as you are the Assistant-Adjutant-General, you had better provide some one that will. In the next place I wish to tell you that I consider that I have been treated most unjustly and most unfairly, because I have no friends and no interest. This expression is, I am aware, quite sufficient to cost me my commission, and I wish it so."

Second Charge. For conduct unbecoming an officer, and to the prejudice of good order and military discipline, in having at the same place addressed an official letter, bearing the same date, to the Assistant-Adjutant-General of the Madras Artillery for submission to the Brigadier-Commandant of Artillery, in which he requested that he might be allowed to do duty with some other corps than the Madras Artillery, such request being dictated by an insubordinate spirit, and intended as an expression of his dissatisfaction with the official act of his superior officer, the Brigadier-Commandant of Artillery, in recommending his removal to the C company of the 5th battalion.

Finding—The court, on the evidence before it, and what has been stated in defence, is of opinion that the prisoner, Second Captain John Ramsay James Robertson, of the 5th batallion of Artillery, is Guilty of the first charge—guilty of the second charge. Sentence—The court sentence the prisoner, Second Captain John Ramsay James Robertson, of the 5th battalion of Artillery, to be suspended from rank, pay, and allowance, for two calendar months.

St. Thomas' Mount, 7th April, 1860.—Revision.—The court having maturely weighed and considered the remarks of his Excellency the Commander-in-Chief, as conveyed in the Acting Judge Advocate General's letter, begs respectfully to adhere to its former sentence.

St. Thomas' Mount, 14th April, 1860.—"Confirmed."—Signed Pat Grant, Lieut.-General, Commander-in-Chief.—(Head Quarters, Madras, 16th April, 1860.)

Remarks by the Commander-in-Chief.—The inadequacy of the sentence, passed by the Court, rendered it necessary to call for a revision; the Court has not responded to the call, it, therefore, becomes the Commander-in-Chief's duty, in giving publicity to the proceedings, to withhold his approval of the sentence.

Second Captain Robertson, in the ordinary course of the Service, was removed from one battalion of his corps to another, it was his duty to have complied with the order for his removal without murmur or complaint; instead of doing so he addressed the note to the Assistant Adjutant-General of Artillery, which forms the first charge; his conduct is therein properly designated highly insubordinate, and of this the court have found him guilty.

For the grave military offences of which Captain Robertson has been convicted, the court has considered two months' suspension a sufficient punishment. The Commander-in-Chief will be wanting in his duty to the Army if he allowed such a sentence to go forth without the marked expression of his opinion regarding its inadequacy.

By order of his Excellency the Commander-in-Chief.

Signed, W. G. Woods, Lieutenant-Colonel, Adjutant-General of the Army.

The court-martial on Captain J. G. Griffin, of the Madras army, has sentenced him to be cashiered, and Lord Clyde has confirmed the decision.

THE INDIAN ARMY QUESTION.

In our last week's impression we gave a full report of the speech delivered by Sir C. Wood in submitting to the House of Commons the ministerial plan for amalgamating the local European force in India with the Imperial Army. The first reading took place last Thursday evening, and—possibly with the exception of some discussion in the Upper House, where we may expect Lord Ellenborough and others to state their views—the measure is certain to pass without serious opposition. The debate on Thursday evening was opened in a very elaborate speech by Lord Stanley, who observed that whilst the question of fusing the local European army with that of the Queen had been raised in the simplest form for the convenience of the House, still the House was placed at a disadvantage in having to discuss that subject without being first supplied with the details of the measure contemplated by the Government. He held that the maintenance of a local European force for the present and for the future was inevitable, and that the dangers which had been apprehended from its existence were greatly exaggerated. It was true that the Company's army was last year chargeable with insubordination, but that arose from totally different causes than the local character of the force, and he doubted if, under similar circumstances, the troops of the Queen would not have acted as the local force had done. It was all very well to say that the proposal of the Government was approved of by the highest military authorities; but he should like to know who those authorities were. The Commander-in-Chief in India was by universal admission a very high military authority, yet it was notorious that he was utterly opposed to the scheme. If there were danger of combinations and disaffections amongst a local force, it would surely be less likely to spread over two armies differently constituted, and with different interests, than over one army. The noble lord cited the opinions of General Outram, Sir J. Malcolm, Sir Hugh Rose, and others in favour of maintaining an independent local army, and said that although Sir Charles Wood had appealed to the *dictum* of the Duke of Wellington in support of the opposite view, the fact was that all the noble duke had done was to recommend that the Company's army should be transferred to the Crown, and he had not said one word about its amalgamation with the forces of the Queen. With regard to the effect of the measure upon the army of the line, the scheme proposed would virtually employ 25,000 or 30,000 more troops of the line in India than heretofore; and as the force in the colonies could not be sensibly reduced (unless, perhaps, that at the Cape, which was extravagantly large), it followed that every officer and soldier would have to put in a longer term of service abroad, while the expense to the country would be enormously increased. But whatever the decision of the House would be, he for one should acquiesce in it, knowing well from experience that upon all questions of administration, the collective judgment of the House was generally wiser and sounder than that of individual members.

General Peel thought that the evidence on each side of the question was very equally balanced; but, after giving it the utmost consideration in his power, he felt bound to state that circumstances had led him to change the opinions he formerly entertained with regard to maintaining separate the Queen's and the Indian army. He should therefore give his warm and cordial support, not only to the motion before the House, but to the scheme suggested by the Government.

Colonel Sykes replied in detail to the statements made on a former evening by Sir Charles Wood in support of the measure, and recommended the Government not to persevere with the bill.

Mr. Peacocke was of opinion that the arguments in favour of one army acting under one impulse were not unanswerable. He was therefore in favour of a thorough and perfect amalgamation of the two armies.

Sir De Lacy Evans concurred generally in the observations which had fallen from Lord Stanley, and said that, in his opinion, the local army was in no way inferior to that of the Queen, and that no case had been made out to justify the proposed change. Sir De Lacy expressed his distrust of the Horse Guards' patronage.

After a few words from Captain Jervis, leave was given to bring in the bill, and it was read a first time.

COURT MARTIAL AT CHATHAM.

Last week a general court-martial commenced its sittings at Chatham for the trial of Captain Henry George Savage, commanding the 33rd company of Royal Engineers at Brompton Barracks. The following were the charges on which the prisoner was arraigned:—"First, for conduct unbecoming an officer, and to the prejudice of good order and military discipline, in the following cases:—1. For having at Brompton Barracks, on the 21st of May, 1860, knowingly sent in the morning state of the 33rd Company of Royal Engineers then under his command, addressed to Colonel Sandham his commanding officer, and also some passes for the men of his company, as well as an application for leave for himself, falsely signed with his name; the false signatures attached to the above documents having been affixed by Lieutenant Edward Harvey, Royal Engineers, by Captain Savage's directions. 2. For having at the same place failed to attend at the issue of bread and meat, at 7 o'clock, on the 21st of May, which it was his duty to have done as captain on duty for the week. 3. For having at the same place failed to attend at the quarter to 9 a.m. parade on the 21st of May, which parade it was his duty to have attended as captain on duty for the week. Second, for conduct unbecoming the character of an officer and a gentleman, and to the prejudice of good order and military discipline, in having at the same place falsely stated to Lieut.-Colonel Ross, Royal Engineers, on the 21st of May, on two separate occasions when questioned by that officer as to his reasons for absence from duty, as specified in the second instance of the first charge, that he did not know that he was on duty as captain of the week, he having been warned on the previous day, on two different occasions, that he was for duty as captain during the week, commencing 21st of May, and his name having also appeared on the previous day in regimental orders." The prisoner pleaded "Not guilty" to all the charges.

Digitized by Google

Colonel H. Jervis, commanding the 1st battalion, was President of the Court; Major W. L. Stewart, officiating as the Deputy Judge-Advocate. The Court was occupied during Friday and Saturday in taking the evidence adduced by the prosecutor, Lieut.-Colonel A. P. Ross, R.E., in support of the prosecution, the witnesses to be called to establish the charges on which the prisoner was arraigned being Colonel Sandham, director of the Royal Engineer establishment; Major Stopford, the adjutant; Captain Gordon, Lieutenant Harvey, and several non-commissioned officers. At the adjournment of the Court on Saturday the evidence adduced by the prosecutor was closed, and at the request of the prisoner a sufficient time was allowed him to prepare his defence. At the opening of the Court on Monday morning, the president called upon the prisoner to proceed with his defence, when Captain Savage at once rose and read a very able defence to the Court, in which he reviewed the whole of the evidence which had been brought forward on the part of the prosecution, exculpating Lieutenant Harvey, who had signed the papers and documents for the prisoner, that officer having acted entirely under his (prisoner's) orders, and giving a positive denial to the charges on which he was arraigned, in which it was alleged he had wilfully neglected his duty. After Captain Savage had concluded reading his address, which was listened to throughout with the deepest attention by the Court, a copy of his defence was handed to the deputy judge-advocate, to be appended to the proceedings. Several witnesses were called by the prisoner and examined for the defence, including Major Stopford, adjutant of the Royal Engineers, Major Thompson, a retired officer, and two other witnesses, the examination of whom occupied till two o'clock in the afternoon, when the court was cleared to enable the president and members to agree as to their finding, but the proceedings will not be known until they have been approved at head-quarters.

NAVAL COURTS-MARTIAL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It has always appeared that the organisation and perations of naval courts-martial are not of a nature, especially in the present state of the Navy, to give general satisfaction, and that the summary manner in which punishments are frequently inflicted at the will of one man is not quite right; and if they could be made to approximate more to the military code of laws, it would be more beneficial to the Service than the present course followed in the Navy. At present no officer can sit on a naval court-martial under the rank of commander, equivalent to that of major in the Army, so that a court-martial can only be composed of field officers. Now, in the Army, even in a general court-martial, there may be a proportion of subalterns; why, therefore, should naval lieutenants be excluded, who hold the relative rank of captains in the Army, from taking their share in these duties?

The courts-martial in the Navy are all what we soldiers call "General Courts-Martial," and they, unlike ours, at once pass sentence without further deliberation or consultation; so that a prisoner has no chance of his sentence going before another party for approval and confirmation. How frequently it happens in the Army that the general or other officer who orders the court, and necessarily approves of the proceedings, discovers some flaw or irregularity in them, for which he revises the court; and they sometimes see that he is right, and alter or amend their opinion accordingly? Now poor Jack has no chance of this, but at once receives his sentence instead of its going before a cool and disinterested person, of the highest rank, who carefully peruses the documents, and approves, or otherwise, as he may see fit. He can of course only revise a court once, but at any rate that gives them time to reconsider the opinions they have formerly given when they are cool and have had further time to consider the sentence at their leisure; not that we would accuse any court of giving a sentence which has not been duly weighed and considered; yet there is sometimes a certain degree of excitement during the sitting of a court, arising from stupid witnesses, prevarication, and other things, that perhaps it would be better if sentence was not passed till the day following at least, after all the evidence on both sides had been carefully gone through and read over again. This rule would hold good in both services—Army and Navy.

The general rules for proceedings in naval courts-martial might be easily approximated to those of the Army, in the following manner, viz.:—

For the trial of commissioned officers, and the more serious crimes of all ranks, the court should be ordered by the admiral or other officer in command of the station to which a ship should belong, and be composed of commissioned officers not below the rank of lieutenant. Of course surgeons, paymasters, and all the non-combatant officers, would not perfom this duty. This court would be equivalent to the military general court-martial, and the proceedings would have to be laid before the admiral or officer ordering the court to assemble, for his perusal and approval, before the sentence could be carried into execution.

For minor offences on board ship, the captain might order a court-martial, and approve and confirm it in his own ship, the next senior officer sitting as president, and the court composed of commissioned officers, never less than two besides the president. In cases which do not involve matters relating to the navigation, or solely on nautical affairs, the marine officers might sit as members according to their rank and date of commission, as in cases of insubordination, or other irregularity, and especially where a marine is tried, he should, unless a prosecutor, be always a member.

This would be equivalent to a regimental court-martial. In small vessels where there might not be sufficient commissioned officers to form a court martial, then an officer or officers might be borrowed from another ship to make up the quota. The commanding officer of the ship never to be president. No doubt it would be more satisfactory to a sailor, before he was punished, to know that he had got a fair trial before his officers, on their oaths bound to administer justice, and that all the witnesses are likewise put on their oaths; and also that he has the power to bring witnesses on his behalf, perhaps to refute what may have appeared on the prosecution. Certainly these proceedings would make him feel that he was not punished in a hasty manner, or under irritation or excitement, but has had a cool and deliberate trial. No seaman or marine should receive corporal punishment, be disrated or reduced from his rank, without being duly tried and condemned by a court-martial. For minor crimes, minor punishments at the discretion of the commanding officer may be awarded; but for certain crimes, such as mutiny, desertion, habitual drunkenness, and others, a court-martial should always be assembled to investigate. Of course, should anything of this kind be adopted, proper and competent persons will be appointed to carry out the measure, but it must appear evident, that, considering the present state of naval affairs, some alteration in the code of laws now existing for the government of the Navy would tend to ameliorate that service, for when everything else around is changing, why should there not be some investigation into this very interesting branch?—almost anything would be an improvement on the old system which has been carried on with very little change since the days of our forefathers.—I am &c. C. S.

DEPOT *v.* SECOND BATTALIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I well remember when it was considered absolutely necessary to strengthen our home defences against the threatened invasion by France in the year 1806; at that time a 2nd battalion was added to every regiment of the Line. These battalions soon became so effective as to enable the Government to employ them, not only for home defences and the Channel Islands, but subsequently in the Peninsula, where they signalised themselves in battles and sieges, that enabled the late Duke of Wellington often to declare in his despatches, that with such troops he felt he was more than a match for his enemies.

These 2nd battalions were kept up by ordinary recruiting and volunteers from the militia, and were feeders to the ranks of the 1st battalions of well-trained, seasoned men, as drafts were required. How, may I ask, are the 1st battalions now to be effectively kept to their strength from depôts? Certainly not of soldiers practised to every kind of duty and service as formerly from 2nd battalions. There is no such thing as an *esprit du corps* in depôts, either by officers or men; the contrary does exist in 2nd battalions. In them one and all possess that *esprit du corps* so essential to the general welfare of the regiment and the service at large. Depôts may be resorted to in time of general peace, on dissolution of 2nd battalions, but (as a very old soldier), I contend for it they are worse than useless in time of war, or of approaching war, and should not be relied on as a means of home defence. Second battalions form a steady, compact body, easy to be moved at the shortest notice. Not so depôt battalions, consisting of a confused mixture of several portions of regiments, having no particular interest in each other.

With regard to expense, I verily believe that depôts are found to be more expensive than 2nd battalions. In the year 1804-5 the Channel Islands were garrisoned by 2nd battalions, and I remember well were under arms every morning an hour before daybreak, and not dismissed until an hour after sunrise; this watchful habit, with training under canvas, soon prepared them for more active service in the Peninsula, where they attained such honours as were awarded by the thanks of Parliament, together with medals for the battles they had been engaged in, and now emblazoned on the colours of their respective regiments. Under all the circumstances I am fully convinced that depôts are not a source of strength for home or other service, but that 2nd battalions would be at all times available for every service, and a credit to themselves and their country.—I am, &c.

A VERY OLD RETIRED OFFICER.

CAP-PEAKS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I venture to differ with "Ex-Hussar" touching the peak to the dragoon forage-cap. He says that the peak invariably lasts longer than any other part of the cap, and can even be put to a new one when the original cap is worn out. This, with all due apologies, I beg to deny. That leather, as a material by itself, is more durable than cloth I am ready to allow, but the gold wire or thread which forms the ornament to the peak is sewn through and through it, and cannot be renewed when soiled; and by the mere handling that it necessarily meets with in putting the cap on, or taking it off, this thread speedily becomes tarnished, and is the first part of the cap which loses its good looks, independently of the grease which will work its way into the leather from the hair and the perspiration of the forehead. Now, the lace on the top of the cap can at any time be renewed, and the band can not only be renewed, but will bear turning; and thus the cap, setting aside the peak, will be nearly as good as new. I have a cap by me now, the cloth of which will wear and look well for some time longer if I have the band and lace on the top renewed. "Ex-Hussar" says that most of your readers, save perhaps a few Light Dragoons, will agree with him in preferring a peak to no peak. I can only say, that I have been lately quartered with a regiment of the Line (2nd battalion newly raised), and in which there are many officers who have been appointed from other regiments, and a great part, if not the greater part of whom, have served in India and elsewhere abroad, and in course of conversation with them on the subject of peak or no peak, —which seems to be a topic of some little interest to all branches of the Service just now,—I find that almost without exception they would be delighted if the "Peak Removal Movement" extended to them also; so that taking one infantry regiment as a fair example of the whole body, I fancy I should have the Line on my side, as well as the Light Dragoons. I am, &c. LIGHT DRAGOON.

Mr. Lindsay moved and carried against the Government on Tuesday night a resolution to the effect that, it was the duty of Her Majesty's Government to adopt at the earliest possible period the necessary measures to carry into effect the recommendation of the commissioners appointed in 1858 to inquire into the formation of harbours of refuge on the coasts of Great Britain and Ireland.

AUSTRIA.—Lieutenant Field-Marshal Count Thun has transferred his head-quarters from Padua to Venice, and the Prince of Hesse has transferred his from Treviso to Padua.

Obituary.

Time is making sad havoc among the gallant fellows who fought with "Nelson, Howe, and Jervis." Week after week have we the melancholy task of recording the departure from among us of some familiar name. We have now to announce with deep regret the death of one who belonged to a fighting family, and who, although a civilian, was always as ready with his sword as with his pen. We allude to John Elliot (as he was familiarly called), late steward of Greenwich Hospital, who died on Saturday last. Mr. Elliot was brother to the late Captain Sir William Elliot, of the Navy, and like him had seen some service in his time. In 1798 Mr. Elliot was serving as a midshipman in the Mars, 74, Captain Hood, in her gallant night action and capture of the Hercule, 74, on the coast of France. He was captain's clerk of the Russell, 74, at Copenhagen, with Lord Nelson; and purser with the late Sir Charles Brisbane at the taking of Curaçoa, with a squadron of four frigates; he was also in the Arethusa at the capture of a Spanish frigate. Mr. Elliot was considered one of the fighting pursers of his day, ever ready for a cutting-out party or a boating expedition. He was secretary to Admiral Plampin at St. Helena, and on the Irish station, and also to Sir Edward Codrington. In 1841 he was appointed agent victualler at Haulbowline, and afterwards storekeeper at Deptford Victualling Yard, and in 1850 transferred to Greenwich Hospital as steward in the place of Mr. Jessep, R.N. The appointment thus vacant is at the disposal of the First Lord of the Admiralty. We would respectfully suggest to the Duke of Somerset the excellent plan adopted by Sir John Pakington on the occasion of filling up the office of Comptroller of Victualling for the Navy. Sir John had been besieged by applicants who had been useful to his party, and by others, who, although not belonging to it, still contrived to bring "interest" to bear upon him. Sir John was perplexed; and, to escape from this dilemma, took up the Navy List, and guiding himself by an inspection of the names of the pay masters, a fitting man was selected to occupy the vacant situation. If the precedent is adopted on the present occasion there will be no fear of an unworthy man being the successor of John Elliot. The emoluments are of a character that would be most acceptable to an old officer. They are in addition to half-pay, 500*l.* per annum, a comfortable residence, and, among other privileges, that of obtaining provisions at contract prices.

General Sir Robert John Harvey died on Monday evening at his residence, Mousehold House, near Norwich. The death of the gallant officer causes a vacancy in the colonelcy of the 2nd West India Regiment. Sir Robert Harvey entered the army 57 years since, his commission as ensign being dated October 8, 1803. His successive promotions bore date as follows:—Lieutenant, March 24, 1804; captain, Jan 2, 1806; major, July 25, 1811; lieut.-colonel, June 21, 1813; colonel, July 22, 1830; major-general, Nov. 23, 1841; lieut.-general, Nov. 11, 1857; and general, Jan. 17, 1859. Sir Robert, who was appointed to the colonelcy of the 2nd West India Regiment in June, 1848, served as assistant-quartermaster-general of the British and Portuguese armies in Portugal, Spain, and France, from 1809 the close of the Peninsular war in 1814, and was present a the passage of the Douro, at the sharp action of Busaco, t the terrible second siege and storming of Badajoz, at th siege of Ciudad Rodrigo and Burgos, and at the battles of Salamanca, Vittoria, the Pyrences (where he was slightly wounded), Nivelle, Nive, Orthes, and Toulouse. From 1809 to 1811 he was employed in procuring intelligence of the enemy's movements in advance of the army, in organising nine Portuguese guerilla corps (the officers of which presented him with an elegant sword in testimony of his services with them), and in resisting the attempt of the enemy to pass the Tagus at Chamusca. From 1811 to 1814 he was the organ of communication between the Duke of Wellington and the Portuguese troops. Sir Robert received the gold medal for the battle of Orthes, the silver Peninsular medal with nine clasps, and was also a Commander of St. Bento d'Avis, and Knight of the Tower and Sword of Portugal.

We have to record the death of General John Mackenzie, the oldest officer in the British Army, who expired on Thursday week at his house in Academy Street, Inverness, in the 97th year of his age. General Mackenzie was born the 19th of December, 1763. He was the second son of Sir Alexander Mackenzie, of Gairloch, who succeeded to the title and estates in 1766, and died in 1770, having been killed by a fall from his horse. The deceased general entered the Army in his 15th year as lieutenant of the 73rd Foot, and in 1782 rose to be captain. On the formation of the 78th Highlanders, or Ross-shire Buffs, in 1793, he obtained the appointment of captain, and in two more years he rose to be major and lieut.-colonel. He served in the campaigns on the Continent, including the several actions on the Waal and the Rhine, in 1794 and 1795. He afterwards served in Sicily, India, and Spain. In 1802 he attained the rank of brevet-colonel, in 1809 that of major-general, and in 1814 lieut.-general. In 1837 he became a general officer. The deceased was married to Lilias, daughter of The Chisholm, by whom he had one son, Mr. Alister Mackenzie, who died a few years ago as Receiver-General at Melbourne, in Australia. General Mackenzie retained his faculties to the close of his long life, and continued to take a warm interest in passing events. In October last, when the 78th Regiment was publicly received in Inverness, and was marching through the town, General Mackenzie stood at his door to congratulate the men, and, by command of Colonel Mackintyre, the regiment gave three hearty cheers for their venerable brother soldier.

Fitz-Thomas Goldsworthy, Lieutenant in the late 72nd Regiment of Bengal N.I. (who died on board the ship Surrey on the 2nd April, 1860, aged 31 years), was a young and promising officer. His death has added another name to that long list of British heroes who have lost their lives by the hardships of the duties imposed on military men engaged in the suppression of the Sepoy rebellion. Lieutenant Goldsworthy was at the siege of Mooltan, and during 1857 and 1858 was continually on active service. He was present at the relief, and also at the final capture, of Lucknow, and the taking of Cawnpore, &c., &. As a mark of respect and gratitude, this energetic young officer

Digitized by Google

was presented with a handsome silver inkstand, bearing the following inscription:—"Presented to Fitz-Thomas Goldsworthy, Esq., Deputy-Assistant-Commissary-General, at Head Quarters, by the members of the Head Quarters Staff Mess of Lord Clyde's army, during the campaign of 1858 and 1859." There were few young men more truly beloved than Lieutenant Goldsworthy in the Indian army. On service, midst all the bustle and hurry of marching, this officer ever retained his equanimity of temper, and was ever ready to assist all who applied to him. Those who are aware of the duties of the Staff Commissariat, under the immediate eye of such an active commander as Lord Clyde, will be able to appreciate the services of poor Tom Goldsworthy. In camp, in mess, at home, or abroad, this young officer was ever the same—a kind and good man, and a brave soldier. He was the most kind and exemplary husband, and has left a fond wife and a son, together with numerous relations and sincere friends, to lament his loss. There is not the least doubt that the constant anxiety of mind, and the bodily fatigue during the mutiny, caused his premature death.

We regret to announce the death of Mr. George F. C. Bateman, paymaster of Her Majesty's ship Neptune, which lately took place at Malta. Mr. Bateman's seniority was of the year 1847.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Bartlett—March 2, at Auckland, New Zealand, the wife of Henry Bartlett, Esq., Assistant-Commissary-General, of a daughter.

Bowlby—June 16, at Canterbury, the wife of Major Bowlby, 64th Regiment, of a son.

Bunny—June 16, at the residence of her father, 51, Cleveland Square, Hyde Park, the wife of Major Arthur Bunny, Bengal Artillery, of a son.

Clephane—June 19, at Portobello, N.B., the wife of Lieut.-Colonel Clephane, late 79th Highlanders, of a daughter.

Cockburn—June 10, at the Rectory, Bildestone, Suffolk, the wife of Captain Cockburn, R.N., of a daughter.

Dale—May 13, at Bareilly, the wife of Alfred Jas. Dale, Esq., Assistant-Surgeon 12th Irregular Cavalry, of a son.

Dames—June 16, at Plumstead, Woolwich, the wife of Captain T. Longworth Dames, Royal Artillery, of a son.

Drummond—June 16, at Old Charlton, Kent, the wife of J. Drummond, Esq., late 10th Hussars, of a son.

Farquhar—June 13, at 5, Adelaide Crescent, Brighton, the wife of Captain Arthur Farquhar, H.M.S. Hannibal, of a son.

Graves—June 18, at Hastings, the Hon. Mrs. Adolphus Graves, of a son.

Griffin—June 17, the wife of Captain C. Lewis Griffin, 45th Regiment, of a son.

Hore—May 10, at Bermuda, the wife of F. Standish Hore, Esq., 39th Regiment, of a son.

Manners——June 17, at 3, Hamilton Place, the Lady Adeliza Manners, of a son.

Penrhyn—June 20, at East Sheen, Surrey, the wife of Captain Leycester Penrhyn, of a daughter.

Pollard—June 14, at Scarr Hill, the wife of Captain Pollard, Adjutant 4th West York Regiment, of a daughter.

Sherson—June 20, at 23, Thurloe Square, the Lady Anne Sherson, of a son.

Shervinton—June 16, at Woolwich, the wife of Major Shervinton, Unattached Brigade-Major, Military Train, of a daughter.

Sisted—May 9, at Umballa, the wife of Major T. H. Sisted, 7th Hussars, of a son.

Tighe—June 17, at Portugal Street, Grosvenor Square, Lady Kathleen Tighe, of a son.

Walton—June 18, at 10, Westbourne Place, Eaton Square, the wife of Major Walton, 38th Regiment, of a daughter.

Williams—June 16, at Sandgate, Kent, the wife of Major-General W. Freke Williams, K.H., commanding Infantry Brigade, Shorncliffe, of a son.

Wilson—June 19, at Lee, Blackheath, the wife of Captain John J. Wilson, Royal Engineers, of a daughter.

MARRIAGES.

Badham—Fitzpatrick—June 19, at St. Alphage, Greenwich, by the Rev. John Hurnall, M.A., incumbent of Egginton, Bedfordshire, brother-in-law of the bridegroom, assisted by the Rev. Charles Woolls, M.A., uncle of the bride, Edward James, son of the late Charles Badham, M.D., F.R.S., and grandson of the late Vice-Admiral Sir Edward James Foote, K.C.B., to Harriette Jane, fourth daughter of the late Mathew Fitzpatrick, Esq., of the Queen's County, formerly of Her Majesty's 39th Regiment.

Barrett—Hasby—June 14, at St. George's, Stonehouse, Devon, by the Rev. W. H. Nantes, Richard B. Barrett, Esq., of the Admiralty, Somerset House, to Elizabeth, eldest daughter of John Hasby, Esq., of Stonehouse, Devon.

Cooke—Dicker—June 21, at St. John's, Ramsay Cooke, R.N., second son of Lieutenant Dilk Cooke, and nephew of Admiral J. Cooke, to Elizabeth Howard Dicker, niece of General Donald Campbell, R.M., Southsea, Hants.

Bashford—Fryer—June 14, at Wimborne Minster, by the Rev. W. F. Witts, Fellow of King's College, Cambridge, and the Rev. H. P. Cookesley, B.A., Charles Brome Bashford, Esq., 9th Royal Lancers, eldest son of W. C. L. Bashford, Esq., of Norwood Park, Middlesex, to Anne Argentine, youngest daughter of the late John Fryer, Esq., of Wimborne Minster, Dorsetshire.

Elwes—Stewart—June 21, at St. James's, Piccadilly, by the Rev. C. D. Stewart, uncle of the bride, Cary Charles Elwes, of Great Billing, in the county of Northampton, Esq., to Caroline Henrietta, second daughter of Major Stewart, of Fareham, Hants, and formerly of South Ockendon Grange, Essex.

Fane—Thornhill—June 21, at St. Stephen's Church, Paddington, by the Hon. and Rev. A. Byron, John Augustus, eldest son of Lieut.-Colonel and the late Lady Ellen Fane, of Wormsley, Oxfordshire, to Eleanor, daughter of the late Thomas Thornhill, Esq., of Woodleys, in the same county.

Fothringham—Carnegie—June 16, at St. George's', Hanover Square, by the Rev. Samuel Lysons, of Hempstead Court, rector of Rodmarton, Glocestershire, uncle of the bride, Thomas F. Scrymsoure Fothringham, Esq., of Fothringham and Powrie, in the county of Forfar, to the Lady Charlotte Carnegie, daughter of the late Sir James Carnegie, Bart., and sister of the Earl of Southesk.

Goode—Leacock—June 13, at St. George's Church, Clifton, by the Very Rev. the Dean of Ripon, uncle to the bridegroom, assisted by the Rev. W. Sealy, M.A., uncle to the bride, Major W. Goode, 64th Regiment, son of Henry Goode, Esq., of Ryde, Isle of Wight, barrister-at-law, to Sarah, only child of G. B. Leacock, Esq., and grand-daughter of Henry Sealy, Esq., of 29, Berkeley Square, Clifton.

Heyward—Jones—June 14, at Aberdovey, Merionethshire, J. H. Heyward, Esq., barrister-at-law, and Captain Royal Montgomeryshire Rifles, to Elizabeth, eldest daughter of the late John Jones, Esq., of Crosswood, Montgomeryshire.

Nunn—Houghton—June 14, at Dursley, Glocestershire, by the Rev. Thomas Harvey, uncle of the bridegroom, assisted by the Rev. G. A. M. Litle and the Rev. G. F. Clarke, William H. Nunn, Esq., of Wolverhampton, Berks, to Sophy Caroline, youngest daughter of Richard R. Houghton, Esq., late Major of the 73rd Regiment.

Robison—Mair—June 6, at South Bersted, Sussex, by the Rev. J. N. Palmer, uncle to the bride, assisted by the Rev. E. Eedle, vicar of Bersted, Captain Hugh G. Robison, H.M.'s 3rd Bombay European Regiment, to Mary Maria, eldest daughter of Lieut.-Colonel Mair, of Hothampton Place, Bognor, Sussex.

Withington—Wentworth—June 19, at Woolley Church, by the Rev. Digby Wrangham, cousin of the bride, Captain Withington, 7th Dragoon Guards, second son of the late Thomas Ellames Withington, Esq., of Culcheth Hall, Warrington, to Catherine Mary, youngest daughter of Godfrey Wentworth, Esq., of Woolley Park, near Wakefield.

DEATHS.

Adams—June 20, Grace Eleanor Josephine, the infant daughter of Major Adams, R.M. College, Sandhurst.

Anderson—June 19, at Edinburgh, Andrew Anderson, M.D., formerly Surgeon in H.M.'s 92nd Highlanders.

Barbar—June 7, at Naples, of fever, Lewis John Barbar, Esq., H.B.M.'s Consul at Canea, aged 37.

Boates—June 21, in London, of scarlet fever, Caroline, widow of the late Lieut.-Colonel Henry Ellis Boates, of Rosynalt, Denbighshire.

Brebner—April 22, at Kamptee, aged 20, Lieutenant Charles Napier Gordon Brebner, 4th Madras Light Cavalry, fourth son of James Brebner, Esq., advocate, Aberdeen.

Coulson—Accidentally drowned off Gibraltar, where he was serving with his regiment, Captain George Bell Coulson, 100th Regiment, aged 21.

Dames—April 15, on board the King Phillip, on his passage home, two days before reaching the Cape, of disease of the liver, Lieutenant G. F. Longworth Dames, 37th Madras N.I., eldest son of the late Captain G. Longworth Dames.

Delme—June 14, at Paris, Mary, widow of Lieut.-Colonel Delmé.

Goldsworthy—April 2, at sea, on board the ship Surrey, Lieutenant Fitz Thomas Goldsworthy, late of the 72nd Regiment Bengal N.I., and Brigade-Major at Lucknow, aged 31.

Grantham—June 18, at 13, Campden Grove, Kensington, Major-General Grantham, late of the Royal Artillery, aged 73.

Harvey—June 18, at his residence, Mousehold House, near Norwich, General Sir R. J. Harvey, C.B., K.T.S., Knight Commander of the Order of St. Bento D'Avis, F.R.S. and F.A.S., aged 74.

Hoare—June 15, at Tyringham, Bucks, aged 71, Elizabeth, widow of the late Captain Richard Hoare, R.N., and daughter of the late William Praed, Esq.

Liot—June 18, of apoplexy, aged 53, at No. 9, Fitzroy Terrace, Glocester Road, Regent's Park, Captain W. B. Liot, formerly of Tottenham, and late Chairman of the Board of Management of the Royal Mail Steam Packet Company.

Macdonald—June 15, at Brompton, Chatham, Kent, Major James Macdonald, late Paymaster of East India Depôts, aged 85.

Margesson—June 14, at 4, Green's Row, Chelsea, Philip Davies Margesson, Captain Royal Artillery, F.R.G.S., fourth son of the Rev. W. Margesson, aged 33.

Mends—May 11, at Barbadoes, after a few days' illness, William Fisher Mends, Esq., Deputy-Commissary-General of H.M.'s Forces.

Obbard—April 24, at Ormrapore, East Indies, of cholera, Edward Kelly Obbard, Lieutenant 91st Regiment, aged 22, youngest son of Robert Obbard Esq., of the "Paragon," Blackheath.

Perrott—June 15, at Plumstead, Kent, Dame Louisa Augusta Perrott, widow of Sir E. Bindloss Perrott, Bart., third daughter of the late Colonel N. Barly, M.P., formerly of the 1st Foot Guards (Grenadiers), and the R.W.M.M., aged 81.

Pollexfen—June 12, on his way home on board the P. and O. steamer Massilia, Captain J. James Pollexfen, of 15th B.N.I. Regiment.

Royse—June 21, at 13, Castlewood Avenue, Rathmines, Lieutenant Royse, R.N., third son of the late Thomas Henry Royse, Esq., D.L., Nanteman House, county Limerick.

Sinclair—June 14, at Stevenson, Haddington, Anne Elizabeth, eldest daughter of Vice-Admiral Sir John Gordon Sinclair, Bart.

Stuart—June 13, at 14, Oxendon Street, Haymarket, Captain Richard Stuart, R.N., aged 78.

West—June 16, at Plymouth, Ellen Maud, the beloved child of Captain W. H. H. West, Royal Marines (Light Infantry), aged 1 year and 7 months.

ARMY MEDICAL OFFICERS AND THEIR PRESENT POSITION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Well knowing that the columns of your paper are ever open to assist the oppressed, permit me to draw your attention, and at the same time, perhaps, that of the authorities, more especially the present Minister for War, to the slur that has been thrown on the Commission for the improvement of the Army Medical Department, held during 1857, and of which (commission) he (Mr. Herbert) was the energetic and indefatigable president.

That commission, after much trouble and prolonged labour, gave birth to an offspring, in the form of a "Blue-Book," recommending sundry and necessary changes to be made, with regard to the position and pay of army medical officers.

On the 1st of October, 1858, a royal warrant was promulgated, embodying some of the principal recommendations of the commission, omitting, however, to the non-professional person, a few apparently trifling ones; but in the eyes of the army medical officers, the most important recommendation. Vide page lxxii., Blue Book, containing the "Report of Commissioners on Organisation of Military Hospitals," &c., where the following will be found:—

"Our attention has been called to other and minor points in which the army medical officers consider themselves aggrieved, as regards rank and precedence.

"For example, in the Army List, the medical staff is placed in the list of each regiment after the other members of the regimental staff, though the relative rank of the surgeon is always higher than that of the adjutant, the quartermaster, and the riding-master, and frequently than that of the paymaster. Again, in the General Army List, the department is placed after others, which though most important and respectable in themselves, can scarcely be held upon an equality with a scientific profession which stands justly high in every civilized society, &c. Small, therefore, as these matters may appear, still they are taken as indications of the degree of respect with which the government regards the medical department, and of the estimation in which it is intended by them that its officers should be regarded by others. We recommend that in the Army List, the Medical Department should have precedence of the Commissariat, and that their names, the army medical officers, should appear according to their rank, with the date of their commission in the list of the regimental staff, and that the whole regimental staff shall be placed before the list of captains."

I need scarcely add, that not *one* of the above quoted recommendations has been carried out. And now that Mr. Sidney Herbert is in office, surely it is a fitting opportunity for him to carry out his (and his brother commissioners') recommendations. I can assure you, sir, that the omission of not doing so has caused not a small amount of heart-burning amongst the officers of this department; which department is second to none other. Civilians constantly say, "Oh! surgeon: why you can hardly call them belonging to the regimental staff, when their names are at the bottom of the list of the officers of the regiment."

Do try and do away with the opinion of the public (on our anomalous position), who seem to consider us, more in the light of an appendage (caudal in every sense) than (as we really are) an integral portion of the regiment.

This boon could be granted so easily, no expense entailed, and a certainty of giving satisfaction to *all* medical officers; and which would, most decidedly make up in a great degree, for the many sins, both of omission and commission, of the falsely be-lauded warrant of 1st October, 1858.

Apologising for having trespassed so far on your limited (but kindly afforded) space,—I am, &c.,

Nil Desperandum E.T.

Advertisements.

CRYSTAL PALACE.—June 25, 26, and 28.—GREAT FRENCH MUSICAL FESTIVAL, by 3000 performers.—This great combination of the French Choral Societies, comprising deputations from nearly every Department of France, representing 170 distinct Choral Societies, and numbering between 3000 and 4000 performers, conducted by M. Eugene Delaporte, President de l'Associationdes Sociétés Chorales de Paris, will visit England expressly to hold a Great Musical Festival at the Crystal Palace on the above days. The Band of the Imperial Regiment of Guides will accompany portions of the vocal music, and perform a selection of the most admired pieces of their repertoire each day. M. Edouard Batiste, the organist of Saint Eustache, Paris, will preside at the organ.

Admission by single day tickets, bought before each day, 5s.; by payment on the day, 7s. 6d.; reserved stalls, in blocks, arranged and numbered as at the Handel Festival, 5s. extra; a limited number of stalls will also be reserved in the transept galleries at half-a-guinea each; sets of transferable tickets (one admission to each of the three performances), 12s. 6d.; sets of reserved seats, 12s. 6d. extra; or if in the galleries, 25s. These tickets are now on sale at the Crystal Palace; at No. 2, Exeter Hall; at the Agents' of the Company; or by order at the music-sellers' and libraries in London and the principal towns as at the Handel Festival. Cheques or P.O. orders (the latter payable at the chief office), should be made payable to George Grove, Esq. The Palace will open at Twelve, and the performances will commence each day at Three o'clock.

Notice.—The leading railway companies north of London will issue return tickets over their lines, available from the 23rd to the 29th June. Other railway companies will run excursion trains, of which they will give due notice.

CRYSTAL PALACE.—BAND OF THE GUIDES.—By the gracious permission of the Emperor of the French, this celebrated Band will accompany the Orphéonistes to England, and take part in the performance on the 25th, 26th, and 28th June.

FRENCH FESTIVAL, MONDAY NEXT.—FIVE SHILLING TICKETS.—The Crystal Palace and Exeter Hall Offices will REMAIN OPEN for the sale of tickets of admission at Five Shillings each, or for Reserved Seats, up to NINE o'Clock THIS EVENING, Saturday.

CONTRACTS FOR SUGAR, COCOA, AND WHEAT.

Department of the Comptroller for Victualling and Transport Services,

Somerset House, 15th June, 1860.

THE COMMISSIONERS for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, do hereby give notice, that on MONDAY, the 2nd JULY next, at half-past One o'clock, they will be ready to treat with such Persons as may be willing to Contract for supplying and delivering into Her Majesty's Victualling Stores at DEPTFORD, the undermentioned Articles, viz.:—

SUGAR, 300 Tons.
COCOA, 150 ,,
WHEAT, 3000 Qrs.
} When to be delivered:—Half of each in Three Weeks, and the remainder in Three Weeks afterwards, or earlier if preferred by the party tendering.

Tenders may be made for the whole or any portion of the Articles.

Their Lordships reserve to themselves the power, when the Tenders are opened, of contracting either for the whole, or for such part thereof only as they may deem fit, or for a greater quantity, or of not contracting for any, and also an unlimited power of selection.

The Sugar and Cocoa, to be exempted from the Customs' Duties, and parties tendering are to state where they are respectively lying.

Samples of the Cocoa (not less than Two Pounds) and of the Wheat (not less than Two Quarts) must be produced by the parties tendering.

Each Tender for Sugar must specify the mark and landing number of each cask or package, the ship in which imported, and the country or place of its growth or produce, and an average sample (not less than two pounds for each import mark) must be produced by the parties tendering, and not an average of different marks or several imports, and any parcel that is found not to be of the same mark or average quality as the sample tendered and accepted, will be rejected by the officers.

The samples produced by persons whose tenders are not accepted, are requested to be taken away by them immediately after the contract has been decided.

No Tender will be received unless made on the printed form provided for the purpose, and which may be obtained on application at the said office, or to the Officer conducting the Packet Service at Liverpool, or to the Collector of Customs at Bristol.

Particular attention is called to the recent modification of the Conditions of the Contracts, which may be seen at the said office, and at Liverpool and Bristol.

No Tender will be received after half-past One o'clock on the day of treaty; and it will not be required that the party tendering, or an agent on his behalf, should attend at the office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every Tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for ," and must also be delivered at Somerset House.

NATIONAL RIFLE ASSOCIATION.—PATRON.

His Royal Highness the PRINCE CONSORT.

PRESIDENT.—The Right Hon. SIDNEY HERBERT, M.P.

The FIRST PRIZE MEETING of the National Rifle Association will take place on Wimbledon Common, in the county of Surrey, on MONDAY, JULY 2 NEXT.

Among the Prizes offered for competition will be Her Majesty's Prize of £250, for Volunteers; H.R.H. the Prince Consort's Prize of £100, for all-comers of all nations; H.R.H. the Duke of Cambridge's Prize of £50, for breech-loading rifles; with one Gold and one Silver Medal, presented by the Association.

Noblemen and gentlemen desirous of becoming members of the above Association, and of assisting its objects by donations, &c., are requested to communicate with the Secretary, 11, Pall Mall East, S.W., from whom all particulars may be obtained. Annual subscriptions, £1 1s.; life subscriptions, £10 10s. Subscriptions and donations will also be received by Messrs. RANSOM, BOUVERIE, & Co., bankers to the Association, 1, Pall Mall East, S.W.; Messrs. COUTTS & Co., 59, Strand, W.C.; Mr. SAMS' Royal Library, St. James's Street, S.W.; and WRIGHT & Co., Booksellers and Stationers, 60, Pall Mall, S.W.; where may be had the rules, bye-laws, and Regulations of the Association, price 6d.

EDMOND H. ST. JOHN MILDMAY, Secretary.

Offices, 11, Pall Mall East, S.W.

NATIONAL RIFLE ASSOCIATION.—THE MEMBERS OF VOLUNTEER CORPS intending to compete at the Wimbledon Meeting must APPEAR in the UNIFORM of their respective corps.

By order of the Council of the Association.

EDMOND H. ST. JOHN MILDMAY, Secretary.

Offices, 11, Pall Mall East, S.W.

NATIONAL RIFLE ASSOCIATION.—The Council of the National Rifle Association propose to set apart a large tent for the EXHIBITION OF SPECIMENS OF MODELS OF FIREARMS AND CANNONS of novel construction.

These must all be placed and arranged in the tent by NOON of MONDAY, the 2ND OF JULY.

Every precaution will be taken by the Council, but they cannot hold themselves responsible for the safe custody of such specimens or models, and they rely on the exhibitors to look after their own property.

EDMOND H. ST. JOHN MILDMAY, Secretary.

Offices, 11, Pall Mall East, S.W.

STATUTORY NOTICE TO CREDITORS.—Major GEORGE BULKELEY TATTERSALL, Deceased.—Pursuant to an Act of Parliament made and passed in the 22nd and 23rd years of the reign of her present Majesty, cap. 35, intituled "An Act to further Amend the Law of Property, and to Relieve Trustees," NOTICE is HEREBY GIVEN, that all persons having or claiming to have any DEBTS or CLAIMS against the ESTATE of GEORGE BULKELEY TATTERSALL, late of No. 13, Shaftesbury Crescent, Pimlico, in the county of Middlesex, and late a Major in the Ceylon Rifle Regiment, deceased, who died on the 21st day of February, 1860, and whose will was proved on or about the 14th day of June, 1860, in the Principal Registry of Her Majesty's Court of Probate, by Frederick Webb Pettigrew, of No. 9, Belgrave Road, Pimlico, and Richard James Wilmot, of No. 19, King Street, Covent Garden, both in the said county of Middlesex, Esquires, the Executors named in the said will, are REQUIRED, on or before the 31st DAY OF AUGUST NEXT, to send in to the said executors, at the office of their solicitor, Mr. Arthur Bingham Trevenen, situate at No. 8, Danes Inn, Strand, London, the particulars of their respective debts or claims upon or against the said estate, with the nature and particulars of their securities, if any. And Notice is Hereby further Given, that after the said 31st day of August next the said Executors will be at liberty to distribute the whole of the assets of the said deceased among the parties entitled thereto, having regard to the claims (if any) of which they shall have had notice, and will not be liable for or in respect of the assets so distributed, or any part thereof, to any person of whose claim they shall not then have had notice.—Dated this 16th day of June, 1860.

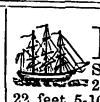
Stalls, 3s.; area, 2s.; gallery, 1s. Box office open from Ten till Five.—Secretary, W. H. EDWARDS, St. James's Hall, Piccadilly, W.



FOR SALE, or TIME CHARTER, the beautiful new A 1 iron Screw Steamer COLONIST, *pro. tem.* 351 tons O.M. 236 tons register. Length 165 feet; breadth 22 feet 5-10ths; depth of hold 12 feet 9-10ths; built this year, by the well known firm Messrs. Denny & Rankin, under special survey, and classed A 1 at Lloyd's for nine years. Her engines (by Messrs. John Jones & Son) are direct acting, of 60 horse-power nominal, and combine all recent improvements; has tubular boilers, fitted with superheating apparatus; also a donkey engine. Capacity of coal bunkers, 50 tons. She steams 9¼ knots on a remarkably light consumption of fuel, being 2¼ lb. per indicated horse-power, or about 7 cwt. per hour; carries a large cargo on a light draught of water, and is admirably adapted for bar harbours, or where light draught is necessary. The cabin accommodation is complete for thirty-six passengers; on inspection will be found a most desirable vessel; she is quite ready for sea: now lying in the Clarence Dock.—For inspection apply to the owners, Messrs. JOHN JONES & SON, Engineers, or to CURRY, KELLOCK, & Co., Brokers, Liverpool.

FOR SALE.—The undermentioned STEAMERS.

SCREW.—1200 tons, builders' measurement; now building, to class twelve years A 1, with engines of 175 horse-power, with all recent improvements; speed twelve to thirteen miles per hour. Dimensions:—Length, 260 feet; breadth, 32 feet; depth, 20 feet.

SCREW.—700 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines, with all recent improvements, of 120 horse-power, and expected to steam thirteen to fourteen miles per hour. Dimensions:—Length, 215 feet; breadth, 27 feet; depth, 15 feet, 6 inches.

SCREW.—575 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines direct acting of 75 horse-power; speed ten knots under steam alone. Dimensions:—Length over all 190 feet; breadth, 25 feet; depth, 14 feet.

SCREW.—596 tons, builders' measurement, 318 tons register: now building, to class A 1 at Lloyd's for nine years; will carry about 550 tons measurement or 450 tons dead weight; direct engines 60 horse-power. Dimensions:—Length 170 feet; breadth 27 feet; depth 12 feet 6 inches.

PADDLE.—440 tons, builders' measurement, 203 tons N.M.; building to class A 1 at Lloyd's for six years; will accommodate fifty two first-class and twenty-two second-class passengers; will carry about 170 tons measurement or 100 tons dead weight on 7½ feet water; oscillating engines of 120 horse-power; expected to steam thirteen knots per hour. Dimensions:—Length 200 feet; breadth 21 feet; depth 11 feet.

The above ships are built, and being built, by first-rate builders, and the new boats can be completed to suit the plans of purchasers. For specifications and all further particulars apply to

CURRY, KELLOCK, & Co., Brokers, Liverpool.

ROYAL UNITED SERVICE INSTITUTION, WHITEHALL YARD, S.W.

LECTURE at Three o'clock, Friday, 29th June.—Captain C. P. Coles, Royal Navy, "His shot-proof Shield as adapted to iron-cased ships, considered as an economical Mode of National Defence."

By order of the Council,

18 June, 1860. B. BURGESS, Captain, Secretary.

SHIPWRECKED FISHERMEN AND MARINERS' ROYAL BENEVOLENT SOCIETY.

The recent terrific gales compel the Committee earnestly to APPEAL to the public for HELP to relieve the poor castaways, or their widows and orphans. The Shipwrecked Mariners' Society is entirely dependent on voluntary contributions. For the last three years its expenditure has been beyond its income 2500*l.*, and the incessant demands made on its funds from sufferers by disasters of the sea continue to increase, 10,354 persons having been relieved last year, which tells its own tale, and the demands for the first quarter of this year have exceeded that of the last by 1000*l.*

HENRY HOPE, Admiral, Chairman.

FRANCIS MAUDE, Capt. R.N., Deputy-Chairman.

Bankers—Messrs. Williams, Deacon, & Co., Birchin Lane, City, E.C.

FRANCIS LEAN, R.N., Secretary.

Office, Hibernia Chambers, London Bridge, S.E., May, 1860.

EDWIN KESTERTON, COACHBUILDER, 93 and 94, LONG ACRE, LONDON, W.C.

MONEY.—TO OFFICERS, NOBLEMEN, and GENTLEMEN.—Wanted to place out several sums of money upon Real and Personal Estate. To those having reversionary interests, life estates, and property in settlement, and to whom payment of interest would be a consideration, can have it deferred till in possession. Advances made to Loans effected for short periods upon approved Personal Securities. Apply by letter, or personally between 1 and 5 o'clock, to Mr. COLLINS, 13, Duke Street, St. James's, S.W. Reversions purchased.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

FARMS, ESTATES, &c.

MESSRS. HEARLE & CO., LAND AGENTS AND SURVEYORS, 5, Crescent Place, Blackfriars, E.C., direct attention to the very great facility for Letting and Selling Farms and Estates, afforded by the extensive circulation of their printed Lists, containing upwards of 200 farms and estates, which are published twice per month, and distributed to some hundreds of applicants, free. These Lists contain estates throughout England to be let or sold, especially suitable to the requirements of noblemen and gentlemen of the Naval and Military profession.

WANTED, LEFT-OFF CLOTHES FOR AUSTRALIA.—MR. & MRS. JOHN ISAACS, 319 & 320, Strand, W.C. (opposite Somerset House), continue to give the highest price in cash for Ladies', Gentlemen's, and Children's Clothes, Regimentals, Underclothing, Boots, Books, Jewellery, and all Miscellaneous Property. Letters attended to. Parcels sent from the country, either large or small, the utmost value returned by post office order the same day. Reference, London and Westminster Bank.

THE VOLUNTEERS' PICTURE FRAMES.—The Cheapest House for every description of Picture Frames. Country dealers supplied with every description of Gold and Fancy Wood Moulding. Three-quarter Gilt Beads at 7s. per doz. 6 feet, at

GEORGE REES, 129, Drury Lane, W.C.

THE STANDARD LIFE ASSURANCE COMPANY. SPECIAL NOTICE.

BONUS YEAR.—SIXTH DIVISION OF PROFITS.

All policies now effected will participate in the division to be made as at 15th November next.

The Standard was established in 1825.

The first division of profits took place in 1835; and subsequent divisions have been made in 1840, 1845, 1850, and 1855.

The profits to be divided in 1860 will be those which have arisen since 1855.

Accumulated fund £1,634,598 2 10

IMPORTANT TO OFFICERS.—Have all your BOTTLED ALES, WINES, &c., PACKED IN SEYMER'S REFRIGERANT STRAW ENVELOPES, which entirely prevent Heating, Fermentation, and Breakage, will use repeatedly as Wine Coolers, prevent all litter on board ship or in quarters, and save 20 per cent. in space and freight. Supplied by all Wine Merchants at 9d. per dozen, and wholesale by THOMAS WHITEHEAD, 37, Eastcheap, London, E.C.

COVENT-GARDEN MARKET.—To Clubs, Hotels, and large Establishments.—PULLEN & SON are confident the above would effect a great saving by having their supply of FRUIT and VEGETABLES fresh every morning from their Wholesale and Retail Warehouse, Centre Avenue, Covent Garden and Farringdon Markets. Wedding Bouquets provided. Country orders punctually attended to. A list of prices forwarded on application. Carriage free to any part of town.

SEQUELIN'S OIL.—This Vegetable Preparation is an infallible restorative of the Human Hair, producing its growth, checking its falling off almost instantly, and imparting to it unequalled softness and brilliancy. Testimonials and references on application. One bottle is sufficient. Price 1 guinea. Sold by S. SEQUELIN, 40, Wharton Street, Lloyd Square, W.C. London Agents: G. JOZEAU, 49, Haymarket, S.W.; and METCALFE, BINGLEY, & Co., 130B, Oxford Street, W.

DINNEFORD'S PURE FLUID MAGNESIA
Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for
ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.
As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the
ACIDULATED LEMON SYRUP,
it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.
PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS,
(and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

TEETH. — MR. ESKELL'S IMPROVEMENTS IN THE CONSTRUCTION OF ARTIFICIAL TEETH, whereby one set generally lasts a lifetime, are worthy the attention of those suffering from the loss of Teeth. The gradual removal of natural teeth or stumps which may be in the mouth, or the absorption of gums from whatever cause, are provided for; thus doing away with the necessity, at any future time, of having new sets of teeth, or being beyond an hour or so unpleasantly detained without them.
Not only are the dentist's services dispensed with for a long series of years, but the expense is no greater than for the ordinary kinds; and when it is added there is no pain to undergo, neither teeth nor stumps being extracted, nor any pain given whatever, it is evident this system possesses manifest advantages, and is the nearest approach to perfection yet attained. The teeth are exquisitely enamelled to nature, of unexceptionable purity and workmanship, and for accuracy of adaptation for mastication, articulation, and impossibility of detection, cannot be surpassed.
Mr. Eskell's celebrated Osteoplastic Enamel, for Stopping Decayed Teeth (admirably adapted for front teeth), retains its colour, and is free from any injurious properties either as regards the teeth or general health. Post free for 30 stamps. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation free. Charges strictly moderate.—314, Regent Street, opposite the Polytechnic. Established 1847.

1860.—Just published, post free, three stamps.
"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.
Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.
"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald*.
Liverpool, 134, Duke Street.

A BOON TO NERVOUS SUFFERERS.
HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.
EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Bugs, Beetles, and every other insect, by this Powder, which is perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in Packets, 1s., 2s. 6d., and 4s. 6d. each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the above name and address. Sold by all druggists.

INSECTICIDE VICAT (Vermin destroyer). Ten years of great success, twenty official reports from learned Societies, and several honorary medals, testify to Vicat's Insecticide powder for the destruction of all kinds of Insects. Insecticide Vicat is used by the French Government for the destruction of insects in barracks, camps, ships, hospitals, Imperial schools, &c., &c. Sold by SAUTET & ROBINET, 9, Greek Street, Soho Sq., W., and by their agents in town and country.

BUGS, FLEAS, OR LICE in birds, dogs, cats, poultry, or human beings; insects on plants and flowers; mosquitoes, moths, ants, and all kinds of insects, exterminated by DUMONT'S INSECT KILLER, which powder, although so mortal to insects, yet is perfectly harmless to birds, plants, animals, and human beings. Sold by all Chemists, Oilmen, &c., with patent apparatus included, at 3d., 6d., and 1s. each, or post free for 4, 8, or 14 stamps, from the Manufacturers, HADROT & AVRIL, No. 12, Castle Street, Holborn, E.C.—Caution: Every apparatus bears P. Dumont's signature.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle, Cottage Gardener*, and *Field*. In boxes, 1s., 3s., 10s. 6d., retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

DOG CARTS.
THOMSON'S REGISTERED excels other inventions of the kind in commodiousness, elegance, lightness, and economy. Manufacturer and inventor, WILLIAM THOMSON, Coachbuilder, Perth.
In addition to the testimonials already published in *The Field* and elsewhere, the following have been recently received:—
"Dalhousie Castle.
"SIR,—I have tried the Dog Cart several times, and am much pleased with it. I consider it a most perfect carriage of its kind. W. MAULE RAMSAY, Colonel.
"Jan. 20, 1860."
"Edmondstown, Feb. 29, 1860.
"MR. THOMSON,—I have just received the Dog Cart safely. In justice to you, I must say that a neater, lighter, or roomier cart I have not seen. I shall have pleasure in recommending it. I remain, &c., &c.,
"ARTHUR COSTELLO, late 7th Dragoon Guards."
Drawings sent on application.
The Price of the Registered Dog-Cart, complete, with Hand-Drag, best Lamps, Aprons for both Seats, all finished in the highest style, with Shafts for one Horse, and delivered at any Station on the Great Northern or London and North-Western, FIFTY GUINEAS. If for a pair, with Pole, Bar, and polished-steel Chains, FIFTY-FIVE GUINEAS.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2l. 2s., from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

MILITARY BAND INSTRUMENTS.
J. KOHLER begs respectfully to call the attention of Commanding Officers and Presidents of Band Committees to his IMPROVED MODELS OF BAND INSTRUMENTS, possessing a most powerful and sonorous tone, and combining elegance with durability in their workmanship.
J. KOHLER also takes this opportunity to state that his newly-invented PATENT HARMONIC CORNOPEAN is universally approved of by the musical world, and he can with confidence strongly recommend it to the notice of all amateurs of the Cornopean.
Drawings and Price Lists sent on application to J. KOHLER, Military Musical Instrument Maker to H.M. Army and Navy and the Indian Army, 35, Henrietta Street, Covent Garden, London, W.C.

Instructions for the Cultivation of the Algæ, their preservation in the Herbarium, and their preparation as objects for the Microscope.
*** Either Volume may be had separately, price £2 2s. each.

NOTICES OF THE PRESS.
"In this Work of 'British Sea-Weeds' is to be found all that could be wished for, and more than could be expected, in reference to the tribe in question. The specimens you gather from the beach, wash and carefully display before admiring eyes, are not more fresh and perfect than are these illustrations now before us. Drawings, however highly finished in coloured plates, and however faithfully they represent what they are intended to place before you, are not to be compared with these prints. You touch them with your finger to ascertain whether they lie upon the surface of the paper or are a part of it."—*Morning Chronicle*.
"For this kind of work Nature-Printing is exactly adapted. Every delicate and inimitable ramification is most attractively and accurately represented. The fifty-six plates in this volume can scarcely be surpassed, and have not, as far as we know, been equalled. . . . . We have found them pleasing, and still pleasing during several inspections. The volume is handsomely got up, and will make a very attractive drawing-room table-book at home or at the sea-side."—*Athenæum*.
BRADBURY & EVANS, 11, Bouverie St., Fleet St., E.C.

MACMILLAN & Co., Cambridge, and 23, Henrietta Street, Covent Garden, London, W.C.

A SPLENDID PRESENT for the SEASON, "THE OVERLAND ROUTE TO INDIA," illustrated with 32 large choice Engravings, from pictures by Grieve, Telbin, and Absolon, forming a handsome folio volume, and is a most interesting pictorial detail of the entire route from Southampton to Calcutta. This beautiful work was lately published at two guineas; the whole stock is now offered in its original rich binding for only Twelve Shillings and Sixpence complete.—Prospectuses to be had of, and post-office orders made payable to, EDWARD LACEY, 434, West Strand, London, W.C.

"DOINGS IN LONDON" in the reign of the Fourth George, by the celebrated PIERCE EGAN, upwards of 420 large octavo pages, with 36 Illustrations by Cruikshank. A few copies of this scarce work, long since out of print, may be had at 21*s.* per copy. Also a few other works of equal rarity, and a small parcel of Academy Studies for the Stereoscope.—Address Mr. W. WARD, 5, Triangle, Kennington Cross, S. "DOINGS IN LONDON" AT THE PRESENT TIME, a smart and instructive sketch, illustrated, 60 stamps.

NEW WORK by the AUTHOR of "CURIOSITIES OF WAR."

Preparing for early Publication in Monthly Parts, price One Shilling, with fac-simile Illustrations printed in Colours,

MEDALS OF THE BRITISH ARMY,

AND

HOW THEY WERE WON.

BY THOMAS CARTER,

AUTHOR OF "CURIOSITIES OF WAR, AND MILITARY STUDIES."

"What is a ribbon worth to a soldier?
Everything! Glory is priceless!"—SIR E. B. LYTTON.

NO general history of these Distinctions having been yet attempted, it is considered that a Work which shall afford a clear insight into the circumstances under which such Honours were gained is likely to be received with favour by the public, when accompanied by fac-similes printed in colours of the Medals and Ribbons, and interspersed with notices of Regimental and Individual Acts of Heroism, and Military Statistics of an interesting character.

In order to render this National Work generally accessible, it will be published in Three Sections, of about Five Parts each, commencing with the Crimean Campaign:—the First Section, containing "THE CRIMEAN CAMPAIGN," Dedicated, by Permission, to MAJOR-GENERAL THE HON. SIR JAMES YORKE SCARLETT, K.C.B., Adjutant-General of Her Majesty's Forces, &c., &c.—to be followed by the remaining two portions, the one comprising the Services enumerated in the General Order of the 1st of June, 1847, from the Battle of Maida, and terminating with Waterloo—Dedicated, by Permission, to HIS GRACE THE DUKE OF RICHMOND, K.G.;—the concluding Section being devoted to the Campaigns in India, Egypt, China, &c., from 1799 to the suppression of the Indian Mutiny, and including the Medals accorded with annuity, gratuity, or otherwise, for distinguished conduct and long service.

When completed, the series will form a handsome volume, elegantly illustrated, which will contain a record of unsurpassed Military Prowess; and it is anticipated that such an attempt to perpetuate the memory of the brave, by bringing together the gallant deeds of officers and men, will meet with patronage from a public so deeply indebted to, and interested in, the proud achievements of the British Army.

*** Orders received by the principal Booksellers.

Orlebar, Henderson, Master, Fellowes, Sidney Smith, Blackett, Millett, Knollys. Mr. Mounsteven, who passed first at the Competitive Examination for Marine Cadetships, was also prepared at North Grove House.

W. BELL, Chaplain, R.N.;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

THE MILITARY COLLEGE, SUNBURY, S.W.—At this Establishment, conducted by Captain LENDY, with competent assistants, STUDENTS are PREPARED for the Staff, Artillery, Line, and every branch of the service. In 13 Examinations for the Line and Staff College, to which pupils have been sent since 1858, they have six times taken the first place, four times the second, and three times the third, and four-fifths of the whole number of candidates sent to compete for admission to Woolwich were successful at their first trial.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

CIVIL AND MILITARY SERVICES (Home and Indian).—CANDIDATES PREPARED for these Services by the Editor of "Hall's Guide to the Three Services," assisted by experienced teachers. Hours of study from 10 to 1. Terms:—For the Home Civil Service, three guineas per month; for the Army, four guineas. Residence, five guineas per month additional. Address J., Paxton Hall, Oxford House, Chelsea, S.W.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vauban's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotheran, York.

DR. LOVELL'S SCHOOL, Winslow Hall, Bucks, for the Sons of Noblemen and Gentlemen (Established 1836).—The course of Tuition is preparatory to the Public Schools, Eton, Rugby, and Harrow, Sandhurst College, and the Army and Navy Examinations. Native teachers of French and German reside in the house, and these languages form an integral part of the daily school duty. The number of pupils is strictly limited, and none are admitted beyond fifteen years of age. All further particulars can be had of the Principal.

MR. FAHEY, whose Pupils have taken the highest honours in the Military Colleges of Woolwich, Addiscombe, &c., informs his friends that he has removed from Brompton to 71, Cadogan Place, S.W., and that he continues to give lessons in Fortification, Geometrical and Civil Drawing—required for the Competitive Examination.

RIFLE REGULATION GLOVE.—W. TENT begs to inform those Gentlemen who have joined the different Corps, that he has had made for them expressly the BLACK BUCK REGULATION GLOVE that is being worn by the 7th Surrey and other Corps. To be had only of W. TENT, Shirt Maker, &c., 4, Birchin Lane, Cornhill, E.C. N.B. The Dress of the 7th Surrey to be seen on application.

THE MOUNTED RIFLE CORPS BOOT. Can be worn outside the trowsers in wet weather, entirely superseding the trouble and inconvenience of leggings, forming, in fact, the most complete military boot extant. Suitable for a knock-about boot in the country, &c. Price 38*s.* A choice assortment of ready-made goods always on hand.

KING & SOTHERS, 21, Piccadilly, W.

RIFLE CORPS CAPES AND KNEE PADS.—WARNE'S PATENT TUBULAR INDIA-RUBBER CUSHIONED KNEELING PADS, non-absorbent of moisture; also, the new make WATERPROOF RIFLE CAPES, permitting perfect ventilation and entirely free use of arms. WARNE & Co., India-rubber Manufacturers, 9, Gresham Street West, E.C.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

TO VOLUNTEER RIFLE CORPS.—HURST'S NEW RIFLE MUZZLE PROTECTOR, Registered March 28, 1860.—Approved by many of high authority, and used by several officers of different corps, and supplied to the 7th Sussex Rifle Corps. It preserves the muzzle from friction, keeps the ball in the centre of the bore, does away with the rattle of the rod, and protects the breech in the platoon exercise; can be attached to the rod without any trouble or inconvenience whatever.—May be had of C. E. HURST, Armoury Sergeant, 7th Sussex, Horsham; price 1*s.* 6*d.* each by post.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s.* per 1000; blank, 33*s.* per 1000.
Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

TO VOLUNTEER CORPS.

WOOD'S GOVERNMENT PATTERN TARGETS, price 63*s.* complete, with wrought-iron staves, fastenings, &c. Delivered free at any Station in England. Weight about 5 cwt. each.
To be had only of the appointed Agents, RICHARDS & Co., Nos. 117 & 118, Bishopsgate Street Within, E.C.
Also, MANTLETS. Drawings, &c., per post.

TO SPORTSMEN.—The following articles of the best quality, manufactured by FREDERICK JOYCE, of London, may be had of most Gunmakers and Dealers in Gunpowder throughout the United Kingdom:

Manufactory and Show Rooms, Newhall Street, Birmingham.
Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

MILITARY DECORATIONS, WAR MEDALS, &c.

ORDER OF THE BATH, LEGION D'HONNEUR, and the MEDJIDIE, in all the different Classes and Sizes.
MINIATURE MEDALS, consisting of CRIMEAN, FRENCH, SARDINIAN, CAFFRE, and the whole Indian Series issued to the present time.
Clasps, Bars, Ribbons, &c., and Masonic Jewels of all kinds, manufactured and supplied by
PHILLIPS BROTHERS, Goldsmiths, &c., 22, Cockspur Street, London, S.W.

CHRONOMETERS, WATCHES, CLOCKS, &c.

E. WHITE, for several years principal assistant at Messrs. Dent's, of Cockspur Street, having taken the above premises (formerly occupied by Messrs. Green & Ward), respectfully solicits an inspection of his Stock, comprising a choice selection of CHRONOMETERS, WATCHES, CLOCKS, &c., all of which have been recently manufactured on the most improved principles, by workmen of the first talent.
20, Cockspur Street, Pall Mall, London, S.W.

FREE TRADE IN CHRONOMETERS.—JOHN PENNINGTON, Chronometer, Watch, and Clock Maker, for many years Manufacturer for the Trade, purposes supplying the public at Manufacturers' prices. CHRONOMETERS, as supplied to the Royal Navy, 25*l.* Terms, cash.
"Mr. Pennington well deserves success, for science will profit also, and the public will thereby be the gainers."—See "Nautical Magazine," May, 1860.
WATCHES & CLOCKS OF EVERY DESCRIPTION.
12, Orchard Street, Portman Square, London, W.
City Agency—27, Lombard Street, E.C.

GOLD WATCHES, CHAINS, AND JEWELLERY, best quality, at moderate prices, at HASELDINE'S (Successor to Young), 3, Coventry Street, Haymarket, W. Diamonds, Pearls, and Plate purchased or exchanged.

BRAVINGTON, LATE YOUNG, 51, PRINCES STREET, LEICESTER SQUARE, W.C.
GOLD WATCHES, CHAINS, AND JEWELLERY, Of the Best Quality, new and second-hand, at Moderate Prices.
Money advanced on Diamonds, Plate, Jewels, &c.

BENNETT'S RIFLEMAN'S WATCH, 65 & 64, CHEAPSIDE.
J. BENNETT having manufactured a Watch specially fitted for the use of Military Men, and combining the advantages of both the hunting and open-faced watch, solicits the inspection of his large stock by all Rifle Volunteers. In silver from five guineas; in gold from fifteen guineas. Free and safe by post.
Money Orders to JOHN BENNETT, Watch Manufactory, 65 & 64, Cheapside, E.C.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors, JAMES COULSON & Co.,
Beg to intimate that their only London Depôt is at No. 46, PALL MALL, S.W.,
A few doors West of the Army and Navy Club.

COLOURED FLANNEL SHIRTS.
SOLD BY
THRESHER & GLENNY, 152, STRAND, W.C.

THE GORGET SHIRT, Jos. FRYER & Co., Patentees. 6 for 42*s.* Next door to the Haymarket Theatre, S.W.

SHIRTS.—ROBERTSHAW'S, Long cloth, with Linen Fronts, &c., 5*s.* 6*d.*, 6*s.* 6*d.*, and 7*s.* 6*d.* Flannel Shirts, 8*s.* 6*d.*, 10*s.* 6*d.*, and 12*s.* 6*d.* Outfits for either Service.
ADDRESS, 100, OXFORD STREET, W.
Established 1777.

SHIRTS.—CHURTON'S SHIRTS GIVE GENERAL SATISFACTION.—They fit well, and their durability proves their economy, quality being the test of cheapness.—WILLIAM CHURTON & SON, Family Hosiers, India and Colonial Outfitters, &c., The Golden Fleece, 91 and 92, Oxford Street, London, W.
Established 80 years.

SHIRTS.—UNEQUALLED FOR QUALITY AND ACCURACY OF FIT.—Sizes or measures registered for future orders.—POPE & PLANTE, 4, WATERLOO PLACE, PALL MALL, LONDON, S.W.

H. J. & D. NICOLL'S Establishments for Gentlemanly and Moderate-priced Clothing, REGENT STREET, CORNHILL, & MANCHESTER.

THE CAPE PALETOT, INVERNESS CAPE, or SLEEVED CAPE, used in private life, as well as for Volunteer Corps.
H. J. & D. NICOLL, 114, 116, 118, 120, Regent Street, W.; 22, Cornhill, London, E.C.; and 10, St. Ann's Square, Manchester.

CLOTHING FOR YOUTH.—The KNICKERBOCKER, the Highland Dress, Ladies' Travelling Mantles, Riding Habits, and Pantalons de Dames à Cheval, with much novelty and general excellence, H. J. & D. NICOLL have for the remainder of this season at WARWICK HOUSE, 142 and 144, Regent Street, W. In the autumn this branch will be removed to the rear of the old Establishment.

NEUTRAL COLORED COMPLETE SUITS of one material, introduced last season for Gentlemen, and subsequently improved by variety of materials, the fastening by a top link or button, which serves for a letter-seal when engraved with Crest or Coat of Arms. Is registered 6 & 7 Vict., and the Complete Suit is occasionally under and seldom exceeds three pounds in cost.
H. J. & D. NICOLL, 114, 116, 118, and 120, Regent Street, W.; and 22, Cornhill, London, E.C.

H. J. & D. NICOLL are prepared, at short notice, to produce Court Suits and Servants' Liveries, by applying to them in Regent Street, London, W.

CHAMBERLAIN'S ROYAL PORCELAIN WORKS.—Admission of Visitors to the Works to be had on application at the Show Rooms, from 9 A.M. to 6 P.M. each day, except Saturday from 9 A.M. to 2 P.M.—W. H. KERR & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

GARDNERS' £2 2*s.* DINNER SERVICES complete, best quality. A large selection of patterns of the choicest description. Breakfast, Dessert, Tea, and Toilet Services, at the lowest possible prices. Cut Wines, 3*s.* 6*d.* per dozen; Cut Quart Decanters, 7*s.* 6*d.* per pair.—H. & J. GARDNER (by appointment to Her Majesty, the Board of Green Cloth, Lords of the Treasury, Admiralty, Office of Works, Customs, and the other Government Offices), 453 and 63, Strand, Charing Cross, S.W. Established 108 years. Engravings free by post.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

MESSRS. OSLER, 45, Oxford Street, London, W., beg to announce that their NEW GALLERY (adjoining their late premises), recently erected from the designs of Mr. Owen Jones, is NOW OPEN, and will be found to contain a more extensive assortment of GLASS CHANDELIERS, Table, and Ornamental Glass, &c., than their hitherto limited space has enabled them to exhibit.

CLARK'S PRIZE MEDAL LAMPS, FOR INDIA, are so arranged to burn under the Punkah. The very numerous testimonials received from India is a guarantee of the sterling merits of these lamps. They are so substantially made that they cannot get out of order. Prospectuses of new designs sent upon application. To be had only of the Metropolitan Light Company, 447, West Strand, W.C.
JOHN CLARK, Manager.

NEW REGULATIONS FOR NAVAL CADETS, for passing the College may be obtained on application to B. JOSEPH & Co., or sent post free to all parts of the world, with full list of prices of Outfits for young gentlemen entering the Navy.
A large stock of fashionable clothing at moderate prices may be had either ready made or made to order in a few hours' notice at the Hall of Commerce, 924 & 93, Queen Street, Portsea. B. JOSEPH & Co., Proprietors.

WATERPROOFS FOR INDIA.

EDMISTON & SON, Sole Manufacturers of the only WATERPROOF CLOTHING guaranteed to withstand the climate of India. The POCKET SIPHONIA (weight 12 ounces), price 40*s.* This coat can be carried in the pocket. Shooting Boots, and every requisite for the Sportsman in India. Portable Folding Baths, Air-Beds, Water-Beds for Invalids, Pillows, &c. Portable Indiarubber Boats, to carry one or more persons, weighing from 40 to 50 pounds, price 7*l.* 10*s.*, 10*l.* 10*s.* and 18*l.* 18*s.*; folding in a compass of 3ft.
THE SIPHONIA DEPOT, 5, CHARING CROSS, S.W. late 69, Strand, London.

TO OUR VOLUNTEERS.—The simple system of training may be summed up in two or three words—moderate eating and drinking, exercise, and constant use of the Sponge Bath, with the aid of A. & T. DAVIES'S CHAMPION TRAINING TOWELS, Nos. 1 and 2, and FLESH GLOVES. Any man may train. See *Times*, Wednesday 18th April, on the condition of the Boxers for the Championship. No. 1, 1*s.* 6*d.*; No. 2, 2*s.* Flesh Gloves, 1*s.* per pair. Sponge Gloves, 6*d.* per pair. All the improved makes in English and Foreign Training Towels, Flesh Gloves, &c., at A. & T. DAVIES'S Linen Warehouse, 121, High Holborn, corner of King Street, W.C.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of
CROSSE & BLACKWELL, 21, Soho Square, London, W.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND
Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS, 8, King William Street, City, London, E.C.
Black or Green Tea, 2*s.* 8*d.*, 2*s.* 10*d.*, 3*s.*, 3*s.* 4*d.*, to 4*s.*
A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.
Sugars are supplied at Market Prices.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
WOTHERSPOON & Co., Glasgow and London.

THE GUINEA COAL COMPANY'S (double screened) WALLSEND COAL, One Guinea per Ton (All the Year Round). HORATIO MORGAN, Sole Consignee for London, Office, 17, Wellington Street, Strand, W.C., where all orders are to be sent.
N.B. No Agents or Travellers employed.

GARIBALDI, OR THE IRRESISTIBLE. The perfume of the day. Price 2*s.*, 3*s.* 6*d.*, 5*s.*, &c.
HENRY RIGGE, 35, New Bond Street, London, W.

GAY & SONS' DRESSING-CASES are the best and most reasonable.
113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of White friars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, June 23, 1860.

WE have already pointed out, in last week's ARMY AND NAVY GAZETTE, how far the Report of the "Commissioners appointed to consider the Defences of the United Kingdom" falls short of the general expectations of the country. But from military officers we hear it would be impossible for us ever to garrison the enormous fortifications now projected, and that it would be hazardous to prepare such permanent works as we could not occupy ourselves, only to enable the enemy, once in possession, to hold them against us.

The press has with one exception expressed similar opinions. The exception is the *Saturday Review*, which (forgetting that on the 16th inst. it agreed with the general press—and the *Times*, that "the least satisfactory thought is, when all is done that the Commissioners propose, neither London nor Woolwich will have any protection against an attack by land"), now defends the Commissioners against the "injustice" of such criticism "in the *Times* and elsewhere!" on the ground that the memorandum of instructions, which accompanied the Commission, limited the inquiry to the dockyards, —ignoring the passage in Mr. Secretary Herbert's memorandum which expressly reminds the Commission to "consider the protection of Woolwich against an attack by land," as being also an "important element in the means of defence for the metropolis." But the Commissioners have left themselves no loophole through which to escape for the satisfaction of the *Saturday Review*. It is not a preliminary Report they have issued, with a promise of another hereafter, on what in importance ought to have been considered first; for they say (§172) "they have completed the task assigned to them," and they submit their recommendations, "with a firm conviction that their adoption will place the power of this country, for self-defence, on a par with its other elements of greatness and strength; will give security to its industry and commerce; afford a guarantee for the maintenance of peace; and add a new glory to Her Majesty's reign."

The task assigned to the Royal Commissioners by Her Majesty was to "inquire" and "offer such suggestions as may seem to you meet, as will render Our United Kingdom in a complete state of defence." And we ask, was the inquiry full? are the suggestions such as even *primâ facie* to meet the case? We regret to have to say *No* to both these questions. As to the first, the Commissioners ignored all that had been previously written and published both by distinguished French and British officers. Nor did they give the few officers they examined any opportunity of stating generally their views as to the defence of the kingdom; but, apparently with preconceived views of their own, they cross-examined them on restricted points, beginning with a stereotyped question put to Admiral Sir R. Dundas, Admiral Sir M. Seymour, and other naval officers, as to the security of the anchorage at Spithead, "if casemated works are placed on Horse Sand and No Man's Land;" and were "our own fleet absent?"

So, when they call Sir John Burgoyne before them, they do not try to elicit his general views as to the defence of England, and the grounds upon which they are founded, but begin by saying:

"The Commission is considering the question as to what additional defences are required at Portsmouth—You consider that it is necessary to occupy Portsdown Hill?" (Q. 588.)

This is not "to inquire" at all in the proper sense, having reference to the scope of the inquiry. All that is general, and bears upon the whole large question before the Commissioners, comes out as it were incidentally in the evidence, and is forced upon their consideration by the witnesses. The naval officers don't like the questions "in the shape they are put" (Q. 1)—they do not see why the fleet should, even *ex hypothesi*, be so completely disposed of as "absent;" and Admiral Sir T. Maitland, after some remarks as to the obvious advantages of certain proposed fortifications, which gave one of the Commissioners an opportunity of arguing—"Then you are an advocate for them?" said very plainly,

"It requires serious consideration to say which I prefer; but, with regard to my own opinion, I would first put the Navy in such a position as to secure the command of the Channel, at least against any one nation." (Q. 54.)

In like manner, when Captain Sullivan is pressed on the subject of the proposed fortifications, he at last observes:

"If you make Portsmouth impregnable, and an invading army ever land, it makes it more certain they will go to London." (Q. 202.)

Therefore, *cui bono?* And when Sir John Burgoyne is pressed as to fortifications on Portsdown Hill, he says:

"What I should be afraid of would be placing permanent works there, and not being able to occupy the position. I do not expect that you would get a force of 20,000 men for Portsmouth, because Portsmouth would not be attacked unless a great invasion took place. You would have the Militia, probably, with your field army, as they would be a valuable force. (Q. 607.) And this objection would lie against any other place where you have an enormous extent and a small garrison." (Q. 608.)

Sir John goes on:

"In the defences of the sea-port batteries, I think it would be desirable to leave almost all your detached earthen batteries to be thrown up when war is declared; not always to keep the charge of them during a long peace; it is very expensive, and very difficult, and very troublesome. If you can throw up a great mass of earth, which will form into a battery, forty-eight hours will make your battery; you might do that at the time. It would not only save a great deal of previous expense, but it would also come unexpectedly upon the enemy, who would know perfectly well how everything was previously established." (Q. 615.)—"But Portsmouth is part of the defence of London, and therefore you could not afford a large garrison there:"—"I cannot help thinking that if an enemy get into London it is all over; that we must make peace and submit to almost any terms." (Q. 690, 720.) "The enemy's first point would be London, where success would put an end to the war. *I think that that is their only chance.* If you could keep them from London for a month or two, you would make a very good fight of it, I have no doubt." (Q. 766.)

It is in the face of all this, and without a tittle of supporting evidence, that the Commissioners propose to build an enormous extent of fortifications round Sheerness, Portsmouth, and Plymouth, and to leave London unprotected! They propose this also (will it be believed?) not only against the meagre evidence they thought proper to take, but against their own opinions as to what is really requisite "for the defence of the United Kingdom," or even of our chief arsenal! This we shall now endeavour to prove.

In the first eight paragraphs of their Report, the Commissioners speak of the "general question of the defence of the United Kingdom," quoting the words of Her Majesty's Commission. But they find "the fleet alone insufficient" (§ 1), that "steam" is only to "our disadvantage," though they do not deny the "importance of an efficient Channel fleet" (§3). Therefore, "the dockyards should be protected" (§ 4); but still we cannot rely on preventing a landing of the enemy, because only a "*few* thousand riflemen might *happen to be* at hand exactly when and where required," though they admit "the defence would be somewhat aided by railroads and telegraphs" (§ 5). But then our land forces, the most obvious means of resistance, must needs be smaller—regulars, Militia, and Volunteers altogether—than those of continental nations; and apparently, therefore, according to the Commissioners, smaller even than the troops sent to invade us (§§ 6 and 7); and so, in despair, they turn to Fortifications (§ 8).

But in paragraph 9 we have a dissolving view, or inverted logical sorites, in which the general arguments for the defence of the United Kingdom disappear or dwindle down to the minor point of defending the dockyards! Then follows a crowded view of the number of pounds sterling a great increase in the regular Army would cost, including 11*l.* for merely raising each man—that is, to be spent in coaxing men into an army with insufficient pay, when half the amount added to their wages would get rid of these enormous recruiting expenses, and much of the subsequent desertion. And as we cannot fortify all the coast (§ 13), the

"Commissioners are of opinion that the fortifications of this country should be confined chiefly to the protection of those vital points at which an enemy would strike." (§ 14.)

So far so well. The evidence says that the most vital point is London, and so say the Commissioners themselves. In paragraph 16 we find:

"There can be no doubt that the *main* object of an enemy invading the country would be to push for the capital;"—but "the defence of London has not been brought under our consideration."

We cannot understand their saying this; for the consideration of the subject is forced upon them again and again: thus in paragraph 75, on the "Probable plan of attack" of Portsmouth, they say:

"The plan of an enemy might be either to attack Portsmouth before he advanced on London, or, if he had sufficient force, to detach a portion of his army to destroy the dockyard at the same time that his main body marched on the capital."

We have the same point glanced at in paragraph 86:

"Plymouth would not, like Portsmouth, be in immediate connection with any plan of invasion, of which London was the objective point."

From which it follows that the Commissioners have considered that London would be the objective point of any plan of invasion threatening Portsmouth. Then, again, in paragraph 129:

"The defence of the Thames involves interests of vast magnitude; it includes the security of the great powder magazine establishment at Purfleet; the important arsenal at Woolwich, and the adjoining dockyard; the Government Victualling Stores and Shipbuilding yard at Deptford; the large amount of valuable property extending for many miles on either bank of the river; the fleet of merchant shipping moored in the port of London; and lastly, the Metropolis itself."

The strategic connection of the heights in the south of London with Chatham, is noticed in paragraphs 143 and 147; and when they come to Woolwich we find that they are aware "a proposal to occupy Shooter's Hill by a permanent work was brought forward by His Royal Highness the Duke of York half a century ago;" and, indeed, no military authority has treated of the defence of England in case of invasion since, without marking out Shooter's Hill as a necessary position to be strongly fortified. The Report goes on:

"Our instructions direct us to consider what steps should be taken for defending the approaches to Woolwich, and what defensive works, if any, it may be necessary to construct with a view to its protection against an attack by land, such works being at the same time regarded as an important element in the means of defence for the Metropolis." (§ 153.)

And, unfortunately for their reputation, they practically answer "Not any," except indeed on Shooter's Hill; but they say:

"It is doubtful whether, even if Woolwich were converted into an extensive entrenched camp, it would hold out long after the occupation of the Metropolis by an invader" (§ 155);

while they admit that a proper plan "for the defence of the Metropolis would also provide for the security of Woolwich itself."

We must quote the whole of this most important paragraph, which renders it simply inexcusable that a plan for the defence of the metropolis should have been omitted from the Commissioners' "consideration:"

"It appears to us that the operations of an enemy against the place by land necessarily imply the successful disembarkation of his army on our shores, the subsequent defeat of our manœuvring army in the field, and the *consequent advance of the enemy upon the capital.* Under these circumstances, and considering its immediate connection with London, in our opinion it is doubtful whether, even if Woolwich were converted into an extensive entrenched camp, it would hold out long after the occupation of the Metropolis by an invader. Besides, the fortress of Chatham, which is only twenty miles to the eastward of

Digitized by Google

Woolwich, would to a certain extent supersede the latter, whether in its bearing upon the advance of an enemy from the eastern coast of Kent, or in its power of acting upon the flank of a hostile army moving upon London from the direction of Harwich. If it were considered advisable to provide an extensive fortified position in the neighbourhood of London, it is probable that other positions might be chosen affording greater advantages, which might go far towards the realisation of a scheme of more general application to the defence of the Metropolis, and thereby provide for the security of Woolwich itself." (§155.)

Instead, however, of inquiring, and considering, and reporting to Her Majesty how to defend Woolwich, and so the Metropolis (according to the memorandum of instructions which has been so strangely interpreted as meaning that the very thing it calls attention to was not to be considered); or how to defend the Metropolis, and so secure Woolwich (according to the Commissioners' own opinion of what alone is practicable) they apparently make up their minds that Woolwich "must fall with the capital;" and so they provide for another central arsenal for artillery stores and "duplicate patterns," "in the event of the loss or destruction of Woolwich." This place they decide, in a Supplementary Report, should be Cannock Chase, 80 miles from Liverpool, and 120 from London.

When Woolwich "falls with the Metropolis," let us ask the Commissioners Whether they anticipate the invaders will leave us safe in Cannock Chase, to furbish up our duplicate patterns and make preparations for re-taking London? The sooner the Commission is re-constituted, with Lord Overstone, or some other man of intellect and without limited views, to preside, in order that the real opinions of our most eminent military authorities may be collected and weighed, and Her Majesty informed of what is really necessary to place Her United Kingdom in a "complete state of defence," the better for the country. The various important works on the subject that have been written, both by the French—such as Maurice, Carnot, Grobert, &c.,—and by the English, as General Lloyd, Major-Generals Lewis and Williams, Lieutenant-General Napier, Sir John Burgoyne, Colonel Jebb, Colonel Adair, Colonel Kennedy, and many others, should form the basis of the inquiry; and a very moderate amount of dialectic skill will suffice to eliminate all weak points from the various plans, and to establish an impregnable chain of evidence, proving both what ought to be done, and how to do it. There should be no limit to the scope of such an inquiry. The advantages for the defence arising from steam-vessels, railways, telegraphs, must be fully considered, and so organised as to outbalance similar advantages for an attack. The arrangements to meet an invasion must not be contemplated as if only the troops or Volunteers which "happen to be" at any spot are all we can ever count upon. And, above all, the Commissioners must not prejudge what is wanted, and report against or without evidence, or only try to get opinions that will serve to bolster up crotchets or half-views of their own. A Committee or Commission that does this deserves the gravest censure, for dereliction of duty or sheer incapacity. Though the country by no means underrates the importance of our dockyards, we still must think their loss—though it, too, "must never be"—would yet be second to the humiliation and national degradation (to quote the words of a distinguished officer who has written on the subject) "of a hostile flag waving over the grave of departed greatness from the dome of St. Paul's." Nor can we anticipate the farcical kind of attack upon our shores, imagined by the late Royal Commissioners, by an enemy, "with no intention of occupying the capital, or attempting a serious invasion of the country" (§ 16). Secure London, and we scarcely think an enemy will ever care to come; secure the ports only, and still he might dare—his coming to London being then only made inevitable. But, be assured of this—it will be a "serious" business when it does happen. Serious it may be to us, but serious also in our reprisals,—even if merely a single dockyard were subjected to a bombardment. Let England be thus insulted without cause, and we shall wipe out the stain in blood, and strain every nerve to wipe out the very name of the aggressor from among the nations.

By the last mail we learn that Chusan is re-occupied, and that the first act of the new Chinese drama has commenced without opposition or bloodshed, although the long Bund and the fort on Joss House Hill, which cover Ting-hae, were tempting places to mount guns upon, and would have proved formidable obstacles to an enemy in any other than Chinese hands.

Possibly the mandarins of Ningpo and Chapoo may remember the ineffectual struggle, and the terrible slaughter they twice endured in the first war, and probably the people of Chusan may not yet have forgotten the security and prosperity they enjoyed under the firm and mild rule of Brigadier Campbell and his Brigade-Major, now Lord Clyde and Colonel Haythorn, the latter just promoted from Chief of the Staff in China to be Adjutant-General in India, to the great loss of the former, and equal gain of the latter command.

In re-occupying a spot with which we were so long acquainted, we have a great advantage, if we know sufficiently how to profit by the experience of our former campaign. We have, in the first place, to remember the terrible mortality which all but exterminated the 26th Cameronians on the lonely range of wooded hills above Ting-hae, and the comparative immunity from disease of the 98th and of the Madras troops after they were quartered in the cantonment under the Bund, on the level of the paddy swamps; and it is the more indispensable to remember this, as the special correspondent of the *Times*, in his admirable report of his visit to Chusan, has pointed to the latter cantonment as having been, from its ill-chosen site, the cause of a frightful mortality, which might have been escaped on the hills.

Actual experiment proved this very justifiable theory to be incorrect. The beautiful hills were so deadly as to give to Chusan the reputation of being so pestilential, that it was not worth retaining, when it might have been had for the asking; while the hospital and cantonment in the plain proved to be the healthiest place in China, or perhaps in the East: they quite reinstated the island in public opinion, and caused many a subsequent regret that it had not, rather than Hong Kong, been the military headquarters in China.

It is well known among residents in malarious climates, that on the level of the plains there is less risk than on the hill-sides, owing to the gases evolved from decaying vegetation being slightly lighter than the air, which causes them to rise to a certain, but not considerable height, where they remain stagnant, unless not dissipated by sea-breezes or strong currents of air; thus the sides of tropical hills are often uninhabitable, when the plain at the foot or the exposed summit, are both comparatively free from malarious influences.

It must, however, for the credit of the Chusan hills, be remembered, that other besides local agencies were at work to cause sickness. The force had just returned from the Yang-tse-Kiang, where the seeds of fever must have been generally contracted. It had also been greatly exposed to the sun at the capture of Chin-Kiang-Foo, where numbers of men perished by coup-de-soleil, besides many other hardships and fatigues on shore, varied by long intervals of confinement on board ship. Thus the 98th Regiment, nearly 1200 strong, were for six months shut up on board the Belleisle, till they landed under Colonel Colin Campbell for the attack on the Tartar camp, as a diversion in favour of Sir Hugh Gough's assault on the city. A sun which would have grilled a beef-steak, and made gun-barrels too hot to be handled, had a fearful effect, as may readily be imagined, on men whom want of condition, from long confinement and ship diet, had rendered too feeble for such exposure. More than twenty men fell dead in the ranks, and the entire regiment sickened; and it was only after long sojourn and rest in the Chusan Paddy fields, and with large contributions to the hospital and cemetery, and large drafts from home, that it recovered its original effective condition, and earned for itself and its officers in India the honours and rewards which a long and patient struggle with adversity of all kinds in China had so well merited.

When first Chusan was occupied by the 26th Regiment, the men were chiefly fed on salt meat, cured at Calcutta, of a detestably bad quality. They were marched at daybreak from the hills to the Bund, there to wait for their rations to be served out, and to carry them back in the hot sun. They lived in tents, and got for a mere trifle as much Sam-shoo as would have poisoned a regiment. Moreover—and this perhaps was the chief cause of fever—the peasants were frightened for a time from their cultivation, and the paddy rotted over thousands of acres of irrigated fields, causing an amount of vegetable decomposition which even under a cooler sun would have been deadly.

With all these lethal causes at work, it is not to be wondered at if men sickened and died. The wonder rather is that any survived to tell a tale by which we may now profit. We have got possession of Chusan at a healthy period of the year, and without a struggle. The cultivation may go on uninterruptedly absorbing the gases on which vegetables live and man dies. Ample time is afforded to throw up huts, and clear and drain a sufficient space about them. A sanatorium may be established on the adjoining island of Footo, where a dry soil and extensive Buddhist temples and monasteries afford every convenience for adaptation to our wants. Our connection may be renewed with our old purveyors at Ningpo, distant about 40 miles, and at Woosung and Shanghae, less than 100 miles distant, where supplies of cattle, sheep, horses, poultry, vegetables, fuel, clothing, and everything an army can require, may be obtained. A better system, too, has been inaugurated since we learnt at Balaklava, under the hard teaching of adversity, that good administration is as important in camp and barracks as good leading and discipline in the field; in fact, that a man is no more fit for war than a horse for the course without good preliminary feeding, and housing and clothing, as well as training, and that condition in both horse and man is the proper and equal balancing of all these essentials. We have learnt much in these respects, but we have still much to learn, and many prejudices to overcome: for the Anglo-Saxon is of an obstinate and stiffnecked generation, and is not easily to be frightened, bullied, or coaxed out of his old habits, good or bad.

We have now a base some 600 miles nearer than Hong Kong to the scene of operations—in a climate not bad, if too many liberties are not taken with it; which may even, under favourable circumstances, be reckoned good; in the midst of a vast and beautiful archipelago; in the immediate neighbourhood of the richest provinces, and the most orderly, industrious, and kindly people of China, without prejudice against us, and unimbued by Cantonese malice and presumption. We are close to vast water-sheds to bear us supplies from the interior, and we can command the aid of an almost unlimited amount of labour, at lower rates, and from a more manageable race than the half-land, half-water pirates, whom we attract in the south by high wages and a prospect of pillage. Japan is within a couple of days' steaming in either monsoon; and although the winter cold is occasionally severe, the surrounding seas are never frozen.

We have thus made an excellent step in the right direction from Hong Kong; and whatever may be the final result of the negotiations, whether peace or war, we have every reason to rejoice that our troops and depôts are so well placed. In Chusan, life will be less of a burden than at Hong Kong. The artist and sportsman may find ample congenial occupation. There is much to explore and to learn, and much good to be done in confirming and extending, by useful works and just treatment of the people, the good reputation we acquired in our last sojourn in these parts.

In order to fully carry out the scheme we have lately proposed for the organisation of a Standing Navy, the creation of which can only be a matter of time, we shall now offer our ideas on the necessity and formation of a Staff Corps for the Navy.

At present admirals in command select their staff from their relatives and friends, amongst whom they distribute, of right, all the vacancies, whether from disease, battle, or otherwise, which occur on the station which they command. Such is their prerogative, and no one can complain of the admiral; he has been educated up to this system, and very naturally regards his patronage, in his flagship and on his station, as what it actually is—his private property. It is simply his share of the Admiralty patronage for the time being. No one can blame him; there is nothing that can be styled irregular; he is merely carrying out the laws and customs in such cases used at sea in Her Majesty's Navy. But, that such laws and customs are not manifestly unjust, and calculated to effect what they have done, namely, debauch the Service in every branch, none can deny; and amongst the officers have mainly tended to create that insubordinate contempt of their superiors and the Service generally, which is reflected at every mess table, and has naturally extended itself to the crews they command. They see that officers of high social position, or Service connection, may be drunken, incapable, and negligent, and not only with perfect immunity,—where their less fortunate brethren would be court-martialled and turned out of the Service,—but rapidly advance. Within the last few years there have been actually cases of officers being promoted when their case has been so gross as to have left no room for anything but court-martial, and thereby escaped; and, higher in the scale, we can remember a captain of one of Her Majesty's ships, who was so drunk at the assault of a fortified town that he had to be removed, within three weeks being rewarded with the rank of commodore.

These are some of the many reasons which have induced us to advocate the abolition of all patronage, and also the desire to see an efficient Staff Corps attached to the proposed divisions of the Standing Navy, from which the flag-officers in command may choose their staff, their sole rewards being a higher rate of pay when serving on the Staff, and the advantage of being in a prominent position, where distinguished services before the enemy may lead to board promotion.

In conjunctiom with a Naval College (which we hope

Digitized by Google

to see established ere long in some eligible spot near Osborne, instead of at morally and physically pestiferous Portsmouth), where cadets may be educated from their first joining, spending the summer months in training-corvettes, and eventually returning to pass all other examinations (instead of having to hang about Portsmouth on their own foundation, often for months, when they too frequently imbibe those germs of dissipation which eventually become their ruin), there must be a senior branch, in which those wishing to compete for the Staff Corps must first pass into, and, subsequently, stand the test of successive and rigid examinations. For example, a sub-lieutenant, after having qualified for the Staff, on receiving his promotion to the rank of lieutenant in the ordinary routine of the Service, will again have to pass another and tougher examination before he is qualified for a lieutenant of the Staff; and so with every stage he may attain, he will have again to qualify for that corps, if he wishes to serve in it. Following this scheme, it will be no sinecure, and no idler will ever be able to become a captain of the staff, and at the same time we shall secure active-minded and intelligent officers to fill the extraordinary and varied duties by which, in modern warfare, a flag-officer is surrounded, and also valuable assistants in home administration.

By these successive and severe examinations we should not only ensure most competent and diligent officers for the Staff, but naval officers generally would be obliged to retain their knowledge, and keep up with the daily improvements, &c., which are being made in all those branches of education which ought to constitute the education of a modern naval officer. A Captain would then no longer require a dry nurse, in the shape of that singular anomaly in Her Majesty's ships, of a master to navigate for him. He might, as in other navies, have a navigating lieutenant to assist him; but he would not have to ring his bell with every shift of wind for his master, to ask him where he was, and on what tack he should next go.

THE ARMY.

2nd Dragoon Guards. Lieutenants W. J. Thomas and C. G. A. Barnes are on leave of absence from the head-quarters at Lucknow.

3rd Dragoon Guards, now at Mhow, with the exception of a squadron recently arrived at Kirkee, are expected at Kirkee, and will embark for England after the rains. The regiment has been in India since the autumn of 1857. Captain T. J. Francis is on leave to England for 12 months.

7th Dragoon Guards. Major F. G. Smith is on leave to England from 15th April to 15th October, 1861; and Lieutenant E. Molyneux to England, from 1st May to 1st November, 1861.

7th Hussars. Lieutenant Topham, who had been nominated to act as Adjutant in the room of Lieutenant Mould, has since been appointed Commandant of the Rohilcund Horse. Lieutenant and Adjutant John Mould is on leave to England, under new rules.

8th Hussars. Major F. E. Macnaghten has passed an examination in Hindostanee.

12th Lancers. The hired troop-ship Trafalgar, from Madras, March 15th, and St. Helena, May 12, has arrived home with the head-quarters of the 12th Lancers, under command of Captain Horne. The officers are Captains Reader and Allen, Adjutant Brown, Lieutenants Le Quesne, Gower and Vaughan; Cornets Chichester, Blacker, Cruise, and Jackson, and Quartermaster Blake. Cornet Sefton died on the passage, in May.

Royal Artillery.—The following appointments, transfers, &c., are announced in a general regimental order:—Second Captain A. Noble, to be Assistant-Inspector of Artillery, vice Vandeleur, deceased; Captain E. J. Bruce, to be Secretary to the Royal Artillery Institution at Woolwich, vice Noble; Lieutenant L. H. H. Parsons, to be removed from the Riding Establishment to K battery, vice Maule, who resigns his appointment in the brigade only, and is posted to No. 8 battery, 2nd Brigade; Lieutenant W. M. B. Walton to the Riding Establishment, vice Parsons. The following transfers have been ordered:—Second Captain S. H. Anderson, from No. 4 battery, 5th Brigade, to No. 2 battery, 7th Brigade, and Second Captain R. O'Hara, from the latter to the former; Lieutenant Guille, from No. 3 battery, 13th Brigade, to the Depôt Brigade; Lieutenant Leacock from No. 2 battery, 1st Brigade to No. 3, battery, 13th Brigade; Lieutenant Oliver, from No. 5 battery, 3rd Brigade, to No. 4 battery, 12th Brigade; Lieutenant Stevenson, from No. 6 battery, 8th Brigade, to No. 3 battery, 11th Brigade; Lieutenant Wilmer, from No. 7 battery, 10th Brigade, to No. 3 battery, 11th Brigade; Assistant-Surgeon W. D. Smythe, from the Depôt to the 9th Brigade, for duty at the Curragh; Sergeant Michael Cook, of the 1st Brigade, has been appointed Sergeant-Major of the Royal Military Repository at Woolwich, in the room of Marshall, promoted Lieutenant of the Coast Brigade.

Captain Warren remains in India for the present, and is doing duty with Depôt Royal Artillery in Fort William.

Royal Engineers.—Lieutenant G. Swetenham is on leave in India for six months from date of embarkation of 4th company for the Mauritius, with a view to his continuing to serve in the public works department.

3rd Buffs, 2nd battalion. Lieutenant and Adjutant Cotter has arrived home from Malta in the Megæra, in charge of detachments.

5th Fusiliers. The 1st battalion will shortly return home from India. Lieut.-Colonel W. C. Master has leave to England for eighteen months.

6th Regiment. The 1st battalion which has been on foreign service since August, 1846, may be expected home next year from India. Captain R. Bolton, is appointed to offic. temp. as commandant of Chinsurah depôt. Major C. J. Blanckley, has leave to England, under new rules.

7th Regiment, 1st battalion. Lieut.-Colonel R. Y. Shipley is on leave to Murree, from May 1 to Oct. 31. Major T. Tryon is on leave to Cashmere, from 20th April to 15th October.

8th Regiment, 1st battalion. The under-mentioned officers, being in excess of the number for which accommodation can be provided with the regiment, are permitted to proceed to England, overland:—Captain M'Crea, Lieutenants Blairand Page, Lieutenant and Adjutant Whelan, Ensign Watson.

18th Regiment, 1st battalion. Captain C. G. D. Annesley is on leave to England for eighteen months.

19th Regiment, 1st battalion. Captain C. H. Lambert is on leave to England for six months.

20th Regiment, 1st battalion. Lieutenant N. Gwynne is appointed to officiate as instructor of musketry to the corps, pending the arrival of Lieutenant Cox.

22nd Regiment, 1st battalion. The head-quarters arrived at Malta on the 22nd instant, from Queenstown, in the Olympus steamer.

24th Regiment. The 1st battalion will return home from India this year.

27th Regiment. Captain C. Warren has leave to Simla and hills north of Deyrah, from 15th April to 14th October.

35th Regiment. Captain R. C. Lee has passed an examination in Hindostanee. Assistant-Surgeon Thistelton is on sick leave to Landour, from April 15 to July 14.

37th Regiment will return home from India this year.

42nd Regiment. Captain W. Baird is on leave from the regiment from 1st May to 31st October, to hills north of Deyrah and Simla.

46th Regiment. Leave of absence is granted to Lieut.-Colonel Deacon, C.B., from Feb. 21 (the date of his removal from 61st), till the sailing of the mail steamer for India in October next, when he is to proceed to join his regiment.

48th Regiment. Captain F. C. Trent has obtained leave to England for eighteen months.

Royal Marines Light Infantry.—Private Coleman, 9th company, Royal Marines, has been tried by general court-martial this week on charges of insubordination, striking a sergeant, refusing to strip for medical examination, and using disrespectful language to his colonel. The prisoner pleaded "Not guilty." The finding and sentence of the court will not be known until it has been approved of by the Admiralty.

51st Regiment. Lieut.-Colonel A. H. Irby is on leave to Cashmere from April 15 to October 14.

52nd Regiment. Captain and Brevet-Major G. C. Synge is on leave to Simla from April 15 to October 14.

54th Regiment. Lieutenant and Adjutant J. W. Hughes has passed in Hindostanee. Major and Brevet-Lieut.-Colonel Brett has obtained leave to England for eighteen months. Ensign R. Magill, is on leave to the hills for three months, from April 20, 1860.

57th Regiment. Captain J. Stewart is on leave to England from April 20, 1860, to October 20, 1861.

64th Regiment will be one of the regiments sent home from India next year.

66th Regiment. Ensign T. Gamble is on leave to England for six months from date of embarkation at Bombay. Col. C. E. Law, is on leave to England, under new rules, for 15 months, from date of embarkation at Bombay.

68th Regiment. Captains C. U. Shuttleworth and F. L. Saunderson have obtained leave to England for eighteen months. Assistant-Surgeon A. P. M. Corbett is on leave to England for nine months.

73rd Regiment. Under orders to return from India. The regiment left England in September, 1845, and has been longer on foreign service than any regiment now abroad.

75th Regiment. Lieutenant H. P. Hurford has left Chatham garrison, in charge of detachments, for Cork. Lieut. F. D. Cornwall has leave home under new rules.

76th Regiment. Brevet-Lieut.-Colonel Mortimer is on leave until the 14th August.

77th Regiment. Captain J. G. Skene is on six months' leave to Mussoorie and Simla.

78th Regiment. A grand banquet was given on Friday week evening, in the Riding-School adjoining Hamilton Palace, in honour of the 78th Highlanders, now stationed at Hamilton. The chair was occupied by Provost Nisbet, the chief magistrate of the borough, and there were present about 170 soldiers, 60 or 70 Volunteers, and upwards of 200 other persons. After dinner, the chairman, in the name of the magistrates and council of Hamilton, presented Lieut.-Colonel M'Intyre, commanding-officer of the detachment, with the freedom of the borough, accompanied with an address expressive of their high sense of the services he had rendered to his country, particularly during the recent campaign in India. After an appropriate acknowledgment of the compliment by Colonel M'Intyre, the usual loyal and patriotic toasts were given. "Health and prosperity to the officers and men of the 78th Regiment" having been given with much cordiality, Lieut.-Colonel M'Intyre, on behalf of every officer and soldier of the 78th Highlanders, returned thanks. He said that the 78th Regiment had had the good fortune to meet with the highest reward at which a soldier could aim, as evinced not only on this, but on many occasions since their return from India, and that reward was the approbation of their countrymen.

79th Regiment. Lieutenant J. M'Nair has leave to England for eighteen months.

80th Regiment. Lieutenant W. B. B. Christie, is gone on leave from India to Australia, from April 1 to October 1, 1861.

81st Regiment. Captain Tonnochy is appointed Commandant of the 13th Punjab Infantry. Assistant-Surgeon H. Bicknell has leave to England for one year from date of departure from his regiment.

88th Regiment. The following officers are on leave:—Brevet-Major E. D. Radcliffe, to Mussoorie; Lieutenants J. Irwin, H. G. Moore, to Nynee Tal; Lieutenants J. Burke and E. A. Percival, to Mussoorie, from April 15 to Aug. 14; Lieutenant C. Robertson, from April 15 to July 14, to Nynee Tal.

89th Regiment. Ensign W. G. Osler is about to retire from the Service.

93rd Regiment. Lieutenant W. S. Mackenzie has obtained leave to Cashmere (with the sanction of Government) from May 2 to Aug. 2.

97th Regiment. Ensign R. Gray and Assistant-Surgeon J. H. Porter have passed in Hindostanee.

Rifle Brigade, 3rd battalion. Brevet-Major H. R. L. Newdigate has leave to England for eighteen months.

3rd West India Regiment, at Barbadoes. The sergeants of this regiment presented Quartermaster-Sergeant John Acres with a handsome silver epergne, as a testimonial of esteem on his leaving the regiment, after a period of 21 years in Her Majesty's service, 18 years of which he has spent in the West Indies.

Weapons of War.—Since 1852 the principal items of the public expenditure for enabling private persons to make experiments for the purpose of improving weapons of war amount to 72,769*l.* Advances were made of 11,000*l.* to Mr. Lancaster for oval-bored rifled cannon; of 7219*l.* to Sir W. Armstrong for rifled cannon; of 3406*l.* to Messrs. Bishop and Vaughan for a large gun; of 7811*l.* to Mr. W. Hale for war rockets; of 11,808*l.* to Mr. Mallet for mortars of large construction; and of 16,995*l.* to Mr. Whitworth for machinery and experiments.

Rifle Shooting.—Two very interesting matches came off at Chatham Garrison; the first on Wednesday, June 20, 1860, between six sergeants of the Royal Engineers, armed with the Lancaster rifle, and six sergeants of the 3rd Depôt Battalion, armed with the regulation sergeants' rifle, each sergeant firing five rounds at each of the following distances—viz., 400, 500, 550, and 600 yards (2nd class). The sergeants of the 3rd Depôt Battalion proved themselves the best shots, having made an average of 14·83, the sergeants of the Royal Engineers making 13·83. The second match came off on Saturday, June 23, between two sergeants of the Royal Engineers and two sergeants of the 3rd Depôt Battalion, each sergeant firing five rounds at each of the following distances—viz., 150, 200, 250, and 300 yards (3rd class); the sergeants of the 3rd Depôt Battalion were again the winners, making the unprecedented average of 27·00, the sergeants of the Royal Engineers making 20·50. After the shooting matches between the Royal Engineers and the battalions in Chatham, in 1858, the public were under the impression that the Lancaster rifle was far superior to the Enfield rifle. If it was better in 1858 it seems to have fallen off in 1860. The following is the order of the sergeants' firing:—First match—Royal Engineers: Colour-Sergeant Cole, 20 points; Sergeant Hartley, 16 points; Sergeant Gartshora, 16 points; Sergeant Pickles, 11 points; Sergeant Cullen, 7 points. 3rd Depôt Battalion: Sergeant-Instructor Macartney, 18 points; Sergeant-Instructor M'Kie, 17 points; Colour-Sergeant Pennington (19th Regiment), 16 points; Colour-Sergeant Southwell (81st Regiment), 16 points; Colour-Sergeant Spark (75th Regiment), 15 points; Sergeant Mitchell (81st Regiment), 7 points. Second match—3rd Depôt Battalion: Sergeant-Instructor M'Kie, 29 points; Colour-Sergeant Southwell (81st Regiment), 25 points. Royal Engineers: Sergeant Hartley, 21 points; Colour-Sergeant Cole, 20 points.

Victoria Rifles.—After the termination of the grand review, the 1st Middlesex, or Victoria Regiment, accompanied by the Harrow Rifles, took up their line of march, previously laid out along the Edgeware Road, headed by their bands, to the Victoria Rifle Ground, at Kilburn, where, having piled arms, about 400 in all proceeded to a very extensive military tent erected in the centre of the expansive ground, and partook of a *dejeûner*. Major Whitehead, of the Victoria Rifles, presided, and was supported by various officers of each corps. The toasts were drunk with the greatest enthusiasm.

The Council of the National Rifle Association have made arrangements by which all members of the Association will be accommodated within the reserved space prepared for the presentation of the addresses to Her Majesty the Queen and His Royal Highness the Prince Consort. Members of the council and all officers connected with the Association are requested to appear in uniform.

In the House of Commons, some evenings since, Colonel Lindsay asked the Secretary for War if he had received any report respecting the efficiency of the knapsack invented by Mr. Berington and Colonel Spiller, and also if the report was true that it was intended to provide the Volunteer force with knapsacks, or to grant them a certain sum in lieu. Mr. S. Herbert said that the question concerning the knapsacks was deferred, not to a committee of officers, but to the men themselves, whose report was favourable to that of Colonel Spiller, and not to that of Mr. Berington. However, a further report was to be made upon the subject. With regard to the second part of the question, in case of invasion knapsacks would be furnished to every Volunteer, or a sum of two guineas in lieu of it. We understand that the second Report has been since received at the War Office, and that it is highly favourable to Colonel Spiller's knapsacks.

Lieut.-General Sir Frederick Love, Inspector-General of Infantry, accompanied by his Aide-de-Camp, Major Mayne, made a very close inspection of the depôt of the East India Company's Army, on Thursday, the 28th inst., at Warley. The Lieut.-General after inspecting the Cavalry, Artillery, and the Infantry, visited the men's dinners, and the hospital, as also all the books, returns, &c., of the depôt; and before leaving in the evening, expressed to Colonel Lesley the commandant, his satisfaction at the excellent order in which he found everything under his command.

Her Majesty left London for Aldershot on Monday for the purpose of reviewing the troops in camp on the following day. The sun shone brightly, and the day was, in every respect, favourable. Her Majesty was on horseback, and wore a scarlet habit, being accompanied by Prince Albert, the Prince of Wales, Princess Alice, and a numerous staff of officials. The troops were engaged in a series of manœuvres, of which the object was to resist an imaginary attack of the enemy. On Monday evening the following officers were invited to dine with Her Majesty: Lieut.-General Knollys; Colonel J.

Digitized by Google

S. Wood, C.B., assistant adjutant-general; Lieut.-Colonel the Hon. H. Clifford, assistant quartermaster-general; Colonel Newton, Coldstream Guards; Colonel Cooper, 45th Regiment; Colonel Steele, C.B., Coldstream Guards; Colonel Vyse, Royal Horse Guards; Colonel Bentinck, 4th Dragoon Guards; Lieut.-Colonel Hume, 55th Regiment; Lieut.-Colonel Nixon, R.A.; Lieut.-Colonel Goodenough, R.A.; Lieut.-Colonel Radcliffe, R.A.; Lieut.-Colonel Adams, 49th Regiment; Lieut.-Colonel Allan, 2nd battalion 25th Regiment; and Lieut.-Colonel Foster, 16th Lancers. The band of the 1st battalion Rifle Brigade played during dinner.

ROYAL MILITARY COLLEGE, SANDHURST.

The following is the official list of successful candidates at the recent examination for admission to the Royal Military College, Sandhurst:

	Marks.
1. George L. B. Thomas, age 16, place of education, private tuition	4295
2. George C. Helme, 16, Winchester College and Wimbledon School	4164
3. John P. Brabazon, 17, Academic Institute, Dublin, and private tuition	3712
4. J. H. Gamble, 16, Cheltenham College	3569
5. H. L. Ricard, 17, King's College School	3560
6. C. W. Lloyd, 18, Marlborough College	3347
7. Howe J. Knox, 17, Harrow, and private tuition	3293
8. C. H. Sanford, 16, private tuition, and Dr. Bridgman's, Woolwich	3180
9. Henry Teevan, 18, Oscott College	3140
10. Compton Norman, 16, private tuition	3069
11. W. H. Balders, 16, Mr. Hopkirk's, Eltham	3051
12. A. Chaytor, 16, Cheltenham College	2822
13. E. B. Bishop, 16, Victoria College, Jersey	2675
14. C. M. Taylor, 16, Cheltenham College, and private tuition	2640
15. H. M. Matthews, 17, Woodspeen Academy, and private tuition	2616
16. Wm. F. Gatacre, 16, Mr. Hopkirk's, Eltham	2583
17. Charles Y. Peyton, 17, Wimbledon School, Surrey	2554
18. Edward S. Mott, 16, private tuition	2550
19. Richard J. Airey, 16, private tuition	2365
20. J. Harvey, 16, Portora Royal School, Enniskillen	2239
21. Thorold Parkinson, 17, private tuition	2182
22. Edward James, 17, King's College	2067
23. Charles Dew, 16, Westbourne College, and private tuition	1990
24. Thomas Baker, 16, Grosvenor College, Bath, to June, 1859	1945
25. Digby T. Brett, 17, private tuition	1910
26. Mileson Edgar, 17, Queen Elizabeth's School, Ipswich	1750
27. A. H. W. Mansergh, 16, private tuition	1640
28. George B. Skinner, 16, Lansdowne, and Bath Proprietary College	1145
29. Edward Richardson, 17, Portora Royal School, Enniskillen	1005

The following Queen's cadets were also examined, and found qualified:—

Arthur E. Havelock, 16, private tuition	4730
Edmund C. Browne, 17, St. Mark's College, and Bayswater Grammar School	2215

THE COMMISSARIAT DEPARTMENT.

The annexed General Order has been issued relative to the vacancies about to ensue in the Commissariat Department;—

"Horse Guards, S.W., June 15.

"The Secretary of State for War having notified to the General Commanding-in-Chief that there will shortly be vacancies in the rank of Deputy-Assistant-Commissary-General, His Royal Highness directs that when officers of the Army are desirous of being appointed to the commissariat department, in terms of clause 4 of the Royal Warrant of the 28th October, 1858, their applications may be made according to the annexed form,* which will be forwarded to the Adjutant-General of the Forces, for submission to the General Commanding-in-Chief, with a letter of recommendation from the officer commanding the regiment or depôt to which the applicants may belong.

"Previously to appointment as probationary Deputy-Assistant-Commissary-Generals, candidates will be required to undergo an examination according to the following scheme, viz. :—

"OBLIGATORY.	Maximum Marks.
"English Language—Correct writing from dictation; composition	1000
"Arithmetic—First four rules; simple and compound; weights and measures; vulgar and decimal fractions; duodecimals; proportion; extraction of square root; practice; and interest and discount	1000
"One foreign language	1000

"In each of the subjects, one-half of the marks allotted to it should be gained for qualification.

"VOLUNTARY SUBJECTS.	
"Mathematics—Commercial (book-keeping and exchange); arithmetic (accounts); algebra; Euclid (Books I. and VI. and XI. and XII.); trigonometry; mensuration of planes and solids; mechanics	2500
"Geography—Especially in reference to the population, commercial production, resources, and communications of country	1000
"History—From the year 1789	1000
"Chemistry	1000
"Geology and mineralogy	1000
"Any other modern language, each	1000

"No candidate will be considered qualified who does not obtain an aggregate of 2400 marks. Not more than three of the voluntary subjects must be taken up by any candidate, nor will he be allowed to count the marks he obtains in any voluntary subject if below one-fifth of the maximum allotted to it.—By command of His Royal Highness the General Commanding-in-Chief.

"JAS. YORKE SCARLETT, Adjutant-General."

* The form here referred to contains vacancies, in which the name of the officer, place and date of birth, corps in which he has served and date of first commission, present rank, &c., must be inserted.

The Army Gazette.

WAR OFFICE, PALL MALL, JUNE 29, 1860.

The Queen has been graciously pleased to give orders for the appointment of Lieutenant-General Sir Charles Yorke, K.C.B., Military Secretary to His Royal Highness the General Commanding-in-Chief, to be an Ordinary Member of the Military Division of the First Class, or Knights Grand Cross, of the Most Honourable Order of the Bath.

53rd Regiment of Foot—Major-General Frederick Maunsell to be Colonel, vice Lieutenant-General Sutherland, C.B., transferred to the 93rd Foot.

93rd Regiment of Foot—Lieutenant-General W. Sutherland, C.B., from the 53rd Foot, to be Colonel, vice General the Lord Clyde, G.C.B. transferred to the Coldstream Guards.

Royal Artillery.—Brevet-Colonel George Robert Harry Kennedy to be Colonel, vice Ingilby, removed as a General Officer: Brevet-Major Edward Mourrier Boxer, on the Supernumerary List, to be Lieutenant-Colonel; Brevet-Major Charles Scudamore Longden to be Lieutenant-Colonel, vice Kennedy; Brevet-Major William Henry Randolph Simpson to be Captain, vice Longden; Lieutenant Noel Hamlyn Harris to be Second Captain, vice Simpson.

Gentlemen Cadets to be Lieutenants—Charles Jones, Alexander Burton Brown, Henry Andrews Barker, Henry William Lovett Hime, Charles Domett Egerton Parks-Smith, Leonard Downes, Banks Robinson Greig, James Walker Bernard, John Becher Ormsby, Frederick Augustus Hand, Rowland Walkey, John Walter Inge, Hardinge William Browne, Albert Edward England, William Augustus Cook, Edmund Hunt Holley, Ferdinand Henry Wheeler Milner, Edward Albert FitzRoy, William Gorges Mulloy, Richard Jackson Hezlet, George Arthur French, Robert Dundas Elliott Lockhart, Thomas Wood, Thomas Martyn Hitchins, Frank Galloway, James Fergusson Jenkin, Thomas Micklem Cruttwell, Maitland Moore Lane, Francis Carminowe Nicolas, Price Frederic Blackwood, John Archibald Campbell.

The Commission of Paymaster Donald Stewart to be antedated to 24th April, 1860.

The Commission of Paymaster Claudius Buchanan Piers to be antedated to 26th April, 1860.

Royal Engineers—The undermentioned Lieutenants with temporary rank to be Lieutenants with permanent rank, viz.: William Innes, Robert Mitchell Campbell, Hamilton Tovey, Richard Nicholas Buckle, Robert Athorpe, James Fellowes, Richard Henry Beaumont Beaumont, Richard Harry Williams, Jasper Gustavus Silvester Davies, Edmund Donough Collins O'Brien, William Joseph Carroll, Samuel Anderson, Charles Woodward.

Gentlemen Cadets to be Lieutenants with temporary rank—William Charles O'Connor, Henry Fowler, John Henry Urquhart, Henry Horace Baker, James Devereux Bowly, Charles Cunningham, William Alexander Wildman Orange.

96th Foot—Lieutenant John Thomas French, to be Captain, by purchase, vice Hallett, who retires.

STAFF.

Lieutenant-Colonel and Brevet-Colonel Sir Alfred H. Horsford, K.C.B., from Inspecting Field Officer of a Recruiting District to be Deputy Adjutant-General to the Forces, vice Major-General William Frederick Forster.

RECRUITING DISTRICT.

Lieutenant-Colonel and Brevet-Colonel Henry Hope Graham, C.B., from the 59th Foot, to be Inspecting Field Officer of a Recruiting District, vice Brevet-Colonel Sir Alfred H. Horsford, K.C.B., appointed Deputy Adjutant-General to the Forces.

BREVET.

Major-General Alexander Maclachlan to be Lieutenant-General, vice Dyneley, deceased; Colonel William Bates Ingilby to be Major-General, vice Maclachan; Lieutenant-Colonel and Brevet-Colonel Andrew T. Hemphill, 26th Foot, to have the temporary rank of Brigadier-General, while in command of a Brigade.

MEMORANDUM.—Dated Horse Guards, June 29, 1860.

His Royal Highness the General Commanding-in-Chief has been pleased to appoint Major-General William Frederick Forster to be His Military Secretary, in succession to Lieutenant-General Sir Charles Yorke, K.C.B., who has resigned. Dated 1st July, 1860.

(Signed) J. YORKE SCARLETT, Adjutant-General.

GENERAL ORDER.—No. 756.

Dated Horse Guards, S.W., 5th June, 1860.

Her Majesty has been graciously pleased to command that the Reverend Hugh Huleatt, a Chaplain to the Forces, be promoted to be Chaplain of the Second Class, from the 17th May, 1860, in consideration of his meritorious services with the Army in China.

By command of His Royal Highness the General Commanding-in-Chief,

(Signed) JAMES YORKE SCARLETT, Adjutant-General.

This promotion was published in the Gazette of the 5th instant.

LIGHT CAVALRY EQUIPMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—This arm of our Service is divided into three classes, viz., Lancers, Light Dragoons, and Hussars. The two last, however, differ only in name, although the Hussar is the Light Dragoon, *par excellence*.

As we have now entered upon a new era in warfare—living in an age when the Whitworth and Armstrong guns have superseded the old bulldogs of former days, whose bark was worse than their bite—in times when the Enfield rifle, which carries true, and is effective at a couple of thousand yards, has taken the place of Brown Bess, with which a haystack could not be hit at a distance of as many hundred;—at a period like this, then, while artillery and infantry have made such rapid strides in advance, it behoves the cavalry not to be left behind in the march of improvement, but to endeavour to refreshen and develop its energies in some way or other so as to keep pace with the other two arms. If something of this kind be not done, and that shortly, the cavalry will lose the forward position it has always held, and degenerating, be considered fit for nothing better than to take charge of the baggage,—in short, to bring up the rear of the Army instead of leading the van.

I need scarcely remark that the great essential with cavalry is speed; consequently the first thing to be considered is, how may this be augmented without injuring its efficiency? As every pound extra will tell upon a horse in the field, or on the line of march, I should propose in the first place to reduce the weight at present carried by the horse as much as possible. And this can be done easier than some may be inclined to imagine.

It is a well-known fact, that in no cavalry in the world are the horses foraged, stabled, and looked after so well as in our own. At the same time it must be allowed that in no service have they so much weight to carry. Look at the saddle alone, and compare it with that of the French *Chasseur à cheval*, and it will be found that the latter does not weigh half as much as ours; and the Cossack saddle, made of raw hide, clumsy as it may look, is lighter than either. One thing in their favour certainly is, that they have no brass ornaments, or in fact anything that is not useful about their appointments—no weighty bits or stirrup irons; in fact, the Cossack has only a light snaffle in the horse's mouth, and but one rein to that.

Our light dragoon's horse, in complete marching order, has to carry, besides the rider, a weight between seven and eight stone (the shabraque is not included in this). Now, so long as this is the case, a much greater speed with our cavalry can never hope to be attained, when the horses have to carry so much extra weight as this; an unnecessary and useless burden a great part of it may be termed, for I have no hesitation in saying that on a campaign, a dragoon could do with a deal less kit than he has in times of peace. I know from experience that I had not in the Crimea one-half of the necessaries I should have been obliged to have had I been in England; yet I had quite enough then for all that is required.

At present the dragoon's kit consists of (his uniform of tunic and leather overalls not included) a pair of cloth overalls and stable jacket for foot parades, a pair of boots, and spurs, a pair of high-lows, three shirts, two flannels, two pair of drawers, two towels, three pair of socks, two pair of gloves, a hold-all complete, two shoe brushes and blacking, a cloth brush, horse-brush and currycomb, sponge, horse towel, nosebag and grooming bag, and forage cap. These are all packed in the valise except the high-lows and grooming things, which are packed in the wallets.

Now, the weight of the different articles are as follows:

	lb.	oz.	Stone	lb.	oz.	
Men's necessaries	24	8				
Valise	2	8				
Stable jacket	2	0	2	3	8	
Overalls, cloth	2	8				
Ditto, ditto, leather-booted	3	8	0	1	0	Extra
Tunic	3	0				
Busby	2	0				
Clonk	8	2				
Sword, belt, and sabretache	2	4				
Pouch and belt, cap, pocket-swivel, and 10 rounds ammunition	3	12	2	2	12	
Sword (new pattern)	4	4				
Carbine (Victoria pattern)	7	6				
Collar, bit, bridoon, and chain	8	0				
Saddle-tree	7	12				
Pannels-girth, tabs, &c.	9	4				
Wallets, shoe-cases, stirrup-irons, and leathers	14	0	3	1	8	
Sheepskin	4	8				
Lasso	4	0				Not cluded
Total			7	8	12	

This is what is carried by the light dragoon's horse at present, and with the view of reducing it to a more serviceable scale, I will propose the following changes, viz., that on a campaign the soldier should have two red flannel shirts in lieu of the three white ones; the former would not only be easier washed, and more serviceable, but would last longer; likewise the flannel under shirts we have at present could be dispensed with. Again, one pair of overalls (leather) is quite sufficient, and let these be lined with strong calico, which will make them wear better; besides doing away with two pair of drawers that are worn now. Instead of having a pair of boots and high-lows, substitute a strong pair of half boots, with high heels for spurs; these would do for everything, mounted or dismounted. One towel would be enough, as it can easily be washed when requisite. Cloth and shoe brushes, one set between every three men. One pair of gloves—no more can be worn—a holdall for the knife, fork, and spoon, three pair of socks. These and the grooming things would be all that a dragoon requires to carry with him on service, and could all be packed easily in the wallets in this way, viz. :—

Near Wallet.	Off Wallet.
1 red flannel shirt.	1 brush and box of blacking.
2 pair of socks.	Horse brush and curry-comb.
1 towel and holdall.	*Ditto rubber and sponge.*

Hoof-pick in the near shoe case, oil tin in the off.

By this method the valise would be entirely done away with, and would allow the saddle-tree being made much lighter in the rear, without taking into consideration how less liable a horse would be to having a sore back.

The horse appointments are all too heavy; but as it would be a work of time to make any reform there, it will be best left alone, except that the crupper and breastplate can both be very well done without. I rode all the time I was in the Crimea without a crupper, and although mine was a narrow-shouldered horse, never found the saddle shift in the least; and the Cossacks never wear either breastplates or cruppers, although their saddles do not fit anything near so well as ours without them. One great advantage would be, that the dragoon could saddle in a third less time had he neither of these useless articles than could be done with them; a matter of great importance, be it remembered, when, lying within the circuit of an enemy's vigilance, you are exposed to a sudden attack. At such a time, quick saddling becomes a virtue in a dragoon.

The next consideration is the belts and arms. Just look at the sword; what an unwieldy, cumbersome weapon it is, especially for the light bobs of 5 feet 4 inches! Does it appear reasonable that they should have to use a blade as weighty as that of the heavy dragoon, who stands 6 feet in height, and is strong in proportion? yet such is the case. But the great objection to the present weapon is the steel scabbard and its rings and slings, which answer no purpose but to spoil the edge, and, in moving about, makes such a rattling din that would render any surprise of the enemy next to an impossibility. This is putting the weight on one side altogether. Why not have a leather scabbard, attached to the waist-belt, similar to the sheath for the bayonet in the infantry? It would not then swing about, but would hang close and convenient to the hand.

I should at the same time do away with the carbine, with which, mounted, a correct aim cannot be taken; as the only rest for it is over the left, or bridle arm, and, however steady a horse might stand under fire,—a very rare occurrence—the slightest movement of his head even, at the time of firing, would cause a bullet to go far wide of the object aimed at. In the place of the carbine, I should recommend a long-barreled rifle pistol with a saw handle. This to be carried in a holster fastened by the side of the right wallet. With such a weapon, a steady and correct aim with the right hand might be taken. The ammunition-pouch would be carried on the waist-belt, to the right and in front. The pouch belt and swivel would not be required, which will prove of great benefit to the soldier, as this belt is very injurious, causing pains in the shoulders, or, more frequently, a pain across the chest, rendering breathing a difficulty. The cloak, or coat, might be the same as at present, with the exception of the cape, which ought to be made of macintosh cloth. This would be of great use to the dragoon, serving at all times for a dry bed to lie on; as no damp from the ground can strike through it. A macintosh would be very desirable as well, when on outlying picket on a rainy day without shelter. Whoever has been upon that duty in front of

Digitized by Google

Balaklava in such weather, when their clothes, coat, and all had got saturated through and through, will be able to form some idea of the benefit such a cape would have been to them, which, keeping the upper extremities of the body dry, yet remained light and easy to wear. It could be made so as to cover both cloak and wallets, and as there would be no baggage, the sheepskin (which, in rainy weather, only collects water) can be dispensed with.

The weight that the horse should have to carry would now be, as under:

	Lbs.	oz.	stone	lbs.	oz.
Necessaries, packed in wallets	4	8			
Half-boots and spurs	4	4		12	4
Overalls, leathered	3	8			
Tunic	3	0			
Busby	2	0			
Cloak and waterproof cape	8	0			
Sword-belt, pouch, cap-pocket, 10 rounds ammunition	2	6	1	7	8
Sword (leather-scabbard)	2	2			
Pistol	4	0			
Collar, bit, and bridoon	5	8			
Pannels, girth, flaps, &c.	9	4			
Saddle-tree (no cantle)	5	0	2	3	12
Leathers, wallets, &c., no baggage straps, crupper, or breast-plate	12	0			
Total			4	9	8

It will be seen that, if this method was adopted, the cavalry horse would not have as much to carry by nearly three stone as at the present time, and, as a consequence, would be able to get over the ground quicker, and go a greater distance than could be expected from him now.—I am, &c., PAUL PILGRIM.

LIGHT CAVALRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—When the commission on the Indian Army was sitting, I was asked by one of the members to put down my views with regard to organisation, equipment, tactics, &c., of light cavalry; and in reading your issue of the 9th I was struck with the identity of views of your Correspondent "A Dragoon," with mine on many points, and as a sensible opinion is never the worse for being backed, I will give you my views very shortly as to the equipment of light cavalry, but without going into detail, which would involve a longer letter than you would thank me for. There is no doubt that great alterations are required in cavalry drill and tactics on account of the increased range and accuracy of large and small arms; but this is too long a subject to enter on. My views with regard to the equipment of light cavalry were as follows:—Sacrifice everything you possibly can to lightness. In the first place, enlist small light men, with a machinery for drafting into the heavier, or artillery, those who grew too large for the light cavalry.

Secondly, reduce the weight of your saddlery by more than half (which could easily be done).

The saddle that I would give light cavalry would be neither more nor less than a strong hunting saddle, with German silver round the pummel and cantel to preserve the leather; a blanket underneath, a cloak strapped in front, and a shoe pocket behind the flap. No shabraque, no holsters, no valise.

Each regiment should consist of 3½ squadrons, the 1st and 2nd squadrons armed with a revolver on the sword-belt, and the remaining 3 troops with breach-loading rifled carbines. One or two carts or waggons, per troop, light and strong, to be horsed out of the odd troop, or No. 7, with the spare men to sit on the carts. Thus, if the carts were drawn by two horses, one man would be mounted on the near horse, and the other sitting in the cart; if four horses, two would be mounted and two in the waggon, the remainder of the troop acting as escort. This would leave 3 squadrons for the line on parade, the 3rd squadron being armed with carbines would be available as skirmishers, or to be dismounted and used as infantry, thus enabling a light cavalry regiment to act under all circumstances independently. The carts should hold all the kit which would otherwise have been on the horses, and would be available for sick or disabled men.

The carts should frequently be paraded with the regiment, and learn to work with it, on the reverse flank when in columns, and in the rear when in line; in fact, working with the regiment, as the waggons of horse-artillery do with a troop. I have seen a good deal of service with light cavalry in India, and know, by experience, that lightness is everything. On one occasion, when in charge of a detachment of light cavalry travelling by forced marches, I found it necessary to leave all the valises behind, under the charge of a native official, to be forwarded by camels, as, from their weight, the horses were getting rubbed over the loins, and we got on very well without them. With our present heavy saddlery, too, it is almost impossible, in forced marches, to prevent the horse's backs being galled. In long marches, particularly at night, men will roll about and go to sleep, and the heavier the thing that is rolling about on a horse's back is, the sooner it will be galled. There is an immense lot of unnecessary leather, too, about the horses' heads, and the bits are so heavy that a horse to relieve the weight hangs on the rider's hands, and thus gets a hard mouth. There is much more to be said, but I fear troubling you with too long a letter.—I am, &c., A LIGHT DRAGOON.

THE BUFFS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The Grenadier and Fusilier Guards have been lately commemorating the 200th anniversary of their formation; and, as other and older regiments have not done so, the idea appears to be general that these are the oldest regiments in the British Army. This is a mistake which, with your permission, I will endeavour to correct.

The oldest regiment in the Army appears to me that now numbered the 3rd Foot, which, if it commemorated its 200th anniversary of formation must have done so 87 years ago, for it first became a regiment, of which Thomas Morgan was colonel, in 1573.

In 1574, Queen Elizabeth reviewed 700 men of this regiment near St. James's Palace. They were the first good harquebusiers who had been seen in England. In 1593, Sir Francis Vere was appointed colonel, and his regiment is constantly mentioned in the wars in the Netherlands.

At this period many companies of Scots were also employed in the Netherlands. In 1613, several of these engaged themselves in the service of Gustavus Adolphus of Sweden, and these became the nucleus of the corps which is now represented by the 1st Foot.

In 1653, the English veterans (those who had been Vere's) were called the "Holland Regiment," and the colonelcy was conferred on John Cromwell, who changed his name to Williams.

In 1656, Lord Wentworth received command of a regiment, now the Grenadier Guards. General Monk appears to have raised the Fusilier Guards shortly after.

In 1660, Lord Wentworth's Regiment appears to have been taken on the strength of the British army, and in 1662 was called the Royal Regiment of Guards (now the Grenadiers).

Douglas's Regiment of Scots, who had been in the French service, landed in England from France in the summer of 1661, obtained rank in the English army from that date, and are now the 1st Foot.

A regiment raised for Tangier, in the autumn of 1661, is now the 2nd Foot.

The Admiral's, or Duke of York's, Regiment, raised in 1664, became the 3rd Foot. (This corps was incorporated in the 2nd Foot Guards in 1689.)

The "Holland Regiment" landed in England in May, 1665, and became the 4th Foot. On the incorporation of the Admiral's Regiment into the 2nd Guards it became the 3rd Foot, where it has since stood, though its name has changed twice. In 1689 it was called the "Prince George of Denmark's Regiment;" and in 1708, it received the name of the "Buffs," which it has borne ever since.

I hope you will not mind inserting this in your paper. Regiments are proud of their antiquity; and I should be sorry that any doubt of the antiquity of the 3rd Foot should exist while there remains AN OLD BUFFER.

May the Buffs commemorate their 300th anniversary in 1873, and may I be there to see!

THE COMMISSARIAT AT CHATHAM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I cannot consent to the circulation of the article in your issue of the 16th inst., headed "The Commissariat at Chatham," without remonstrance. You state "from information on which you can rely, that scarcely a day passes, but either large or small quantities of meat are rejected by the Board of Officers, whose duty it is to see that nothing but meat of prime quality is sent into the garrison for the troops."

You have been misinformed. Whenever either the Quartermaster, or the Regimental Board of Officers (daily detailed for the purpose), object to the supply—whether meat or bread—a report is made to the Brigade Office, and a Garrison Board convened. By no other person or persons can bread or meat be *rejected*.

During the contract for fresh meat for the six months ending 31st May last, eleven Boards of Survey were held upon meat.

During the present contract (from 1st inst. up to date of your last number), three boards have been held.

The Commissariat contract binds the contractor most unmistakeably as to the quality of meat to be supplied—"properly fed, good, sound, sweet, and wholesome beef and mutton," and the soldier is guaranteed this through his own regimental officers, who certify to having inspected and passed it.

What can Captain A., Lieut. B., or Ensign C. know about it? will say some of your readers. They probably know as much about drill as they do about meat when they join: as they study the one, so should they study the other. General Eyre, in a very recent garrison order, calls the attention of officers to this most important part of their duty. Your informant tells you that Quartermasters cannot be expected to be well versed on the subject! I differ with your informant, and hold a very contrary opinion as regards the Quartermasters in this garrison; and as for apprehending a reprimand from General Eyre for erring on the right side in this most important part of their duty!—Ask them.

When a Board condemns meat (or bread, or any supply), I purchase a like quantity in the market at the contractor's cost; and I ask your informant, does he believe any contractor would persist in offering meat of even indifferent quality, if he found the inspecting officers careful and resolute in enforcing the conditions of the contract? How could he stand my purchasing at 7½*d.* and 8*d.* per pound what he only gets 5¾*d.* for?

In conclusion, I would ask the person from whom you received your information, to accompany me some morning on a tour at "Rations," and then to communicate to you whether he does or does not believe the soldier is well supplied and well protected.—I am, &c.

A. C. CROOKSHANK, A.C.G.

As I am under orders for Scotland, perhaps your informant will take an early opportunity of communicating with me.

SELF-REGISTERING TARGET.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Being on Saturday last at the fine practising ground of the South Middlesex Rifles at Beaufort House, my attention was attracted by a crowd of the officers and volunteers, who, whilst some of them were firing at a target divided into squares, were looking at a small case containing two dials and two needles, presenting a strong likeness to a telegraphic instrument, such as may be seen in our railway stations.

I did not at first understand the meaning of this apparatus, as I found the gentlemen noting the result of the shots stood with their backs towards the target, instead of facing it, as is usually done; but whilst looking at these dials a shot was fired, and at the same instant I was surprised to find one of the needles suddenly move and remain stationary, pointing to the word "Bull's Eye," which had, in fact, been hit by the shot fired half a second before.

Many more shots were fired, and all which hit the target were similarly registered, the needle pointing unerringly to the part of the target struck; and pointing it out before the sound of the bullet striking it could reach us. The distance at which the firing took place was 200 yards.

Having seen on several occasions the unpleasantness and squabbling which takes place in registering the hits in ball practice by the ordinary system of marking, to say nothing of the danger and loss of time involved in the system, I think this "Telegraphic Target" is calculated to remove all these impediments and objections in the most reliable and satisfactory manner.

Not having seen or heard of any of the numerous journals noticing this clever and efficient invention, though I understand it has been used and approved of at Hythe, I am induced to avail myself of the medium of your valuable and widely-circulated journal (if you should consider this worthy of a corner in it) to call the attention of the various Volunteer Corps to what appears to me to be an apparently simple and efficient means of removing all the objections to the present system of marking.

I am informed this morning by one of the members of the corps, that yesterday the Inspector-General of Infantry and staff were present during the employment of this instrument, and expressed themselves highly gratified at its utility.—I am, sir, &c., A TRAVELLER.

THE CHINA EXPEDITION.

The following is the distribution of the Expeditionary Force (exclusive of head-quarters staff):

1ST DIVISION.

Major-General Sir J. Michel, K.C.B.; Brevet-Lieut.-Colonel Elkington, 6th Regiment, A.D.C.; Captain Green, 77th Regiment, D.A.A.G.; Lieutenant Allgood, Bengal Army, D.A.Q.M.G. Royal Artillery.—Desborough's Battery (9-pounders); Barry's Battery (Armstrong). Royal Engineers.—10th (Fisher's) Company.

1st Brigade.—Brigadier Staveley, C.B.; Captain Robert Brooke, 60th Rifles, Brigade-Major. 1st (Royal) Regiment, 2nd battalion; 31st Regiment; Loodiana Regiment.

2nd Brigade.—Brigadier Sutton; Captain Van Straubenzee, 9th Regiment, Brigade-Major. 2nd (Queen's) Regiment, 1st battalion; 60th Rifles, 2nd battalion; 15th Punjab Native Infantry.

2ND DIVISION.

Major-General Sir Robert Napier, K.C.B.; Captain H. F. Brooke, 48th Regiment, A.D.C.; Brevet-Major Greathed, Bengal Engineers, A.D.C. (extra); Brevet-Major M. Dillon, Rifle Brigade, D.A.A.G.; Captain W. Hanmer, 87th Regiment, D.A.Q.M.G. Royal Artillery.—Mowbray's Battery (9-pounders); Evan's Battery (9-pounders). Royal Engineers.—23rd (Graham's) Company.

3rd Brigade.—Brigadier Jephson; Captain the Hon. R. Baillie Hamilton, 44th Regiment, Brigade-Major. 3rd (Buffs) Regiment, 1st battalion; 44th Regiment; 8th Punjab Native Infantry.

4th Brigade.—Brigadier Reeves; Brevet-Major M. Walker, V.C., 3rd Regiment, Brigade-Major. 67th Regiment; 99th Regiment; 11th Punjab Native Infantry; 19th Punjab Native Infantry.

CAVALRY BRIGADE.

Brigadier Pattle; Lieut.-Colonel C. Walker, 2nd Dragoon Guards, A.Q.M.G.; 1st (King's) Dragoon Guards, 2 squadrons; Probyn's Irregular Horse; Fane's Irregular Horse. Royal Artillery.—Millwood's Battery (Armstrong).

ARTILLERY RESERVE.

Bedingfeld's Battery of Position; Rotton's and Pennycuick's Batteries; 2 Batteries Madras Artillery.

ENGINEER RESERVE.

8th (Papillon's) Company, Madras Engineers; 2 Companies Madras Sappers.

We have received the following from a correspondent at Hong Kong; it is dated May 6:—"The harbour is crowded with transports, all ready to make a start as soon as Lord Elgin arrives. There is a splendid little army, which, although there are croakers, ought, to my mind, to be able to walk right through China. The great bulk of the troops are now encamped on the opposite side of the harbour at Cowloon, and the ships are there all ready to embark them.

"I hear that Chefoo, just round the north end of the Kwan-Tung promontory, is to be the rendezvous of the allies. The French will not be landed in anything like the state our men are in. They have been crowded into steam transports, 1200 men in each, besides the crews, and I hear that they have plenty of scurvy among them. They were hurried up to Woosung, a swampy and unhealthy place, at the mouth of the Yang-tse-Kiang, but have since gone to Chusan, where they said they must levy supplies and money, and live at the expense of the inhabitants. Sir H. Grant interfered; hence, I believe, the removal to Pooto, where there are no inhabitants, except a few monks.

"Armstrong's guns are not answering, upon trial, the expectations entertained of them, and the gunners are a little disappointed. The Armstrong powder got damaged on the voyage, and the common powder is not found to answer so well. However, they throw shot 2000 yards with pretty good precision. There is a report that the Bengal Commissaries return to India, having refused to serve under the English Deputy-Commissary-General, except on their own terms.

"The troops commence embarking to-morrow, the Royals to begin, as dysentery is among them at the barracks. Captain Green (on Michel's Staff) is down with dysentery, and very bad, though here only a few days. Lowe, of the Guards, is the same.

"No one hears anything of the French, except that there is no very friendly feeling between the allies. The 87th is kept at Canton, because there is a French regiment here from whom they formerly took colours."

An Order in Council has been published, to the effect that hostilities with China will be carried on in strict conformity with the declaration signed by the powers assembled in Congress at Paris, and dated April 18, 1856. According to this order the flag of any neutral power shall cover the enemy's goods, with the exception of contraband of war, and neutral goods, with the exception of contraband of war, shall not be liable to capture by reason only of their being under the enemy's flag.

An amateur theatrical performance by the non-commissioned officers and men of the Royal Engineers took place in the Royal Marine Theatre on Tuesday night, on behalf of the Central Association for Improving the Condition of the Wives of Soldiers and Sailors. The pieces performed were "The Momentous Question," "Frederick of Prussia," and "The Mummy." The theatre was crowded.

THE NAVY.

ADMIRALTY, JUNE 26.

PROMOTIONS AND APPOINTMENTS.

Vice-Admiral H. Johnstone, to be commander-in-chief at the Nore, vice Vice-Admiral Harvey, whose period of service is about to expire.

Rear-Admiral Stopford to be captain of the Channel fleet, vice Rear-Admiral G. Elliot, resigned.

Commander—C. F. Boughey, to the Exmouth.

Lieutenants—C. G. T. Knowles, to the paddlewheel frigate Terrible, 21, Captain Glass, C.B., at Plymouth; S. G. Price, to the Excellent; John J. Martin, to the Torch.

Masters—Daniel J. May, to the Forte (additional); Percy V. James, to the Flying Fish; John Jones, to the Geyser; G. H. Dominy, confirmed in the Styx.

Second Master—T. W. Webster, to the Ariadne.

Masters'-Assistants—A. R. Brown, A. W. Apthorpe, and T. Coward, to the St. George.

Engineers—W. L. Robinson, first-class assistant-engineer, to the Orion; T. F. Simmons, first-class assist.-engineer, to the Asia, for service in the Grinder; Francis Thornton, promoted to the rank of second-class assistant-engineer in the Bloodhound. Alfred Smith, second-class assistant-engineer, to the Dasher; H. G. Constantine, second-class assistant-engineer, to the Asia as supernumerary. Acting third-class assistant-engineers T. F. P. Shelley, to the Asia, for service in the Lucifer; T. Pringle, to the Flying Fish; J. Kelly, to the Asia, for hospital treatment; T. Young, to the Flying Fish, as supernumerary; J. Kay, to the Wellington, as supernumerary.

Secretary—Paymaster A. Jones to be secretary to Vice-Admiral H. Johnstone.

Paymasters—J. Lyall, to the Asia; W. Hamilton, to the Monarch; J. C. Aldridge, to the Ajax; W. L. Norcock, to the Impregnable; R. Deveson, to the Saturn; F. G. Pearce, to be additional to the Blenheim.

Assistant Paymaster—A. Edwards, to the Castor.

Assistant Paymaster in Charge—H. W. Molesworth, to the Rhadamanthus.

Clerk—Robert J. B. Smart, to the Ajax.

Midshipmen—C. G. Whitelock, to the Donegal; A. W. Benyon, to the Algiers; E. C. Drummond, R. H. Harries, E. S. Watson, C. W. Talbot, T. P. W. Nesham, H. A. Mandeville, E. Bourke, and the Hon. H. G. P. Meade, to the St. George.

Naval Cadets—H. Ching, J. E. Bowley, E. G. Festing, and V. J. English, to the Orion; P. W. S. Monteath, to the Agamemnon; F. M. Poland, to the Donegal; W. F. E. Freeland, to the Algiers; E. Herrick and A. M. Ducat, to the Neptune; T. H. Seventhorpe, to the Diadem; G. T. Bolton and H. B. Lang, to the Ariadne; C. J. Provost, to the Centurion; C. Y. Francis, to the Terrible; R. B. Needham, to the Queen; T. H. Houghton, E. S. Dugdale, and C. W. Cole, to the Nile, for disposal; H. M. Greenfell, to the Melopone; C. T. F. Hodgkinson, to the Hannibal; B. W. Fielding, B. H. Dunn, A. O. Tottenham, P. O. Black, A. Ross, L. C. Reece, J. A. Clifton, J. W. Wilkins, H. E. Walters, G. S. La Coste, G. G. Boys, F. A. Gataker, G. Osborne, E. W. J. Hennah, and the Hon. E. M. D. Browne, to the Marlborough, for disposal; J. A. T. Bruce, P. P. Aitkins, C. Y. Francis, H. A. Walters, and J. S. Luckraft, to the St. George.

COAST-GUARD OFFICE, JUNE 28.

APPOINTMENT.—Chief Officers—Lieutenant Francis Osburn, to command Swanage Station.

REMOVALS.—Chief Officers—Messrs. John Sheppard from East Ferry to Youghal. Robert McMaster from Killough to East Ferry.

The order for Mr. McMaster's removal to Youghal, has been cancelled.

Advice, paddlewheel steam-tender, M. Raymond, Second Master Commanding, having had defects made good, took on board supernumeraries and some passengers, and left Plymouth on Saturday last for Queenstown.

Agamemnon, 91, screw, Captain Thomas Hope, was in the Bay of Naples on the 23rd inst.

Alacrity, screw steam-vessel, 4, Commander John K. E. Baird, was at Trieste on the 23rd inst.

Albion, 90, sailing line-of-battle-ship. It is stated that on opening out this ship at Devonport, a considerable amount of decayed timber has been discovered. The Albion was one of Sir William Symond's models, a fine ship, but rather addicted to rolling.

Asia, 84, two-decked sailing-ship, Captain George T. Gordon, at Portsmouth. It has been intimated that this powerful old two-decker is to be converted to a screw. The Asia is a fine teak ship, and will, if we are not very much mistaken, make an efficient screw liner.

Atlas, 91, is nearly ready for launching at Chatham dockyard. The day at present fixed for the ceremony is the 21st July.

Bacchante, 51, screw frigate, Captain M'Kenzie, and flag ship of Rear-Admiral Sir Thomas Maitland, C.B., the new Commander-in-Chief in the Pacific, left Spithead yesterday afternoon.

Blenheim, 60, screw block-ship, Captain Tatham, is now in No. 7 Dock, Portsmouth, undergoing a thorough repair. A great many artificers are employed upon her, externally and internally.

Boxer, screw gun-boat, 1, tender to Marlborough, left Malta with the Admiral on the 16th inst.

Brunswick, screw steam-ship, 80, will be docked in No. 3 dock in Keyham steam-yard on the removal of the Orion, 91.

Bulldog, 6, paddle steam-vessel, Captain Sir F. L. M'Clintock, steamed from Spithead on Sunday last, and proceeded down channel through the Needles passage.

Cæsar, 90, screw, Captain T. H. Mason, was in the Bay of Naples on the 23rd inst., but under orders to proceed to Malta.

Caradoc, 2, paddle steam-vessel, Lieutenant-Commander C. M. Buckle, was at Malta on the 21st inst., and was expected to leave for the Admiral on the arrival of the next mail from England.

Colossus, 80, screw, Captain F. Scott, C.B., hoisted the broad pennant of Commodore Yelverton, C.B., Comptroller-General of the Coast-Guard on Tuesday last. She steamed out of Portsmouth harbour on Wednesday last and anchored at Spithead. She is now under orders to proceed to Portland.

Cormorant, 4, screw gun-vessel, has returned into harbour at Chatham, having undergone a most satisfactory trial of her engines and machinery, which were found to work in a thoroughly efficient manner.

Cossack, 20, screw steam-corvette, Captain Moorman, was at Bermuda when the last mail was dispatched to England.

Cressy, 80, screw-liner, Captain the Hon. C. G. J. B. Elliot, C.B., sailed from Malta in company with the Admiral on the 16th inst.

Cuba, schooner, tender to Imaum, was in Port Royal Harbour by the latest accounts.

Cyclops, 6, paddle-steamer, Captain W. J. S. Pullen, was in Galle Harbour on the 28th May.

Duncan, 101, screw, in Portsmouth basin, is expected to make her official trial of speed during the next spring tides.

Emerald, 51, screw frigate, Captain Arthur Cumming, was to leave Bermuda on the 9th inst. for Devonport, and may therefore be looked for any hour.

Ganges, 84, sailing line-of-battle-ship, Captain Fulford, bearing the flag of Rear-Admiral Sir Robert L. Baynes, K.C.B., was at Victoria, Vancouver's Island, May 9th.

Gladiator, 6, paddle-wheel steamer, Commander H. D. Hickley, was at Greytown by the last accounts.

Growler, gun-boat, 1, Lieutenant and Commander H. E. Crozier, was at Malta on the 21st, but was under orders to proceed to the Danube.

Havannah, 19, sailing-corvette, has been towed from the higher moorings in Hamoaze, and moored to the jetty in the Devonport Dockyard, where she will discharge her harbour gear and stores, and be sent to Cardiff as a school-training-ship for boys.

Hecate, 6, paddle steam-sloop, Commander Hoskins, left Plymouth on Monday, for Vancouver's Island.

Himalaya, iron screw steam store-ship, Captain Seccombe, got up steam in Keyham basin on Saturday last. It is stated that she is appointed to convey the Astronomer Royal and staff to Spain to witness the approaching eclipse of the sun.

Immortalité, 51, screw, lighted fires on Tuesday morning in the steam basin at Portsmouth, to prove boilers and engines. She had an ample supply of steam, and her engines worked beautifully.

Intrepid, screw steam-vessel, 6, Commander J. H. Maryatt, arrived at Malta on the evening of the 22nd instant, from Palermo and Messina.

James Watt, 91, screw-liner, Captain Codd, sailed from Malta in company with the Admiral on the 16th inst.

Jasper, 1, screw steam gun-vessel, Lieutenant-Commander Wm. H. Pym, was at Bermuda when the last mail left.

Kingston, schooner, tender to Imaum, was at Carthagena when the last West India mail left for England.

Liffey, 51, screw-frigate, Captain Preedy, C.B., was under orders on the 19th inst. to leave Corfu for Malta.

London, 90, screw, Captain H. Chads, was at Castellamare on the 23rd inst.

Lucifer, 2, paddle steamer, left Spithead yesterday for Devonport, with supernumeraries.

Marlborough, 131, screw three-decker, Captain W. H. Stewart, C.B., bearing the flag of Vice-Admiral W. F. Martin, sailed from Malta on the 16th inst.

Megæra, 6, screw troop-ship, Commander Henderson, arrived at Spithead on Sunday afternoon, from Corfu, Malta, and Gibraltar, her dates from the two latter ports being respectively the 7th and 18th inst. She has brought home 400 military and naval invalids, and a number of private passengers, among the latter of whom are Lord F. H. Kerr, lately commanding Her Majesty's ship Marlborough; Lieut.-Colonel Hamilton, 25th Regiment, &c. The Megæra experienced fine weather during the passage home until crossing the Bay, when she fell in with thick weather, which continued up Channel. The invalids were disembarked on Monday last.

Mullet, a new class of screw steam gun-vessel, to carry 5 guns, and similar in construction to the Landrail, in course of fitment for service in the basin at Woolwich, has been brought down from Deptford to be equipped for sea.

Neptune, 90, screw, Captain F. A. Campbell, was at Castellamare on the 23rd inst.

Orion, 91, screw-liner, Captain Frere, in Keyham steam-yard, has received her repaired shafting, and is otherwise making rapid progress in her re-fitting. In consequence of the fall of a stage slung to the side of this ship, a seaman named Cæsar, belonging to her, was unfortunately killed on Monday afternoon, and John Vallack, a boy, was much injured in the head, and was conveyed immediately to the Royal Naval Hospital at Plymouth.

Orpheus, 21. Another important addition has been made to the British Navy by the launch of the fine war steamer Orpheus, which took place at Chatham Dockyard on Saturday last, making the third of the squadron of line-of-battle and other ships building at this establishment launched during the past twelve months. The interest naturally felt just now in everything relating to the English Navy served to draw together a considerable concourse of spectators, but the number would have been very much larger had it not been for the superior attractions presented by the Volunteer Review by Her Majesty in Hyde Park. The launch was appointed to take place at the top of the flood, about three o'clock, shortly before which hour the dockyard gates were thrown open to the public, and in a short space of time every available spot which commanded a view of the noble ship was crowded with spectators. Owing, however, to the excellent police arrangements made by the director, Lieutenant Wise, not the least crowding or inconvenience was experienced. Near the head of the ship a gallery had been erected for the accommodation of the officials of the dockyard, the principal officers of the port and garrison, and the heads of departments, and this was filled with occupants. Arrangements had also been made for the accommodation of the Lords of the Admiralty, but no member of the board was present, owing to the Volunteer Review. Several hundred persons had been admitted on board the vessel, and remained in her until she had been launched and brought up at her moorings in the river. Although not so large as many of the fine line-of-battle and other screw-steamers recently built and launched at this dockyard, the Orpheus is nevertheless one of the finest of the screw-corvettes which have only but comparatively recently been introduced into our Navy, and the greatest credit is due to all who have been in any way connected with her construction. She has been a little more than two years in progress, having been commenced on the 12th of May, 1858, and was constructed from the designs of Admiral Sir Baldwin W. Walker, Comptroller of the Navy, under the superintendence of Mr. O. W. Lang, master shipwright. As she lay on the stocks before the launch, her graceful form and outline excited very general admiration. The following figures show her principal dimensions:—

	Ft.	In.
Length, extreme	226	6
Length between perpendiculars ...	197	2¾
Breadth, extreme	40	8
Breadth, for tonnage	40	4
Depth in hold	24	2
Breadth, moulded	39	8

Burthen in tons, 1,705 55·94.

Her figure-head is a fine bust of the lyrist whose name she bears. The following is her armament:—Main-deck, 20 8-inch guns, each of 60 cwt., and 8 feet 10 inches in length; and one pivot gun of 95 cwt., and 10 feet in length. She is to be fitted with a screw and engines of 400-horse power by Messrs. Humphreys & Co. Every preparation having been made for the introduction of the noble vessel to her destined element, Mr. Lang conducted Miss Wood, daughter of General Wood, to the bow of the vessel, that young lady having been selected to perform the ceremony of "christening" the ship, when the ceremony to be followed was explained to her by the master-shipwright. As soon as the tide had reached its height, and the operations of the master-shipwright's staff completed, Miss Wood drank, "Success to the Orpheus," and precisely at a quarter past three, severed the cord which held the remaining blocks of the ship, at the same instant dashing a bottle of burgundy against the prow, when the noble vessel glided rapidly down the launching-ways into the Medway, amid the cheers of the assembled thousands, which were taken up again and again by those on board. The launch was in every respect a most successful one, and as soon as the Orpheus had got clear of the shed the royal standard, the union jack, and the Admiralty ensign were displayed. The Orpheus is to be immediately fitted with her machinery and made ready for sea. A large screw-steamer, to be named the Reindeer, is to be at once commenced on the same slip as that from which the launch took place.

Penguin, 5. Steam was got up on Tuesday on board the new contract-built steam gun-vessel Penguin, and she proceeded from Hamoaze into Plymouth Sound, and went outside the breakwater to make trial of her machinery, after which she returned to harbour, and was placed alongside the Devonport Dockyard.

Prince of Wales, 131, screw, has commenced taking in her tanks in the steam-basin at Portsmouth.

Racer, 11, steam-sloop, Commander Lyons, was at Vera Cruz when the last West India mail left the coast of Mexico.

Ranger, 5, screw, Commander H. R. Wratislaw, got up steam on Tuesday at Spithead, and proceeded to the trial-ground in Stokes Bay, in charge of Commander Thorpe, of Her Majesty's ship Asia, to test her speed at the measured mile. Five runs were made, the average of which gave the ship a speed of nine knots; revolutions of engines, *maximum*, 99; draught of water—forward 10 feet 6 inches, aft 12 feet; force of wind during the trial about 4. The Ranger is one of the newly-constructed three-masted screw-schooners, armed with a heavy pivot-gun and four 24-pounder howitzers, and is fitted with 80-horse (nominal) engines by Messrs. Rennie. Her destination is the West Coast of Africa.

Queen, 86, screw, Captain Charles F. Hillyar, sailed from Malta on the 16th inst., in company with the Admiral.

Renown, 91, screw, Captain A. Forbes, was at Castellamare on the 23rd inst.

Rhadamanthus, steam store-ship, Master Commander F. Sturdee, sailed on Tuesday from Woolwich for Portsmouth, laden with a heavy cargo of boilers and steam machinery for the Prince of Wales, Pelican, and Frederick William, line-of-battle-ships, recently launched, and in course of fitment for service. The Rhadamanthus has also embarked fifty second-class boys for ships at Plymouth. The present voyage will constitute the first trial trip of the superheating steam apparatus, fitted on board under the special sanction of the Board of Admiralty, and with which a series of trials is to be carried out, to decide the merits of the invention. Mr. Dinnen, inspector of steam machinery afloat, was dispatched from the department of the Surveyor of the Navy to accompany the Rhadamanthus, in order to render a strict and impartial detail of the working of the engines under superheated in contrast with the ordinary steam; and Mr. Wetherhed, the inventor, also took passage, to watch the performance on his own behalf. The result, which is of considerable importance in reducing the consumption of fuel and enhancing the safety of the machinery, will be very interesting.

Royal Adelaide, 104, guard-ship of ordinary at Devonport, is, it is stated, to be fitted as a training-ship, and her place as guard-ship will be taken by the old sailing frigate, Stag, 44.

Satellite, 21, screw-steam-corvette, Captain James C. Prevost, was at Victoria, Vancouver's Island, on the 9th of May. This ship has been ordered home, but she may now be detained by the Admiral, owing to a "difficulty" having arisen between the Colonial Government and the notorious General Harney.

St. Jean d'Acre, 101, screw, Captain Thomas P. Thompson, sailed from Malta on the 16th instant, in company with the Admiral.

Surprise, 4, screw gun-vessel, having been hauled under the crane in the north basin at Keyham steam-yard, is now in the hands of the factory men.

Topaze, 51, screw steam-frigate, Captain the Hon. J. W. S. Spencer, was at Victoria, Vancouver's Island, on the 9th of May.

Torch, 4, screw steam gun-vessel, Commander F. H. Smith, at Chatham, is reported to be nearly ready for sea.

Trincomalee, 24, sailing-ship, fitting at Chatham for the service of the Naval Coast Volunteers, is nearly completed, and will shortly be ready to proceed to her destination at one of the northern seaports. She has shipped her

Digitized by Google

armament, but will only take a portion of her guns, 18 in number.

Valorous, 16, paddle-steamer, Captain Aldham, C.B., was at Vera Cruz, when the last mail left.

Viper, 1, steam gun-vessel, Commander Hewett, V.C., has been ordered home from the coast of Africa.

Victor Emmanuel, 91, screw, Captain W. J. C. Clifford, C.B., arrived at Corfu on the 16th inst., and was expected to leave for Malta on the 19th inst.

Wrangler, 4, screw steam gun-vessel, Commander Beamish, having had her defects made good, sailed from Plymouth on Sunday for the West Coast of Africa.

THE CHANNEL SQUADRON.—The Channel squadron, after an anchorage of 15 days in St. Margaret's Hope, Firth of Forth, left its moorings on Saturday afternoon, and under canvas, with auxiliary steam power, proceeded down the Firth, and stood out to sea. The squadron, in passing the narrow straits at Queensferry, proceeded in single line, the leading ships being the Royal Albert, 121, flagship of Vice-Admiral Sir C. Fremantle, the Mersey, 40-gun frigate, the Edgar, 91, flagship of Rear-Admiral Erskine, and the Donegal, 101, followed by seven other ships of the line and the Diadem frigate. The Greyhound, corvette, 17, accompanied the Royal Albert as a tender. On passing Inchkeith, and getting into the outer bay of the Firth, the fleet formed in two lines, and stood out south-west in the direction of St. Abb's Head; the Royal Albert, the Donegal, the Aboukir, the Conqueror, and the Centurion, with the Greyhound, forming the south line; and the Edgar, the Trafalgar, the Algiers, the Mars, the Diadem, and the Mersey, the north line. A number of steamers convoyed the fleet down the Firth. The public enthusiasm excited by the visit of the Channel squadron in the Forth can scarcely fail to give a stimulus to the Service in the south-east of Scotland, where for many years a fleet of war-ships had not been seen; and great disappointment is felt that the fleet has not been able to make the tour of the north of Scotland and Ireland, as was anticipated. The squadron proceeded to Yarmouth Roads, and has been at anchor there during the week. It will remain there for the present, as no orders have as yet been sent from the Admiralty as to its further movements.

PORTSMOUTH.—A meeting of a remarkable character was held in Portsmouth Dockyard on Saturday last. During the earlier part of the day notice was given that at the conclusion of work Miss Marsh, the authoress of "The Memoirs of Hedley Vicars," would deliver an address in the new pattern-loft over the steam-factory. Accordingly at four o'clock about 400 men in their working attire assembled in the room, and Miss Marsh delivered an eloquent address on the subject of the Prodigal Son, the parable of which she previously read. A devotional exercise followed, and afterwards an earnest exhortation. Mrs. Bruce, wife of the commander-in-chief, and Mr. and Mrs. Murray were present.

We take the following from a contemporary for the purpose of giving the rumours a distinct contradiction:—"Various reports have for the last eight or ten days been current in Plymouth regarding the alleged loss of Her Majesty's screw steam sloop Nile, 91, Captain E. K. Barnard, which left Plymouth April 7th, with Lady Milne and family for Bermuda. On Tuesday it was currently stated at Devonport that she had arrived at Halifax with loss of masts." The Nile arrived at Bermuda safe and well on the 2nd inst.

In the naval appointments which appeared in the morning papers of yesterday was that of Lieutenant F. W. Bennett to the command of the Bulldog. This must be an error, as the Bulldog is commanded by Sir Leopold M'Clintock, and is employed on special service. It is probable that as Lieutenant Bennett is in England, the Bullfrog gun-boat was meant instead of Bulldog. The error is a stupid one, and should not have been made.

Vice-Admiral Hope Johnstone will hoist his flag on board the Formidable, 84, at Sheerness, on the 2nd of July, and will at once assume the duties of Commander-in-Chief of the port.

Rear-Admiral Sir Thomas Maitland, C.B., arrived at Portsmouth on Tuesday, and re-hoisted his flag on board the Bacchante, 51, screw, Captain Mackenzie, at Spithead.

Two more of the additional screw-steamers ordered by the Admiralty to be built at Chatham Dockyard have been commenced at that establishment, namely, the Royal Oak, a line-of-battle-ship of 91 guns, and a fine screw-frigate of 51 guns, to be named the Belvedere. The Royal Oak is building on the new granite (No. 7) slip, and the Belvedere on the fourth slip. Both vessels will probably be completed in about a year from the present time.

ROYAL NAVAL SCHOOL, NEW CROSS.—The names of the following young gentlemen, who received cards of merit with honourable mention, were omitted in the prize list we published last week, viz.:—Keele, Morris G., Monck Mason, Massie, 1st; Parker, Jones G., Burney 1., Noble 1., Leah 2., Brand F., Hungerford, Field, and Heathcote.

GUNBOATS.—The contract with Messrs. Green in 1855, which has been laid on the table of the House of Commons, stipulates for vessels to be built in a substantial and workmanlike manner, and with good, sound, and proper materials, to be approved by the Government inspectors; and if any materials or workmanship should be deemed defective, unsound, improper, or insufficient by the inspectors, the defect and insufficiency should be forthwith amended to their satisfaction. During the building of the gunboats there were two inspectors at the yard for part of the time, and but one for the other part, in addition to which the inspecting officer of the Comptroller of the Navy's Department was constantly going his rounds. In the beginning of 1858 the Coquette, one of these vessels, was examined, and several parts of the planking were found completely rotten, and the remainder extensively tainted with dry rot. Early in the present year the Caroline, another of Messrs. Green's vessels, was reported as having very extensive defects, timbers very sappy and rotten, fillings generally defective, and also the outside planking; "some of the planks were not worked close to the timbers, and not well fastened; very few bolts in the bottom were clinched, many of them being too short." The Admiralty return which gives these particulars, states that there is no record in the office of any document or correspondence respecting the inability of Messrs. Green to procure seasoned timber.

THE MEDITERRANEAN FLEET.—A portion of the Mediterranean fleet, under the command of Vice-Admiral W. F. Martin, has left Malta on a cruise, but a weekly communication will be kept up between the ships and the island. The Caradoc was waiting in Malta Harbour, according to our latest dates, to take the first mail from England to the squadron.

PROMOTIONS FOR SERVICES IN NEW ZEALAND.—The Lords of the Admiralty have been pleased to promote Lieutenant W. H. Blake, first-lieutenant of the Niger, to the rank of Commander, for gallant conduct in New Zealand. The captain's coxswain will also receive a warrant. Lieutenant Blake's seniority (1854) is comparatively of short standing, therefore his promotion will be the more acceptable to him, as it has reached him at a time of life when he may reasonably look forward to rise to the Flag list. We wish we could say the same of many others of his late brother officers, who have for a series of years been industriously toiling in the hope of receiving at the hands of the dispensers of patronage that encouragement which they had fairly earned.

Captain Lord Frederick H. Kerr having been superseded in the command of H.M.S. Marlborough, owing to his time having expired, by Captain W. H. Stewart, C.B., has returned to England. His lordship arrived at Portsmouth on Sunday last in the Megæra screw troop-ship.

A NEW DEFENCE FOR SHIPS' SIDES.—Mr. Howell, of the firm of Shortridge, Howell, & Co., of Sheffield, has recently submitted to the Admiralty a plan by which he proposes, without using a greater weight of iron than is obtained in the 4½-inch plates, which have been found ineffectual to protect our ships from heavy steel shot fired from rifled cannon, to offer a resistance five times greater than that obtained by 4½-inch iron plates. The plan is to form a sort of wicker-work of steel rods, interlaced crosswise, and to cover the vessel with six thicknesses of this wicker work. The total weight would not be greater than that of the 4½-inch plate, while the power of resistance will, it is said, be five-fold; and in case the iron should be pierced the result would be to bend the broken ends of the steel in such a way as to hold the mass firmly together and prevent any extensive injury. The invention is about to be submitted to the usual tests by the Admiralty.

ARRIVAL OF TEAK AT CHATHAM.—The Boanerges, Mr. B. Skeene, master, has arrived from Moulmein with a cargo of teak timber for the dockyard. If the accounts we receive in reference to the stocks of timber at our dockyards can be depended on, and we have no reason to doubt them, a few more arrivals of this description would be welcome.

The Civil Service Commissioners have been engaged during the past week in the examination of candidates for apprenticeship to the shipwright and factory department at Chatham Dockyard, and to the factory at Sheerness. The number of candidates who presented themselves was forty-two, including twenty-three from Chatham dockyard, and nineteen from Sheerness.

Admiral E. Harvey, accompanied by his staff, with Captain Schomberg, of the Steam Ordinary, made a minute inspection of the vessels in the first-class steam reserve at Sheerness on Saturday last. The vessels inspected were the Meanee, 80, screw, 400 horse-power; Challenger, 21, screw steam-corvette, 400 horse-power; Charybdis, 21, screw steam-corvette, 400 horse-power; and the Bullfrog, Mayflower, Carnation, and Fly gun-boats. The gallant admiral expressed his gratification at the efficiency and cleanliness of the respective vessels. It is to be hoped that this satisfactory state of the vessels in the steam-reserve of Sheerness will not be of a transitory character, as, on the occasion of the trial of the Whitworth gun, we could not have paid a high compliment to the condition of the Carnation.

BOYS FOR THE NAVY.—A number of well-grown intelligent lads, desirous of being enrolled for service in the Royal Navy, were on Wednesday forwarded to the Fisgard's office, Woolwich, by Mr. Frazer, manager of the Field Lane Ragged Schools; but in consequence of the Admiralty laws regulating that branch of the Service, which direct that the consent of their parents must be given in writing, the boys were rejected, pending the receipt of more ample instructions, as the poor lads professed to be without friends or relatives, and are for the most part foundlings, having no knowledge of even their birthplace, which latter is also required to be entered in the Naval Register. What on earth are the occupants of "Circumlocution Office" about? These boys are the very fellows at present required, and no difficulty should be thrown in the way of their entering the Service.

The two-gun battery erected on the heights of Plumstead Common by the united labour and exertions of Lieutenant Tongue's company of Artillery Volunteers, has been supplied with a couple of 32-pounder garrison guns from the Royal Artillery, Woolwich. The new battery, although at present affording simply a practice-ground for the rehearsal of the Volunteers, is looked upon as a most important advance towards securing the safety of the Arsenal. Workmen are likewise engaged in Woolwich Dockyard in arranging the five-gun battery, and newly sighting the guns for the use of the Dockyard corps of Volunteers, in command of Captain Thornton.

Naval officers, engineers, and the scientific public will be interested to hear that Vice-Admiral Moorsom has published a small pamphlet, which he entitles "Memorandum for the British Association at its Meeting to be held at Oxford in June, 1860, on the Performance of Steam-Vessels, the Functions of the Screw, and the relations of its diameter and pitch to the form of the Vessel." Our space this week will prevent us from making any extracts from what appears to us a very interesting paper.

Sirius, old sailing-frigate, built upwards of 40 years ago, is now being armed externally alongside the jetty in Portsmouth harbour, with several new descriptions of plates, as well as with Howell's patent ship-armour. This old ship was built when sound timber was not so scarce as at present, and it seems almost a mistake to make a target of her well-seasoned frame. On ripping her open to fix on her armour plates, her timbers were found to be as blue as indigo in places, but as sound as the day she was built. A similar test might be profitably applied to some of the other old-fashioned frigates and liners that now are of no more use than to cut a figure on paper.

In the House of Lords on Monday evening, the following short dialogue took place on the National Defences. The Earl of Derby said he was not surprised that the noble earl opposite had not been able to give an answer to a question put to him without notice; but he trusted that as the subject of the national defences had been so long before the Government, and as the session was growing towards its termination, the noble earl would be able to answer the question which had been put to him by Monday, as to what the Government intended to do on the subject. Earl Granville said he would ascertain fully the views of the Government on the matter; and he had no doubt of being able to give an answer by the middle of the week.

A VOICE FROM THE DEEP.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The naval retirement by the present Board of Admiralty has at last come to light, and a pretty budget it is.

Why, sir, Lord C. Paget gave us to understand that it was to benefit the commanders and lieutenants, and in some degree the captains.

But instead of its doing so in any way, he has, by way of a beginning, recommended a compulsory retirement after 15 years, instead of 20, taking away the extra sixpence a-day from those who have not 9 years' active service (which was granted under the Order in Council of the 25th June, 1851, *vide* "Navy List," page 384). And he neither allows mates' time to count—officers who rank with lieutenants in the Army—nor coast-guard time, excepting one for every three years. Again, the Greenwich pension is to be withheld from those who have not 12 years' active service; and with regard to his respective proposals for the different grades, he says he will be enabled to remove 8 captains, 64 commanders, and 179 lieutenants, which will leave vacancies for promoting 3 commanders to the rank of captain and 18 lieutenants to the rank of commander, which will be a great boon to the Service; or rather, I should say a boon for their own particular friends.

What does it all amount to? Why, simply this,—to get rid of the old officers anyhow, irrespective of justice, for the purpose of making way for their red-tape *protégés*.

Well might Lord C. Paget have tried to carry it in the manner he did, but which so far happily failed. My belief of Lord C. Paget's character is such that, left entirely to himself, he never would have ventured the introduction of such a budget. If they want to do anything for the Navy, why not take a just and dignified course, and offer that which is their due, instead of trying to compel officers to be shelved in the manner he has suggested.

The country will never begrudge what is fair and just: it is the reckless jobbing system which has been pursued from time to time that has caused such indignation against the respective Boards of Admiralty, and certainly not without a cause. I must say his lordship's expression of wishing to see the old officers retired with honour, coupled with what he has recommended, seems to be vastly at variance.

How is an honourable position to be supported without a fair amount of pay. The whole discussion would stand good for a fresh edition of "Bombastes Furioso," viz.:—

> "Meet me at the Admiralty hall.
> Be sure, I'll without fail attend your call.
> Porter, I say, who now ascend our steps?
> Some old commanders.
> May they break their necks.
> But stop, the boys, they shall retire with honour,
> Captains, I'll dub them all, without donor.
> Ah! But what will the journals say to this?
> The country, too, will think something amiss.
> I'm told to starve them, ay, cut short their prog:
> His grace so wills it—I must go the whole hog.
> Our defeat was bad on Thursday night;
> Blowed if I feel disposed again to fight.
> By giving time, the House will find us out,
> And, damme, some one put us to the rout.
> Oh! let the Admiralty stand at ease,
> The Commons then can settle it as they please.
> By doing this, we shall keep up our mirth,
> And, what is better, each retain his berth." [*Exit.*

Look at the difficulty of getting employed as a commander. Observe even the appointments of last week, one a commander of 1855, another a commander of 1858.

To cut the matter short, they will not give the seniors a chance of serving, neither is it their intention to do so. Why, as regards myself, I have been incessantly applying for the last eight years and more, with good testimonials, approved by the First Lord at his annual levees, but of no avail whatever. And, after so many years' continual application (there being only 9 of the senior commanders out of the first 220 upon the list employed in sea-going ships), to find a fresh budget introduced which will cut officers who have served 30 years' active service down to 8, and so skeletonise their expectations! Here is a boon for the Service. Why, the whole is a downright farce.

Would not this *exposé* be a warning to all gentlemen's sons at the age of 13 entering such a service at a time when a boy's best period of instruction is up to 17; whereas his going to sea so early unfits him for any other profession. Under such circumstances, I maintain naval officers ought not to be neglected.

No, sir. If this is to be the beneficial budget they expect to carry, the sooner we go before the Duke of Somerset (like the Siamese ambassadors, upon all fours) and beg to be let alone, the better; for depend upon it the next thing we may expect will be that of their taking away from us the little we have. For the employment they gave us is cut down; our servitude is reduced to a nothing; and, what is more, we can't get the chance of making up for it. The lieutenants are offered something better. They not only can get servitude as they are required by the Admiralty; but they will have a chance of getting an increase of pay up to 11*s.* 6*d.*, whilst the bulk of commanders will stick at 8*s.* 6*d.* and 10*s.* per diem. So much for the rank of the Service. Sir, in bringing this to a conclusion, I can but remark that I think it is high time, if a Naval Board of Admiralty (who are well paid for their work) cannot act with more judgment and consistency, and carve out something more substantial or fair, to say the least of it, in the shape of a retirement, the sooner the House of Commons take it in hand the better.

It is very true that all cannot advance the rank of admiral; but officers should be allowed to retire at a fair compensation, which would allay this general feeling of dis content, now existing for so many years.—I am, &c.,

VERITAS.

THE ROYAL MARINES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I send you an extract from a letter just received from an officer of Royal Marines on board one of H.M.'s ships in Malta harbour, in which some very mutinous proceedings lately took place.

"The sailors mutinied here on the evening of the 3rd, and would not obey orders, but threatened the officers, and pelted them with all sorts of missiles. I ordered the Marines to stand to their arms immediately, and, finding persuasion was of no use, I fixed bayonets, and very soon drove the mutineers off the lower deck. They pelted us, and knocked out our lanterns. I received some bruises, but the guns being in the way they managed to escape up the ladders. The admiral held an inquiry on board; he considers the conduct of the sailors to have been very mutinous, but has reported in honourable terms the officers and men of the Marines. Not one of our men joined the ruffians."

The letter speaks for itself. Ever since the days of the mutiny at the Nore, it has been the same; the stand-by of the Navy is the Marines. The Admiralty, and indeed the country, is justly proud of this fine corps; but the former has not as yet treated them as it ought. The augmentation recommended by the Commission last year has not yet been made; but even the vacancies of the last three months are not filled up. A captain of Marines, even with ordinary luck, must wait fifteen years for his next step, but frequently more than this. Looking at it in a political point of view, the delay of the Admiralty is inexplicable. All modern authorities, from the Prince de Joinville down to our friend across the water and Sir C. Napier, concur in judging marine artillerymen the great feature in modern warfare. Nautical excellence is now in abeyance; navigation has given way to gunnery. The Marine can work the guns on board, and at a moment's notice form up on shore, ready for an assault, a march, a charge, or a first-rate skirmisher to cover an advancing body.

"Jack" ashore is a fine fellow, no doubt, and in catching or thrashing a nigger, admirable; but his discipline is inferior. The Marine's, on the contrary, is perfect. There are now scarcely 18,000 for the whole of the fleet all over the world, yet 30,000 would not be too many; and it should be remembered that a Marine is not made in a day. We may be deficient in sailors, but, with an engineer, a stoker and a steersman, a ship held by Marines would give a very good account of an anemy. If you, sir, would use your influential pen in advocating justice to this corps, the effort would not be thrown away. They seem to have been forgotten in the late scheme for the retirement of the Navy, of which I will only say, that it was liberal and efficacious as far as it went, and if they do not get that they will get none. I will not further trespass on your space. When you are advocating the claims of the Navy, do not forget to put in a word for

POOR JOE.

CAPTAIN COLES ON ARMOUR-PLATED SHIPS.

Yesterday afternoon Captain Cowper Phipps Coles, R.N., —so well known as the inventor and constructor of the celebrated Lady Nancy, a raft which carried a 32-pounder, and was used with great effect during the Russian war in the Sea of Azoff—gave a lecture at the United Service Institution on a "Shot-proof Gun-shield," as adapted to iron-cased ships for national defence.

The lecturer stated that his chief object in addressing the audience was to explain the views he entertained in reference to the great changes which arms of great precision, more especially rifled-cannon, were calculated to produce in any future warfare; and after drawing attention to another raft, or an improved Lady Nancy, with the advantage of being provided with an hemispherical iron shield for the purpose of covering a 96-cwt. gun, and protecting the crew and magazine—the whole only drawing 3 feet 7 inches. The lecturer proceeded to state that since he has been on half-pay he has occupied himself in preparing numerous drawings and models, and the result has been that he has arrived at the conviction that the mere coating of a ship with iron plates, and leaving a perfectly exposed area, amounting in the case of a vessel of 20 broadside guns to 240 square feet, would be abortive. With the help of diagrams and drawings, the gallant lecturer pointed out that after much labour and study he had designed the model of an iron-plated, flush-decked ship. The guns are placed under a hemispherical or a cone-formed shield. The port-hole is entirely closed by the gun, excepting the small space sufficient to permit an elevation of ten and a depression of seven degrees. The horizontal motion of training is effected by turning the shield itself with the gun, crew, and the platform on which they stand by means of a common turn-table, which can be revolved with the utmost nicety. Aim at the enemy may be taken either through a sight fixed on the top of the shield or on the gun.

Captain Coles demonstrated that no horizontal fire can strike his structure above the water-line except at an angle of 40 degrees, and that it is entirely protected against vertical fire by its arched-roof; he further proved that, by means of a second or outer side made of iron plates, with numerous compartments, all of which would be made useful, he would ensure stability which, without this contrivance, would not be secured. We cannot possibly (although most willing) follow Captain Coles through the whole of his lecture, but we will endeavour briefly to give some of the principal advantages of his system. We will compare a ship of his plan, with an iron-coated vessel of 380 feet long, such as the Warrior carrying 36 guns, having, however, a broadside of only 18 guns. Now, supposing Captain Coles' ship is of the same dimensions, the same weights, and same expense, she would have a broadside of 26 guns in 13 shields, as each shield is so constructed as to carry 2 guns. Again, in a vessel of this kind, boarding would be next to impossible, as 4 guns could be trained from forward and 4 from aft, which would sweep the decks of every living enemy, while the defenders would be under cover, and unexposed. The shields could not be displaced by shot, as the weight of the machine altogether is as much as 40 tons. It is quite evident that the mode of warfare in existence at the time when our celebrated naval battles were won is become obsolete. Armstrong, Whitworth, and the inventors of armour plates, have settled this point; so we must revert to the system pursued by the chivalry of old—we must fight for the future in armour. Captain Coles asserts that his mechanical appliances obviate the necessity of having crowded ships (we shall not require a heavy reserve of seamen); and that, owing to the rapidity of his fire, and his comparative safety from that of an enemy, 15 of his ships would be a match for 45 three-deckers, armed and manned as at present. He proposes as a means of national defence to have 5 of his ships at the Nore, 5 at Portsmouth, and 5 at Plymouth, to be supported by the 150 gun-boats already in existence; and, in case of a threatened invasion, to call into operation the electric telegraph, so that all fifteen might be concentrated within a few hours at a given point, while the rest of our fleet would also be co-operating.

We regret that we cannot give all the explanations which Captain Coles very lucidly afforded. There was a very numerous attendance of naval and military officers, and all seemed perfectly satisfied with the value of the plans brought under their notice. Among the audience we noticed Lady Franklin, who was a most attentive listener. It was casually stated that the War-Office Authorities have resolved to make an experiment with one of the shields, as they are equally well adapted to forts as to ships. We hope to hear of the publication of Captain Coles' lecture for the better information of all who take an interest in coast defences.

THE MILITIA.

The average annual cost of every effective thousand, rank and file, of the embodied Militia (including pay of officers, clothing, and commissariat charges, but not the cost of providing arms and quarters), is 41,113*l.*; of the Line, serving in the United Kingdom, 40,049*l.* 10*s.* At the beginning of the year 1855, when so large a portion of the regular Army was in the Crimea, there were no less than 119 Militia regiments embodied. In the five years 1854-9 the total expense incurred on account of the embodied Militia has been 6,596,983*l.*; of the disembodied Militia (including the permanent staff), and the Militia called out for training, 1,219,262*l.* The number of Volunteers enrolled in the Militia of England, Scotland, and Ireland, in the course of the eight years 1852-1859 was 303,682. In the period from 1854 to October, 1859, the Militia furnished 66,322 recruits to the regular Army, and 5220 to the Royal Marines; and the numbers recruited from other sources were 135,098 for the Army, and 9375 for the Marines, in nearly the same period (from 1854 to August 1859), so that during that time the Army has obtained one in every three of its recruits from the Militia.

The East Kent Regiment of Militia, which has just been disembodied at Canterbury, is one of those battalions which have most efficiently performed the duty, both at home and abroad, of regiments of the line, during the last six years. This regiment, under the command of Colonel George Brockman, late of the 85th Light Infantry, was embodied in 1854; and, after a period of garrison duty at Woolwich, embarked for Malta, where it remained until its return to England for disembodiment in 1856. While it was at Malta, Sir J. Pennefather, commanding the forces there, constantly made the most favourable reports of the discipline and efficiency of the corps. The East Kent, after having been disembodied for about a year, received the order for re-embodiment in August, 1857, and was accordingly called out in October of that year. It proceeded to Woolwich for garrison duty in the following month. The head-quarters remained at Woolwich till June, 1858, while detachments from the regiment furnished the infantry garrisons of the remaining posts on the Thames—Sheerness, Tilbury Fort, and Deptford dockyard—up to June, 1858, and gave the guard of honour at Gravesend on the occasion of the embarkation of the Princess Royal after her marriage. From June, 1858, to July, 1859, the regiment formed part of the 2nd infantry brigade at Aldershot camp, under Major-General Spencer. In July, 1859, it proceeded to Portsmouth, where the head-quarters remained, giving a detachment at Weymouth till June, 1860. The regiment marched out of Portsmouth for disembodiment, under command of Colonel Brockman, on the 11th June; and it is much to the credit of both officers and men that the whole regiment, more than 800 strong, paraded on that morning without a single case of drunkenness or absence. During the period of embodiment, from 1854 to 1856, this regiment gave a considerable proportion of men and officers to the line, and in 1855, while the regiment was at Malta, Captain Howell obtained leave to serve with the Turks in a campaign against the Arabs in the Tripoli Desert, for which he has received the Turkish war medal. During the last embodiment, from 1857 to 1860, the regiment has given about 300 volunteers to the regular Service, in addition to the following officers: two captains, five lieutenants, and two ensigns, to first commissions in the cavalry or infantry; two captains to appointments as adjutants of regular Militia, and one paymaster to a paymastership in the line. Accompanying the order for disembodiment was a general order, expressing the sense entertained by Her Majesty's Government of the services of this regiment during its prolonged course of embodied service.

The Royal Ayr and Wigton Rifles, under the command of Lieut.-Colonel Sir James Fergusson, M.P., were inspected on Thursday by Major-General Douglas, Inspector-General of Militia. The regiment mustered 812, exclusive of officers, and there were no sick in the hospital. In the afternoon, the regiment, after marching past, was put through various field evolutions by the Commandant, at the close of which the reviewing officer, addressing it, expressed his satisfaction with the progress made during training, and with the absence from crime by which the conduct of the men had been distinguished.

The 2nd Derby Militia, Chatsworth Rifles, completed 27 days' training on the 19th, under the command of Lieut.-Colonel Cavendish. The regiment was inspected on the 16th by Major-General Douglas, Inspector-General of Militia, who complimented the officers and men on their soldierlike appearance and efficiency in the field. The men came up well, there being only 16 absentees, and their conduct in the town has been excellent.

Westmeath Rifles.—Mr. William Ringland Stapleton, has received from Lord Castlemaine his commission as ensign in the Westmeath Rifles.

Waterford Militia Artillery.—Charles Edward Luther, gentleman, to be second lieutenant, vice Michael Louis Luther, resigned.

County Meath.—Richard Donaldson to be Captain in the Royal Meath Militia. John Kearney, to be lieutenant.

SECOND WEST YORK LIGHT INFANTRY.—This effective militia regiment, numbering between 600 and 700, was inspected by Lieut.-General Sir J. L. Pennefather, K.C.B., commanding the Northern District, on Monday afternoon, at York. Everything passed off highly to the satisfaction of Sir John.

The Militia Gazette.

WAR OFFICE, PALL MALL, JUNE 26.

Royal Sherwood Foresters or Nottinghamshire Regiment of Militia—Ensign Leonard Jaques to be Lieutenant, vice Vandeleur, resigned.

The Queen has been graciously pleased to accept the resignation of the commission held by Lieutenant Thomas John Walsh.

Light Infantry Battalion of the Royal Sussex Militia—Ensign Thomas Carr Foster to be Lieutenant, vice Marjoribanks, resigned.

3d Regiment (Light Infantry) of West York Militia—George William Hoyle, Gent., to be Ensign, vice Verner, promoted.

5th Regiment of West York Militia—Captain Sir Charles Henry Ibbetson, Bart., to be Major, vice Elmsall, resigned.

Memoranda—3d Regiment of West York Militia—Her Majesty has been pleased to accept the resignation of the commission held by Lieutenant Thomas Bolger.

Norfolk Artillery Regiment of Militia—First Lieutenant Robert Bacon Longe to be Captain, vice Wodehouse, promoted.

Prince Albert's Own Leicestershire Yeomanry Cavalry—Thomas Henry Farquhar, Gent., to be Supernumerary Cornet, without pay.

WAR OFFICE, PALL MALL, JUNE 29.

1st Devon Regiment of Yeomanry Cavalry—John Marwood Wolcot to be Captain, vice John Guppy, resigned; William Coles Hunt to be Surgeon.

North Devon Mounted Rifles Yeomanry Cavalry—Charles Henry Williams to be Cornet, vice Hugh Mallett, promoted.

Devon Militia Artillery—Edward Hilton Glendwr Bradshaw to be Second Lieutenant.

1st Devon Regiment of Militia—Henry Martyn to be Lieutenant.

West Kent Light Infantry Regiment of Militia—Lieutenant Thomas John Popplewell to be Captain, vice Sorrell, resigned; Ensign John Summous Ramsay to be Lieutenant, vice Keeling, resigned; Ensign George Owen Ramsay to be Lieutenant, vice Beales, resigned.

MEMORANDUM.

Royal Westmorland Light Infantry Regiment of Militia—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Major James Fairtlough.

Royal London Regiment of Militia—Lawrence Trent Cave, late Captain 54th Regiment, to be Captain, vice Frederick Peto, resigned.

Haddington, Berwick, Linlithgow and Peebles Regiment of Militia Artillery—George Cockle, Gent., to be Second Lieutenant, vice Greig, resigned.

MEMORANDUM.

The Queen has been graciously pleased to accept the resignation of the Commission held by Captain Thomas Alexander Hog.

Fifeshire Artillery Militia—Charles Rice Williams to be Assistant-Surgeon, vice William Husband Dewar, resigned.

MEMORANDUM.

Royal Aberdeenshire Highlanders—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant William Marshall Priest.

CAVALRY RECRUITING.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In a recent number, one of your *correspondents*, I believe a distinguished officer, makes some excellent remarks on this branch of the Service. There are some points I must, after many years service solely in the cavalry, dissent from him upon. He wishes to have a general recruiting for the cavalry. I urge if such was carried into effect you would destroy all *esprit de corps*. The great difficulty now of keeping each branch separate is the *esprit de corps*, and the anxiety of each cavalry commanding officer is to obtain smart tall men. Five shillings a man out of lieut.-colonels' private purses were given over and over again to obtain this end. Another point: Bob joins the 101st Lancers because Bill does. Bill may be six feet, and consequently must be put away from Bob, not by being rejected, but by being forced into a heavy regiment he may dislike.

On the contrary, I would have each regiment recruited from a separate county. I had command of an Indian depôt, and instead of dispersing my recruiting parties all over the kingdom, I sent one to London, the rest all to Yorkshire. I had no parties in any other place. In a short time I had my depôt far above its strength, and that when other depôts were far below theirs, and could not obtain men. If this plan was adopted generally, say one corps was to take Nottinghamshire men only, another Somersetshire, another Sussex and Hants, and so on; Ireland for the Irish, and Scotland for the Scotch; I know the plan would succeed.

Your correspondent recommends two large depôts. These in England would again destroy *esprit de corps*. No pains I know are spared by the generality of colonels to obtain good remounts. If depôts were established as in India, they would become "vast jobs" like all our similar attempts at home; nice pickings for veterinary surgeons and horse dealers.

York might be a good depôt for horses, but York towa itself is the worst place for recruiting in the United Kingdom. For large cavalry depôts you cannot improve on Canterbury and the Curragh.

I consider mounted riflemen ought to be fostered. Yorkshire, Lincolnshire, Cheshire, Northumberland, Nottinghamshire, Leicestershire and Warwickshire ought to send forth their trained bands of loyal volunteer cavalry, and my only trust is they will adopt the suggestion.—I am, &c.,

A DRAGOON GUARDSMAN.

A correspondent, who is a warm friend to the Volunteers, writes as follows:—"Sir,—I have noticed lately, both at church, chapel, concerts, promenades, &c. (where I think you will agree with me, a military dress is very much out of place when worn by a civilian), members of the rifle corps wearing the uniform, belt, knickerbockers, cartridge-box, and all the paraphernalia of war. I think that, with no want of charity, this parade may be attributed to a desire to attract public attention, or to what is vulgarly called 'snobbishness.' Now by this means ridicule and contempt are undeservedly brought upon the whole body, and to my personal knowledge it has deterred many from volunteering (not that it would do so should the necessity be greater than at present), and I am sure it would result in the immediate increase of their number could this folly by any means be put down."

VOLUNTEERS.

METROPOLITAN.

VOLUNTEER ARTILLERY CORPS.—The subjoined notification appears in a general regimental order dated the 22nd instant:—"There not appearing to be any uniformity of practice in the several districts at home as to the means of affording instruction in drill to the various companies of Volunteer Artillery, it is to be understood, as a rule, that where there is a master gunner on the spot, or in the vicinity of the place where the drills are carried on, he is to be considered as the instructor; and any assistants that may be necessary are to be obtained from the best qualified non-commissioned officers or gunners serving under his orders. The great demand for instructors in the United Kingdom renders it imperative to employ every available individual for the purpose, and it is obvious that if the master gunners are excluded, there will be many non-commissioned officers employed in their stead, who might otherwise be available for a similar service elsewhere. There may, of course, be instances in which circumstances of a local nature will prevent this rule being strictly adhered to; but it is apprehended that it can only be in a very few cases, if any, that a master gunner's more immediate duties will debar him from devoting the necessary time to the instruction of the Volunteers, which ordinarily occupy but a few hours weekly."

CHRIST'S HOSPITAL VOLUNTEER CORPS.—This newly-formed brigade is progressing satisfactorily. The first company is formed and the officers for it chosen, and the second company is now in course of formation. The drill, for the next three weeks or a month, will take place in the ground of Sion College, until those of Christ's Hospital are ready. W. Gilpin, Esq., treasurer of Christ's Hospital, has kindly undertaken the office of treasurer to the corps, which he has supported in a praiseworthy manner. The Rev. J. T. White, M.A., master of the school, and an old Blue, has generously accepted the office of chaplain to the corps. The uniform will be blue. The corps would feel honoured if the governors of the hospital would undertake the organisation of the corps as its council of patrons, with the Duke of Cambridge for president of the council. The brigade has received the approbation of his Royal Highness.

CUMBERLAND.

CUMBERLAND RIFLE VOLUNTEERS.—The command of this battalion, comprising all the companies of this county, has been given to Major C. H. Wake, a retired officer of the Bengal Army, in which he served 24 years, latterly as Deputy-Judge Advocate-General. Major, now Lieut.-Colonel Wake, served in the Cole, Chooar, Sutlej, and Punjab campaigns, and has received medals for the latter.

LANCASHIRE.

On Sunday the officers and men of the 61st Company Lancashire Volunteers assembled in front of the police station at Chorley for the purpose of attending Divine Service. After having been "told off," they marched to St. George's Church, headed by their band. After the service was over the organ played "God Save the Queen." The Volunteers then marched back to the station, where they were dismissed. The outside of the church was decorated with flags, and the streets were densely crowded. Several military men who were present expressed their admiration of the steady manner in which the Volunteers marched.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, JUNE 26.

Retford or 2d Nottinghamshire Rifle Volunteers—The Rev. Arthur Brook to be Hon. Chaplain.

1st Company of Cheshire Artillery Volunteers—Andrew Alexander, Gent., to be Second Lieutenant; William Heap, jun., Gent., to be Second Lieutenant.

23d Company of Cheshire Rifle Volunteers—William Jones, Gent., to be Lieutenant; William Cawley Milner, Gent., to be Ensign.

24th Company of Cheshire Rifle Volunteers—John Jones, Gent., to be Honorary Assistant-Surgeon.

Worcestershire Rifle Volunteers—2d Company—The Rev. Herbert McLaughlin to be Honorary Chaplain; John Laxon Sweet, Esq., to be Honorary Assistant-Surgeon. 10th Company—Martin Woodward, Esq., to be Honorary Assistant-Surgeon. 11th Company—George Walker Sherrin Coates, Esq., to be Honorary Assistant-Surgeon. 16th Company—The Rev. Henry Bond Bowlby to be Honorary Chaplain; Thomas Richard Cooper, Esq., M.D., to be Honorary Assistant-Surgeon.

36th Staffordshire Rifle Volunteer Corps—Edward John Ridgway, Esq., to be Captain.

Kent Rifle Volunteers—4th Company—Lieutenant William Henry Carter to be Captain, vice Thorold, promoted as Lieutenant-Colonel of 1st Battalion; Ensign John Matthew Butler to be Lieutenant, vice Carter, promoted. 36th Company—The Rev. William Atherstone Hales to be Honorary Chaplain; Frederick Harvey Sankey, Gent., to be Honorary Assistant-Surgeon.

[The following is substituted for that which appeared in the *Gazette* of Tuesday, June 19]:—

Kent Rifle Volunteers—1st Battalion—Colonel George Edward Thorold to be Lieutenant-Colonel; Captain Harry Burrard Farnall to be Major.

18th Sussex Rifle Volunteer Corps—Percy Burrell to be Lieutenant.

1st Derbyshire Mounted Rifle Corps—Mr. John Brown to be Captain; Mr. Henry Rangeley to be Lieutenant; Mr. William Harmer to be Ensign.

Derbyshire Rifle Volunteers—3rd Battalion—Captain Lord George Henry Cavendish to be Major. 1st Company—Rev. William Francis Wilkinson to be Hon. Chaplain.

10th West Riding of Yorkshire Rifle Volunteers (Huddersfield)—Her Majesty has been pleased to accept the resignation by Ensign Frederick Greenwood of his commission as Assistant-Surgeon in this corps.

16th West Riding of Yorkshire Rifle Volunteers—(Harrogate)—Her Majesty has been pleased to approve of Captain John James Harrison bearing the title of Captain-Commandant of this corps.

The 12th (Skipton), 15th (North Craven), 23rd (Burley), 25th (Guiseley), and 26th (Ingleton) Corps of West Riding of Yorkshire Rifle Volunteers have been formed into a battalion for administrative purposes, with a Staff consisting of one Major and one Adjutant. The battalion is numbered as the 2nd in the said West Riding, and the several corps composing it will retain their present numbers and designations in the county force.

7th Shropshire Rifle Volunteer Corps—The Rev. Benjamin Banning to be Hon. Chaplain.

Yeovil or 16th Somerset Company of Volunteer Rifle Corps—William Fancourt Tomkyns, Gent., to be Hon. Assistant-Surgeon.

2nd Lancashire Rifle Volunteers—Ensign William Alexander Paterson to be Lieutenant; Aspden Pickup Dickinson, Gent., to be Ensign.

4th Durham Artillery Volunteers—The Rev. William Broughton to be Hon. Chaplain.

1st Durham Rifle Volunteers—Memorandum—Her Majesty has been graciously pleased to approve of Captain Thompson of the 1st Durham Rifle Volunteer Corps, bearing the title of Captain Commandant of that corps.

4th Durham Rifle Volunteers.—Collingwood Lindsay Wood, Esq., to be Captain; John Jobson, Gent., to be Lieutenant; Matthew Culley Stobart, Gent., to be Lieutenant; William Robert Hawks, Gent., to be Ensign; James Thompson, Gent., to be Ensign; Valentine Hutchinson, M.R.C.S., to be Assistant-Surgeon.

6th Durham Rifle Volunteers—John Chambers, Gent., to be Ensign.

11th Durham Rifle Volunteers—William Robson Shiel, Gent., to be Assistant-Surgeon; the Rev. Joseph Price Depledge to be Hon. Chaplain.

Memorandum.—The name of the gentleman appointed Ensign in this corps is Robert French Gibson, and not Robert Trench Gibson, as previously gazetted.

Leith Rifle Volunteer Corps—Ensign James Laurence Boyd to be Lieutenant, vice Henry; James Cochrane, to be Ensign, vice Boyd, promoted.

City of Edinburgh Rifle Volunteer Corps—Lieutenant David Macgibbon to be Captain, vice Ballantine, resigned; John Thomson Gordon to be Captain, vice M'Callum, resigned.

Roxburghshire Rifle Volunteer Corps—3rd Company—Thomas Tod, Esq., to be Captain; Thomas Alexander Riddell Carre, Gent., to be Lieutenant; James Curle, Gent., to be Ensign. 4th Company—John Scott Chisholme, Esq., to be Captain.

Upper Annandale, or 6th Company of Dumfriesshire Volunteer Rifle Corps—George Gordon Hope Johnstone, Esq., to be Captain; Thomas Welsh, Esq., to be Lieutenant; Walter Johnstone, Esq., to be Ensign.

Lockerbie, or 8th Company of Dumfriesshire Volunteer Rifle Corps—Osmond de Havilland Steuart, Esq., to be Captain; Thomas Stodart, Esq., to be Lieutenant; William Wallace, Esq. to be Ensign.

27th Lanarkshire Rifle Volunteers (Glasgow)—William Gilmour, Esq., to be Captain, vice Thomas Small, resigned.

74th Lanarkshire Rifle Volunteers (Glasgow)—John Burns Mac Brayne, Esq., to be Captain, vice Thomas Carmichael Orr, resigned.

10th Hertfordshire Rifle Volunteers—Joseph Simpson, Gent., to be Captain; John Phillips, Gent., to be Lieutenant; Henry Perkins, Gent., to be Ensign.

[The following appointment is substituted for that which appeared in the "Gazette" of the 19th of June last]:—

8th Monmouthshire Rifle Volunteer Corps.—The Hon. James Fitzwalter Clifford Butler to be Captain.

WAR OFFICE, PALL MALL, JUNE 29, 1860.

Renfrewshire Rifle Volunteers—11th Company (Greenock)—John Erskine, Gent., to be Ensign, vice Heir, resigned.

19th Company (Nitshill)—Ensign Dugald Dove to be Lieutenant, vice Coats, resigned. James Lancaster, Gent., to be Ensign, vice Dove, promoted.

4th or Holywell Company of Flintshire Rifle Volunteers—The Honourable Rudolph William Basil, Viscount Fielding, to be Captain; Alexander Cope, Gent., to be Lieutenant; Charles Crockford, Gent., to be Ensign.

Oxford University Rifle Volunteer Corps.—Lieutenant Edward Cecil Coney to be Captain, vice Warre, resigned; Ensign Byam Martin Davis to be Lieutenant, vice Coney, promoted; Serjeant Arthur Cecil Guiness to be Ensign, vice Davies, promoted; Serjeant William Oswell Thompson to be Ensign, vice Russell, resigned.

City of Norwich Rifle Volunteer Corps.—John Brandram Morgan, Gent., to be Lieutenant; Samuel Hurry Asker, Gent., to be Ensign.

Great Yarmouth Rifle Volunteer Corps.—Frederick Palmer, Esq., to be Surgeon; Henry Ralph Nevill, Clerk, to be Honorary Chaplain.

1st Devon Mounted Rifle Volunteers—George Rashleigh Edgell to be Lieutenant; Edward Morgan Puddicombe to be Honorary Assistant-Surgeon.

5th Devon Mounted Rifle Volunteers—Lord Seymour to be Captain.

7th Devon Mounted Rifle Volunteers—Baldwin John Pollexfen Bastard to be Captain.

3rd Devon Artillery Volunteers—Richard Bealy Tulloch to be Honorary Assistant-Surgeon; Reverend Thomas Burne Simpson to be Honorary Chaplain.

6th Devon Artillery Volunteers—Campbell Sawers to be Captain, vice Cleland, resigned; Samuel Nathaniel Elliot to be Honorary Assistant-Surgeon; Reverend John Tracey to be Honorary Chaplain.

9th Devon Artillery Volunteers—John Thompson Goodridge to be Lieutenant.

18th Devon Rifle Volunteers—John Gould to be Honorary Assistant-Surgeon.

Victoria Rifles—Lieutenant William Dickinson to be Captain; Lieutenant William Louis Collins to be Captain.

South Middlesex Rifle Volunteer Corps—Captain Evan MacPherson to be Major, vice Lord Ranelagh, promoted.

13th Middlesex Rifle Volunteer Corps—Joseph Henry Warner, Esq., to be Captain.

Worcestershire Rifle Volunteers—3rd Company—John Hillman, Esq., to be Honorary Assistant-Surgeon; 5th Company—Cecil Webster, Esq., to be Honorary Assistant-Surgeon; 9th Company—Richard Leacroft Freer, Esq., to be Honorary Assistant-Surgeon; 11th Company—Lieutenant Sir H. E. F. Lambert, Bart., to be Captain; Ensign Tonge to be Lieutenant.

1st Staffordshire Rifle Volunteer Corps—Samuel Fallows Shelley, Gent., to be Ensign, vice Mole, promoted.

19th Lancashire Rifle Volunteers—Lieutenant William Donald Ryrie to be Captain, vice Mackenzie, resigned.

22nd Lancashire Rifle Volunteers—Ensign Isaac Dawson to be Lieutenant.

51st Lancashire Rifle Volunteers—Frederick George Aubie de Bentley, Esq., to be Captain; Alfred Whittle, L.R.C.P., to be Assistant-Surgeon.

55th Lancashire Rifle Volunteers—Lieutenant George Edward Jee to be Captain; Ensign Henry Kirkpatrick to be Lieutenant; James Bayley Knott, Gent., to be Ensign.

56th Lancashire Rifle Volunteers—The Reverend Patrick Charles Nicholson, Clerk, B.D., to be Honorary Chaplain.

35th Lanarkshire Rifle Volunteers (Glasgow)—Joseph Robertson Gent., to be Ensign, vice John Russell, resigned.

90th Lanarkshire Rifle Volunteers (Glasgow).—John Russell, jun., Gent., to be Lieutenant; James Adamson, Gent., to be Ensign.

1st Battalion of the Inverness-shire Rifle Volunteers.—Ewen Macpherson, Esq., to be Major.

20th Aberdeenshire Rifle Volunteer Corps—Alexander Forbes Irvine, Jun., Esq., to be Captain Commandant; David Henderson Kennedy, Gent., to be Lieutenant; James H. Irvine, Gent., to be Ensign; William Lyon, Gent., to be Assistant-Surgeon.

23d Aberdeenshire Rifle Volunteer Corps—James Walker to be Lieutenant; William Reid to be Ensign.

Merionethshire Rifle Volunteer Corps—The appointment of Charles Tynes, Esq., as Adjutant to the above Corps has been cancelled owing to its not being in accordance with the regulations published by Her Majesty's Secretary of State for War.

THE QUEEN AND THE VOLUNTEERS.

GENERAL ORDER.

Horse Guards, S.W., 25th June, 1860.

His Royal Highness the Duke of Cambridge has received the commands of the Queen to convey to the several Volunteer corps reviewed by Her Majesty on Saturday, the 23rd inst., the very great satisfaction with which she observed the rapid progress they have made in military discipline, and the degree of perfection at which they have arrived.

The steadiness and precision with which they performed the parade movements leave little doubt in Her Majesty's mind, that if they continue to be actuated by the same zeal they have hitherto evinced, a moderate degree of drill, interfering as little as possible with their usual avocations, will render them a most valuable auxiliary to Her Regular forces for the defence of the country.

Much as Her Majesty's admiration was excited by the soldierlike bearing of the various corps passed in review, a still deeper impression has been made on her mind by the proof which the Volunteer movement throughout the country affords of their devotion and loyalty to the throne, and their anxiety to second her endeavours to ensure the security, and thereby the prosperity of the kingdom.

The General Commanding-in-Chief is further directed by Her Majesty to mark especially her sense of the zeal displayed by the officers of Volunteers commanding brigades and corps, and to notice particularly those battalions and companies which, regardless of personal inconvenience and expense, came from distant counties to join in the display of loyalty and patriotism, which will render the 23rd of June, 1860, memorable in the annals of our times.

The General Commanding-in-Chief having thus given expression to Her Majesty's sentiments regarding the Volunteer force, commendation on the part of His Royal Highness would be superfluous; but he desires to offer his thanks for the support and co-operation he has received, on this occasion, from the officers of the Regular Army employed during the day, and more particularly, to refer to the excellent arrangements made by the Inspector of Volunteers and his assistants, which were so well seconded by the intelligence and orderly conduct of the various corps present.

By command of His Royal Highness, the General Commanding-in-Chief,

JAMES YORKE SCARLETT,
Adjutant-General.

THE GRAND VOLUNTEER REVIEW.

The following Circular, dated War Office, 27th June, 1860 has been forwarded by Mr. Sidney Herbert to the Lords-Lieutenants of counties from which Volunteers were sent to the recent review. It is accompanied by the Horse Guards' General Order.

"I have the pleasure of enclosing a copy of a general order, in which His Royal Highness the General Commanding-in-Chief has been authorised to express Her Majesty's admiration of the soldier-like bearing of the Volunteers reviewed by Her Majesty in Hyde Park on Saturday last, and the deep impression made upon her mind by the loyalty and devotion evinced by the Volunteer force throughout the whole country.

"In communicating this document to you, and requesting you to enclose copies of it to the commanding officers of the various corps in your county, I avail myself of the opportunity to express to you the high gratification with which Her Majesty's Government have witnessed the rapid success of the Volunteer movement, and the degree of efficiency to which the corps present at the late review have attained.

"The zeal and public spirit of the Volunteers have added a new and valuable element to our means of defence, and have earned for them the approbation of their Sovereign and the gratitude of the country.

"I have, in conclusion, to convey to you the thanks of the Government for the assistance which you have afforded me in the raising and organisation of this force, and for the zeal with which you have discharged the onerous duties which have devolved upon you in connection with it."

SKETCH OF THE STATE OF INDIA.

India has been taken out of the hands of those who gained that magnificent empire, and is now in the hands of those who would legislate for two hundred millions of Asiatics, as if they were so many Englishmen of the age of the Plantagenets; with this difference, that they have been educating them for the last thirty years in our own language, and teaching them that they are a free people, and on a footing with the English settled amongst them, in everything but in political thought and action; the Government exercising in every department despotic power. This state of things is incompatible; and we must be prepared to deliver over the country to the two hundred millions by composition, and by degrees, or be compelled to quit it for want of means to keep it in subjection.

When General Briggs went as Senior Commissioner to Mysore in 1832, he found that the inhabitants, owing to the indolence and indifference of the raja, and the oppression of the farmers of the revenue (who were also the official governors of their districts), took to the jungles, or went into other countries, laid open the custom toll-gates, refused to cultivate their lands or pay taxes, and the unpaid soldiery refused to act against their countrymen who were "without arms, and who molested nobody."

This extreme measure was only had recourse to after the raja had hung up a few of the chiefs of the country, whom he invited to meet him to hear their complaints. They mistrusted the raja till the commander of his cavalry pledged himself for their security; and when the raja ordered their execution, the chief protested against the measure, and swore he would never draw sword again in his service—an oath which the rest of the force strictly kept.

The inhabitants called on the English Government to take possession of the country, which has been governed by a commissioner and a very few European officers for the last 30 years, under a purely native system, with judges or collectors; and old debts, to the amount of ten or twelve millions, have been paid off till it is said no debt now remains. The country is as large and as populous as Oude, with its 400 independent zemindars and forts, and its million and a-half of weapons taken and destroyed.

So familiar are the people of India with this mode of dealing with arbitrary governments, that no sooner is a gross and intolerable injustice inflicted on a single village than it is deserted; the inhabitants sink into the populations of any others wherein they have family or caste connections; the fields are abandoned, the Government loses its revenues, and sooner or later the oppressor finds it his interest to conciliate and compromise. This peaceful resistance is not unfrequently exercised in cases of freehold lands being too heavily assessed; but woe to the bold peasant stranger who undertakes to cultivate it. The real proprietor becomes an active defendant of his property. He collects about him his relations, or other injured men, and they not only destroy the crops, but those who attempt to protect them. Such is the system of revenge which pervades all Bengal more or less since Lord Cornwallis's settlement in 1793, and renders it impracticable to maintain an efficient police where the population is divided against itself. The Government talks of rendering the European branch of the army moveable from India all over the world; reducing the European officers of the native army to mere policemen, and to depend on 60,000 European soldiers spread over a country larger than all Europe for keeping it in subjection; which will prove an enormous mistake.

[ADVERTISEMENT.]—MAPPINS' RIFLEMAN'S KNIFE, 12s. each.—"No Volunteer should be without one: invaluable for campaigning."—Manufactured by MAPPIN BROTHERS, Queen's Cutlery Works, Sheffield, and 67 and 68, King William Street, London Bridge, E.C.

VISIT OF THE PRINCE OF WALES TO AMERICA.

The following programme has been officially issued :—His Royal Highness will start from Devonport upon the 10th of July in H.M.S. Hero, Captain G. H. Seymour, which will be accompanied by H.M.S. Ariadne, Captain E. W. Vansittart, and H.M.S. Flying Fish, Captain C. W. Hope. The Prince will be attended by Her Majesty's Secretary of State for the Colonies, His Grace the Duke of Newcastle ; the Lord Steward of Her Majesty's Household, the Earl of St. Germans ; His Royal Highness's Governor, Major-General the Hon. R. Bruce ; and the Equerries in Waiting, Major Teesdale, R.A., and Captain Grey, Grenadier Guards ; and Dr. Acland, His Royal Highness's physician. Mr. Engleheart, private secretary to the Duke of Newcastle, will accompany his grace. The Prince of Wales will first land at St. John's, Newfoundland, then visit Nova Scotia, and thence proceed to visit New Brunswick and Prince Edward's Island, and will reach Quebec by the route of the Lawrence. He may be expected at Montreal about the 23rd of August, and the opening of the Victoria Bridge will take place a few days later. His Royal Highness will represent Her Majesty upon this important national occasion, and will hold levees and receive addresses in the capitals of the different colonies. It is intended that the Prince should visit the principal towns in both Canadian provinces. On his return from the western districts, it is intended that His Royal Highness should drop all royal state, and, assuming the title of Lord Renfrew, under which he has before travelled upon the continent of Europe, His Royal Highness will visit some of the most important and interesting localities of the United States. It is understood that the President, Mr. Buchanan, having in an autograph letter to the Queen expressed his personal desire to receive the Prince at Washington, His Royal Highness will pay him a visit in that city ; and that His Royal Highness has also accepted an invitation from the city of New York. His Royal Highness may be expected back in this country about the middle or end of October.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL
OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s*. 6*d*. per quarter, or 26*s*. per annum, payable in advance ; and the postage—uniformly 1*d*. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

WILLIAM O. MITCHELL,
MILITARY BOOKSELLER AND PUBLISHER,
39, CHARING CROSS, LONDON, S.W.
Catalogues sent on application.

NEW THEATRE ROYAL, ADELPHI.—
Sole Proprietor and Manager, Mr. B. WEBSTER.
Second Week of the reproduction of the powerful Adelphi Drama, THE FLOWERS OF THE FOREST. Tenth Week of the Favourite American Actress, Miss Julia Daly. On Monday, and during the Week, THE FLOWERS OF THE FOREST (cast as last week); OUR FEMALE AMERICAN COUSIN (cast as before). Commence at Seven.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Sir Colin Campbell.—This great Picture, by T. J. BARKER, from Drawings and Pictures taken expressly at Lucknow, by Egron Lundgren, is NOW ON VIEW at the Lucknow Gallery (Messrs. THOS. AGNEW & SONS), 5, Waterloo Place, Pall Mall, from Ten to Six o'clock.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly, Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence. The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*

Gold Watches, 4 to 100 guineas ; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C. Established 1749.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, ELSTOB, of 12, Avery Row, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

DAY'S PATENT CHAIR-BED, a perfect combination of Easy Chair, Couch, and Bedstead, adaptable to either purpose by one simple motion, without screw, nut, rack, or complication of any description. An illustrated and descriptive circular for one stamp. W. DAY & SON, Portmanteau Manufacturers and Military Outfitters, 353 and 378, Strand, London, W.C.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are :

1. Extreme lightness ; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum ; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS
SUPPLIED WITH EVERY REQUISITE.

	£	s	d
Bass Drums, 32 inches	4	4	0
Tenor Drums, 20 inches, transparent heads	2	7	0
Brass Side Drums, 14 inches	1	8	0
Regulation Drums, brazed shell, as supplied to the Army	2	2	0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2	5	0
Oak (polished) Side Drum, 14 inches	1	5	0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

BUGLES FOR VOLUNTEER CORPS, Government pattern, corresponding to those used in the Line, very best make, price, in copper, 42*s*., or strongly electro-plated, 63*s*. ; green cord and tassels, 3*s*. 6*d*. ; silk ditto, 8*s*. ; enamelled leather case, with strap and buckle, 12*s*. Sent carriage free on receipt of a remittance.—BOOSEY & SONS, Military Musical Instrument Manufacturers, Holles Street, London, W. Volunteer Bands furnished with instruments and music of every description.

NOTICES TO CORRESPONDENTS.

"B. R. W."—1. The Foot-Guards may be considered as very nearly approaching a model of discipline and drill. 2. The Line regiments, except possibly an occasional new battalion, are not "far inferior" to the Guards. 3. The marching past of the Marines is, in general, admirable ; and we recollect that, at the presentation of the Victoria Cross in Hyde Park in 1857, the Marines were held by many to be superior to the Guards in appearance and marching. We believe, however, that it was a picked battalion, made up of men selected from each division, sent up to London for the occasion.

"J. G."—The Duke of Cambridge's title is General Commanding-in-Chief, and Sir George Brown's, Commanding the Forces in Ireland. Lord Clyde is Commander-in-Chief in India, because his command is one in many respects practically independent of the Queen (she has the power of confirming courts-martial, of remitting capital sentences, &c.) while the generals on the Staff at home, are supposed to be acting directly under the orders of the Sovereign, and are only commanding as her subordinates.

"W. S."—Lieut.-Colonel Deacon is certainly entitled under the Royal Warrant of 1858 to be gazetted Brevet-Colonel. Doubtless he will be so gazetted, with his commission as Colonel ante-dated to the 11th of May, 1860.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, JUNE 30, 1860.

Those who regard anxiously the organisation and efficiency of the Militia will read with great, if not unalloyed, satisfaction the speech in which Mr. Sidney Herbert introduced the Government measure for amending the Militia laws on Tuesday evening. Almost every one of the changes which the Minister proposes has been the subject of earnest advocacy in these columns ; and although in some respects we would go a little farther than his programme appears to do, we gladly accept it as a wise step in the right direction which, if logically followed up, will, in the course of a little time, bring the Militia into such an available condition for service that we may really count upon it as a great national safeguard. The leading ideas of Mr. Herbert's speech are, the practical localisation of the Militia, and the renunciation of the policy which treated them principally as a "nursery for the line." We say practical localisation, for Mr. Sidney Herbert appears to dislike the name of local Militia ; and although, like him, we cannot well say what is the difference between a general and a local force, we do not care to fight about terms as long as it is laid down that the Militia are not to be taken from their own districts unless in case of actual war, that they are not to be sent to do the duty of the Line in garrisons or camps, and that they are to be maintained in all respects as a reserve force for national defence,—as worthy of being preserved upon that footing as any other constituent portion of the military establishment of the country. Under this new system, when it comes to be properly developed and popularly understood, we have little doubt that a far superior class of men will be attracted to the Militia service. No doubt it will be some time before the populace can divest themselves of the many repugnant ideas associated with service in the Militia during the last few years ; but when they really find out that they are not to be embodied and disembodied, turned here and there, or harassed by recruiting sergeants from the Line, men of settled residence and good character will come in and learn the duty of soldiers as readily as the Volunteers do now. We wish we could add that the period of training was changed so as to include three or four months' instruction at first enrolment, and a slighter annual obligation afterwards, but this will doubtless come before long. The details of the reforms announced by the Secretary for War are, on the whole, sensible and useful ; and we trust before long to see this important but somewhat neglected force once more regain its proper position as an element of national defence.

The Volunteers of 1859 have had their grand parade, and obtained from Queen Victoria and the Horse Guards official recognition of their value as an element in the defensive force of Great Britain. London has enjoyed a sensation springing from a military novelty, and has not been reluctant to express its satisfaction. The military critics have had an opportunity of scrutinising the citizen soldiers while engaged in the actual business of "marching past," the martinet's delight ; and they, too, the hardest of all to please, have said, Well done ! None but those who knew what the Volunteers have been doing all the winter and spring, and how closely they have stuck to drill, anticipated that the review of Saturday would be a success, so that the whole thing broke upon the majority of spectators as a splendid surprise.

And a noble sight it was. As a mere military spectacle, a theatrical display, it wanted the grandeur which the glorious old red uniform imparts to the gatherings of our regular troops ; but as a military spectacle it was not deficient in beauty. Though the day was without sunshine, yet it was fair. On the plateau of Hyde Park, stretching from the Serpentine to the Marble Arch, stood the columns of Volunteers in varied uniform—the cavalry and engineers and London Artillery in red, the country artillery in blue, masses of riflemen in dark green, columns in dark grey, and mist grey, and bright green. As a carpet beneath their feet was the grass, as a background the noble timber of the Park, and, as a setting for the whole, a tremendous all-encircling crowd, such as London alone can send forth, while in front of the crowd were marshalled the stalwart Guards, foot and horsemen, more distinctly seen in contrast to the dark masses of the spectators. And beyond the park the house-tops, and every coign of vantage held its group of eager sightseers. The galleries set apart for the privileged blossomed like the rose, and beneath them a host of officers in gorgeous apparel decked the ground. No such spectacle had been seen in Hyde Park,—no such spectacle had been seen in merry England—since the year '14. It was something that made its mark upon the memory, to remain there for life.

But it was not regarded solely as a brilliant and unusual spectacle. The thoughtful went there to see something more than outside show—they went to weigh and test a military performance ; to scan the bearing, the step, the steadiness of the performers ; to form some estimate of their worth as military engines ; in short, to learn whether the Volunteers were, as the Frenchman phrased it, a national guard or troops. The result was that they went away with the conviction that they had assisted at the manœuvres of troops, and not of a national guard.

They saw 21,000 men, exceeding in stature, muscle, and carriage, the average of the troops of the Line. They remarked that, in marching past, the step of the Volunteer was not the heavy tread of the Linesman, but an elastic spring of step, regular and measured, but quite unconstrained. They saw the companies go by in even lines ; but the martinets observed that the Volunteer companies differed from the regulars in one point — they did not invariably look before them, but sought to catch a glimpse of the Queen as they swept by. Moreover, our critics saw the whole mass in regular motion, moving steadily up to the wheeling point, wheeling compactly, opening out, marching past, and doubling again into quarter distance or close column, without confusion. Perhaps some of the men did not carry their heads erect enough, and few carried their rifles sufficiently far to the rear ; but these were defects counterbalanced by the spirited marching step, soldier-like air, and unwavering motion ; and by the emphatic moral force, the strong intelligence, the resolute will, evident in the whole mass. It was plain they were essentially Volunteers,—manifest that not one of them had drilled except of his own free will. The bonds that bound them together were loyalty and honour, and strong bonds they have proved.

The value of the display as a test of the quality of the Volunteer troops is not so great as the value of the moral lesson it conveyed—the lesson that old England is once more giving free play to her healthy martial instincts. As a military performance it was good of its kind, but no parade manœuvres can ever be a test of real excellence in soldiership. All they prove is, that the troops can be moved, and can themselves move with a certain degree of precision, under the most advantageous circumstances. It is highly creditable to the Volunteers that they marched so well ; but no one would think of accepting such an achievement as a proof that they were fit for active service. The real test of their quality as soldiers was shown in the regularity and punctuality with which the several brigades, coming in sections from all parts of London, and almost all parts of England, were concentrated in the Park. They were ordered to take up a certain ground at a certain time, and they did it. A still better test was the movement out of the Park. Nothing could have been more regular. No longer time was occupied than actually sufficed for the march of the columns over the ground to be covered. Instead of being in the Park till midnight, before eight in the evening, that is in less than two hours, every section had quitted the Park, and the Foot Guards who kept the ground were halfway towards the barracks. The most striking movements of the day were those which

Digitized by Google

brought the men into Hyde Park and those which took them out again in good military time. It is this fact which made so deep an impression on Sir John Burgoyne, and caused him to modify the opinions he had formed of the possibility of making soldiers out of Volunteers. He has no doubt about it now. Give them time; don't let them hurry, and drill so foolishly in the rain; let them be broken in upon system, and they will be fit for any duty.

We must not forget how much of the success of the day is due to Colonel M'Murdo and his staff. He issued the marching orders for concentration and dispersion, and fixed the rendezvous for the country corps, and their route to and from the ground; and he amply deserves the approbation accorded to him in the General Order.

So far, then, the Volunteers have done well. They have much to learn and much to do. They can learn it and do it. But, whether they will, depends entirely upon the intelligence, firmness, and energy of their officers. Those corps will go the furthest who proceed upon military principles, and approximate the most closely to the best military systems. Nobody but the captains of companies can establish good systems in their companies, and none but the commandants of battalions can do the same for battalions. Now, it should be the business of Inspectors of Volunteers to insist upon the adoption of sound principles of organisation and training, and of the Adjutants to see that these principles are carried out. This we regard as a vital point; and the Inspectors will not do their duty unless they look into the thing closely, and report and advise with frankness and discretion. The Volunteer Army has proved its capabilities, and a heavy responsibility will rest on those who fail to give them fair play.

At the recent final examination of Cadets at the Royal Military College, some forty young gentlemen passed an examination which was declared to have fitted them for commissions in the Line. Nevertheless, the Duke of Cambridge in addressing them, was obliged to state that it was out of his power to give commissions without purchase to more than twenty of them; and the first twenty on the list, according to their number of marks, were selected. The remaining twenty are left either to purchase commissions, or do the best they can. We are well aware of the calls upon the Secretary for War to prevent the Reserved Fund being unduly diminished, especially with a number of cavalry retirements impending; but we do think, even in the face of this, and of the Fifteen Million Bill before us, that these young men have a right to complain of not merely a virtual, but a direct, plain, and positive breach of faith on the part of the Government. That a satisfactory career at Sandhurst secures, or has been in the habit of securing, a commission without purchase, is a matter of sufficient notoriety to render it at least very equivocal conduct on the part of the Secretary for War to take away the privilege without long and distinct notice. But, in the present instance these young gentlemen went to Sandhurst under a distinct compact with the Government, contained in the regulations then in force. The words of paragraph 20 of these regulations are, "With a view to the advantage of the Service, and as an encouragement to young gentlemen educated at the Royal Military College, and a stimulus to their exertions, commissions are given to all those passing an examination before the Collegiate Board." Notwithstanding this very distinct stipulation, the young gentlemen who have performed their part of the compact are told the Government cannot fulfil theirs. There was nothing about competition when they entered Sandhurst. They invested their time and money in the acquisition of a Military education, in return for which they are promised the gift of a commission. They are pronounced duly qualified; there is no question as to their having earned the prize honestly, but it is not convenient for the Minister for War to diminish his balance by giving it. As against a private individual they could undoubtedly maintain an action-at-law: as against the Minister, we hope public opinion will see that right be done.

We are glad to learn that a more complete and efficient system is about being carried out for the inspection of the Volunteers throughout the country. The present Inspector and his assistants are all as accomplished officers as could be wished for, but they are too few in number; and as regards the Assistant-Inspectors, their districts have been allotted without proper regard to the considerations by which the Volunteer organisation should be regulated. Certain head-quarters of military districts have been selected for their location, irrespective of the population or the number of Volunteers around them. The Southern counties have been well attended to by the Assistant-Inspectors stationed at Canterbury, Winchester, and Plymouth, but there is only one for all Scotland; while Wales, the Eastern and North-Midland counties, are not at all provided for. The Volunteer force has now assumed too valuable an appearance not to entitle it to the most careful supervision, and every advantage in the shape of skilled instruction in its duties. What has been so wonderfully created must be carefully preserved; and the country will cheerfully consent to the very small additional outlay necessary to give the Volunteers—officers and men—every aid in acquiring and maintaining their efficiency.

The Select Committee on Military Organisation has been engaged this week in considering its report. The next meeting will take place on Tuesday, when it is anticipated its deliberations will be brought to a close.

The pleasure experienced by Her Majesty at the great spectacle of Saturday, is officially recorded in another portion of our columns, and we believe that some of the Volunteers—the distance of whose head-quarters from the Metropolis prevented their appearance in Hyde Park—are likely to be gratified by being inspected by Her Majesty nearer their own localities. A review on a large scale, at Edinburgh, is one of the events likely to distinguish Her Majesty's visit to Scotland this autumn.

The death of the Earl of Strafford has given somewhat more of a foundation to a rumour which has been from time to time mentioned lately, to the effect that the Duke of Cambridge, Sir Howard Douglas, and Lord Gough were likely to be created Field-Marshals. The two gallant veterans well deserve so great a mark of honour, while coupled with his high rank, the earnestness and good intention of the Royal Duke while in command of the Army, fairly entitle him to be associated with them. It would be no expense to the country, as Lord Gough and Sir Howard Douglas would continue to receive their regimental pay only, while the Duke of Cambridge would doubtless readily follow the example of Lord Hardinge, who, on being appointed a Field-Marshal, accepted only the pay and allowances of a General on the Staff.

To-day General Knollys resigns the Aldershot command, in which he will be succeeded by Sir John Pennefather. Sir George Wetherall assumes the command of the Northern district on Monday. On the same day Major-General Forster assumes the duties of Military Secretary to the Commander-in-Chief in the room of Sir Charles Yorke, who well deserves the Grand Cross of the Bath conferred upon him after six years of constant and trying work; and Sir Alfred Horsford takes General Forster's place as Deputy Adjutant-General.

Lieut.-General Gascoigne, who resigns the command of the Dublin district, will very probably be succeeded by Major-General the Hon. A. A. Dalzell, now commanding the Cork district, which will thereby become vacant.

Colonel Hemphill, of the 26th Regiment, has been appointed to command a brigade at the Curragh, for the purposes of drill and field evolutions during the summer.

Colonel Blane, Assistant Adjutant-General in Dublin, is on leave of absence, and the duties of the office are being discharged by Captain Morgan, Major of Brigade.

From the detailed statement in another column, it will be seen that the total strength of the Volunteers reviewed in Hyde Park, on Saturday, was 20,890 of all ranks.

The Gunboat Committee had another sitting this week, Sir Frederick Smith in the chair, and Sir Baldwin Walker, the Surveyor of the Navy, was re-examined. The Committee have issued summonses for the attendance of Sir Charles Wood and Sir Maurice Berkeley. The former was First Lord of the Admiralty, and the latter Senior Sea Lord, at the time the contracts for building the gun and mortar-boats were issued. Sir Frederick in the interval between the last and the next sitting of the Committee, has made up his mind to visit Chatham Dockyard, and there make a personal examination of the gun and mortar boats laid up there.

The Indian Government has decided that the troops employed at and prior to the battle of Banda and siege of Kotah respectively, shall be held entitled to the clasp for Central India; but that those of other of the columns of Generals Whitlock and Roberts, who were employed in the subsequent minor engagements, shall have a claim to the medal only.

It is officially announced that His Royal Highness the Prince of Wales will embark for Canada in the screw line-of-battle ship Hero, 91, Captain George H. Seymour, C.B., and will be accompanied by the Ariadne, 26, Captain E. W. Vansittart, and Flying Fish, 6, Commander Charles W. Hope. The Hero has a complement of 880 seamen and marines, the Ariadne, 450, and the Flying Fish, 110. The Ariadne will be well worthy of a visit from our trans-Atlantic cousins, as, although only mounting 26 guns, these are of the heaviest calibre, and she actually measures nearly 100 tons more than the Hero, which mounts 91 guns; she has also 1000 horse-power, whereas the latter ship has only 600. According to present arrangements the Flying Fish will start a day or two in advance, so that she may be able to reach the shores of Canada at about the same time with her more powerful consorts.

The Royal Commissioners for inquiring into the state of the Dockyards will commence their labours in earnest on Monday next. The Surveyor of the Navy, Sir Baldwin Walker, will be one of the first witnesses examined, and it will only be fair to this officer, on whom so much responsibility has been cast, that Lord Clarence Paget should be present, so that the charges which his lordship brought forward last session in his famous Opposition speech should be thoroughly explained away, as, up to this moment, not one of them has been substantiated against Sir Baldwin; and from what we know of Lord Clarence, judging of the honest and good-tempered way in which he has conducted the duties of the office, he will be eager to withdraw that portion of his statement in which he cast the blame of reckless expenditure upon one who had no more control of the use of the public money than he had himself.

It has been known in naval circles for some time past that Rear-Admiral George Elliot was desirous of relinquishing the appointment of Captain of the Fleet under Vice-Admiral Sir Charles Fremantle. His retirement has now been officially announced, and he is to be succeeded by Rear-Admiral Robert Fanshawe Stopford. Admiral Stopford is an excellent and popular officer; but we must say that it appears to us we are sadly off for active officers, if on each vacancy that occurs, we have almost invariably to depend upon a Martin, a Fanshawe, or a Stopford to fill it.

THE CHINESE WAR.—Some weeks since Lord Clarence Paget declined, for reasons he thought sufficiently weighty, to give the exact amount of our naval forces employed in the East Indies and on the coast of China. The following particulars will be interesting to the public at a time when, in all probability, hostilities are going on; and, as we have collected them from the most reliable sources, they may be depended upon. We have two Admirals—Vice-Admiral James Hope, C.B., and Rear-Admiral Lewis T. Jones, C.B.; one Commodore, twelve Captains, one Acting-Captain, seventeen Commanders, two Acting-Commanders, twenty-five Lieutenants-Commanding, and two Masters-Commanding. There are serving under these officers, in addition to a number for disposal in the event of casualties, the usual complement of Lieutenants, &c., according to the ratings of the different ships. There are fifty-nine effective vessels of various classes, mounting 490 guns, manned by upwards of 7000 seamen and marines. There are also borne on the books of the flag-ship Chesapeake, 2 battalions of Royal Marine Light Infantry, and a company of Royal Marine Artillery, making together some 1800 men. We have, therefore, in addition to the army dispatched from India and from England, 9000 sailors and marines to bring against the Chinese. We have not taken into account the vessels and the crews of the late East India Company's navy, as they are chiefly employed on other parts of the station, and have not hitherto taken part in the new war with China. We have not noticed receiving-ships, storeships, or hospital-ships, of which there are several.

Her Majesty the Queen has consented to inaugurate the first prize meeting of the National Rifle Association, of which H.R.H. the Prince Consort is the patron, and Mr. Sidney Herbert, Secretary at War, the president. Wimbledon Common, on which the events which will commence on Monday next will take place, has been prepared by the erection of tents and other suitable accommodation for the reception of the distinguished persons who will meet Her Majesty on Monday, and who will attend on the following days to witness the competition amongst riflemen. Her Majesty is expected to arrive on the ground at three o'clock on Monday afternoon, when an address will be presented to her, probably by Mr. Sidney Herbert, the president, or by Lord Elcho, and the active business of the meeting will commence as soon as the Queen has fired a rifle from a fixed stand. Her Majesty has offered a prize of 250*l.* for the best rifle shot amongst Volunteers, and it is a *sine quâ non* that all Volunteers intending to compete must appear in the uniform of their respective corps. The Prince Consort offers a prize of 100*l.*, open to all comers, and it is expected that a considerable number of foreigners will enter the lists as competitors.

ST. GEORGE'S RIFLES.—It has been arranged that, upon the occasion of Her Majesty's visit to Wimbledon Common, on Monday next, to inaugurate the proceedings of the National Rifle Association, 100 members of the St. George's Rifles (Hanover Square) shall be selected to form a guard of honour to escort her upon the ground. It must be very gratifying to the feelings of the Volunteers as a body that this duty, which, as a matter of course, usually devolves on a detachment of regular troops, is allotted to them upon so important an occasion. It is worthy of mention, in connection with the St. George's Rifles, that it is in contemplation to establish cadet classes in the corps, and that Lieutenant-Colonel Lindsay, the commanding officer, has announced his willingness to accept any number of young gentlemen who are related to the members, or are recommended by them. Should this idea be adopted and acted upon by other Volunteer corps, the nucleus will be formed of a permanent force capable at a future time of indefinite expansion.

THE VOLUNTEER REVIEW.

The nation is still thrilling with the emotion excited by the spectacle in Hyde Park last week, which agitated through every fibre of the heart of the great metropolis. The pulse of England has been beating more fully and freely ever since—the flush of pride is on her cheek—and with joy and gratitude she acknowledges the devotion of her sons. To the remotest cottage has been carried the story which makes us feel something of that heroic ardour, and the consciousness of youthful strength, which constitute the vital power of empires. We know how the Queen saw on that ever-memorable day, with gleaming eye, the battalions of her freemen soldiers. We have sympathised in the exultation which the Sovereign must have felt in the manifestation of her people's love of country and attachment to the throne. The soil seems to have become more firm under our feet. The sky has cleared; or if dark clouds charged with lightning still gather on the horizon, we are assured that, with God's blessing, we have nothing to fear from the violence of the storm. In the midst of doubt and perplexity, in an ocean of trouble, whilst the pilots were watching the course of the ship in fear and trembling, whilst the durability of her materials and the resources of her crew were canvassed with diffidence, the vessel of the state has of itself offered us an element of perfect security, and satisfies us that she can right herself in any crisis. To the armed despotisms of Europe the army of 20,000 men may seem a small thing, a matter of very little boast. To us, however, it is full of comforting significance. It is in no spirit of vain boasting that we ask what would Austria have given for such a force on the heights of Solferino, and what would not Naples dare in cruelty and wrong if she could only rely on that army to stand before the bands of Garibaldi? The student of history can tell what twenty thousand Englishmen have done in fight in times gone by. We now have proof that the population of the island has not deteriorated in martial spirit, in physical vigour, or in love of country. A few months ago, and the old giant was thought to have grown faint from loss of blood in Crimean and Indian wars—to have parted with his armour and with his spirit—to have enervated his system by shopkeeping, and gold collecting, and luxury, so that robbers might come in and plunder him, if not with ease, with certainty. He awoke in time last week, and we saw how he will protect his own—that which his right hand has won, and which he holds for his children and for the race of freemen all over the world, if the day comes when his own shall be menaced. A few months have seen the Volunteers spring into life—not energetic, or simultaneous, and universal life, but into slowly spreading existence. Now the whole body is warmed with noble blood which shall be shed freely, if needs be. We may count the weeks in which the Volunteers have been raised, drilled, and equipped. One day sufficed to concentrate 20,000 of them in Hyde Park. There are one hundred and odd thousands more who could be brought to the neighbourhood of any armed visitors ere they had well lighted their cooking-kettles. In a few hours, with admirable regularity, they were assembled in a limited area, and in a shorter time than any military man believed possible they were marched out of it again in perfect order. These things have their influence abroad as well as at home. One lesson which they teach to Government, whilst it is soothing to their fears, if they have any, is by no means calculated to lessen their responsibility. England tells them, in fact, that she will take on her shoulders a full share of the home defence, but that she expects her power on the sea shall be maintained, and that her distant empires and dependencies, her honour and her dignity in every sea, and on every land, shall be defended and secured. If they fail—

> Si tamen impia
> Non tangenda rates transiliunt vada—

we have our Volunteers, but we must know how it has all happened.

As a spectacle the Review was admirable. The arrangements were complete. No one will acknowledge more readily than the Volunteers themselves the forethought, the solicitude, and the skill displayed by the military authorities in the preparations for their marching, arrival, reception, disposition, and departure; and they will willingly admit that professional skill and experience in a soldier's business were requisite to render the display possible. The march of every corps had to be nicely timed, the ground told off to a yard, the points placed, and colours fixed with accuracy; and if these things were done well, it must be admitted, also, that the Volunteers showed really military instincts and soldierly spirit in obeying their instructions.

The Duke of Cambridge deserves the highest credit for the genuine and hearty support he has ever given to the Volunteers, even in the hour of their birth, when the infant Hercules was an object of pure suspicion and ridicule to a section of the country; and His Royal Highness has on behalf of Her Majesty acknowledged the ability and entire devotion of Colonel M'Murdo, on whom devolved the cares of preparing for the great Review.

It will not be necessary for us to describe the scene in the Park, the aspect of the Metropolis, or the incidents connected with the arrival of the corps, or of Her Majesty.

It was strange enough, but as the threatening clouds swept over the grey masses who formed a solid wall to the green sward of the Park in front of the spectators, one who had seen it was reminded of the vast columns of the Russians who advanced in the last great charge to the Tchernaya. The Queen has arrived in a most stately and effective pageantry, with more than ordinary effectiveness of pomp. Surrounded by her generals and great officers of state, escorted by her Guards, she passes between the countless spectators on the one side, and on the other the apparently interminable line of battalions created by the spirit and devotion of her people. Well may she feel proud as she goes along; for though the eyes of other sovereigns may have rested upon armies infinitely greater, upon martial displays more vast and brilliant, assuredly it has never fallen to the lot of a monarch to be the centre of a scene of such solid grandeur, so entirely free from the canker which must tinge the despot's heart in the midst of his most glittering pageant, as that of Saturday, when the free and unpurchased devotion of a nation proferred itself—a disciplined army—to its Sovereign.

When the royal *cortége* had proceeded along the whole length of the line, it returned to the centre point of the spectators and the great event of the day—the march past—began.

The march of the 1st Division, which was the only corps to which cavalry Volunteers were attached, was watched with great anxiety. General Love might well be proud of the effect of his little force, which, in the march past, set all the spectators at rest as to the result of the day. The Duke of Manchester, leading his stout squadron of eighty mounted riflemen, marched at the head of the column. Though somewhat foreign, the uniform of the corps is becoming and picturesque; the men had good English horses under them, and rode them with a good Huntingdon seat as if they were accustomed to the saddle; and even though the troopers did not seem too well suited for service on foot with the rifle, the Duke must be congratulated on the success of his exertions, to which we wish a still larger development in creating mounted Volunteers. A small troop of the 1st Surrey Mounted Rifles, commanded by Captain Meller, followed, each Volunteer with his rifle slung over a not very sightly tunic, in the manner of the Chasseur d'Afrique, so as to protect the body and the neck from a sabre cut. Although the appearance of these troops of mounted men was very creditable, and the movement of man and horse wonderfully good, it is doubtful whether these small corps would be of any real use unless they were much more numerous. A mere handful of troopers could do very little good, except as intelligent orderlies and extra temporary aides-de-camp, as they would be too few for vidette duty, much less for skirmishing; though good riders, well mounted, might be valuable, if they are on the spot in front of an enemy when wanted. A division of a horse troop of the Honourable Artillery Company of London came next, with two guns, apparently six-pounders, the only artillery on the field, with the exception of the Armstrong battery, from which the salutes were fired. Lord Colville had every reason to be content with the impression produced by his civic soldiers on the fair ladies and on the strangers, who were not aware that in Finsbury is nurtured the martial spirit of the Trained Bands of London, and that there is a famous regiment in that borough, in uniform, and in all but average stature, so like the Guards as to afford reasonable excuse for the variety of opinions which were expressed on the platforms as to their identity, and to justify the exclamations of "Here come the Guards!" which broke from some of the spectators. The 1st Engineer Volunteers, closely resembling in their uniform the Sappers and Miners, with the exception of white stripes and silver lace instead of yellow and gold, succeeded, marching steadily and well. We are inclined to doubt the value of exceedingly limited special corps such as these, unless the members really acquire special knowledge of their duties. For instance, if each private Sapper learns a Sapper's duty, he would be very useful on occasion to do the work for which Sappers are intended, namely, to direct working parties in the ordinary business of throwing up fences, making approaches, repairing embrasures, cutting gabions, tracing, &c. If they are not thus qualified, they are merely ordinary Volunteers,—gallant gentlemen, good soldiers, but not very useful as Volunteers. The Volunteer Six-Foot Guards, showy as they look, well as they marched, and applauded as they deservedly were, are open to similar objections.

We can scarcely be certain of the corps which followed; grey-coated, gaitered, and well set-up stalwart men; but we can congratulate them on the perfect precision of their march, and the excellence of their line as they advanced towards the Queen. Each mounted officer in command, on approaching the Royal carriage, saluted his Sovereign by lowering the point of his sword; Generals and their immediate staff wheeling round after the march passed to the left, and taking post in the line of commanding-officers in the line nearly opposite the Royal carriage, close by the bands of the Guards, which had assembled opposite the Royal Standard, and played with great judgment and taste throughout the march, in which their efforts were very useful.

The Artillery Brigade showed in considerable strength. Kent may be proud of her 1st battalion of Artillery Volunteers and without invidious particularity, the Royal Arsenal and the Dockyard companies were deserving of high praise for their soldierly bearing. The 2nd battalion, consisting of four different companies, was composed of corps from Bristol, Brighton, and distant Durham; the Marchioness of Londonderry having, with her usual masculine activity, got up a fine corps of her own tenantry, whom she entertained most liberally and thoughtfully on their arrival. A name, which on that day could not be heard without emotion, ran along the line as soon as the head of the first Brigade approached; the Duke of Wellington, with his father's sword in his hand—an old-fashioned curved sabre—led the advance of an extremely efficient and serviceable-looking brigade. His Grace, in times gone by, was known as a smart officer of the Rifle Brigade; and the brigade-major of his warlike following, Major Hume, is one who saw service in the Crimea, and who accompanied Sir John Campbell on the staff of the 3rd Division in the tremendous assault on the 18th of June, in which his chief was killed, and our troops repulsed from the Redan with terrible slaughter. The Iron Duke himself could not have despised the strong and vigorous battalions who followed his son, company by company. They marched past to the music of the united bands of the Guards' brigade, keeping their time and distance wonderfully, and sometimes admirably.

The fronts of the companies in most of the brigades seemed to vary from 20 to 30 file; sometimes the line of nursing sergeants in the rear had a little judicious shoving and poking to administer to the centre of the rear rank, which is always the weak point when marching in close review order. A change in the music of the march, want of ear or of length of leg in the captain on the right, now and then produced very visible results on the regularity of the march; but on the whole the stream, which for more than an hour and a half went past the Queen, moved like successive waves with unbroken regularity, in relative distance, in equal motion, and in precision of line. Our eyes are so much accustomed in this country to the machine-ruling which we have borrowed from the Prussians, and from the old rectilinear formations of the latter part of the last century, that we can scarcely understand how exceedingly wonderful was the result produced by assiduous drilling.

A French general might, perhaps, have objected to the slowness of the review step, but he could not fail to be satisfied with the regularity of movement and of line, scarcely to be found in a French regiment. This remark applies generally to all the corps on the field.

The general object of Colonel Macmurdo, whom our great contemporary in present anticipation calls General, next to regularity of arrival and departure, seems to have been to break the Brigade into equal battalions. In the case of the Duke of Wellington's, there was a splendid force of four battalions, numbering altogether 2700 men, of which the second, under Lord Radstock, seemed exceedingly efficient, although it would be scarcely fair to pass by without a word of praise some of the battalions of the 3rd and 4th Divisions, or the 1st Middlesex. In the 2nd Brigade, led by Lieut.-Colonel Hicks, which consisted also of four battalions 2500 strong, the 1st battalion of the City of London, and the 2nd battalion under Captain Rose, showed exceedingly well. The Custom House battalion, and the men of Essex, are equally deserving of notice; but the 3rd Brigade, commanded by Lord Ranelagh, was still more interesting. The 2nd Middlesex formed one battalion, 789 strong (we give the official numbers). In the 2nd battalion, under Lord Bury, were assembled the Civil Service men of Somerset House, terrible for facts and figures, full of learning and statistical information, in whose ranks moved men famous for social knowledge and varied experience of public life; and the 38th Middlesex, comprising the *élite* of the brush, which seems by the bye to be associated in its successfulness with a large share of physical power, to judge by the bearing and stature of the gallant painters. The 3rd battalion, under Lord Grosvenor, 938 strong, seemed well worthy of the name of the "Queen's," and in its marching and bearing showed that no ordinary pains had been taken by officers and men in their drill. Although the 4th battalion, "The Devil's Own," did not muster much above 480 men, the appearance and marching of the strong well set-up children of the forum was a most complete demonstration of the healthiness of legal pursuits, and of the adaptability of gentlemen of the legal profession to defend the laws of their country, in whatever form they may be menaced. They were led by the son of a distinguished Irish lawyer, who has served in the appropriate Rifle Brigade. The common law and equity bar presented a military aspect not inferior to that of any corps in the Park.

A fearful thought suggested itself to a legal member of the House as it passed before him, which, although somewhat an exaggeration, was still not monstrous to imagine;—said he to a friend, in a frenzy of emotion, "Imagine the frightful effects of a discharge of grape into that column. What learning and what knowledge might be destroyed at a volley; they would charge the devil, if necessary, but the whole Chancery bar might be swept away with a couple of rounds from a 68-pounder." One missed, however, many faces well known in Westminster Hall. The successful barrister is apt to become fat or apathetic. Mr. Edwin James is much fitter to fight the battle of the publicans in the House than to do a day's light skirmishing or quick marching in the field. The 4th Brigade was led by Lord Elcho, to whose strenuous and unflagging perseverance, the Volunteer movement in the Metropolis owes a great deal of its éclât; 420 gallant Scots, constituting the 15th Middlesex, for once forgetting the wrongs of their particular lion, and the exclusiveness of their nationality, marched shoulder to shoulder,—stout, stern, and strong,—the first company in grey kilts and plaids, led by their captain, Mackenzie, who, having proved himself one of the best rifle shots in England, has shown himself an earnest Highland soldier. For ourselves we must say that, respecting very sincerely all national prejudices, we cannot conceive a more uncomfortable attire for a rifleman than kilt, and scarf, and plaid. Bushes, and brakes, and thorns must sadly lacerate and perplex him, and his limbs are open to all the malign influences of the insect world, and to all the inclemencies of heat and cold; but "he that will to Cupar maun to Cupar;" and we doubt not the gallant Gaels would fight as well in their hodden grey petticoats and naked legs as if they were clothed in proof of Milan. The 2nd battalion was formed of the 1st Surrey, a fine body, 414 strong. Surrey and the metropolitan districts furnished 1040 men, exceeding in stature and appearance the average of Line regiments in the 3rd and 4th battalions.

The 2nd Division, consisting of four Brigades, was under the command of Lord Rokeby, a kindly old Guardsman, who saw service in the Crimea during the campaign of 1855. At the head of his brigade, Major Shervington, who led the remnants of the 46th out of the terrible field of Inkerman, and who served in the trenches throughout the siege of Sebastopol, acted as

Digitized by Google

brigadier to Colonel Thorold, commanding the 1st Brigade; the four battalions of which were principally composed of companies and corps from the county of Kent, which displayed in this movement a zeal worthy of its warlike reputation; though Essex furnished three fine corps to the 1st battalion. The outlying metropolitan districts presented a fair show under Lieut.-Colonel Croyndon, and Woolwich again gave a proof that, if it absorbed a good deal of the country's money, it was ready to fight for what it got, in the shape of large and soldierly contingents to the 3rd and 4th battalions. The 2nd Brigade, under the Marquis of Donegal, composed of four battalions of diverse elements, worked so well together as to satisfy the most incredulous of the cohesion which can be produced in an intelligent body like the Volunteers under very ordinary pressure. Gloucestershire furnished the 1st battalion, 836 strong. Warwickshire contributed the 2nd battalion, 759 strong. Major Lindsay, who got the V. C. and something more for defending the colours of the Scots Fusiliers at Alma, headed the 3rd battalion of the gallant Berkshire, of the 2nd Oxford, and 1st Dorset, 543 strong. In the 4th battalion the Irish, led by a loyal Fitzgerald, marched in company with the men of Northampton and of Bucks, 443 strong. It may be observed that in many of the metropolitan companies and battalions, the Irish, less cohesive than the Scotch, form a considerable portion of the members. The efforts of these gallant Volunteers to secure a separate national identity for themselves were heartily approved of by the spectators; and as with waving plumes the companies stepped lightly on to the spirited step of "Garyowen," to which they have so often listened in the old land, when thinking of the gallant deeds of their fathers fighting for the British Crown, they were loudly cheered on all sides. Brigadier-General Russell, fresh from Indian fields, brought upon the sward of Hyde Park a splendid brigade, of which Lancashire and Nottingham divided the glory. The peace party of Manchester were represented by 1837 as stout Volunteers as ever carried arms; and when the Robin Hoods appeared in sight in eight strong companies, it was felt by all how strong are the old associations and traditions which knit men's hearts together in England. Sherwood Forest has long since disappeared; Robin Hood is a semi-mythical abstract, but the band that pulled the archer's bow in the name of freedom has its representative now in the vigorous grasp which wields the rifle. The 4th Brigade, under Brigadier-General Taylor, was composed of various companies from Surrey and Kent, Sussex and Derby, Stafford and Worcester, the West Riding and Cheshire. And at the last moment changes in formation, too minute to be exactly chronicled, though not to be plainly observed, were introduced into the composition of the various corps. Being composed of so many unconnected companies, the three battalions of which this brigade was constituted, were commanded by officers of the regular army. Thus, Lord Alexander Russell, the colonel of one of the most splendid and historic battalions in the British Line—the 1st of the Rifle Brigade—headed the second battalion; Colonel Allen, 25th Regiment, who set the example of coolness and courage at the blowing up of the Eastern Monarch troopship, the first; while a smart ex-Adjutant of the Guards—Lieut.-Colonel Fremantle, of the Coldstreams—commanded the battalion which brought up the rear of this grand and substantial procession. Nor were there absent from the cavalcade other figures reminding one of more terrible fields. Thus appeared upon the ground Major William Barnard of the Guards, who served in the Crimea, and who accompanied his lamented father to India, and remained there until death seized upon him in the height of the terrible contest before Delhi. He seemed to be acting as major of brigade. Thus again, came before us another Crimean in the same capacity, Captain Napier Sturt, who well upholding the chivalry of the young blood of England, was wounded severely in the most glorious of our battles on that ill-fated peninsula, returned to his duty as soon as he was able, and remained before Sebastopol till the war was over. As the various corps marched past it became a difficult question to determine which was the most becoming of the uniforms, though nothing could be more obvious than the unsightliness of certain forms of tunics. Nothing can be more incongruous than the French cavalry caps, with a heavy horse-hair plume, and a rifleman's dress; long tunics reaching far down the thigh give men the air of railway guards or rural police, and are not by any means so becoming or soldier-like as the long frocks of the Russian or French infantry. Red, as a general rule, does not harmonise with grey, or full colour, on cuffs or collar, nor are bands to caps or tufts as smart as short plumes, still less are horse-hair crests becoming. Bluish greys are cold and unimpressive, dwarfing as it were the size and proportions of the figure, whilst warm and drab greys strike gently on the eye, when near, and when distant, melt away in cloud-like vacuity. Brass ornaments and gold lace are exceedingly offensive on dark green, which has indeed the disadvantage of rendering it incumbent on any corps which assumes it, to assimilate very closely to the uniform of the Rifle Brigade, or of the 60th, if they desire to look becoming. Dark green again becomes black at any considerable distance, and can only be saved from high relief by juxtaposition with the darkest forest, or with the deepest evergreen foliage. The lighter greys show well with black facings, dark grey harmonises well with emerald green; and, as a general rule, caps look better than the compromise between English shako and French kepis, which has been adopted by so many corps; and, from the few specimens on the ground, an impression has been created in our minds in favour of the gaiter, which looks useful and workmanlike.

In our last impression we gave so complete a programme of the arrangements that it would be mere repetition to dwell upon them here. However, the problem of getting 20,000 men into Hyde Park and out again was triumphantly solved by Colonel M'Murdo. His programme was a model, and its fulfilment absolute perfection. Within ten minutes of each other the reports from the railway stations came in that all was right at London Bridge, Paddington, Euston, and King's Cross. Perhaps even more admirable were the arrangements for leaving the Park. Many experienced Line officers predicted that midnight would witness the still departing Volunteers. The fact was that the Bristol corps were being railed out of Paddington station on their homeward journey at a very few minutes after 6, and of the 20,890 Volunteers not one was in the Park at 7·30.

We must say a special word of public praise is due to these corps who came with an utter abnegation of personal comfort from great distances. The 1800 from Manchester were 27 hours under arms; while from the time Lady Londonderry's gallant contingent left Seaham to that of their return, more than 36 hours must have elapsed. As far as possible, their noble mistress tempered the hard journey by good and substantial cheer and thoughtful attentions worthy of a true soldier's wife.

A sum of the actual strength of each battalion upon the ground will no doubt be of more than present interest, and we subjoin the official "state," as corrected. In the hurry of preparing the returns the numbers were mis-stated, and thus some of our daily contemporaries were led into a computation that those reviewed were a little above 18,000, when they were in reality within a fraction of 21,000.

THE VOLUNTEER REVIEW FROM THE POINT OF VIEW OF ONE OF THE VOLUNTEERS REVIEWED.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Of a review, there are aspects *ab extra* and *ab intra*, the one from the house, and the one from the stage. I offer you an attempt at rendering the latter.

Let a previous word be said of the exertions of some of the corps who came from the more distant counties. To place those in line at 4 o'clock had been an affair of twelve hours on the average, of previous hard work, and of many days of arranging and providing. In respect of these distant Volunteers, as in respect of everything else connected with the review, the War Office did its work admirably. Some of the Railway companies did not so do theirs, but Saturday last will have been a lesson to them as to others. A great point was to ensure the breakfasting of the country Volunteers. Through bad time kept by a Railway company, and the needless fidget of somebody, a Manchester regiment was marched into a room in sight of a comfortable breakfast, only to be marched off to the Park without tasting it, and the consequence was that the men fainted by dozens. There was the greatest difficulty in finding accommodation near the various stations, and in the case of my own corps we had to march to a tavern in an obscure district a mile off. There was but just time: the trains were two precious hours too late.

At last off to the Park. One very gratifying thing to notice, was the civility and good feeling of the Londoners. No omnibus cad or cabby "chaffed" us; no roughs yelled "Who shot the dog?" All were civil, and seemingly pleased. As we neared the Park, windows, balconies, house-tops, and carriages were crowded; and the streets and Park roads were packed. The wealth and power of the country seemed creaming up to the surface. Not to trench, however, on the province of yourself and others as outsiders, only let me quote Blücher's expression, when, riding through London, and regarding the place from the Blücher point of view; he stroked his moustache, and exclaimed, "Mein G—tt vat a town for to plunder!" It is therefore very well worth while to prevent the plundering.

The enclosure of the Park entered from the north side, an extraordinary scene presented itself, which, in its picturesque apparent confusion, to result shortly in a condition of the most complete order, was an aspect of the day well worth seeing, and which no one but those who were in it could see. Bodies of Volunteers of all colours and equipments were moving in all directions over ground of varying surface, like ants swarming over their molehill, marching, counter-marching, wheeling, and left and right turning. At one time a strong dark battalion came sweeping down a hill upon our fours, as if they meant to annihilate us, when "left half turn" carried them off, just missing the tail of us. Brigadiers, staff-officers, and commanders of battalions, were riding about, bands playing, and the life and excitement all around was indescribable.

Not many minutes passed before we had piled arms on the extreme left of the line. Then ensued a time of dusting and polishing, refreshing, smoking, sitting down, and talking in groups. It was a most wonderful spectacle,—the groups, the colour, the trees, the grass. And it did NOT rain!

Before 4 o'clock the long line of contiguous battalions was at "attention," and the officers in front, ready for the salute. The Queen came and passed,—a brilliant show,—and so much of the performance was over. Next, the whole line of battalions had to take ground to the right; and here came to Volunteers one practical illustration of the use and meaning of all the drilling and grind-work they had been going through for months, viz., to enable them to move in order. And move they did, orderly and well. We were commanded by a Guardsman, who won the confidence and liking of the battalion directly, by that charm of manner which is a happy peculiarity of all Guardsmen. "3rd battalion, attention! fours right! quick march!" and we were moved on for a short distance. Then, "halt! stand at ease!" Again, "attention! quick march!" and so went on, moving and stopping, and gradually gaining to the right. Presently, the corps and battalions, which had been on the right, had moved up on their side of the square, wheeled on to the marching-past side, and were to be seen by us, far off in the distance, passing by the Queen. I am not sure but that this distant view of the spectacle was to the full as imposing as a near one. Battalion after battalion were seen sweeping by in serried ranks; and the knowledge of how many more of them were to pass before we should reach that distant ground—as many as it might perhaps take an hour and a-half to move on—gave a peculiar and impressive idea of the magnitude of the force present. Mine was the front company of the battalion, and each time that the "halt! stand at ease!" came, we had an excellent view of the marching past on the opposite side of the square. We saw the second wheels going on at the double; and the head of the reviewed force, the Duke of Manchaster's Mounted Rifles, presently caught us up and followed on our left, halting as we halted. They were magnificent men and horses, superbly dressed and equipped. At length we had edged on by our "attention! quick march! halt!" process to the corner of the square. Here, it was "Front, turn! by the right, quick march!" Another corner, and a wheel; and now we were moving on, to do it well or ill, in front of that great stage. I don't think any of us feared we should do it ill. There were a few minutes of anxious watching for accurate stepping and dressing, and the thing was done. Some 100 yards past the Queen an ingenious trap had been contrived by the Board of Works for throwing the battalions into disorder. A wet hollow place in the ground had been left, and where for ought I know the surface had been cut up by cart wheels and workmen, and it had now become a perfect quagmire. "Don't pick your way,—go through it:" and so they did, but it was hard to keep your legs, and the trap was very nearly successful. Now for the second wheel! Look, O Company, at that Guardsman by the flag, and keep him to your left,—and steady,—steady,—trot and dance round evenly,—he is looking down your front rank to see how you will do it. All right. "Forward;" Still at the double. "Quick!" A third wheel, complete, brought us up where we had taken ground at first, our left front rank man standing exactly touching the tree he had stood by when the Queen passed by. A short pause, and then, the advance in line,—halt,—and general salute. I hear it was well done.

A faint murmur of hurrahs is heard far off. It rises in power as it sweeps down the line of battalions, the voices of enthusiastic thousands.

The review was over. "Officers to the front!" A semi-circle was formed in front of the Brigadier. "Gentlemen!—I am desired by the Commander-in-Chief to convey to you from the Queen, that Her Majesty has experienced the greatest possible satisfaction from what she has seen this day. The manner in which the Volunteers have marched past has astonished every soldier on the ground."

But a few minutes of piled arms were allowed before we were marched off. The man next me turned his head and exclaimed, "Look there!" I looked over my shoulder and a sight it was indeed; a broad slope covered with the broken-up line of battalions of moving men swarming down it, in patches of colour like gigantic flower beds, and glittering with innumerable points of bright light. It was a glimpse of but a single instant, but was another of the many wonderful, soul-stirring aspects of that great day for old England—Saturday, the 23rd of June, 1860.—I am, &c., PARS FUI.

FOLKESTONE.—A presentation of instruments to the band of the Folkestone Artillery Volunteers takes place to-day on the Pavilion Hotel lawn. The instruments have been purchased, and the presentation will be made at 6 p.m. by a committee of ladies who have originated a subscription for the purpose of providing the Volunteer band with the brass instruments required; the daughter of Captain Kennicott, R.N., has been very energetic in promoting this laudable object.

HON. ARTILLERY COMPANY.—We have received a letter from an old member of the Hon. Artillery Company, in which he denies that the heat and weight of the bearskin compelled several of the men to fall out of the ranks prior to the inspection of the corps by the Prince Consort last week. Our correspondent praises the bearskin as more comfortable, and cooler than any of the four head-dresses successively worn during his membership.

The Peninsular and Oriental steamer Malabar has been wrecked in Galle harbour, and the details of the occurrence have been most graphically described in a very long and very interesting letter from the special correspondent of the *Times*. Lord Elgin and Baron Gros were on board, and both ambassadors lost their credentials. A large quantity of specie was sunk, but it was expected to be saved by divers.

OUR MILITIA SYSTEM.

In introducing a bill for the amendment of the Militia Laws on Tuesday evening, Mr. Sidney Herbert made an important and interesting speech upon our present militia system, which we subjoin in substance.

Mr. Herbert began by dwelling upon the unsatisfactory condition of the force at present as regards numbers and its disproportion to the adult strength of the country. He found that the number of adults between the ages of 18 and 45 in 1800, was 1,900,000; in 1815, 2,329,000; in 1851, 4,167,000; and it was computed by the Registrar-General that the number at the next census would be 4,622,000. The constant changes which were going on with regard to the embodiment and disembodiment of the militia was the cause which injuriously affected their substantial and permanent form. He read to the House a statement of the successive embodiments and disembodiments which had taken place since 1854. In 1854, 18 regiments were embodied in May, June, and July; 119 regiments were subsequently embodied in December. In the January, February, and March of 1855, a large portion of 119 regiments were embodied. In May, June, and July, 1856, 113 regiments were disembodied. In August and September of the same year 30 regiments were embodied, and in September, 1857, 25 were again embodied. In 1858 and 1859 several regiments were embodied and disembodied, and in the present year several had been embodied. He was ready to admit that the embodiment of these regiments did great service to the state, and he cast no blame on any one who embodied them. Indeed, if any one was to blame more than another it was the man who set the example of embodiment and that person was himself, for in 1858 a great embodiment had taken place for the purpose of providing men for the war in the Crimea. It was notorious that many men who entered the militia imbibed a taste for the profession of arms, which afterwards induced them to join the line. It was, therefore, a matter of policy during the Crimean war, and also during the Indian mutiny, to embody the militia, with a view to tempting them to join the line subsequently. But this was done at the expense of the permanent success of the militia. He did not know whether it was wise to say that he hoped they had seen the last of those distant wars, which induced them to embody the militia in the expectation of getting thereby a more rapid augmentation of the line, but at present it appeared that every effort should be made not only to strengthen the line, but to take care that it should not be strengthened at the expense of the militia, which must be regarded as a great element in the defence of the country. One effect of the constant embodiment and disembodiment of the militia was to drive away the county gentlemen. A friend of his who had great experience in the militia wrote to him in these terms—"If you do not retain the services of the county gentlemen, you will have instead of them a mixture of half-pay officers, used-up Indians, and adventurers." That was strong language, but there was truth in it. A great many of these county gentlemen were in a position to choose their own profession, and if they desired to enter the Army they would have done so; and if they were to enter the militia without the prospect of rank or position, it would tend to sever their connexion with that body when embodied. He gave all credit to those who stood to their regiments under embodiment, who served in garrison, and even in colonial garrisons. But if the county gentlemen had an assurance that they would not be called upon to serve at a distance from their own homes, that they should not have to spend their time at Aldershot or Portsmouth, they would look upon the militia with different eyes. And that was still more true with regard to the men. Then, again, he must say, that the system by which these regiments necessarily were deprived of their best men by volunteering into the line greatly diminished their efficiency. Men were cajoled and harassed, and attacked by every means to induce them to enter the line, and to such an extent was this system carried on that the regiments were demoralised, their discipline was shaken, and they became a kind of Pandemonium for a certain time. The labouring class must in future distinctly understand that the militia was to be a reserve force, and that they were not to serve except in case of war. A great cry had been raised of late for a local militia, but the difference between a local militia and a general militia he could not well understand. He believed that nothing would be more unwise than to introduce a local militia instead of a general one, and it was only in consequence of the interference of the Legislature that the militia was diverted from its original object. The only thing which the militia wanted was to be left alone, and it was only from the pressure of emergencies that their original constitution, which was a sound and wise one, was interfered with. He would now state the changes which had been made in the administration of the militia force within the last few months. In the first place the restriction by which the militia were not liable to serve in Ireland—a restriction which was made when service in Ireland was not so good as it was now—was removed. They were empowered to serve in the Channel Islands, and power was given to unite the militia of two counties where the force in a single county was too small. That practice had been followed in Scotland with great advantage, and it might also be adopted in the Welsh counties. Formerly the adjutants were paid according to the number of men enrolled. This had a most prejudicial effect, for it naturally induced them to enrol men of whose character and antecedents they had no knowledge, in order to swell the numerical strength of their corps. This had also been discontinued, and since the change had been made, and the urgent wishes of the Government had been expressed to the lords-lieutenant and commanding officers that none but men whose antecedents were known should be accepted, there had been a marked improvement in the character of the militia regiments generally. He had endeavoured to impress upon all militia authorities that the object was not to have a large force upon paper only, but that the question was how many men each regiment could produce, and therefore that it was better to refuse men than to take such as were doubtful, and to have a smaller number in training than a larger number of absentees. Well, the effect of this alteration was that the number of absentees in the regiments, of which they had returns this year, and which in the last year was 4707, was this year 2060, while the effectives in the same regiments, which in 1859 were 19,546, were in 1860 22,223. This would give upon the whole 54 regiments, 52,889 for the present year against 44,340 last year. Consequently there was a marked improvement in the numbers in training this year as compared with the previous one. But they must not expect that the whole improvement would be immediate, for there was no class so slow to receive the impression as the labouring class, from whom for the most part the recruits were drawn. It would take more time to convince them that there was no intention of taking them away from their own counties, to remove the fear that the regiments might not be suddenly embodied and sent to distant parts of the country, perhaps for two or three years, instead of being merely called out for one month in the year for training. The following addition had been made to the permanent staff of each regiment in consequence of the report of the commission. A quartermaster, additional sergeant, hospital sergeant, drum or bugle major, and two sergeants as instructors of musketry. At present the whole of the militia, disembodied as well as embodied, were armed with Enfield rifles; last year they were not. It had been suggested that as it was necessary to instruct the men in the use of the Enfield rifle, and adjutants should be the instructors; several of the adjutants had gone down to Hythe, and there acquired great proficiency in the use of that arm. But it was thought that the adjutant's duties in disembodied militia regiments, where he acted as paymaster as well as adjutant, were far too onerous for him to undertake instructions in musketry in addition. Accordingly, two sergeants had been sent down to qualify as instructors from every regiment, and there were now at Hythe under instruction 14 adjutants and 260 sergeants—the number remaining to be instructed being 40 sergeants only, therefore they were very near the whole number, and he was glad to be able to state from the authority of General Hay that they had profited by the instruction afforded to them. The Commission recommended that as a general rule the promotion of the officers should go by seniority; and that if the lord-lieutenant departed from that rule he should assign reasons for so doing. That rule he (Mr. S. Herbert) had adopted he confessed with some hesitation, and no doubt it had given some dissatisfaction. But it was difficult for the lord-lieutenant to say who ought in all cases to be promoted. There were many motives which should weigh with and influence those who selected officers. They wanted in the officers of a militia regiment good county connexion on the one hand, and on the other military knowledge and efficiency. If they could combine both there was no doubt or difficulty in the matter; but they had very often a man of great county influence, who would attract recruits to the ranks, and who on that account it would be most desirable to appoint, but who as an officer would be inefficient because of his want of military knowledge. Again, they might have a man with great efficiency and military knowledge, but who would have no influence in strengthening the numbers of the regiment. In such cases he had always felt that every consideration should be given to the lord-lieutenant in making the selections; but he (Mr. S. Herbert) had always insisted, when the lord-lieutenant made his selection, that he should state the reasons which influenced him, and when he had done so he felt it his duty to support him. Then it was recommended that officers, previous to promotion, should pass some kind of examination. That was a good principle no doubt, and if always insisted upon would induce officers to learn their drill, and fit themselves for their duties; but the application of it was not easy. Well, officers on the permanent staff—adjutants, and so on—had also been allowed to send their sons to Sandhurst, receiving in this way all the advantages which attached to officers of their rank. Therefore, he (Mr. Herbert) thought it better to give every man who enrolled at the end of the five years 10*s.* in addition to the bounty; and he was given to understand that this arrangement was working well. Besides this, they gave to every man who re-enrolled a free kit, or if their old kit was tolerably perfect they were allowed to have the value of the new one in money. Their school fees were abolished and schoolmasters were allowed free. All these changes tended to the advantage of the men, and to the improvement of their position. There were certain things proposed to be done by this bill. First, they desired to have the power of uniting in maritime counties portions of the counties for the purpose of forming artillery corps, as was done now in the North Riding of Yorkshire, so that if they had not enough for two battalions, and too much for one, the surplus might be joined to the force of another county to make up an efficient artillery corps in that county. For that purpose no machinery was required beyond what they had for the amalgamation of the counties for militia objects generally. It had been proposed that the men should be trained immediately after enrolment. He doubted the policy of that proceeding. It would add much to the expense, and would not operate as a check on fraudulent enlistment. Power was taken in the bill to increase the Scotch and Irish militia, in the same proportion as they had power to increase the militia in England, in case of danger of invasion. In England the 80,000 might be brought up to 120,000. He proposed to take power to increase the Scotch militia from 5,000 to 10,000, and the Irish from 15,000 to 30,000; making the total force 120,000 in peace, and 180,000 in war. The commission had recommended that the permanent staff should be put permanently on embodied pay. Since that recommendation was made, the movement in favour of volunteers had greatly modified the necessity for keeping sergeants of militia. He only proposed one other change, and that would be effected by regulation, not by the bill. They obtained field officers and captains and lieutenants without difficulty; but there was the greatest difficulty in getting ensigns. The result was that they had gone rather below the proper class for ensigns. It would be easy enough to get them in time of war, if the regiments were embodied, however difficult it might be in the time of peace. If they got a parcel of raw lads as ensigns during the twenty-eight days' training, they were more trouble than they were worth. He proposed, in disembodied regiments, to allow the existing ensigns to remain, but not to fill up the vacancies. At present there were 66 deficient in the embodied, and 601 in the disembodied regiments. In lieu of them he proposed that there should be two extra lieutenants to carry the colours in each regiment.

Colonel Patten, Lord Enfield, Colonel Gilpin, and General Upton spoke in approbation of the bill, which was brought in and read a first time.

THE INDIAN ARMY QUESTION.

Upon the second reading of the Government measures for the fusion of the local European force in India with the Imperial Army, on Thursday night, a very interesting and protracted debate took place in the House of Commons. It was opened by—

Mr. Arthur Mills, who moved as an amendment that the bill be read a second time that day three months. The hon. gentleman objected to the proposed change on financial, sanitary, and political grounds, and urged that the real question at issue was whether they should annihilate and utterly abolish an ancient and valuable machinery which had been tried and not found wanting during the vicissitudes of a hundred years. It was, he thought, hopeless to attempt to govern India anywhere but in India, and it was an insult and a mockery for the Government to say they had consulted the Indian Council, when they had already made up their minds as to what they intended to do. For his own part he would rather see the Council abolished altogether than see it shorn of all the weight and influence which ought of right to attach to it.

Sir E. Colebrooke seconded the amendment and read a letter written by Lord Cornwallis in the year 1787, in favour of maintaining a local European army in India.

Mr. T. G. Baring defended the bill from the censures which had been cast upon it by the mover and seconder of the amendment, and contended that the principle of the measure was correct, namely, that the British troops in India should be governed and organised on British principles, and the native troops on native principles. The military arguments were altogether in favour of the scheme; the political arguments against it had not been supported, and no one had ventured to assert that it would interfere with the rights of the army of Bengal, With regard to the letter referred to by Sir E. Colebrooke, it should be remembered that it had been written only five months after Lord Cornwallis arrived in India, and that subsequently (in 1794) the noble lord had himself prepared a plan for effecting an amalgamation of the Queen's, and the Company's armies in India.

Mr. Henry Baillie objected to the House being called upon to decide upon a measure of the details of which they were ignorant. He hoped, therefore, that the House would reject the bill, but avoid commiting themselves to the question of amalgamation until the whole scheme of the Government was before them.

After a few words from Sir H. Verney in opposition to the bill,

Sir J. Elphinstone having offered some suggestions for the moral improvement of the local European force, expressed his opinion that it would be far better to devise some means to carry out the plan of the late Government than to rush into a reckless change, the result of which it would be impossible to foretell. He condemned the manner in which the Indian Council had been treated in reference to the matter, and said that the passing of a bill like the present would be the severest blow that could be struck against that body.

Mr. Kinnaird supported the amendment.

Mr. Vansittart thought the present was an opportune moment for accomplishing the fusion of the Queen's and the local European forces.

Sir W. Russell spoke from personal experience derived from service in India of the gallantry of the local European troops in the field; but at the same time expressed his opinion that the tendency of the system under which they were governed was gradually to render them less obedient and amenable to discipline. He supported the bill.

Sir Minto Farquhar and Colonel Percy Herbert having spoken, the former against and the latter in support of the bill,

Mr. Buxton commented upon the arguments used by the Secretary of State in moving for leave to bring in the bill, and expressed his apprehension that the proposal would not only entail vast additional expense upon the country, but tend to lessen our hold upon our Indian empire. He could not but regard the scheme for amalgamating the two armies as dangerous in the last degree to the future of British India.

Mr. Horsman observed that two questions naturally suggested themselves for consideration: first, whether the House had been fairly treated by not having all the papers and information necessary for coming to a correct judgment laid before them; and, secondly, whether the House was prepared to adopt so novel and so unprecedented a mode of carrying out so great a change, involving so many questions both of principle and detail, not by a well-considered legislative measure, but by an abstract resolution, which was to be the beginning and end of all legislation on the subject. The right hon. gentleman censured, in severe language, the conduct and policy of the Secretary of State for India in reference to the insubordination of the troops of the late Company, and charged him with sacrificing the position of the Governor General, snubbing the Council, suppressing important information, and endeavouring to entrap the House under the pretext of affirming a resolution to revolutionise the entire Government of India. He called upon the Secretary of State to produce the despatches of Lord Clyde and Sir William Mansfield, and he pledged himself to prove that Sir Charles Wood had abused the confidence of the House by presenting despatches which he represented as perfect, but from which important passages had been deliberately eliminated. There were many important constitutional questions involved in the bill before the House. The principal of these had reference to finance, while others of almost equal importance, social and political, remained to be discussed. He held that the House was not in a position to decide as to whether it was advisable to amalgamate the Queen's and the European local forces in India, or to maintain the existing system. Lord Metcalfe had declared that India would not be worth ten years' purchase if it were to be governed by a Parliamentary majority, and he (Mr. Horsman) warned the House

Digitized by Google

that if it were to pass this bill it would be taking the first fatal step towards the accomplishment of that prediction.

Mr. S. Herbert said that Mr. Horsman had confined himself to a condemnation of the excessive transgressions of the Government. As to the suppression and delay of documents, the papers in question had been presented in March; and it was not the fault of the Government if they had not been printed. There was not a single part of this change which could not have been effected by regulation, and without coming to that House at all; but it was thought only proper to do so. As to the bill for increasing the local army last year, that was brought in as a precautionary measure, because it was believed the number of the men in that force was in excess of the number sanctioned by statute. If the Government had produced a detailed plan before asking the assent of the House to the main principle involved, no doubt complaints would have been made of such a precipitate and unconstitutional course. There was not a question of expense with regard to the army which the government in India had not in its own hands, and the authorities at home had no power whatever to get a sixpence spent on the British soldier in India; and not a jot of additional power was given by this bill. There was no intention and no power taken to render the Commander-in-Chief in India independent of the Governor-General. He had never had a more difficult question to deal with, and having a bias in favour of a local army, he had come slowly and reluctantly to a contrary opinion; but which he had arrived at on a consideration of the weight of authority, especially as applied to the important circumstance of the mutiny of the local force, the extent of which had been underrated, for the mutineers had entered into communication with the Sikhs for the purpose of an attempt to drive the Queen's army out of India. In the course of his speech Mr. Herbert dwelt especially upon the likelihood of getting a sufficient supply of officers for Indian administration from the Queen's troops under the new system, upon acclimatisation, and upon the purchase system as affecting the new arrangements contemplated. Sir Charles Trevelyan had expressed the opinion that many able officers from the regiments of the line, if an Indian career were opened to them, would crowd into the regiments of India, and would qualify themselves for the service by the study of the native languages. It had been said there was a great advantage in a local army, because they became acclimatised to the country. The meaning of this was, that the army in India suffered at first, but by continuing to live there they became habituated to the climate, and they turned out strong and healthy men. The ensigns came out at eighteen years of age, and the rate of mortality amongst them was 23 per 1000. Amonst lieutenants, who were on an average some three years older, the average mortality was 27 per 1000; amongst the captains who averaged twelve years older, the mortality was 34 per 1000, and so it went on. Thus the increase of mortality was less in ages where carelessness and youthful indiscretion was likely to prevail; those evils might be cured, but it was found that the physical deterioration arising from long and constant exposure to climate could never be compensated. He had in his hands the rates of mortality of soldiers in all parts of the world. In Jamaica, amongst soldiers whose ages ranged from 18 to 25, there was the fearful rate of mortality of 70 per 1000. It might be supposed that acclimatisation would reduce this average. On the contrary, at ages from 25 to 33 the same rate was maintained of 70 in 1000. In the Bombay presidency the rate of mortality amongst the youngest men was 18 per 1000 during the first seven years; during the next series it increased to 34. At Madras, the rate during the first series of years was 21, then it was 59, then 79. At Bengal, it was at first 23 per 1000, then 50, then 50 again, and then 80. What did the argument, therefore, amount to? Why, to this—that a certain sort of food was unsuited for the human stomach, therefore go on eating it. With regard to the staff corps, that was a most important part of the proposed system, and there would be the strongest inducements for young officers to qualify themselves for admission to that corps by which they would obtain promotion, with localised service. It had been said that great evils would arise from the fact that at any moment India might be denuded of troops by their being withdrawn for home service. Now he could not see how that inconvenience would be more likely to arise than under the present system, by which the minimum of European troops in the service of the Indian government was fixed at 15,000, since nobody could maintain that such a force was enough to garrison India. This apprehension was founded on a belief that, at the time of the Crimean war, our own troops were withdrawn from India to such an extent as tempted the natives to break out in mutiny. But the fact was that in 1857 the number of European troops amounted to 45,522, and the difference between that and the number in 1854 was only about 1600 men, which would have been completely made up by the drafts going out at that time; and besides that, some of the troops had been sent to Persia. The troops on their way to China were also diverted from that expedition, and went to reinforce the garrison in India, so that it could not be said that India, at that period of her utmost need, was deserted or neglected by England; but there were a vast number of additional battalions expressly devoted to the Indian service. Now, some honourable gentleman had asserted that the Queen's officers would not take the pains and trouble to learn the languages of India in order to obtain local employment. He would therefore just mention the number who had actually qualified themselves for such posts. There were on the staff 92 Queen's officers belonging to the regular infantry or cavalry, and 41 commanding irregular levies or police, besides 4 employed in the public works, and 8 in other civil employments, total, 145 officers of the Queen's army; and so it was pretty clear that there was no indisposition amongst them to compete and qualify themselves for that sort of appointment. Yet they had been discouraged from doing so by the existing system, which gave a monopoly of such appointments to the small local army of India, so that it was not until after the ablest men, and even those who were less able, of that army had all been taken, that the ablest and most energetic of the Queen's officers could have a chance. How, therefore, could it be expected that the Queen's officers would make very great efforts to obtain posts which they knew could hardly be given to them, but which were given to many less able than themselves? The right hon. gentleman the member for Stroud had said that the Horse Guards were going to take all the patronage; but what was the fact? No change was going to be made in the distribution of commands in India; that which existed now would exist then. There was no change going to be made in the purchase system. The right hon. gentleman had said that, although the House and the whole country were dead against purchase, the Government were going to introduce it into the Indian army. Now he could not say that the House of Commons was so very warmly against purchase, but he could assure his right hon. friend that he was mistaken on this point, although, strictly speaking, purchase did exist in the Indian army to a certain extent, and to that extent the regiments would carry their own habits, regulations, and rights into the Queen's army. The existing rights of the Indian officers were guaranteed by act of parliament, and must be continued on the their present footing until they had died out. In the Indian army, as it stood, every man, poor or rich, was compelled to purchase, or to join the others in purchasing; for, if he would not do it, promotion was stopped in his regiment, and although the required sum might be made up by the rest without him, he would be placed in such a position that he might prefer to yield to the system. It could not, however, be intended, if faith were to be kept with Indian officers, to introduce anything like the system of purchase which prevailed in the Queen's Army. He (Mr. Sidney Herbert) would like to keep those regiments for ever without purchase, and he hoped it would be done. He did not wish to see the system of purchase introduced, and he thought it was important that it should not be introduced into those regiments. Was the Horse Guards about to grasp all this patronage in the line regiments? He should be the last person to attribute to the Indian Council and the Commander-in-Chief that their motives were influenced by such a wretched distribution of patronage. So far as the patronage question was concerned, he thought he might almost dismiss it from view. But he would not dismiss it, because he wished the House to know exactly what had been done. Before the committee upstairs an opinion had been expressed that the system of purchase for the first commission was a bad system, and that all officers should enter at a later age from some college. That was the opinion of the Commander-in-Chief, and he (Mr. S. Herbert) considered it a sound one. He had himself made the same proposal many years ago. But until that system was carried out, what would they do in the interval? Why should they make any change until they made that one? Contrasting the spirit of the Queen's with the local force, he mentioned an incident. The Queen's had been sent to China, and some error occurred about the pay; the men remonstrated, and the officers said it was wrong. The men had confidence in their officers, and the matter was rectified. But in the interim there was not a murmur. There was some dissatisfaction, but nothing like a disturbance. They had tried a local army on a small scale, and it had failed; and they now said, try it on a large one.

At the conclusion of Mr. Herbert's speech three divisions took place upon the adjournment of the debate, which were respectively defeated—the first by 262 votes to 83, the second by 229 votes to 51, and the third by 190 votes to 43. Ultimately, however, Lord Palmerston yielded, and the debate was adjourned to last evening.

CAPTAIN TYLER'S REPLY TO MR. FERGUSSON.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It is only in the present week that I have had an opportunity of seeing your impression of the 9th instant, and of reading in it the letter which Mr. Fergusson has addressed to you with reference to the paper on his system of fortification, that I read at the Royal United Service Institution on the evening of the 21st ult.

Mr. Fergusson says in that letter:—"Captain Tyler's lecture was wholly occupied with these now antiquated details, and my answer referred to what he said, and to that only. The discussion of these at the present day appears to me to be as useless as it is inopportune."

But in writing at an earlier date—on the 30th May—to the Secretary of the U. S. Institution, he speaks of my paper in very different terms; for, in requesting to have a further opportunity of replying to it before its publication, he argues thus:—"The proposition now is that I am to allow the few words I said on the spur of the moment, after listening for an hour and a-half to a rapidly delivered lecture, to stand as my answer to a paper containing the most novel objections, and the most startling assertions, nine-tenths of which I had never heard of before. I do not believe that the most practised parliamentary debater could do this successfully, and I certainly have no pretensions to such powers, and therefore decline to be judged by what I then attempted."

How a paper can be wholly occupied with antiquated details, and can at the same time contain the most novel objections, and the most startling assertions—nine-tenths of which a gentleman of Mr. Fergusson's experience in discussing questions of fortification has never heard of before—I am at a loss to understand; and he will, I think, find it difficult to explain. He will probably have to take refuge under another statement which he has made in a letter dated 8th June. "My recollection of his own elaborate paper is so imperfect, that the chances are a hundred to one that he would be able to accuse me with justice of having misunderstood his meaning, and of being mistaken as to his statements."

What I really attempted to do in that paper was to discuss carefully and deliberately the "main principles" of the system which he has advocated with so much zeal for the last ten years, and which he said last year had been "unrebutted;" and I can assure him that, far from having adopted "the strange system of exaggeration" that he accuses me of, I am ready to give chapter and verse from his own works for every statement I have made as to the principles which he has put forward.

When Mr. Fergusson "begs leave most emphatically to state that he does not retract one single iota of the principles on which his system is based;" and when he asserts that "he is more convinced than ever of their truth and correctness," and that "the invention of rifled ordnance has to his mind made this more apparent than before;"—I would ask him to give a little further explanation as to what those principles are to which he still adheres.

The main principles of his system were made up of the following combination: 1. Three, four, or more tiers of earthen ramparts, placed one above, and one behind another, for making the defence superior in artillery fire at all points to the attack. 2. The employment of enormous ditches, containing a great depth and breadth of water, if possible; or else with masonry revetments, 30 or more feet high, sunk 30 or 40 feet below the surface of the ground. 3. The adoption of circular or curvilinear instead of straight-lined forms. And these were to form at once an impregnable and an economical system of fortification.

The principal tenor of my paper was to show the fallacy of these principles, as applied to the past and the present, and to indicate that the changes which they involved were in a direction opposite to those which must be made with reference to artillery improvement and future construction. If Mr. Fergusson still adheres to these principles, there is no occasion for his repudiation of his model and his published works. If he does not adhere to them, he cannot correctly assert that he does not retract a single iota of the principles on which his system is based.

In his reply to my paper he said, or at least it was so taken down in shorthand at the time, and I believe with accuracy: "The whole system of gunnery has been revolutionised. If I was to propose a system now, it would not be that model, or the lines of Portsmouth; it would be entirely a new system—a new project altogether. I do not wish to put forward that model as what I propose now: quite the contrary. I should modify that to an extent that would make it quite a different thing. I believe the details of that are entirely wrong now, and I entirely repudiate them."

He made another statement to a similar effect, which I need not quote; and the only principle to which he referred as one that he adhered to was the separation of the offensive from the defensive part of a fortification—that is to say, the principle of employing certain portions of the works exclusively for defensive, and certain others exclusively for offensive purposes. But the application of this principle cannot be considered to be a distinctive feature of Mr. Fergusson's system at all, because it has been carried out in all its integrity in the numerous fortresses that have been constructed in Germany since the peace of 1815; and I may add that he will find it to be one which does not admit of too rigid an application to the works of the future. If this be the only principle to which he now adheres, I shall be happy to discuss it with him at length on a future occasion; or if, as is hardly probable, he still desires to combine any of those before alluded to with it, I shall have pleasure in renewing the discussion upon any combination to which they may lead.

Mr. Fergusson says, that what was good in 1850 must be bad in 1860, and he refers to the improvements that have taken place in artillery as a reason for now withdrawing the system which he originally proposed. I would therefore observe that my paper was not prepared on account of anything he stated in 1850; but, in reply to a lecture which he delivered only last year, in which he again brought up his system, —as he did also in a similar lecture at the Royal Artillery Institution at Woolwich,—partly in consequence of the same improvements. In fact, he gave at both of these lectures the same reason for again coming forward that he now gives for condemning his system; and he asked earnestly at both of them for criticism, which he said was "generally a cheap-enough article," but with which he now appears to be so little pleased. The question is not whether what was good in 1850, but rather, as far as his proposals are concerned, whether what was good in 1859 is bad in 1860.

With regard to the effect of rifled guns upon the science of fortification, I may add that there is no "new mode of attack" brought to light in consequence of these improvements, though I believe that material alterations ought in practice to be effected, in order to meet them. Elongated bolts and shells can be projected with greatly superior accuracy to greatly increased distances; but these long projectiles labour under two disadvantages. They leave the mouth of the piece from which they are discharged with a comparatively low initial velocity, and the long axis of each retains during the whole of its flight the angle of elevation to the horizon at which it is fired. These peculiarities diminish the powers of penetration which such missiles would otherwise possess, both at long and at short ranges. In the case of short ranges they are wanting in velocity; in that of long ranges they cannot be made to strike any object directly or head first, and this latter disadvantage increases with the angle of elevation at which they are discharged.

On the other hand, these missiles retain their velocity better than short or spherical projectiles at long ranges, and they can be made to strike particular portions of any object against which they may be directed at far greater distances, and with far greater certainty, on account of the accuracy, both in horizontal and in vertical direction, that may be obtained from them; and for these reasons they will, no doubt, on the whole, be more destructive to works of fortification as hitherto constructed, than any that have as yet been employed. At the same time, it must be remembered that they can produce, comparatively speaking, no material effect upon flat slopes of earth, as they cannot be made to penetrate into them when they are fired at low angles of elevation; and that ramparts and parapets, constructed of this material, and disposed in this manner, will be the best that can be opposed to them. Future masonry ought to be entirely concealed; future earth-works ought to be kept as low, and to be inclined at as small an angle to the horizon as is consistent with efficiency; and casemates ought to be more employed for men, guns, and stores

But I must not occupy more of your space at present. I will simply beg in conclusion to be allowed to refer those who are interested in these matters to a paper which I have prepared for the forthcoming volume of the "Professional Papers of the Royal Engineers;" and I will add that I should be glad to see the subject of it discussed in your columns at the present time, when it is of so much importance to us to come to just conclusions as to what principles and what details must now be adopted in the construction of works of fortification.—I am, &c. H. W. TYLER, Captain, R.E.

Obituary.

We regret to announce the death of Lieutenant-General Thomas Dyneley, C.B., of the Royal Artillery, who died on the 21st inst., in the 79th year of his age. The deceased general's services comprised the campaign of 1805, in Italy, under General Sir James Craig, and that in Calabria, in 1806, under General Sir John Stuart, including the battle of Maida and the siege of Scylla. He proceeded to the Peninsula in 1811, serving from July that year to September 1812, including the siege of Ciudad Rodrigo, where he was wounded in the head; the siege of the forts at Salamanca, at which he was wounded in the face; the heights of St. Christovel; the battle of Salamanca; defence of the bridge of Simancas; affairs at Morales de Toro and San Munos; battles of Vittoria and the Pyrenees. He was taken prisoner at Malanahenda, near Madrid, 11th August, 1812, when engaged with the rear-guard of Joseph Bonaparte's army. The gallant deceased, however, managed to make his escape from the enemy, and rejoined the army on the 23rd of the same month. He served during the campaign of 1815, and was present at the battle of Waterloo. He had received the silver war medal and five clasps for the Peninsula, and the medal for Waterloo. In 1838, in recognition of his professional services, he was nominated a Companion of the Order of the Bath, and in February, 1857, was appointed colonel-commandant of the 7th battalion of the Royal Artillery. The deceased general's commissions bore date as follows:—second lieutenant, 1st December, 1801; lieutenant, 1st July, 1803; captain, 28th May, 1808; major, 18th June, 1815; lieut.-colonel, 10th January, 1837; colonel, 23rd November, 1841; major-general, 20th June, 1854; and lieut.-general, 16th December, 1856.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ACHISON—June 23, at Cannock, the wife of Captain A. Achison, late 1st Regiment British Italian Legion, of a son.

BOLTON—June 23, at Worthing, the wife of Major William John Bolton, Royal Artillery, of a son.

BOYD—June 17, at 10, Lansdown Place, Cheltenham, the wife of Mossom Boyd, Esq, H.M.'s Bombay Army, of a daughter, stillborn.

BURNS—June 26, at Brompton, near Chatham, the wife of Dr. Burns, Surgeon, R.N., of a son.

CHETWYND-STAPYLTON—June 22, at 18, Devonshire Street, the wife of Henry Chetwynd-Stapylton, Esq., of a son.

DAY—June 21, at 86, Waterloo Road, Dublin, the wife of Captain Estcourt Day, 26th Cameronians, of a son.

HILL—June 18, at Habin Cottage, Rogate, Sussex, the wife of G. B. Hill, Esq, R.N., Surgeon of H.M.S. Tribune, of a son.

HILL—June 27, at Southampton, the wife of Commander H. W. Hill, R.N., of a son.

HOTHAM—June 25, at the British Consulate, Calais, the wife of Beaumont Hotham, Esq., H.B.M.'s Consul, of a daughter.

HOWARD—May 8, at Gondah, Oudh, the wife of Edward Howard, Esq., of H.M.'s 20th Regiment, of a son.

JACKSON—June 21, in Jersey, the wife of Commander G. Melville Jackson, R.N., of H.M.S. Geyser, of a daughter.

JONES—June 23, at Walworth, the wife of Captain C. P. Jones, of a son.

LITTLE—June 22, at Heavitree House, near Exeter, the wife of Colonel Little, C.B., 9th Lancers, of a son.

PARKE—June 22, at No. 3, Buckland Terrace, London Road, Maidstone, Kent, the wife of Captain Charles B. Parke, R.M.L.S., of a daughter.

SHAW—June 27, at Dovercourt, Essex, the wife of Commander Shaw, R.N., of a daughter.

TAYLOUR—June 21, at Headfort House, Lady John Taylour, of a son.

WHITE—June 24, at "The Grange," Raheny, near Dublin, the wife of Lieut.-Colonel Luke White, of a son.

MARRIAGES.

CAMPBELL—CARDEW—June 26, at St. Leonard's, Exeter, by the Rev. T. A. Southwood, M.A., brother-in-law of the bride, Archibold Edwardes Campbell, Esq., H.M.'s 31st Regiment B.L.I., eldest son of Major-General John Campbell, of Woodside, Plymouth, to Lucy, youngest daughter of the late Captain Henry Cardew, Royal Engineers, of Mount Radford, Exeter.

CHISHOLME—HOYLAND—June 12, at the chapel of the British Embassy, Constantinople, by the Rev. Charles George Curtis, M.A., Lieutenant Robert Scott Chisholme, R.N., second son of Robert Chisholme, Esq., of Chisholme, Roxburghshire, N.B., to Alice Elizabeth, second daughter of C. W. Hoyland, Esq., Surgeon-Superintendent of the British Seamen's Hospital, Constantinople.

DOMENICHETTI—HEYCOCK—June 27, at Pytchley, R. Domenichetti, Esq., M.D., Surgeon 75th Regiment, eldest son of W. L. Domenichetti, Esq., late 95th Regiment, of North Collingham, Notts, to Dorothy, daughter of the Rev. Charles Heycock, of Pytchley House, Northamptonshire.

FAWCETT—GILLIAT—June 21, at the parish church, Hove, by the Rev. E. B. Elliott, incumbent of St. Mark's, Kemp Town, Henry Fawcett, Esq., late Captain H.M.'s 3rd (or King's Own) Light Dragoons, of Broadfield, Yorkshire, to Mary, younger daughter of the late Alfred G. Gilliat, Esq., formerly of Mickleham Hall, Surrey, and of Lewes Crescent, Brighton.

GIBSON—HOME—June 21, at Listowel Church, county Kerry, Henry Gordon Gibson, Esq., Writer to the Signet, Edinburgh, to Elizabeth Murray Home, eldest daughter of Major J. M. Home, late of H.M.'s 36th Foot.

HAMILTON—ANSTRUTHER—June 25, at St. Peter's, Pimlico, by the Right Rev. Bishop of Bangor, Colonel Frederick William Hamilton, C.B., of the Grenadier Guards, sixth son of the late William Richard Hamilton, Esq., to Louisa, fourth daughter of the late Sir Alexander Anstruther, of Thirdpart, Fife.

HARDEN—HARRIES—June 26, at the parish church of St. Pancras, Middlesex, by the Rev. C. H. Andrews, Henry Harden, Esq., eldest son of the late H. Harden, Esq., of Wrington, Somerset, to Anna Maria, eldest daughter of the late Lieutenant Edward Thornborough Harries, R.N., of St. Mawes, Cornwall.

HAWKEY—NEWENHAM—June 23, at Taunton, Captain J. P. P. T. Hawkey, of the Queen's Bengal Army, to Marian, the only child of W. P. Newenham, Esq., Commander Royal Navy.

LLOYD—NICOLAS—June 6, at the British Consulate, Bilbao, Ernest Henry, second son of the late Lieutenant Wm. Lloyd, R.N., to Mary, second daughter of Charles H. Nicolas, Esq.

MACDOUGALL—MILES—June 21, at St. Peter's Church, Pimlico, by the Rev. Robert Miles, rector of Bingham, Notts, Colonel MacDougall, Commandant Staff College, Sandhurst, and only son of Sir Duncan MacDougall, K.C.F., to Adelaide, youngest daughter of the late P. J. Miles, Esq., of Leigh Court, Somersetshire, and King's Weston, Gloucestershire.

PERRY—WHICHER—June 23, at Petersfield, by the Rev. Thomas Field, M.A., Henry Perry, Esq., Paymaster, R.N., to Sophia, third daughter of James Whicher, Esq., of Petersfield, Hants.

PICKEN—HOYLAND—June 12, at the chapel of the British Embassy, Constantinople, by the Rev. Charles George Curtis, M.A., Richard Picken, Esq., M.D., R.N., to Emily Sophia, eldest daughter of C. W. Hoyland, Esq., Surgeon-Superintendent of the British Seamen's Hospital, Constantinople.

POWELL—ALSAGER—June 23, Henry Powell, Esq., 4th Soyal South Middlesex Regiment Militia, late Captain Royal Victoria Artillery, to Caroline, fourth daughter of the late Thomas Massa Alsager, Esq.

ROBINSON—COLLINGS—June 21, at Mortlake, Denbum R. C. Robinson, Esq., of the War Department, to Mary Anne Millicent Charlotte, eldest daughter of Thomas Collings, Esq., of the Admiralty, Somerset House.

DEATHS.

AYTOUN—Killed in action, in the Punjaub, John Marriott Aytoun' Lieutenant H.M.'s 94th Regiment, and fifth son of the late Captain M. C. W. Aytoun, R.A.

BONHAM—June 26, at 4, Walpole Street, Chelsea, Sophia Elizabeth, third daughter of Lieut.-Colonel J. B. Bonham, late 50th Regiment, aged 12.

DYNELEY—June 21, at 78, Upper Berkley Street, Lieut.-General Dyneley, C.B., Royal Artillery, aged 78.

HUNTER—June 24, at 11A, Clarendon Road, Notting Hill, Major T. Montgomery Hunter, aged 63.

MACKENZIE—May 14, at Inverness, General John Mackenzie, of Gairloch, second son of Sir Alexander Mackenzie, of Gairloch, Bart., aged 96.

PERSSE—June 10, William J. Perssé, Esq., of Perssé Park, county Galway, late Captain in the Queen's Bays, youngest brother of Dudley Perssé, Esq., of Roxborongh, and nephew of T. Wade, of Fairfield, Esq., all in the same county.

PONSONBY—June 21, suddenly, Anne Eliza Ponsonby, widow of Captain Ponsonby, of Springfield, Cumberland, and daughter of the late Captain Jones Skelton, formerly of the Royal Artillery.

SCOTT—June 25, General Sir Hopton Stratford Scott, K.C.B., the senior officer of the Indian Army, at his residence, Woodville, near Dublin.

SPOTTISWOODE—May 14, at Kandy, Ceylon, William Donald; and, on the 18th, Arthur Donald, infant twin sons of Colonel A. C. Spottiswoode, H.M.'s Bengal Army, aged 6½ months.

THEOBALD—May 9, at Secunderabad, Nizam Territory, India, John Shadwell Theobald, Esq., Lieutenant H.M.'s 18th (Royal Irish) Regiment, aged 24.

WARCUP—April 21, at Melbourne, the Rev. Thomas Chute Ellis Warcup, Chaplain of H.M.S. Pelorus, only son of William Mark Warcup, M.D., of Scarning, Norfolk, and grandson of the late William Warcup, Staff-Surgeon in the Island of St. Vincent.

HOUSE OF LORDS.—FRIDAY.

TROTMAN'S ANCHOR.

The Earl of Hardwicke wished to know whether the Government had come to any decision with respect to Mr. Trotman's anchors, the superiority of which had been fully established.

The Duke of Somerset declared himself by no means satisfied of the superiority of Trotman's anchors, and referred to the fact that one of them used by the Great Eastern had broken during the terrible gale off Holyhead in October. At all events, it could not be expected that Trotman's anchor should be adopted by the Admiralty until it had been effectually tried in competition with other anchors.

The Earl of Hardwicke expressed his astonishment at the noble Duke's answer. If he had any doubt of the excellence of Trotman's anchor he should not allow it to be used in Her Majesty's yacht; but in that respect the noble Duke's practice differed from his preaching. When the noble Duke talked of subjecting Trotman's anchor to a trial, he seemed to be unaware that it had been tried, and its superiority triumphantly established. The fact of the Great Eastern's anchor having broken was a proof of its holding power.

HOUSE OF COMMONS.—FRIDAY.

TROTMAN'S ANCHOR.

Mr. Mildmay, after some preliminary remarks in favour of Mr. Trotman's anchor, asked the Secretary for the Admiralty whether his attention had been called to a letter in the *Times* of Monday the 21st inst., signed John Trotman, stating that no Trotman's anchor had been supplied to the Navy, except the one used by the royal yacht; and whether he adhered to the statement that any officer could have one of those anchors if he wished it.

Lord Clarence Paget declared that any officer who wished might have a Trotman's anchor. The truth was, officers did not like them, and it could not be expected that the Admiralty should take on itself the responsibility of compelling them to use them against their will. It was a mistake to suppose that the Admiralty were prejudiced against Mr. Trotman's anchor. He had himself used that gentleman's anchor in his yacht; but if he were asked his opinion, as commander of a large ship he must candidly confess that he did not like it. It was very difficult to "fish" it. Notwithstanding Mr. Trotman's statement to the contrary, his anchor was not as cheap as the Admiralty anchor.

THE INDIAN ARMY.

After some conversation it was agreed that the adjourned debate, on the motion for the second reading of "the European Forces (India) Bill," should be resumed on Monday, Lord Palmerston undertaking that a portion of the papers required by Mr. Horsman should be laid on the table on that day, and the remainder before going into committee on the measure.

The Colonial Committee of the General Assembly of the Church of Scotland have lately sent 144 copies of the small edition of a book entitled "Aids to Devotion," and 36 copies of the large edition, to the Chaplains to the Forces of the Presbyterian persuasion in England, for gratuitous distribution among the officers and men of their congregations. The "Aids" have been prepared with great care by a Special Committee of the General Assembly of the Church, and consist of ten "forms of social worship;" a series of family prayers for general use; special prayers for the use of soldiers, sailors, colonists, sojourners in India, and in foreign countries; prayers and thanksgivings on particular occasions; and prayers for the sick, the dying, and the bereaved. "The ten forms of social worship," the committee state, "have been chiefly compiled from the devotional writings of Calvin, Knox, and other Reformers, from the Westminster Directory for Public Worship, and from the prayers of Richard Baxter and Henry Smith. They are not intended for the use of ministers in conducting the ordinary services of the church, but simply as aids to the exercise of social worship, according to the manner of the Church of Scotland, by soldiers, sailors, colonists, sojourners in India or in foreign countries, who are deprived of the regular services of a Christian ministry, and also by the inhabitants of remote and secluded districts of Scotland, who, being far removed from their churches, or separated from them by friths or arms of the sea, are frequently excluded from the ordinances of the sanctuary." We conceive that this little volume will be peculiarly serviceable to soldiers as well as sailors of the Presbyterian persuasion, who are often stationed where there is no Scotch clergyman. By its assistance an officer could conduct the service for the Presbyterians in his regiment, or read the prayers to them, as he has frequent occasion to do to the Church of England soldiers. We are persuaded that this gift will be received with much thankfulness by Presbyterians in the Army, and regarded as a pledge of the warm interest taken in their spiritual welfare by the Kirk of Scotland, the church of their fathers.

CONTRACTS FOR SUGAR, COCOA, AND WHEAT.

Department of the Comptroller for Victualling and Transport Services,

Somerset House, 15th June, 1860.

THE COMMISSIONERS for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, do hereby give notice, that on MONDAY, the 2nd JULY next, at half-past One o'clock, they will be ready to treat with such Persons as may be willing to Contract for supplying and delivering into Her Majesty's Victualling Stores at DEPTFORD, the undermentioned Articles, viz.:—

SUGAR, 300 Tons.
COCOA, 150 ,,
WHEAT, 3000 Qrs.
} When to be delivered:—Half of each in Three Weeks, and the remainder in Three Weeks afterwards, or earlier if preferred by the party tendering.

Tenders may be made for the whole or any portion of the Articles.

Their Lordships reserve to themselves the power, when the Tenders are opened, of contracting either for the whole, or for such part thereof only as they may deem fit, or for a greater quantity, or of not contracting for any, and also an unlimited power of selection.

The Sugar and Cocoa, to be exempted from the Customs' Duties, and parties tendering are to state where they are respectively lying.

Samples of the Cocoa (not less than Two Pounds) and of the Wheat (not less than Two Quarts) must be produced by the parties tendering.

Each Tender for Sugar must specify the mark and landing number of each cask or package, the ship in which imported, and the country or place of its growth or produce, and an average sample (not less than two pounds for each import mark) must be produced by the parties tendering, and not an average of different marks or several imports, and any parcel that is found not to be of the same mark or average quality as the sample tendered and accepted, will be rejected by the officers.

The samples produced by persons whose tenders are not accepted, are requested to be taken away by them immediately after the contract has been decided.

No Tender will be received unless made on the printed form provided for the purpose, and which may be obtained on application at the said office, or to the Officer conducting the Packet Service at Liverpool, or to the Collector of Customs at Bristol.

Particular attention is called to the recent modification of the Conditions of the Contracts, which may be seen at the said office, and at Liverpool and Bristol.

No Tender will be received after half-past One o'clock on the day of treaty; and it will not be required that the party tendering, or an agent on his behalf, should attend at the office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every Tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for ," and must also be delivered at Somerset House.

ARMY MEDICAL DEPARTMENT,
6, WHITEHALL YARD, S.W. 27th June, 1860.

THE NEXT COMPETITIVE EXAMINATION for ASSISTANT-SURGEONS IN THE ARMY will take place at Chelsea Hospital on the 13TH AUGUST NEXT, at 10 o'clock a.m. Application to be made at once to the Director-General, Army Medical Department, No. 6, Whitehall Yard, S.W. There are about thirty vacancies.

J. B. GIBSON, Director-General.

FLORAL HALL, COVENT GARDEN.—AN EXHIBITION OF ROSES, FUCHSIAS, CACTUS, AND STOVE AND GREEN-HOUSE PLANTS, will take place on WEDNESDAY, JULY 18TH. A List of Prizes, together with full particulars, will be published in the course of a few days.

OPERA BOXES, STALLS, and AMPHITHEATRE STALLS, in the best positions, at CRAMER, BEALE, & Co's., 201, Regent Street, W.

HER MAJESTY'S THEATRE.—Grand Volunteer Night, under the immediate Patronage of Her Most Gracious Majesty the Queen and H.R.H. the Prince Consort.—Grand Representation in behalf of the Funds of the National Rifle Association.—W. R. SAMS has the honour to announce that he has for DISPOSAL some of the best BOXES and STALLS for the above interesting occasion.—Royal Library, 1, St. James's Street, S.W.

TOLKIEN'S PIANOFORTES.—THE PATENT IRRESISTIBLE BOUDOIR PIANOFORTE is now acknowledged, by competent judges, to be an instrument of the finest tone yet manufactured in Europe. TOLKIEN'S COTTAGE AND PICCOLO PIANOFORTES, of elegant design, in walnut-tree and rosewood, from 25*l.* to 60*l.* Illustrated Catalogues sent post free to any part of the kingdom.
H. TOLKIEN, 27, 28, and 29, King William Street, London Bridge, E.C.

CRYSTAL PALACE.—GREAT NATIONAL BRASS BAND CONTEST.—Tuesday, 10th, and Wednesday, 11th July.

Arrangements have been made for a Grand Monster Brass Band Contest on the above days, in which upwards of ONE HUNDRED BANDS from all parts of England are engaged to take part. Valuable prizes in Money and Cups will be given, by the Company, and, in addition, the principal musical instrument makers in London have signified their intention to present several first-class instruments as special prizes.

The contest will commence each day at 10 o'clock, and on both days the whole of the bands will meet at 3 o'clock precisely in the Handel Orchestra, and perform Mendelssohn's "Wedding March," Haydn's chorus, "The heavens are telling;" Handel's "Hallelujah;" "Rule Britannia," and "God save the Queen." A monster Gong Drum, 7 feet in diameter, manufactured expressly for the occasion, will accompany the combined bands.

Admission: Tuesday, Half-a-Crown; Wednesday, One Shilling.

Notice.—Excursion trains will run from all principal towns on the Midland, London and North Western, Great Northern, South Western, and other railways.

Further particulars will be duly announced.

SOCIETY OF PAINTERS IN WATER-COLOURS.—The FIFTY-SIXTH ANNUAL EXHIBITION is NOW OPEN at their Gallery, 5, Pall Mall East (close to the National Gallery), S.W., from Nine till dusk. Admittance 1*s.* Catalogue 6*d.*

JOSEPH J. JENKINS, Secretary.

THE NEW SOCIETY OF PAINTERS IN WATER-COLOURS.—The TWENTY-SIXTH ANNUAL EXHIBITION of this Society is NOW OPEN, at their Gallery, 53, Pall Mall, near St. James's Palace, S.W. Admission, 1*s.*; Catalogue, 6*d.* Season Tickets, 5*s.*

JAMES FAHEY, Secretary.

CAMPAIGN IN INDIA.—LIEUTENANT-COLONEL CREALOCK'S SKETCHES of the CAMPAIGN IN INDIA are now on View at Mr. HOGARTH'S, 5, Haymarket, S.W.

CRICKET.—REGIMENTAL OUTFITTER,—JOHN LILLYWHITE'S CRICKET WAREHOUSE, 5, Seymour Street, Euston Square, London, N.W. Every article connected with British Sports may be had. Illustrated Lists of Prices post free. John Lillywhite has lately been specially appointed to supply several of H.M. Regiments at home and abroad.

CRICKET.—J. D. BARTLETT, Manufacturer of the Repercussive and Cane-handle Bats, which are acknowledged by our best Cricketers the best driving bats ever made. They have a beautiful spring in the handle, and are warranted not to break. Clubs, Schools, and Regiments supplied at reduced prices, wholesale and for exportation.—171, Waterloo Road, S.W.

THE GAME OF CROQUET, AUNT SALLY, LAWN BILLIARDS, SUMMER ICE, and all the fashionable games of the season, may be obtained at CREMER'S German Toy Warehouse, 27, New Bond Street, W.

[Incorporated under the Joint Stock Companies' Acts, 1856 & 1857.]

CARDIFF AND CAERPHILLY IRON COMPANY, LIMITED.

OFFICES:—Cannon House, Queen St., Cheapside, E.C.

CAPITAL £100,000 in 20,000 SHARES of £5 each,

With Power to Increase to £250,000.

DEPOSIT, £1 per Share, to be Paid on Application.

Subsequent Calls not to exceed £1 per Share, nor to be made at less intervals than Two Months.

DIRECTORS:

JOHN BIDDULPH, Esq., Swansea, Chairman of the Llanelly Railway and Dock Company.
THOMAS WOOD, Esq., Cradley Park, Stourbridge, of the firm of Messrs. Wood Brothers, The Lye, Stourbridge, Liverpool, and Limehouse.
JOHN SPITTLE, Esq., Smethwick Iron Works, and West Bromwich.
JOB TAYLOR, Esq., Dixon's Green, Dudley.
JAMES JOHN WALLIS, Esq., Winchester House, Old Broad Street, E.C.
(To be added when the transfer of the Property is complete.)
FREDERICK R. GREENHILL, Esq., Roath Castle, Cardiff.
(With power to add to their number.)

CONSULTING ENGINEER:—SIR CHARLES FOX.
BANKERS:—THE COMMERCIAL BANK OF LONDON, Lothbury, E.C.
SOLICITORS:—Messrs. PHILPOT, GREENHILL, & LYNCH, 63, Gracechurch Street, City, E.C.
BROKERS:—Messrs. JOSHUA HUTCHINSON & SON, 15, Angel Court, Throgmorton Street, E.C.
SECRETARY:—JOHN W. TOWERS, ESQ.

The first process in the manufacture of Iron, contains, under proper supervision, all the elements necessary for the profitable employment of Joint Stock Capital: the manufacture of pig iron combining simplicity in production, with a certain and unfailing market.

Glamorganshire is pre-eminent in the Principality, for the abundance of the minerals required for the manufacture of pig iron, more especially from the recent discoveries of large deposits of rich "hæmatite" ores; and no part of that county presents in such profusion on the same spot, and in so advantageous a situation, the constituent elements of iron, as the property, the subject of the operations of the "Cardiff and Caerphilly Iron Company, Limited;" and the Directors will be enabled to produce a first-class iron at a lower cost, and bring it to market at a cheaper rate, than any other masters in the Welsh trade.

This company is formed for the manufacture of pig iron, and for the raising and sale of surplus iron ore and coal, for which first-named purpose it is proposed to erect three blast furnaces, at a point close to the junction, near Taff's Well, of the Taff Vale and Rhymney Railways, only 6½ miles from the Port of Cardiff.

The property contracted to be purchased consists of the minerals under nearly 700 acres of land, situate in the parishes of Eglwysilan and Caerphilly, in the county of Glamorgan, held under the customary mineral leases, from the several freeholders thereof, for the respective terms of 60 years, at a moderate rent, and the royalties of 8*d.* per ton for the iron ore and Blackband iron stone, of 8*d.* per ton for the large coal, and 4*d.* per ton for the small, 2*d.* per ton for the limestone, and 4*d.* per ton for the fire clay, and at equally moderate royalties for the common clay and building stone.

The ironstone and limestone "crop out" within a few yards of the proposed site for the furnaces; but the Directors were desirous, before issuing any further shares in the Company, of being satisfied as to the existence and extent of the former, and with that view pits have been sunk in the deep and levels driven, and the result has proved the existence not only of argillaceous ironstone in great abundance, but also of a most valuable and extensive deposit of "hæmatite" iron ore, similar in all respects to the valuable deposit of that ore at Llantrissant, well known as having been recently sold for a very large sum; in confirmation of which the Directors feel they cannot do better than refer to the subjoined reports.

The results of different analyses made by Mr. Riley, Analytical Chemist, of Oxford Court, Cannon Street, show, as to the hæmatite—peroxide of iron 73·84 per cent., and metallic iron 51·75 per cent., and as to the argillaceous ore, from 31·36 to 33·60 per cent. of metallic iron.

The constituents of iron being in close proximity to the furnaces, the cost of transit will be thereby very materially lessened, and the ore and limestone can be delivered at the furnaces at a trifling cost. Sir Charles Fox, Messrs. John Yardley and Job Taylor, and several other eminently practical men, have inspected the Iron Field, and have expressed their unqualified approbation of the ore, and a high opinion of the class of iron likely to be produced from it. The supply of ore being far greater than can be required for three furnaces a large revenue can be derived from the sale of the surplus to other masters.

The property adjoins the Taff Vale and Rhymney Railways and the Glamorgan Canal, which run through a portion of the property, and the Company have wharfage alongside the canal.

The result of the operations alluded to proves that the property also contains some very valuable seams of the best steam and other coal, varying from four to twelve feet in thickness; which with the advantage of close proximity to the shipping port of Cardiff, and the consequent trifling cost of carriage, can be delivered free on board at a maximum cost of 5*s.* 3*d.* per ton. The selling price, even at the present depressed state of the trade, may be taken at 8*s.* per ton, several offers having been made to take contracts for large quantities at that sum.

Fire and other clay likewise exist in abundance, the former has been proved, by actual test in one of the largest furnaces in South Staffordshire, equal in every respect to the best samples of the well-known Stourbridge clay.

The directors have also contracted to purchase the Glyn Fach Colliery (with the plant and machinery thereon), situate in the Rhondda Valley, on the Rhondda branch of the Taff Vale Railway, only 8½ miles from the proposed site for the furnaces, and held under the customary mineral lease, for a term of 31 years, at a moderate rent and an average royalty, on which a large outlay has been made, is in full working order, capable of raising per day a large quantity of the best smelting coal.

The purchase-money agreed to be paid for the whole of the before-mentioned property, plant, and machinery, is the sum of 45,000*l.*, and the proprietors have taken shares to the extent of 20,000*l.*, and have expressed their readiness to take a much larger amount, even to the extent of 15,000*l.* more, in shares, evincing thereby in the strongest manner their confidence in the undertaking;—the balance of 10,000*l.* to be paid in cash.

The cost of erecting three blast furnaces, on the most improved principles with every requisite for the manufacture and sale of first class pig iron, is taken at 15,000*l.*, making with the purchase-money of the iron ore, &c., and colliery, a gross sum of 60,000*l.*, leaving 40,000*l.* available for the advantageous development of the Company's operations.

The cost of producing a ton of pig iron, making full allowance for commission, expenses of management, contingencies, discount, depreciation fund, and carriage to Cardiff, as approved by several of the largest ironmasters in the kingdom, and certified as correct by the consulting engineer of the Company, will not exceed the sum of 2*l.* 7*s.* 6*d.* per ton.

The present average price of pigs, similar in quality to those made from the Cumberland ores, may be taken at 3*l.* per ton, which on a weekly make of 360 tons would be	£1080	0 0
The cost at 2*l.* 7*s.* 6*d.* per ton on such weekly make will be	855	0 0
Which would afford a net weekly profit of	£225	0 0
Calculating 50 weeks for the annual make, we have a net annual profit of	£11,250	0 0
The amount of surplus ore raised and sold during the year, may be taken at 50,000 tons, which at a minimum profit of 2*s.* per ton, though it will be considerably exceeded, will yield a clear annual profit of	5,000	0 0
The present market price of the coal may be taken at 8*s.* per ton, which at a daily vend of 300 tons, would be ... £120 0		
The cost at 5*s.* 3*d.* free on board at Cardiff, on such daily vend will be 78 15		
Leaving a net daily profit of ... £41 5		
Calculating 300 working days in the year, it leaves a net annual profit of	12,375	0 0
Showing a total net annual profit of ...	£28,625	0 0

This amount of annual profit will afford a clear dividend of 28*l.* per cent. on the entire paid-up capital of 100,000*l.*

Some idea may be formed of the value of the ore when it is stated that 14*s.* per ton is actually paid in Glamorganshire for argillaceous ironstone brought from Northamptonshire, of a less per centage than the produce of this property, which can be delivered at the same spot for 8*s.* 6*d.*

Attention is requested to the fact of these Iron Works being situate only 6½ miles from the shipping port, while the highly profitable works at Merthyr and Aberdare are distant over 24 miles; and consequently this Company will save seventeen miles and a half of carriage.

The Deed of Association provides for a strict audit and supervision.

The Company being incorporated under the Joint Stock Company's Acts of 1856 and 1857, is strictly limited, and no shareholder is *liable beyond the amount of the shares for which he subscribes;* it offers therefore a most favourable opportunity for safe and profitable investment, simplicity in the objects of the Company being combined with a certain and unfailing market, which must necessarily insure success.

Applications for shares must be accompanied by the deposit of £1 per share. Should the amount so paid exceed the required amount of deposit on the number of shares allotted, the surplus, or should no allotment be made, the entire deposit will be returned without deduction or delay.

Prospectuses and forms of application can be obtained at the Offices of the Company, Cannon House, Queen Street, Cheapside, E.C., or at the Solicitors' or Brokers'.

For the convenience of parties residing in the country, forms will be forwarded on application to the Secretary, at the Offices of the Company, where further information can be obtained and plans of the property, sections of the mines, specimens and analyses of the ironstone, coal, and clay, together with estimates of the cost of production, &c., can be seen.

Subjoined are reports from Mr. John Yardley, of Tipton, Staffordshire, and Mr. Job Taylor, of Dudley, from which it will be seen that neither trouble nor expense has been spared, with the view of fully testing the value of the property. Their reports are corroborated by other eminent practical men; and the directors are convinced that, with the advantages of cheap coal, ironstone, and limestone, together with cheap and advantageous delivery afforded by two railways and a canal, an early return on the capital expended may be confidently expected:—

November, 23, 1859.—The mines are situated in the parishes of Eglwysilan and Caerphilly, close to the junction near Taff's Well, of the Taff Vale and Rhymney Railways, and only 6½ miles from the important port of Cardiff. The property consists of about 700 acres of argillaceous iron ore, hæmatite, limestone, steam-coal, fire-clay, common clay, and building stone. We have carefully and thoroughly examined various samples of the mine, and found them exceedingly good, equal in every respect to those of South Staffordshire. We have also examined the fire-clay, which is of excellent quality, and particularly suited for iron-works and colliery purposes. Limestone is in great abundance, and is close to the site of the proposed furnaces. All the necessary elements for the manufacture of pig-iron evidently exist in great abundance, and the situation to which we have before alluded is most advantageous, from the fact of being only 6½ miles from Cardiff, whilst Dowlais is at the other end of the line, or subject to the cost of carriage of 25 miles in competition with 6½ miles. From all that we have seen, and from information we have gathered in the district, we have no hesitation in asserting that this property possesses great facilities for the manufacture of iron. The situation is certainly equal, if not superior, to any other in that district, and the iron can be produced quite as cheaply, and the coal raised quite as profitably, as at any of the surrounding works.

Signed { JOHN YARDLEY. JOB TAYLOR.

Dudley, February 27, 1860.

Gentlemen,—As you are aware, we suggested after our former inspection of this property, that further proof should be made, to enable us to report as positively of the *quantity* as we then did of the *quality* of your mines. Since that time, pits have been sunk and we have (in conjunction with several eminently practical men from South Staffordshire) again carefully examined the estate, which we have now no hesitation in saying, contains a large quantity of excellent mines, equal in every respect to those of South Staffordshire, or to any we have inspected in South Wales.

The hæmatite ore has been proved, and we have reason to believe it exists in abundance, every indication shows that it is like the valuable ore now being worked on the neighbouring estate of Llantrissant.

We are, gentlemen, your obedient servants,

(Signed) JOHN YARDLEY, Consulting Mining Agent, Tipton, Staffordshire.
JOB TAYLOR, Coal Master, Dudley.

To the Directors of
The Cardiff and Caerphilly Iron Company, Limited.

NATIONAL RIFLE ASSOCIATION.—PATRON.

Captain EDMOND H. ST. JOHN MILDMAY, Secretary.

The FIRST PRIZE MEETING on Wimbledon Common, commencing Monday, July 2nd, 1860.

LIST OF PRICES AND OTHER ARRANGEMENTS.

Monday, July 2nd, the ground open from 12 o'clock at noon till 7 o'clock in the evening. Admission, 2*s.* 6*d.* each person; carriages 5*s.* each extra; persons on horseback, 5*s.* each.

The Queen and the Prince Consort will on this day receive Addresses from the Council of the Association; and afterwards Her Majesty will inaugurate the Meeting by firing the first shot at the 400 yards' range.

Tuesday, July 3, Wednesday, July 4, Thursday, July, 5, and Friday, July 6, the ground will be open from 8 o'clock in the morning till 8 o'clock in the evening. Admission, 1*s.* each person; ditto, carriages 2*s.* 6*d.* each extra; ditto, persons on horseback, 2*s.* 6*d.* each.

Saturday, July 7th, the ground will be open from 8 o'clock in the morning till 8 o'clock in the evening, and on this day the Great Prizes being competed for, the admission will be as on the opening day, viz.:—2*s.* 6*d.* each person, carriages, 5*s.* each extra, persons on horseback, 5*s.* each.

The entrances to the ground face the road from Putney to Wimbledon.

No change will be given at the entrances, but it may be obtained at a box in front of the entrances.

Carriages and persons on horseback will be admitted on payment as above.

Volunteers in uniform, without side arms, will be admitted on payment of 1*s.* each per day throughout the week.

No money will be taken at the carriage entrances. All persons coming in carriages or on horseback must be provided with tickets.

Servants on carriages, but not on horseback, to be admitted without payment.

Persons becoming members of the Association during the Meeting will be entitled to all the privileges of the Association.

Members of the National Rifle Association and competitors for the Volunteer and other prizes, are to be admitted free on showing their pass tickets, which are admissible only at the entrances specially appointed. Members coming in carriages or on horseback can be admitted only at the carriage entrances, and must produce the necessary tickets.

Admission to the reserved enclosures adjoining Her Majesty's tent will be by tickets, or on payment of 10*s.* 6*d.* each person.

There will be Regimental Bands in attendance during the entire shooting.

Refreshments of every description will be provided by Messrs. Strange, of the Crystal Palace.

There will be marquees and tents on the ground for the company, in case of wet weather; and an ample supply of chairs for the occasion, at the cost of 1*d.* for each occupation of the chair.

Cloak rooms for ladies and gentlemen, lavatories, and stabling for horses, &c., will be provided on the ground.

A card, containing full explanations of the ranges, prizes, signal-flags, &c., with a plan of the ground, will be published, and sold at the meeting.

All persons desirous of becoming members of the Association, or aiding its objects by donations, &c., can do so by communicating with the Secretary at the offices, 11, Pall Mall East, S.W.; or by applying on the ground at the office tent, where subscriptions will be received, and all necessary information afforded.

Captain EDMOND H. ST. JOHN MILDMAY, Secretary.

Note.—The application for members' pass tickets, tickets for the reserved enclosures, and tickets for carriages and horses, &c., should be made without delay to Wright and Co., booksellers and stationers, No. 60, Pall Mall, S.W.; Mr. Sams, Royal Library, St. James's Street, S.W.; Mr. Mitchell, Old Bond Street, W.; and Messrs. Keith, Prowse, and Co., Cheapside, E.C. They will also be procurable on the opening and other days at Putney, Wandsworth, and Wimbledon.

STATUTORY NOTICE TO CREDITORS.—Major GEORGE BULKELEY TATTERSALL, Deceased.—Pursuant to an Act of Parliament made and passed in the 22nd and 23rd years of the reign of her present Majesty, cap. 35, intituled "An Act to further Amend the Law of Property, and to Relieve Trustees," NOTICE is HEREBY GIVEN, that all persons having or claiming to have any DEBTS or CLAIMS against the ESTATE of GEORGE BULKELEY TATTERSALL, late of No. 13, Shaftesbury Crescent, Pimlico, in the county of Middlesex, and late a Major in the Ceylon Rifle Regiment, deceased, who died on the 21st day of February, 1860, and whose will was proved on or about the 14th day of June, 1860, in the Principal Registry of Her Majesty's Court of Probate, by Frederick Webb Pettigrew, of No. 9, Belgrave Road, Pimlico, and Richard James Wilmot, of No. 19, King Street, Covent Garden, both in the said county of Middlesex, Esquires, the Executors named in the said will, are REQUIRED, on or before the 31ST DAY OF AUGUST NEXT, to send in to the said executors, at the office of their solicitor, Mr. Arthur Bingham Trevenen, situate at No. 8, Danes Inn, Strand, London, the particulars of their respective debts or claims upon or against the said estate, with the nature and particulars of their securities, if any. And Notice is Hereby further Given, that after the said 31st day of August next the said Executors will be at liberty to distribute the whole of the assets of the said deceased among the parties entitled thereto, having regard to the claims (if any) of which they shall have had notice, and will not be liable for or in respect of the assets so distributed, or any part thereof, to any person of whose claim they shall not then have had notice.—Dated this 16th day of June, 1860.

EDWIN KESTERTON, COACHBUILDER,
93 AND 94, LONG ACRE, LONDON, W.C.

FOR CORRECT FAMILY ARMS, CREST, OR PEDIGREE, send name and county and 7*s.* 6*d.* to J. LOCK'S City Heraldic Office, 2, Old Jewry, London, E.C., and in a few days you will receive a neat drawing of your Arms, &c., in Heraldic Colours, to be engraved on Seal, Ring, or Family Plate. On y parle Français, Italien, Allemand, et Hollandais. Wedding orders executed. Stamped envelopes and paper. Embossing presses and dies.

NATIONAL RIFLE ASSOCIATION.—Ammunition.—AMMUNITION will be PROvided on the ground, at Wimbledon, for Volunteers, and charged to the corps competing.
EDMOND H. ST. JOHN MILDMAY, Secretary.
Offices, 11, Pall Mall East, S.W.

NATIONAL RIFLE ASSOCIATION.—THE MEMBERS OF VOLUNTEER CORPS intending to compete at the Wimbledon Meeting must APPEAR in the UNIFORM of their respective corps.
By order of the Council of the Association.
EDMOND H. ST. JOHN MILDMAY, Secretary.
Offices, 11, Pall Mall East, S.W.

NATIONAL RIFLE ASSOCIATION.—The Council of the National Rifle Association propose to set apart a large tent for the EXHIBITION OF SPECIMENS OR MODELS OF FIREARMS AND CANNONS of novel construction.
These must all be placed and arranged in the tent by NOON of MONDAY, the 2ND OF JULY.
Every precaution will be taken by the Council, but they cannot hold themselves responsible for the safe custody of such specimens or models, and they rely on the exhibitors to look after their own property.
EDMOND H. ST. JOHN MILDMAY, Secretary.
Offices, 11, Pall Mall East, S.W.

NATIONAL RIFLE ASSOCIATION.—Her Majesty the QUEEN will INAUGURATE the FIRST GREAT MEETING, on Wimbledon Common, on MONDAY NEXT, JULY 2. Carriage tickets, &c., and all other particulars respecting the above Meeting, can be obtained To-day (Saturday) at WRIGHT & Co.'s, Booksellers and Stationers, 60, Pall Mall, S.W.; Mr. SAMS' Royal Library, St. James's Street, S.W.; Mr. MITCHELL'S Library, Old Bond Street, W.; and Messrs. KEITH, PROWSE, & Co.'s, Cheapside, E.C.

NATIONAL RIFLE ASSOCIATION.—FIRST GREAT PRIZE MEETING, on Wimbledon Common, MONDAY NEXT, JULY 2. £2000 and upwards to be given away in prizes.

NATIONAL RIFLE ASSOCIATION.—The Queen's Prize of £250 for Volunteers.

NATIONAL RIFLE ASSOCIATION.—H.R.H. Prince Consort's Prize of £100 for all Comers.

NATIONAL RIFLE ASSOCIATION.—H.R.H. Duke of Cambridge's Prize of £50 for best shot with Breech-loading Rifles.

NATIONAL RIFLE ASSOCIATION.—Twenty Whitworth Rifles, value 25 guineas each, to be given away as Prizes.

NATIONAL RIFLE ASSOCIATION.—The Volunteer Ball Prizes, given by Mr. Gye, of the Royal Italian Opera, £200.

NATIONAL RIFLE ASSOCIATION.—Gold and Silver Medal of the Association, and other Prizes from various donors, to be shot for at the Wimbledon Meeting, next week, by Volunteers, and all comers.

NATIONAL RIFLE ASSOCIATION.—PATRON.
His Royal Highness the PRINCE CONSORT.
PRESIDENT.—The Right Hon. SIDNEY HERBERT, M.P.

The FIRST PRIZE MEETING of the National Rifle Association will take place on Wimbledon Common, in the county of Surrey, on MONDAY, JULY 2 NEXT.

Among the Prizes offered for competition will be Her Majesty's Prize of £250, for Volunteers; H.R.H. the Prince Consort's Prize of £100, for all-comers of all nations; H.R.H. the Duke of Cambridge's Prize of £50, for breech-loading rifles; with one Gold and one Silver Medal, presented by the Association.

Noblemen and gentlemen desirous of becoming members of the above Association, and of assisting its objects by donations, &c., are requested to communicate with the Secretary, 11, Pall Mall East, S.W., from whom all particulars may be obtained. Annual subscriptions, £1 1*s.*; life subscriptions, £10 10*s.* Subscriptions and donations will also be received by Messrs. RANSOM, BOUVERIE, & Co., bankers to the Association, 1, Pall Mall East, S.W.; Messrs. COUTTS & Co., 59, Strand, W.C.; Mr. SAMS', Royal Library, St. James's Street, S.W.; and WRIGHT & Co., Booksellers and Stationers, 60, Pall Mall, S.W.; where may be had the rules, bye-laws, and Regulations of the Association, price 6*d.*
EDMOND H. ST. JOHN MILDMAY, Secretary.
Offices, 11, Pall Mall East, S.W.

SOUTH-WESTERN RAILWAY.—Rifle Volunteers.—Competition on Wimbledon Common, on Monday, 2nd of July, and following days.—The COMPETITION with RIFLES for PRIZES given by the Queen, the Prince Consort, the Duke of Cambridge, the National Rifle Association, &c., will take place upon Wimbledon Common, on Monday, July 2, and following days.

The Queen will open the Competition on Monday, at 3 p.m.

Rifle Volunteers desiring to attend the competition in companies or corps, and in uniform, from any station on the South-Western lines, at a distance from Wimbledon, will be conveyed to Wimbledon (or Putney) and back for a single journey third-class fare in second-class carriages. Officers (and others) in first-class carriages, at double that fare.

Rifle Volunteers travelling to Wimbledon (or Putney), not in companies or corps, but in uniform, will be charged the military fares, viz., 1*d.* per mile in second-class carriages, and 2*d.* per mile in first-class, or the ordinary fares in their option.

On Monday and during the competition all the up-trains on the main line will stop at Wimbledon after 11 a.m. up to 3 p.m., and all the up-trains on the Richmond and Windsor Lines will stop at Putney after 11 a.m. and up to 3 p.m. to set down passengers for these stations.

All the down-trains on the main line will call at Wimbledon after 4 p.m.; and all the down-trains on the Richmond and Windsor Line will call at Putney after 4 p.m., to take up passengers.

There will be frequent trains between London and Wimbledon and Putney on Monday and during the week.

RIFLE VOLUNTEERS' COMPETITION, on Wimbledon Common, on Monday, July 2, and following days.—The Competition with Rifles for Prizes given by the Queen, the Prince Consort, the Duke of Cambridge, the National Rifle Association, &c., will take place upon Wimbledon Common, on Monday, July 2, and following days.

The Queen will open the competition on Monday, at 3 p.m.

Frequent TRAINS will run upon Monday, and daily during the week, from Waterloo and Vauxhall Bridge Stations, to Wimbledon and Putney. Returning from each of those stations.

UNDER ENGAGEMENT to her MAJESTY'S COUNCIL FOR INDIA.—To embark Troops at Gravesend on the 7th July. Last Shipping Day the 2nd July.

For CALCUTTA, with liberty to land Passengers at Madras, the splendid passenger ship, HOLMSDALE, A 1 thirteen years, 1257 tons register, W. J. FERRIS, Commander, lying in the East India Docks. The accommodation for passengers by this fine ship is not surpassed by any vessel in the trade. Will carry an experienced Surgeon.

For freight or passage, apply to PHILLIPPS, SHAW, & LOWTHER, 2, Royal Exchange Buildings, E.C.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., VIA EGYPT.

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

UNITED STATES MAIL STEAMERS BETWEEN SOUTHAMPTON & NEW YORK.—The following splendid full-power, paddle-wheel steam-ships will sail from Southampton for NEW YORK direct every fourth Wednesday.

ARAGO, Captain LINES, 3000 tons, 800-horse power, July 25.

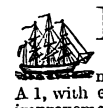
FULTON, Captain WOTTON, 3000 tons, 800-horse power, August 22.

Passage money:—Saloon, 26*l.*; second class, 14*l.* and 16*l.* according to accommodation. For particulars apply to the agents, CROSKEY & Co., Southampton, and 84, King William Street, City, E.C.; or to GRINDLAY & Co., Charing Cross, S.W.

PARIS.—LONDON TO PARIS DAILY.—SPECIAL DIRECT SERVICE BY THE BRIGHTON RAILWAY, viâ Newhaven and Dieppe. First class, 23*s.*; second class, 20*s.* Return tickets (available for one calendar month), first class, 50*s.*; second class, 36*s.* A steward's fee of 1*s.* and 6*d.* respectively is also charged on board. Passports and visas for Paris may be had of the respective agents at Newhaven. Luggage booked through from London to Paris.—For tickets or further information apply at the London Bridge and Pimlico Termini; 43, Regent Circus, Piccadilly; 4, Arthur Street, East, London Bridge; or at any of the stations on the London, Brighton, and South Coast Railway.

FOR SALE, or TIME CHARTER, the beautiful new A 1 iron Screw Steamer COLONIST, *pro. tem.* 351 tons O.M. 236 tons register. Length 165 feet; breadth 22 feet 5-10ths; depth of hold 12 feet 9-10ths; built this year, by the well known firm Messrs. Denny & Rankin, under special survey, and classed A 1 at Lloyd's for nine years. Her engines (by Messrs. John Jones & Son) are direct acting, of 60 horse-power nominal, and combine all recent improvements; has tubular boilers, fitted with superheating apparatus; also a donkey engine. Capacity of coal bunkers, 50 tons. She steams 9½ knots on a remarkably light consumption of fuel, being 2½ lb. per indicated horse-power, or about 7 cwt. per hour; carries a large cargo on a light draught of water, and is admirably adapted for bar harbours, or where light draught is necessary. The cabin accommodation is complete for thirty-six passengers; on inspection will be found a most desirable vessel; she is quite ready for sea: now lying in the Clarence Dock.—For inspection apply to the owners, Messrs. JOHN JONES & SON, Engineers, or to

CURRY, KELLOCK, & Co., Brokers, Liverpool.



FOR SALE.—The undermentioned STEAMERS.

SCREW.—1200 tons, builders' measurement; now building, to class twelve years A 1, with engines of 175 horse-power, with all recent improvements; speed twelve to thirteen miles per hour. Dimensions:—Length, 260 feet; breadth, 32 feet; depth, 20 feet.

SCREW.—700 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines, with all recent improvements, of 120 horse-power, and expected to steam thirteen to fourteen miles per hour. Dimensions:—Length, 215 feet; breadth, 27 feet; depth, 15 feet, 6 inches.

SCREW.—575 tons, builders' measurement; to class twelve years A 1; full poop and forecastle; engines direct acting of 75 horse-power; speed ten knots under steam alone. Dimensions:—Length over all 190 feet; breadth, 25 feet; depth, 14 feet.

SCREW.—596 tons, builders' measurement, 318 tons register: now building, to class A 1 at Lloyd's for nine years; will carry about 550 tons measurement or 450 tons dead weight; direct engines 60 horse-power. Dimensions:—Length 170 feet; breadth 27 feet; depth 12 feet 6 inches.

PADDLE.—440 tons, builders' measurement, 203 tons N.M.; building to class A 1 at Lloyd's for six years; will accommodate fifty two first-class and twenty-two second-class passengers; will carry about 170 tons measurement or 100 tons dead weight on 7½ feet water; oscillating engines of 120 horse-power; expected to steam thirteen knots per hour. Dimensions:—Length 200 feet; breadth 21 feet; depth 11 feet.

The above ships are built, and being built, by first-rate builders, and the new boats can be completed to suit the plans of purchasers. For specifications and all further particulars apply to

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair-Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

SEQUELIN'S OIL.—This *Vegetable* Preparation is an infallible restorative of the Human Hair, producing its growth, checking its falling off almost instantly, and imparting to it unequalled softness and brilliancy. Testimonials and references on application. One bottle is sufficient. Price 1 guinea. Sold by S. SEQUELIN, 40, Wharton Street, Lloyd Square, W.C. London Agents: G. JOZEAU, 49, Haymarket, S.W.; and METCALFE, BINGLEY, & Co., 130B, Oxford Street, W.

TEETH. — MR. ESKELL'S IMPROVEMENTS IN THE CONSTRUCTION OF ARTIFICIAL TEETH, whereby one set generally lasts a lifetime, are worthy the attention of those suffering from the loss of Teeth. The gradual removal of natural teeth or stumps which may be in the mouth, or the absorption of gums from whatever cause, are provided for; thus doing away with the necessity, at any future time, of having new sets of teeth, or being beyond an hour or so unpleasantly detained without them.

Not only are the dentist's services dispensed with for a long series of years, but the expense is no greater than for the ordinary kinds; and when it is added there is no pain to undergo, neither teeth nor stumps being extracted, nor any pain given whatever, it is evident this system possesses manifest advantages, and is the nearest approach to perfection yet attained. The teeth are exquisitely enamelled to nature, of unexceptionable purity and workmanship, and for accuracy of adaptation for mastication, articulation, and impossibility of detection, cannot be surpassed.

Mr. Eskell's celebrated Osteoplastic Enamel, for Stopping Decayed Teeth (admirably adapted for front teeth), retains its colour, and is free from any injurious properties either as regards the teeth or general health. Post freee for 30 stamps. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation free. Charges strictly moderate.—314, Regent Street, opposite the Polytechnic. Established 1847.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their *Patented System of supplying* Artificial Teeth, which are warranted to answer perfectly for mastication *and articulation*, without springs, wires, or any *metal*, and *without any operation*; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Bugs, Beetles, and every other insect, by this Powder, which is perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in Packets, 1*s.*, 2*s.* 6*d.*, and 4*s.* 6*d.* each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the above name and address. Sold by all druggists.

INSECTICIDE VICAT (Vermin destroyer). Ten years of great success, twenty official reports from learned Societies, and several honorary medals, testify to Vicat's Insecticide powder for the destruction of all kinds of Insects. Insecticide Vicat is used by the French Government for the destruction of insects in barracks, camps, ships, hospitals, Imperial schools, &c., &c. Sold by SAUTET & ROBINET, 9, Greek Street, Soho Sq., W., and by their agents in town and country.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle, Cottage Gardener*, and *Field*. In boxes, 1*s.*, 3*s.*, 10*s.* 6*d.*, retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

TO APPEAR SATURDAY, JULY 7.

THE LONDON REVIEW

AND WEEKLY JOURNAL.

CONDUCTED BY CHARLES MACKAY, LL.D.

Published every Saturday Morning, Price Threepence.

A THOROUGHLY ORIGINAL JOURNAL, and Complete Record of the Events and Opinions of the Day, with First-class Literature adapted for the Homes of the Empire. No topic, allusion, or advertisement, that can render it an improper guest in the family circle, is allowed to appear. THE LONDON REVIEW will not be a compilation from, or a reprint of, other newspapers, but a thoroughly original Journal. It will be printed on good paper, in a clear, bold type; and in quantity of matter will greatly exceed most of the more costly weekly newspapers; whilst its price will be such as must secure for it world-wide circulation. TERMS OF SUBSCRIPTION:—Stamped, 4s. 4d. Quarterly; 8s. 8d. Half-Year; 17s. 4d. the Year. Unstamped, 3s. 3d. Quarterly; 6s. 6d. Half-Year; 13s. the Year; or, Threepence per Copy for any period, with One Penny additional if sent by post. Orders received by all Booksellers and News Agents; or at the Office, 11, Southampton Street, Strand, W.C. Post-office Orders to be made payable at the Charing Cross Office, to W. LITTLE, Manager. A single Specimen Copy sent free by Post on receipt of Four Postage Stamps.

THOMAS HOOD.

This day is published, in Two Volumes post octavo, 21s. cloth,

MEMORIALS OF THOMAS HOOD.

COLLECTED, ARRANGED, AND EDITED BY HIS DAUGHTER.

WITH A PREFACE AND NOTES BY HIS SON.

Illustrated with many Copies from his own Sketches, and of a MS. page of "THE SONG OF THE SHIRT."

London: EDWARD MOXON & Co., Dover Street, W.

MONEY.—TO OFFICERS, NOBLEMEN, and GENTLEMEN.—Wanted to place out several sums of money upon Real and Personal Estate. To those having reversionary interests, life estates, and property in settlement, and to whom payment of interest would be a consideration, can have it deferred till in possession. Advances made and Loans effected for short periods upon approved Personal Securities. Apply by letter, or personally between 1 and 5 o'clock, to Mr. COLLINS, 13, Duke Street, St. James's, S.W. Reversions purchased.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

FARMS, ESTATES, &c.

MESSRS. HEARLE & CO., LAND AGENTS AND SURVEYORS, 5, Crescent Place, Blackfriars, E.C., direct attention to the very great facility for Letting and Selling Farms and Estates, afforded by the extensive circulation of their printed Lists, containing upwards of 200 farms and estates, which are published twice per month, and distributed to some hundreds of applicants, free. These Lists contain estates throughout England to be let or sold, especially suitable to the requirements of noblemen and gentlemen of the Naval and Military profession.

42ND ROYAL HIGHLANDERS.—The Officers who have served or are serving in this Regiment DINE together at the LONDON TAVERN on TUESDAY, JULY, 10th, at 7½ o'clock. It is hoped that arrangements may then be made for an Annual Meeting. Gentlemen desirous of joining will be kind enough to send their names to the Proprietor of the London Tavern before the 8th July.

ROYAL TYRONE MILITIA ARTILLERY.—To Non-Commissioned Officers of Royal Artillery.—WANTED, for the Permanent Staff, TWO SERGEANTS. Applications to be sent to the Adjutant, at Charlemont, Moy, Ireland.

CAVAN MILITIA.—WANTED, for the Permanent Staff of the above Corps, a PAY-MASTER SERGEANT, a COLOUR SERGEANT, and a DRILL SERGEANT capable of paying a Company. Apply, enclosing testimonials, to the Adjutant, Cavan Militia, Cavan, Ireland.

RIFLE VOLUNTEERS.—TWO ASSISTANT SECRETARIES WANTED for a Rifle Corps now in the course of formation. Gentlemen resident within the Metropolitan boundary of Middlesex and Surrey, who can make themselves useful, especially in adding to the number, will receive a Commission in the Corps. Address A. B. C., care of Mr. MILLER, 47, Bedford Street, Strand, W.C.

NAVAL AND MARINE CADETS.

ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.
CONDUCTED BY MR. THOMAS EASTMAN, R.N.,
Five Years Naval Instructor on Board H. M. S.
"Excellent."

354 young Gentlemen have passed from this Establishment as Naval Cadets, and upwards of 200 as Marine Cadets, Masters' Assistants, &c.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES at R. N. College, 12th June, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Stewart, Gabbett, V. Orlebar, Henderson, Master, Fellowes, Sidney Smith, Blackett, Millett, Knollys. Mr. Mounsteven, who passed first at the Competitive Examination for Marine Cadetships, was also prepared at North Grove House.
W. BELL, Chaplain, R.N.;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

THE MILITARY COLLEGE, SUNBURY, S.W.—At this Establishment, conducted by Captain LENDY, with competent assistants, STUDENTS are PREPARED for the Staff, Artillery, Line, and every branch of the service. In 13 Examinations for the Line and Staff College, to which pupils have been sent since 1858, they have six times taken the first place, four times the second, and three times the third, and four-fifths of the whole number of candidates sent to compete for admission to Woolwich were successful at their first trial.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

CIVIL AND MILITARY SERVICES (Home and Indian).—CANDIDATES PREPARED for these Services by the Editor of "Hall's Guide to the Three Services," assisted by experienced teachers. Hours of study from 10 to 1. Terms:—For the Home Civil Service, three guineas per month; for the Army, four guineas. Residence, five guineas per month additional. Address J. Paxton Hall, Oxford House, Chelsea, S.W.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vauban's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotheran, York.

DR. LOVELL'S SCHOOL, Winslow Hall, Bucks, for the Sons of Noblemen and Gentlemen (Established 1836).—The course of Tuition is preparatory to the Public Schools, Eton, Rugby, and Harrow, Sandhurst College, and the Army and Navy Examinations. Native teachers of French and German reside in the house, and these languages form an integral part of the daily school duty. The number of pupils is strictly limited, and none are admitted beyond fifteen years of age. All further particulars can be had of the Principal.

MR. FAHEY, whose Pupils have taken the highest honours in the Military Colleges of Woolwich, Addiscombe, &c., informs his friends that he has removed from Brompton to 71, Cadogan Place, S.W., and that he continues to give lessons in Fortification, Geometrical and Civil Drawing—required for the Competitive Examination.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of
GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.
Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.
Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.
This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—
1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.
2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.
3rd. It is easy to manufacture, and can be made entirely by machinery.
4th. It is so constructed that accident from careless loading, or otherwise, is impossible.
5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.
6th. The action is always in good order, requiring no adjustment in use.
7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.
8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.
Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.
A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60s. per 1000; blank, 33s. per 1000.
Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

ELEY'S AMMUNITION, comprising WIRE CARTRIDGES for killing game at long distances, WATERPROOF PERCUSSION CAPS, GUN-WADDINGS, BREECH-LOADING CARTRIDGES, and every description of Sporting and Military Ammunition.—ELEY BROTHERS, Sole Contractors to the War Department for Jacob's Rifle Shell Tubes, Cartridges and Caps for Colt's, Adams', and other Revolvers; Enfield Ammunition, &c.; Gray's Inn Road, London, W.C. Wholesale only.

ENFIELD RIFLE AMMUNITION. CARTRIDGES for Enfield Rifles, and Bullets made of compressed lead, with patch attached; Regulation Cartridges and Bullets, fitted with box-wood plugs; Blank Cartridges, and Percussion Caps.—ELEY BROTHERS, Contractors to the War Department for Small Arms Ammunition, Gray's Inn Road, W.C.

TO VOLUNTEER CORPS.

MESSRS. OSLER, 45, Oxford Street, London, W., beg to announce that their NEW GALLERY (adjoining their late premises), recently erected from the designs of Mr. Owen Jones, is NOW OPEN, and will be found to contain a more extensive assortment of GLASS CHANDELIERS, Table, and Ornamental Glass, &c., than their hitherto limited space has enabled them to exhibit.

CLARK'S PRIZE MEDAL LAMPS, FOR INDIA, are so arranged to burn under the Punkah. The very numerous testimonials received from India is a guarantee of the sterling merits of these lamps. They are so substantially made that they cannot get out of order. Prospectuses of new designs sent upon application. To be had only of the Metropolitan Light Company, 447, West Strand, W.C.
JOHN CLARK, Manager.

RIFLE REGULATION GLOVE—W. TENT begs to inform those Gentlemen who have joined the different Corps, that he has had made for them expressly the BLACK BUCK REGULATION GLOVE that is being worn by the 7th Surrey and other Corps. To be had only of W. TENT, Shirt Maker, &c., 4, Birchin Lane, Cornhill, E.C. N.B. The Dress of the 7th Surrey to be seen on application.

TO OUR VOLUNTEERS.—The simple system of training may be summed up in two or three words—moderate eating and drinking, exercise, and constant use of the Sponge Bath, with the aid of A. & T. DAVIES'S CHAMPION TRAINING TOWELS, Nos. 1 and 2, and FLESH GLOVES. Any man may train. See *Times*, Wednesday 18th April, on the condition of the Boxers for the Championship. No. 1, 1s. 6d.; No. 2, 2s. Flesh Gloves, 1s. per pair. Sponge Gloves, 6d. per pair. All the improved makes in English and Foreign Training Towels, Flesh Gloves, &c., at A. & T. DAVIES'S Linen Warehouse, 121, High Holborn, corner of King Street, W.C.

NEW REGULATIONS FOR NAVAL CADETS, for passing the College may be obtained on application to *B. JOSEPH & Co.*, or sent post free to all parts of the world, with full list of prices of Outfits for young gentlemen entering the Navy.
A large stock of fashionable clothing at moderate prices may be had either ready *made or made to order* in a few hours' notice at the Hall of Commerce, 92 & 93, Queen Street, Portsea. B. JOSEPH & Co., Proprietors.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

NOTICE.—"BEWARE OF IMITATIONS."
LEA & PERRINS' "WORCESTERSHIRE SAUCE" is pronounced by Connoisseurs to be a most agreeable addition to every variety of dish.
*** See the names of LEA & PERRINS upon every Label, Bottle, and Stopper.
Sold by Messrs. CROSSE & BLACKWELL, London; and by Dealers in Sauces generally.
Sole Manufacturers—LEA & PERRINS, Worcester.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND
Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.
Black or Green Tea, 2s. 8d., 2s. 10d., 3s., 3s. 4d., to 4s.
A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.
Sugars are supplied at Market Prices.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
WOTHERSPOON & Co., Glasgow and London.

THE GUINEA COAL COMPANY'S (double screened) WALLSEND COAL, One Guinea per Ton (All the Year Round). HORATIO MORGAN, Sole Consignee for London, Office, 17, Wellington Street, Strand, W.C., where all orders are to be sent.
N.B. No Agents or Travellers employed.

GARIBALDI,
OR,
THE IRRESISTIBLE.
The perfume of the day. Price 2s., 3s. 6d., 5s., &c.
HENRY RIGGE, 35, New Bond Street, London, W.

GAY & SONS' DRESSING-CASES are the best and most reasonable.
113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 10, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, June 30, 1860.

ENGLAND has long been without any national pastime which has a direct influence upon the augmentation of her military strength. Neither cricket, boating, nor fox-hunting directly fits a man for service in defence of his country. All tend to develop nerve, quickness, and precision, and so far help to make a man fitter for successful exertion in war. But they are essentially peaceful sports; and although the fox-hunters of England would very soon prove formidable partisans, the cricketers, as such, would not so readily fall into the ranks. In the old days we had a military pastime; we shot with the bow. We were also adepts at cudgel playing, and in a comparatively recent period wrestling was a national game. Our bowmen must have had some military drill, for they learned to shoot flights of arrows as well as to split willow wands. Since their day, however, until now, we have had no national military sport.

The Rifle movement has supplied us with one. The National Rifle Association is the consequence of the Rifle movement, just as the Wimbledon meeting is a complement to the Review of the 23rd. When an army of marksmen was called into existence, it was just and wise to provide an opportunity of testing their excellence as shots. This collateral issue of the movement has also proceeded on the volunteer principle; and the committee of the Association have found hearty supporters in the highest personages in the land, as well as in the general public. Many and valuable prizes have been given by private individuals, and it may be anticipated that another year will witness a still fuller list of prizes and even an ampler list of competitors.

The meeting at Wimbledon has been so successful that we may regard it as the inauguration of this new national game of rifle shooting. It may be hoped that the example will be contagious: that matches will be made between the picked shots of different corps, that there will be provincial gatherings, and that in due time every county, if not every country town, will have its rifle range, and its annual Rifle Festival. Nothing will help in a greater degree to foster the good old manly instincts and qualities of the British character, and at the same time fit a large numerical force of Englishmen to fulfil the duty of defending their country in the hour of need.

But it would be a great mistake to suppose that mere rifle shooting will constitute a force on which any solid reliance can be placed. A body of the best marksmen in the world would be helpless, if opposed to a disciplined force led by an able general. Unless your marksmen can move with rapidity, precision, and concert, they will be of little use, even behind earthworks. Therefore we must not look upon the shooting at Wimbledon in any other light than as a test of what Volunteers who have obeyed the Hythe regulations can do after a very limited amount of instruction and less practice with ball. Moreover, firing at ascertained distances is an imperfect test of real marksmanship. The question is how would the shooters fire at unknown distances or after the fatigues of a march? Yet it is accuracy on these occasions which constitutes the value of a soldier, considered as a shot. Undue importance, therefore, must not be attached to the displays in the practice-ground; for, in addition to its imperfection as a test of military shooting, it should never be forgotten that it is one thing to fire at a dead, and another to fire at a living, mark.

From what we have seen of ordinary Volunteer firing, we should infer that it would be found very effective up to 400 yards, either against an opposing line of skirmishers or against an assaulting column; while behind earthworks the Volunteer companies would make havoc in the ranks of an assailing and uncovered force at double the distance. Good firing up to 400 yards is a good thing, and may be improved in a year or two into good firing up to 600 yards. For almost all practical purposes this will be found sufficient. Beyond those ranges none but marksmen, that is, a small per centage of the force, will be of certain value. This makes it all the more important that battalion and skirmishing drill should be assiduously cultivated by the Volunteer companies. To be handy and steady, and equal to a rapid march, men must have constant practice. There is no need for any hurry; all that is required is a systematic course of training. And here the importance of good officers comes fully into view. Without good officers the best materials are wasted. We cannot help thinking that the Inspectors of Volunteers could do much towards inciting commandants to bring their corps systematically into shape, and imparting to companies a sound organisation and plan of company drill. At present there is a woful tendency to rush from one movement to another before the first is learned, and all sensible men see and feel that this is sheer folly and waste of valuable time. There can be no reason why Volunteer companies should not closely approximate in their training to the best system of Light Infantry drill; and we are sure that if the men were once systematically taught, they would never forget either the principle or the practice of such movements as it may be deemed useful to teach them.

The interest shown in the Wimbledon meeting is a conclusive proof of the readiness with which Old England welcomes a return to old English ways. Let us hope that the good work begun this week will be carried forward with equal heartiness, and that 1870 will see not only a well-drilled Volunteer army in existence, but will hear the crack of the rifle in the cool of the evening on every village common in Great Britain.

In the Navy List we discover three different classes of officer, represented by the Active, Reserved, and Retired Lists, which the uninitiated might reasonably construe into active, passive, and neuter. But, singularly enough, of the so-termed Active List, the larger half is composed of the latter elements, as will be seen from the accompanying extract from the published lists at the conclusion of the Russian War, when nearly all officers whose services were at all valuable to the country were employed; and we therefore select that period instead of the present, as representing more vividly the requirements of the Navy. The result is as follows:—

	Active List.	Employed on Active Service	Unemployed.
Admirals	98	22 (3 in Admiralty)	76
Captains	392	140	252
Commanders	566	184	384
Lieutenants	1184	670	514

Giving a total of 1226 unemployed officers on the Active List, and that at a moment when war was in full blast.

Now, the question naturally arises, whom does this unemployed column represent? What are they, whose names are therein, doing? and what are they likely to do? We had then been at war for two years, and found that there was no probability of their services being required.

In answer to the first question, it appears that, with some few exceptions amongst the captains and commanders who had recently been as it were advanced to half-pay, it represents the passive and neuter elements of the so-termed Active List. To the second, that they are drawing half-pay, and that their pursuits are eminently domestic, save during their annual irritative persecution of the First Lord, reminding him of their unrequited services, and their anxiety for employment. To the third, that they are likely to do still less, and eventually to be transmitted to the passive and neuter lists. But, be this as it may, this body is generally composed of men whose chances of active employment are, to say the least of it, vague; many have never had much intention of serving since they acquired their present rank; many are in the Coast-Guard, and would be glad to remain there, if they could only perpetuate the lease; many have been active and deserving officers, but were thrown out in the competition with interest, amphibious and political; many are yet anxious to serve. But, generally speaking, their race is run, the country leaves them to the undisturbed enjoyment of their half-pay, but cannot afford to sacrifice its immediate interests to their own, by actively employing them.

This, then, is the composition of that vast body of naval officers who incumber the List and stop the way. This is the body with which the ex-First Lord vainly, but honestly, strove to deal, and with which the present Board have no intention of dealing, unless coerced by the Commons. As for the modicum of retirement they offered last week, it might have merely postponed what they knew ought to be done.

We are far from allowing that out of this vast body of officers there are not many deserving of the highest consideration and respect, but we cannot believe that such a gallant and patriotic body of men, whose lives have been in many cases devoted to the service of their country, can wish that the last act of their honourable career should be an unworthy resistance to what they must well know would be for the highest interests of the Service in which they have earned their glory. Let the Government act generously, and, if honours are required, lavish a whole garden full of laurel; but at any price they must be bought out. Were there no evils arising from this anomalous amalgamation it might be acquiesced in; but there are many—one of which is, that it enables the man of interest, as soon as he has served the necessary time to entitle him to his next step, to arrange himself quietly on half-pay, and then watch his chance. He knows that he cannot get much by serving in command—he will lose money, and besides, may be employed on unhealthy stations. By-and-by, however, an opportunity offers. Friends at home are in office, or abroad hold commands; and with his five or six years' standing, he returns with all its advantages, and his friends award him the first vacancy. For, strange as it may seem, his seniority will enable him either in war or peace, to take precedence of all those who are a day junior to him, though they may have spent the time he has been at ease, in hard work and unhealthy climates; for in the Navy, service afloat or on half-pay counts alike for seniority. Therefore, it would seem that the sooner the sheep and the goats are separated, the more advantageous for the former, for here we have the so-called Active List offering a direct premium for inactivity. Either remove the working portion to a working list, and leave the passive and neuter elements on the retired, or produce a comprehensive scheme of retirement on the following basis:—the compulsory retirement of all officers who have not served afloat since the commencement of the Russian war, and of all those who have, and may attain, the age of sixty, when having devoted threescore years to their country, they may reasonably claim ease and a liberal reward for the remaining time allotted to man, and thereby be enabled to enjoy the sunset of life, and prepare for a better world.

We read in the *Plymouth Journal* of Thursday:—"His Royal Highness the Prince of Wales will arrive in Plymouth on Monday. No official notification of the time, or any of the Prince's movements, had been received by the local authorities up to last evening. The Hero, in which his Royal Highness is to embark, is lying in the Sound. The Ariadne has also arrived. The Channel squadron may be expected in the course of this day or to-morrow; but there is a rumour that they may not come till the day before the Prince is to embark, and that they will not enter inside the Breakwater. It is also stated that no public reception of His Royal Highness will take place; but this statement is not consistent with the fact that the Rifle Volunteers of the eastern division of Cornwall have solicited and obtained permission to be present at the Prince's embarkation, and form a guard of honour as representatives of the county from which His Royal Highness derives his title of Duke."

THE ARMY.

1st Dragoon Guards (King's). Lieutenant Atkinson and Cornets Gough and Greatorex embark for Madras with a draft.

7th Dragoon Guards. Captain Clarke and Cornet Bulkeley are ordered from the Depôt to join the head-quarters in India.

16th Lancers (Queen's). The officers of this regiment had their annual dinner at the Clarendon Hotel on Saturday last. Lieut.-General the Hon. Sir E. Cust, K.C.H., Colonel of the regiment, presided, and was supported by Sir Thomas White, Colonel Foster, Major White, Major Armstrong, Captains Spicer, Irvine, Barclay, Grant, Annesley, Barror, Riddell, Dynon, Halton, &c.

17th Lancers. Captain Goldie and Cornets Blumberg and Robinson embark with a draft from Maidstone to join the regiment in India.

Royal Artillery.—The following Lieutenants of the Royal Artillery, who obtained their commissions on the 19th ult., are ordered to join their respective stations on the 12th proximo, being posted as annexed. Those posted to batteries abroad are requested to join at Woolwich, unless required sooner to embark:—Lieutenant C. Jones, 7th brigade, 5th battery, Halifax; Lieutenant A. B. Brown, to 1st brigade, 6th battery, Woolwich; Lieutenant H. A. Barker, to 1st brigade, 4th battery, Woolwich; Lieutenant H. W. L. Hime, to 11th brigade, 3rd battery, Bengal; Lieutenant C. D. E. P. Smith, to 1st brigade, 2nd battery, Woolwich; Lieutenant L. Downes, to 8th brigade, 2nd battery, Aldershot; Lieutenant B. R. Greig, 8th brigade, 6th battery, Aldershot; Lieutenant J. W. Bernard, 11th brigade, 5th battery, Bengal; Lieutenant J. B. Ormsby, 10th brigade, 5th battery, Alderney; Lieutenant F. A. Hand, 9th brigade, 3rd battery, Curragh; Lieutenant R. Walkey, 13th brigade, 6th battery, Bombay; Lieutenant J. W. Inge, 2nd brigade, 6th battery, Dover; Lieutenant H. W. Browne, 9th brigade, 4th battery, Cahir; Lieutenant A. E. England, 4th brigade, 5th battery, Shorncliffe; Lieutenant W. A. Cook, 2nd brigade, 3rd battery, Dover; Lieutenant E. H. Holley, 3rd brigade, 7th battery, Plymouth; Lieutenant F. H. W. Milner, 9th brigade, 7th battery, Cork; Lieutenant E. A. Fitzroy, 13th Brigade, 8th battery, Madras; Lieutenant G. W. Mulloy, 6th brigade, 10th battery, Corfu; Lieutenant R. J. Hezlett, 3rd brigade, 8th battery, Plymouth; Lieutenant G. A. French, 10th brigade, 4th battery, Alderney; Lieutenant R. D. E. Lockhart, 13th brigade, 7th battery, Bombay; Lieutenant T. Wood, 13th brigade, 2nd battery, Madras; Lieutenant T. M. Hitchins, 4th brigade, 4th battery, Woolwich; Lieutenant F. Galloway, 10th brigade, 7th battery, Portsmouth; Lieutenant J. F. Jenkins, 1st brigade, 7th battery, Woolwich; Lieutenant T. M. Cruttwell, 14th brigade, 2nd battery, Bengal; Lieutenant M. M. Lane, 2nd brigade, 6th battery, Dover; Lieutenant F. C. Nicolas, 14th brigade, 4th battery, Bengal; Lieutenant P. F. Blackwood, 9th brigade, 2nd battery, Ballincollig; and Lieutenant J. A. Campbell, 9th brigade, 4th battery, Cahir.

The following changes in the Royal Artillery are announced in a General Regimental Order:—Capt. Mackenzie, of the Coast Brigade, has been removed from Eastbourne to Manchester, to take command of No. 1 Division, which will be composed of the non-commissioned officers and men of the brigade serving in the Northern Districts; and those of the South-Eastern and Medway Districts will be amalgamated with and form No. 2 Division, under Captain Sweeny; Lieut.-Colonel Longden, from Gibraltar to Malta; Major Simpson, from Dover to Gibraltar; Second Captain Bayley from the Cape of Good Hope to Dover; Second Captain Harris, from Corfu to Dover. An exchange of batteries has been sanctioned between Second Captain Thomas Mahon, of the 1st brigade, and Second Captain Markham le Fer Taylor, of the 7th brigade; also between Lieutenant T. S. Seccombe, of the depôt brigade, and Lieutenant E. H. Thurlow, of the 6th brigade. Lieutenant W. H. Newcome has been transferred from No. 2 battery, 5th brigade, to No. 3 battery, 11th brigade, and has proceeded from Gibraltar to India.

The following General Regimental Order has been issued from the Adjutant-General's Office, Royal Artillery:—"The General Commanding-in-Chief having perused with much satisfaction the following report made by the master gunner at Blatchington to the commanding officer of artillery in the South-Eastern District, and by him forwarded to the Lieut.-General Commanding, relative to the conduct of the non-commissioned officers and men of the Coast Brigade Royal Artillery, in rendering assistance to the crews of vessels wrecked between Blatchington and Newhaven during the severe gale of the 2nd of June last, His Royal Highness desires that the same may be published to the regiment as a special mark of his approval of the gallant conduct of the individuals alluded to:—'The brig Annie was driven on shore opposite the battery about 6 p.m., a heavy sea and tide running at the time, when they, at much risk, rendered valuable assistance in rescuing the crew, six in number, and saving their clothes, &c. This brig became a total wreck about half-past eight o'clock the same evening. At about seven p.m. the schooner Woodside was also driven on shore between the Battery and the Tide Mills. Here the crew had to remain some time in the rigging, on account of the difficulty in approaching them; they, however, were rescued with the exception of one man, who was washed away. The men went into the water in a most perilous position, bringing the crew on shore. The conduct of Gunner C. Leese at this particular crisis was very meritorious in rescuing a boy 12 years old from a watery grave. The humanity of this man deserves particular attention. In addition to the services already described, he was most energetic in procuring a supply of linen, &c., for the crew of the Margaret, which vessel was also a perfect wreck. The above work was no sooner completed when a smack, with a crew (six in number), was driven on shore, and here our men also rendered most valuable assistance to boat and crew.' The names of the non-commissioned officers and men particularly mentioned by Master-Gunner Laird are Corporal David Bannister, Corporal Allan Kay, and Gunner Charles Leese."

The following surgeons and assistant-surgeons recently appointed by augmentation have been posted as undermentioned:—Surgeons Blake, M.D., to depôt brigade, for duty at Shoeburyness; Guy, M.D., to depôt brigade, for duty at Shorncliffe; Fogo, M.D., and Ward, for duty at Woolwich. Assistant-Surgeons Pollard to 2nd brigade, Dover; Whitla, to 15th brigade, Gosport; Mackay, M.D., to depôt brigade, Shoeburyness; Rogers, to 6th brigade, Corfu; Bartlet, to 3rd brigade, Guernsey; Storey, to 15th brigade, Gosport; Adsetts, to 2nd brigade, Jersey; Smythe, to depôt brigade, Woolwich; Cowan, M.D., to depôt brigade, Woolwich; Veale, M.D., to 8th brigade, Devonport.

On Saturday last William M'Bride, a gunner of Royal Artillery, who was an inmate of Woolwich Infirmary, was found in one of the wards with his head nearly severed from his body, and a razor lying by his side. The deceased had been sixteen years in the Service, but had recently given way to intemperate habits, which resulted in delirium tremens.

Royal Engineers.—The following alterations in the stations of officers of this corps have recently taken place:—Major Edwards, late from India, appointed to the Inspector-General of Fortifications Office; Lieut.-Colonel Fanshawe to the West Indies; Colonel C. E. Ford, on sick leave from the West Indies; Colonel Marlow, from Malta, on leave; Captain Cumberland, from India, on sick leave; Captain Frazer, to Ireland; Captain Beaumont, from India, on leave; Captain Gossett, ordered home from the Mauritius; Captain Comes, to command the 25th Company at Aldershot; Captain Magnay, from India, on leave; Lieutenants Lloyd, from Calcutta to Mauritius; Hogg, from Swansea to Pembroke; Bowen, from Chatham to North Britain; Russell, from Chatham to Devonport; Sitwell, from leave to Netley; Wheatly, from Gibraltar, on leave; and Maitland, Webber, and Festing, from leave to Chatham.

Captain C. E. Gordon, late Adjutant of the Royal Engineers, at head-quarters, Chatham, has received orders to proceed to China, to take the command of the 8th company of Royal Engineers.

The ceremony of decorating three non-commissioned officers and three privates of the Royal Engineers with good-conduct medals, which, with money gratuities, had been awarded for long service and meritorious conduct, took place at Brompton Barracks, Chatham, on Saturday, in the presence of the whole of the officers and men of the Royal Engineers now at head-quarters. Colour-Sergeant Clark was awarded a medal and 15*l.* gratuity; Sergeants Dean and Watson, a medal and 10*l.* each; and sappers Avery, Micklewright, and Chesham, a medal and 5*l.* each.

A beautifully executed model, on a large scale, of the siege of a strongly fortified position, has just been completed at the head-quarters of the Royal Engineers, Chatham, by the Sappers at that establishment, under the direction of Captain H. Schaw, R.E. The work, which has been a considerable time in progress, is one of the most interesting of the kind ever completed; and from the exceedingly correct and careful manner in which the whole of the details have been worked out is of the most valuable as well as unique character. The model has been sent to the United Service Institution, where it will be exhibited, and will doubtless attract a considerable amount of interest.

Military Train, 4th battalion.—An affair, which fortunately was unattended with serious results, occurred on Wednesday night, at Shorncliffe. It appeared that John Mayhew, a private in the 4th battalion Military Train was taken to the guard-house for being drunk; he contrived, before being taken, to conceal his 10 rounds of ball ammunition in the breast of his tunic; when placed in the guard-room, he obtained possession of one of the carbines of the guard, and, having loaded it, threatened to shoot any one who approached him. An orderly private, however, rushed upon him. He pulled the trigger, but the cap did not explode. The prisoner will be tried by a general court-martial for this military offence. The sergeant of the prisoners' room is also under arrest, and will be tried by a district court-martial for neglect of duty.

1st Royals. Ensign T. Atkinson and 74 non-commissioned officers and men of the 1st battalion embarked to-day for India.

4th Regiment. The depôt of the 1st Battalion moves from Chichester to Chatham.

8th Regiment. Colonel Longfield has been placed on half-pay in contemplation of the return of the 1st Battalion from India, and his promotion shortly to the rank of major-general. The depôt moves from Chatham to Chichester.

14th Regiment, 2nd Battalion. Captain James D. Mackenzie, of this regiment, has been appointed Assistant-Engineer to the Royal Engineers at Devonport.

24th Regiment. The depôt of the 1st Battalion moves from Chatham to Chichester.

31st Regiment. A draft, consisting of 100 men, under command of Captain G. Bayley, with Ensigns Isaac Parsons and G. M. Lambert, embark in the troop ship Star, for China, to join the service companies.

43rd Light Infantry. Lieutenant H. Gorton, Ensign E. Villiers, Ensign R. M. Tod, 190 non-commissioned officers and men, 1 woman, and 4 children, embarked to-day for India.

Royal Marine Light Infantry.—Private George Coleman, who was arraigned on several charges of insubordination, has been found guilty on all the charges, and in consideration of his former bad conduct is sentenced to 10 years' penal servitude.

51st Regiment. The depôt moves from Chichester to Chatham.

53rd Regiment. The depôt moves from Chatham to Chichester.

74th Highlanders. Captain L. A. Brydon, Ensign N. M. M'Leod, Ensign G. W. M. Hall, Ensign C. H. Dougherty, 138 men, 2 women, and 2 children, embarked to-day for India.

83rd Regiment. The depôt moves from Chichester to Chatham.

91st Regiment. Lieutenant R. P. Jones, Ensign T. G. Elrington, Ensign H. H. Roberts, and 273 non-commissioned officers and men have embarked for Madras from Chatham.

100th Regiment. A letter from Gibraltar of the 26th ult. says:—"A private of the Royal Canadians, named Thomas Wallace, will, early to-morrow morning (8 o'clock), suffer the extreme penalty of the law for having deliberately shot a fellow-soldier of his regiment. When brought before the court-martial Wallace pleaded 'guilty,' avowing at the same time that he committed the deed while in a state of frenzy through hard drink. He is a native of Canada, and only 24 years of age. The court sentenced him to be hung, and, the sentence having been approved by His Excellency the Governor, the execution will take place at Windmill Hill, in the presence of the whole garrison, no civilian being allowed to approach the spot. The murder was committed in the afternoon of the 12th inst., at the North Front encampment, where the corps is now stationed. A few days after this unfortunate occurrence there happened another also in the camp, which might, had not the hand of the assassin been stayed, have proved equally murderous. One of the men, having a grudge against his sergeant, attempted to run him through with his fixed bayonet, but was fortunately checked at the moment by one of his comrades, who seized his arm. This man was tried by a court-martial and sentenced to receive 50 lashes, and afterwards to be imprisoned for two years. The sentence was carried into effect, and he is now undergoing the term of his imprisonment. Last Thursday another man of the Canadians nearly murdered a civilian carpenter, who was working in one of the sheds in the camp. After knocking the man down, it is said without any provocation, he kicked the carpenter on the ground with his heavy boots, and fractured his skull. The trial of this last offender will not take place unitl the carpenter, who is yet in a dangerous state, recovers."

Rifle Brigade.—On Monday night an accident occurred at Aldershot on the canal which separates the North and South Camps, by which a man named Handlay met his death, and several men of the 1st battalion Rifle Brigade narrowly escaped with their lives. It appears that the unfortunate man has, for some time past, been engaged in towing persons across the canal in a punt, after the pontoon bridge, South Camp, has been drawn; and on the evening in question five men of the above brigade, who were returning to their quarters, jumped into the boat, and happening to lean too much on one side, overturned it, and they and the boatman were precipitated into the canal. The engineer on duty did his best to save the men, and succeeded in getting two of them out; the other three scrambled to the bank, and were conveyed to the regimental hospital of the Rifle Brigade. The unfortunate man George Handlay sank, and some time elapsed before he could be got out. Dr. Murphy, of the 12th Regiment, promptly attended, and did everything in his power to resuscitate him, but his efforts were unavailing, and life was pronounced extinct.

7th Depôt Battalion. Lieutenant-General Sir Frederick Love inspected on the 3rd and 4th inst. the 7th Rifle Depôt Battalion stationed at Winchester. He was received in the usual manner. After the battalion had marched past it was formed as a brigade in three battalions, and went through the various evolutions of a retreat and change of front, covered by skirmishers. After the field-day Sir Frederick made a most minute inspection of the kits and small books, and expressed himself highly satisfied with all that he had seen. On the morning of the 4th inst. the general finished his inspection, examining the books, officers in musketry, and interior economy, in the most detailed and searching manner; after which he expressed himself highly gratified to Lieut.-Col. M'Donald, the commanding officer.

Monthly Military Obituary for June.—Field-Marshal: John, Earl of Strafford, G.C.B., G.C.H., Col. Coldstream Guards. General: Sir R. J. Harvey, C.B., Col. 2nd West India Regiment. Lieut.-Generals: Thomas Dyneley, C.B., Col.-Comm. Royal Artillery; Sir Wm. Chalmers, C.B., K.C.H., Col. 78th Foot. Captains: Hon. John H. M. Browne, 80th Foot; George Bell Coulston, 100th Foot; B. C. G. Crookshank, h. p., Sub.-Insp. of Mil.; J. F. Wilson, Unatt.; John Gilleland, Unatt.; Charles Meyer, h. p., 2nd Light Infantry, King's German Legion. Lieutenants: John S. Theobald, 18th Foot; Fred. G. Horn, 20th Foot; Henry Stephen Hodges, 60th Foot; Henry Charles St. George, 69th Foot; Edward Kelly Obbard, 91st Foot; John Marriot Aytoun, 94th Foot, killed in action; A. M. Ayshford, h. p., 12th Foot; John Evans, h. p., 12th Foot; Henry Butterworth, h. p., 35th Foot; Thos. Tatlock, h. p., 62nd Foot; William Smith, h. p., 71st Foot; Cuthbert Eccles, h. p., 83rd Foot; John Buller, h. p., 85th Foot; John Lambert, h. p., 3rd Prov. Bn. Mil.; Gustave de Requefeuil, h. p., Sicilian Regiment. Cornet: Riversdale Elliot, 1st Dragoon Guards. Ensigns: Howard P. Cox, 21st Foot; Francis L. Priestley, 46th Foot. Quartermaster: William Hornby (captain), h. p., 66th Foot. Deputy-Commissary-General: Wm. Fisher Mends. Surgeon: Andrew Anderson, M.D., h. p., 1st class. Assistant-Surgeons: Wm. Jas. Cumming, M.D., Royal Artillery; Thos. Mines, 40th Foot.

The following General Order has been issued:—"Horse Guards, June 29, 1860.—Her Majesty the Queen having been pleased to command that officers serving on the staff as temporary major-generals shall take rank with each other according to the dates of their commissions as colonels, and as junior to all permanent major-generals, but as senior to brigadiers, the General Commanding-in-Chief desires that Her Majesty's pleasure to the above effect may be made known in the General Orders of the Army.—By command of His Royal Highness the General Commanding-in-Chief, James Yorke Scarlett, Adjutant-General."

Grand Review at the Curragh.—A grand military spectacle took place on Wednesday at the Curragh, when between fourteen or fifteen thousand troops performed in a mimic battle, under the command of General Sir George Brown, Commander of the Forces. The morning had not far advanced when all was active in the camp, and the tents in which the Scots Greys, the 3rd Light Dragoons, the 3rd battalion of the Grenadier Guards, the 26th Regiment, and three detachments of the Royal Artillery bivouaced, were full of life and bustle. The hut accommodation on the Curragh is only competent to provide for 10,000 soldiers, and to meet the requirements of the extra troops at present on the Curragh, the tents above referred to had to be provided. Orders to march were given at half-past nine o'clock, and the several regiments left their quarters in admirable order, and formed in column on the eastern side of the camp. The troops on the ground were the Scots Greys, the 3rd Light Dragoons, the 15th Hussars, a battery of the Royal Horse Artillery, the Royal Artillery (3 batteries), a detachment of the Military Train, the 3rd battalion of the Grenadier Guards, the

14th (2nd bat.), 16th (2nd bat.), 96th, 26th, 20th (2nd. bat.) 76th Regiments, and the 4th battalion of the 60th Rifles. The 76th Regiment was pushed on in the direction of Kildare, to represent the enemy, and entrenched themselves in a strong position in the vicinity of the raths which are numerous at the western end of the Curragh. The cavalry formed to the right in advance, and detachments of skirmishers were sent out to harass the enemy. The great mass of infantry advanced in brigades, took up position on the left of the cavalry, and also sent out skirmishers. The troops advanced and the enemy opened fire on the approaching force, which was protected by a terrible cannonade from the horse artillery. The Royal Artillery then opened fire from a rising position in the rear of the centre advancing column. After a great deal of brisk firing the enemy fell back and changed position to the left of the encampment. To resist this movement there was a corresponding change in the disposition of the opposing force, and a portion of the Rifles and a half battery of the Royal Artillery were sent by a circuitous route to turn the flank of the enemy. This movement having been well effected, the firing from the artillery and infantry became general, and having continued for a considerable time the infantry advanced with loud cheering to the charge, which was supposed to have terminated the battle. The review terminated at two o'clock, when the different regiments retired to their respective quarters.

The non-commissioned officers and men of the Royal Engineers at Chatham gave a second performance in the Royal Marine Theatre on Tuesday evening last, in aid of the funds of the Central Association for improving the condition of the wives and families of Soldiers and Sailors. The stalls and body of the theatre were crowded with the officers and troops of the garrison, in addition to whom the officers and volunteers of the Chatham Artillery and Rifle Corps, and the Rochester Rifle Corps, were present. The pieces performed were *The Momentous Question*, *Frederick of Prussia*, and *The Mummy*. The acting throughout was exceedingly good.

INVALID ESTABLISHMENT, CHATHAM.—The continued arrivals of sick and disabled troops from the cavalry and infantry regiments serving in India and the colonies, amounting during the past few weeks to about 2000 men, have had the effect of causing St. Mary's Barracks to become unusually crowded, and notwithstanding that the whole of that establishment has been given up to the invalids, additional space is still required. The staff of officers and non-commissioned officers at the establishment, who are fearfully overworked by the sudden and continued influx of invalids, are unremitting in their attention to the comfort—as far as circumstances will permit—of the large number of invalid troops thus so suddenly thrown upon the establishment; but the experience of the past fortnight has satisfactorily proved, if proof were wanting, that St. Mary's barracks is, from its locality, and other circumstances, probably one of the very worst buildings of the kind that could be appropriated for the reception of our invalid troops, returning from the peculiarly enervating climate of India. On Thursday the large number of upwards of 200 convalescent cavalry and infantry left St. Mary's for their respective depôts, the whole of them having recovered from their wounds or sickness.

In the House of Commons on Tuesday evening, Colonel Lindsay moved for a Select Committee to inquire into the claims of seven major-generals to the pay of general officers, who are now receiving only the half-pay of brevet-majors, and who accepted substantive rank upon half-pay upon the terms and engagements contained in the Horse Guards' Memorandum of the 25th day of March, 1826, and General order of the 25th day of April, 1826. Colonel North seconded, and General Berkeley supported the motion. Mr. Herbert said that this was a question of bargain, and if the claim was a just one it ought to be admitted. But he had come to the conclusion that the terms of the bargain under which the officers in question accepted their rank did not entitle them to the pay of generals. General Peel said that the case came before him officially, when he was at the War Office, and acting not only on his own opinion, but on the advice of military authorities there, he had arrived at the conclusion that a case for that which those officers asked was made out. He thought it would be only fair to grant the select committee. Colonel Sykes and Colonel Dunne supported the motion, and on a division it was carried by 108 to 94.

A question respecting Ship Street Barracks, Dublin, was put in the House on Thursday evening by Sir E. Grogan, who asked the Secretary of State for War why the ground at the corner of Great Ship Street and Upper Stephen Street, in the city of Dublin, which the War Office purchased several years ago, was permitted to remain for so long a time in its present ruinous and dilapidated state; if it were still in contemplation of the War Office to build an addition to the Ship Street Barracks on that ground; and if so, when the works would be commenced.—Mr. S. Herbert said it was the intention of the Government to alter those barracks, but that the opinion of the authorities on the subject had not been received in time to enable a vote in reference to them to be placed in the Estimates.

The case of the disappointed cadets at Sandhurst, which we brought forward in our last impression, came under the notice of the House of Commons, on Tuesday evening, in the shape of a question from General Buckley, who asked the Secretary of State for War, whether, at the recent examination of cadets at the Royal Military College, Sandhurst, 40 passed an examination fitting them for commissions without purchase, and the Commander-in-Chief informed them only 20 could be provided with commissions without purchase, in consequence of the Secretary of State for War not putting more than that number at his disposal. Mr. S. Herbert said that the number of commissions which could be awarded to the cadets at Sandhurst must of course depend on the number of vacancies in the Army. On the occasion to which the hon. and gallant general referred an announcement was made that those young men who had not gained 3000 marks would not be entitled to commissions; and they therefore imagined that the converse of that proposition was true, and that those who had gained that number of marks would have a right to these appointments. But as there were only 20 vacancies, that impression could not be realised. He was glad, however, to be able to add that 11 additional vacancies had since taken place, so that there would be granted altogether 31 commissions, which was more than the average number.

Mr. Bentinck asked the Secretary for War, on Thursday, whether there was any objection to publishing the ages of all candidates for admission into the Royal Military Academy at Woolwich; and whether the Government would supply wrought-iron targets at 3*l.* 1*s.* 4*d.* each on the requisition of officers commanding Volunteer corps, or whether the practice was to direct all officers so applying to buy of the private trade.—Mr. S. Herbert said he would make inquiry, and, if possible, would publish the ages of all the candidates. With regard to the other question, the right hon. gentleman stated that when the government supply of targets was exhausted, the War-office gave permission to officers of Volunteer corps to have them made in their own localities. Since then the Government had received another stock of targets, which were now supplied to Volunteer corps at the cost price of 3*l.* 1*s.* 4*d.* each.

We are informed that Storm's breech-loader has been adopted by the Government.

MR. FERGUSSON AND CAPTAIN TYLER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—If Captain Tyler's letter, which appeared in your last number, involved any question of public interest, it might be worth while to reply to it at length; but, as it is merely a personal attack on myself, its only object being to point out certain inconsistencies he fancies he has discovered between my conversation, my correspondence, and my published works, my answer shall be brief. I cannot fancy the public cares two straws whether an obscure individual like myself changes his opinion on a given subject every Monday morning, and changes it back again every Saturday night, provided he does not publish his inconsistencies to the world; and as everything I have published or that has been published with my knowledge or consent, on the subject of fortification, has been perfectly consistent throughout, there the matter ought to be allowed to rest.

I need hardly add that I decline most distinctly to be bound by anything that any one else may publish in my name, and as it happens, in this instance, in direct contradiction, not only to a written disclaimer, but to a published denial of the correctness of the statement so put forth.

As a member of the Council of the United Service Institution, Captain Tyler has not only the advantage of reporting his own lecture, but, through the instrumentality of his servants, of reporting what I am assumed to have said, and who, it appears, has not only access to my correspondence with Captain Burgess, but, without asking my leave or permission, publishes garbled extracts from these letters without the context, and with his own comments.

By such a process as this a man may easily prove anything he likes, and I can only feel grateful that he has not also published to the world that I have forsaken the faith of my forefathers and turned Hindoo, as well as abjured my fortification heresies. I see so clearly how easily this could be done by the alternate use of extracts from correspondence and from spoken words, that I cannot but rejoice at my escape.

With all due deference to Captain Tyler's superior knowledge, I cannot but think that I ought to be allowed to be the judge whether or not I have changed my opinion on the subject of fortification; it certainly never occurred to me that I had till Captain Tyler undertook to prove that it was so; and, in spite of his overwhelming logic, I still believe that my opinions on the subject are, in all essentials, identical with those I expressed some ten or twelve years ago. I stated this as clearly as I could in my letter which appeared in your columns on the 7th ult., but Captain Tyler knows better. Did he ever read Molière? And though I feel the hopelessness of contending against such an authority, backed by his brother councillors, allow me to reiterate in as strong language as I can use without being libellous what I then said. So far from having changed my views since the publication of my work on fortification in 1849, everything I have since seen or learned has only tended to confirm me more and more in those opinions, and I feel more strongly convinced than I did then that every principle I then enunciated was and is correct, and, I may add, that Captain Tyler's elaborate criticism— *valeat quantum* —has only served to show that no real or solid objection exists or can be advanced against them.

While stating this so broadly, I wish to state as broadly —and as I did at the United Service Institution on the 21st of May—that while the *principles* remain immutable, the *forms* must be altered, in order to keep pace with the improved forms of artillery introduced during the last ten years. If I may be allowed to say so, it appears to me to be the great merit of the system I proposed, that it adapts itself with the utmost facility to the altered circumstance of the case without violating a single principle; and this cannot be said of any other system I know of.

At my own time and my own convenience it is my intention to publish those altered forms, and shall do so whenever I think good can be done by such a process—but there is no hurry. What is true can bide its time, and I can very well afford to allow to Captain Tyler and his backers the little temporary chuckle of triumph which they may obtain by the means they have condescended to resort to for that purpose.

I am, &c.,

J. FERGUSSON.

The Army Gazette.

WAR OFFICE, PALL MALL, JULY 3, 1860.

2nd West India Regiment—Major-General John Wharton Frith to be Colonel, vice General Sir Robert John Harvey, C.B., deceased.

THE NAVY.

ADMIRALTY, July 3.

APPOINTMENTS AND PROMOTIONS.

Captains—Charles Wise (1847), Aide-de-Camp to the Queen, to be Captain-Superintendent of Sherness Dockyard, vice Captain R. B. Watson, C.B.; William G. Luard (1857) to the Formidable, 84, to be commissioned as flag-ship to Vice-Admiral Johnstone, at Sheerness.

Lieutenants—William Seaward (1830) and Edward Hogge (1841) to the Wellesley, 72, at Chatham; Francis W. Bennett (1854) to command the Bloodhound, 3, paddle, at Woolwich; Francis Osburn (1855) to command the Swanage Coast Guard Station.

Masters—Edward J. Maitland to the Adventure, screw store-ship, at China.

Mate to be Lieutenant—John J. Martin, who served in the Atalanta, 16, sloop, on the North America and West India station from January, 1859, until April, 1860.

Second Master to be Master—George H. Dominy (1854), who has served in the Impregnable and Nile since November, 1859.

Chaplain—Rev. Henry Jones to the Blenheim, 60, at Milford Haven.

Paymasters—Edward D. Herbert and John Seldon to the Impregnable, for service as clerks; J. W. Maddock to the Neptune; George Grandidier, Secretary to Vice-Admiral Stopford; John Pittis (additional), to the Victory.

Assistant-Paymaster—N. G. Simmonds to the Imaum; Francis H. Chown, Secretary's clerk to Vice-Admiral Stopford.

Assistant-Surgeon—Richard Radcliffe to the Melpomene. —(Acting): Thomas Cann to the Geyser; Gabriel M. Eyles to the Agamemnon; John Mockridge to the Chesapeake, supernumerary; George E. Farr to the Magicienne; John B. Nicoll to the Centurion; Henry Rickard to the Impregnable.

Clerk—John G. Card to the Pembroke.

Engineers—Jas. Young, 3rd Class Assistant-Engineer, to the Asia, as Supernumerary, for hospital treatment; John Adams, Acting 3rd Class Assistant-Engineer, to the Diadem; Robt. Anderson (b), Acting 3rd Class Assistant-Engineer, to the Himalaya; Josh. V. B. Thompson, Acting 3rd Class Assistant-Engineer, to the Himalaya; Jno. Symons, Acting 3rd Class Assistant-Engineer, to the Wellington, as Supernumerary; Geo. A. Moses, Acting 3rd Class Assistant-Engineer, to the Geyser, as Supernumerary.

July 4.

Paymaster—Henry Gray (a), additional, to the Monarch.

Assistant-Paymaster—M. O'N. W. Markham to the Centurion.

Assistant-Clerk—Chas. P. Skinner to the Aboukir.

Master—John Waye, to the Wellington, for the Desperate.

Second Masters—James Symons, to the Impregnable; George J. Tomlin, to the St. Jean d'Acre; William G. Atkinson, to the Nile; Robert J. Barrett, to the Victory.

Assistant-Master—Thurston Stringer, *to the Bloodhound*; and Percy C. Smith, to the Impregnable; Patrick O'Connor, to the Algiers.

Engineer—John Ferguson, acting 3rd class assistant-engineer, to the Wellington, for the Avon.

Assistant-Engineer (1st class)—Henry Coad Jones, to the St. George.

Assistant-Surgeon—John Bishop, to the Bloodhound.

Adventure, 2, screw steam store-ship, Commander Edward Lacy, was at Chusan on the 26th of April.

Argo, receiving-hulk, Devonport, has been ordered to be broken up.

Armada, Powder Depôt at Devonport, has been ordered to be broken up.

Atlas, 91, screw-steamer, 800 horse-power. The preparations for the launch of this line-of-battle ship, which is ordered to take place on the 21st instant, have been commenced, and a number of shipwrights are employed in preparing the launching ways and other preliminaries for that event.

Bacchante, 51, screw steam-frigate, Captain D. M. L. Mackenzie, bearing the flag of Rear-Admiral Sir Thomas Maitland, which was spoken by H.M.S. Viper, arrived in Plymouth Sound on the 1st inst., in latitude 48° 5′ N., longitude 6° 48′ W.

Blenheim, 60, screw, Captain E. Tatham, was removed out of the steam basin on Wednesday morning to receive her crew from the Eagle.

Brunswick, 80, screw, was taken into dock at Keyham on Monday last.

Buzzard, 6, paddle steam-sloop, Commander Francis Peel, was at Monte Video on the 31st of May. She had lately returned from the Falkland Islands after a fruitless inquiry respecting the Allan Gardiner catastrophe.

Cadmus, 21, screw-corvette, Captain H. S. Hillyar, C.B., was spoken on the 31st May in lat. 31° 41′ north, and in long. 40° west.

Cæsar, 90, screw-liner, Captain T. H. Mason, was in the Bay of Naples on the 30th of June.

Carysfort, 26, once one of our crack and favourite small frigates, has been condemned as unfit for further service at sea, and is to be turned into a hulk for the reception of bedding, at Portsmouth.

Chanticleer, 17, screw. This very smart vessel is progressing towards completion. She has been built in a very short space of time, having been laid down, we believe, since last March.

Coquette, 4. Very little progress has been made in opening up this vessel, built by Messrs. Green, of Blackwall, for the Government. No real opinion of the extent of her rottenness can be given until her outer planking is more extensively ripped off. She has a pair of excellent horizontal engines in her, by Millar, and they are in a good condition.

Cormorant, 4, screw steam-sloop at Chatham, has been placed in the hands of the contractors, in order that her machinery may be fitted.

Cossack, 20, screw-corvette, Captain R. Moorman, was at Bermuda on the 10th of June, but was to accompany the Admiral to Halifax.

Digitized by Google

Dover, iron paddle steam-vessel, put into Lisbon on the 22nd of June for coals, and left again for the coast of Africa on the 25th.

Dryad, 90. The stem of this ship is fixed in position, and a better supply of a much better sort of timber is observable, not only about the frame of this ship, but in the sheds generally. It seems to be principally Italian oak.

Egeria, receiving-hulk, Devonport, has been ordered to be broken up.

Emerald, 51, screw steam-frigate, Captain Arthur Cumming, which conveyed Rear-Admiral Sir Alexander Milne, K.C.B., to the West Indies, arrived in Plymouth Sound on Wednesday evening, and saluted the flag of Admiral Superintendent Sir Thomas Pasley, Bart., acting Port Admiral in the absence of Vice-Admiral Sir Arthur Fanshawe, K.C.B. The Emerald left Bermuda June 10th, under canvass, and has brought a mail from the squadron, and about 30 supernumeraries, invalids, convicts, &c.

Fire Queen, paddle, Master-Commander Paul, lit fires and got up her steam in the steam basin at Portsmouth, on Wednesday, to test her machinery at the conclusion of repairs.

Flying Fish, 6, screw gun-vessel, Commander C. W. Hope, steamed out of harbour on Sunday afternoon, and sailed from Spithead during the night.

Forte, 51, screw steam-frigate, Captain E. W. Turnour, flag-ship of Rear-Admiral Sir Henry Keppel, K.C.B., has been spoken in 12° north and 26° west.

Geyser, paddlewheel steam-sloop, 6, Commander Jackson, was towed on Saturday from the coal ship in Hamoaze to the Devonport dockyard, to be rigged and fitted for sea service.

Glasgow, 51, screw. A great many artificers are employed upon this fine frigate. She is in a very advanced state and is being pushed forward, in order that she may be completed as early as possible. Nearly the whole of her outer planking is worked on her, as well as her inner planking.

Gorgon, 6, paddle wheel-steamer, Commander Bedford C. T. Pim, was at Bermuda on the 10th of June, and it was stated would sail on the following day for England in consequence of the defective condition of her boilers. The Gorgon has only been absent from England ten months, yet this story is current respecting her state. We must leave the authorities at Woolwich to account for her speedy and unexpected return.

Griffin, 5, despatch gun-vessel, Chief-Engineer Mr. Madge, got up steam on Monday at her moorings at Sheerness, under the superintendence of Mr. Napier, of Glasgow, previous to her trial trip, when her machinery will be given up to the authorities. Her engines were found to work admirably. The Griffin is a very fine vessel, built by Pitcher, of Northfleet, and is said to be one of the finest of the class yet turned out of hand. Mr. W. Anstey, of Sheerness yard, had the inspection of her building. The engines are by Messrs. Napier, of Glasgow.

Griper, late in the service of the Coast Guard, has been ordered to be broken up at Portsmouth.

Hero, 91, screw, Captain Seymour, C.B., at Devonport, went out of harbour on Monday, and anchored in the Sound.

Heron, one of the new class screw gun-schooners, arrived at Portsmouth on Saturday, from Messrs. Wigram's building-yard at Northam.

Himalaya, screw-steam troop-ship, Captain John Seccombe, was cast off from the hulk Endymion, in Hamoaze, on Saturday morning, and proceeded out of Plymouth Sound in charge of Commander Paul, of the Devonport dockyard, to try her engines and new propeller; at 6 p. m. she returned and anchored in the Sound, and is to be ready by to-day to embark the Astronomer Royal and suite for Spain.

Lark, schooner, Devonport, has been ordered to be broken up.

Leopard, 18, paddle-steamer, Captain J. F. B. Wainwright, carrying the flag of Rear-Admiral Sir Stephen Lushington, K.C.B., was at Monte Video on the 31st of May.

Linnet, contract-built gunboat, has been surveyed at Chatham, and put out of dock.

Lizard, 1, iron paddlewheel steam-vessel, Lieutenant E. Maunsell, from Sheerness, with stores for the Channel squadron, anchored in the Downs on Thursday.

Lucifer, 3, paddlewheel steam-tender, from Portsmouth, arrived at Plymouth on Saturday, with 150 supernumeraries, including 50 boys for the training ship Implacable, and the same day took on board supernumerary seamen and marines, and sailed again for Portsmouth. The Lucifer was under the command of Master-Commander William Johnson, of H.M.S. Pigmy.

Madagascar, store-ship, Captain R. D. White, was in the harbour of Rio de Janeiro on the 8th of June.

Meander, 44, store-ship, Captain W. F. Burnett, C.B., was lying at Ascension on the 14th of May.

Mullet, screw despatch-vessel, built for the Government at Blackward, is ordered to be completed for service at Woolwich.

Neptune, 90, screw line-of-battle ship, Captain F. A. Campbell, left Naples for Malta on the 25th of June.

Nile, 91, screw-liner, Captain E. K. Barnard, bearing the flag of Rear-Admiral Sir Alexander Milne, K.C.B., was at Bermuda on the 10th of June, but was about to proceed for the summer months to Halifax.

Orion, 91, screw-liner, Captain J. B. Frere. A trial of her machinery was made on Tuesday, alongside the jetty in the basin at Keyham steamyard. She was ordered to be taken out of the basin on Wednesday.

Orpheus, 21, screw-corvette, has been taken alongside the sheer-hulk at Chatham, for the purpose of being fitted for the steam reserve.

Pearl, 21, screw-corvette, Captain John Borlase, C.B., was at Chusan on the 26th of April.

Penguin, screw gun-vessel, at Devonport, went outside the breakwater on Wednesday to try her engines, and afterwards returned to the harbour.

Pigeon, contract-built gunboat, has been surveyed at Chatham and put out of dock.

Plover, 5, screw gun-vessel, was taken into dock at Chatham on Thursday to have defects made good and fitted for service.

Prince Regent, 90. This ship, now being converted, has been found defective in her timbers under her port cathead. They are being replaced with new material.

Racehorse, 4, screw steam-sloop, at Chatham, is now in the hands of the contractors for the purpose of being fitted with her machinery.

Ranger, 3, screw, Commander Henry R. Wratislaw, sailed on Tuesday for the west coast of Africa, and took a mail for Sierra Leone.

Redwing, on Wednesday, conveyed Captain Jerningham, of the gunnery-ship Cambridge, from Hamoaze into Plymouth Sound, where he inspected the crew of the gun-vessel Viper, 4, Commander Hewett, just returned from the African station. The Viper then got up steam, and, while going into Hamoaze, fouled a schooner and carried away her jib-boom. The Redwing, following, fouled the Viper, and carried away her jib-boom. After the crew of the Viper are paid off she will be dismantled and placed in the steam ordinary, but her internal fittings will not be disturbed.

Rinaldo, 17, screw, lighted fires on Monday morning in the steam basin, at Portsmouth, to prove her engines and boilers. Her performance gave the highest satisfaction.

Royal Adelaide, 104, Captain Woodford J. Williams, will be paid off about the 20th of July, and re-commissioned the following day as a training-ship for boys.

St. George, screw steam-ship, 91, Captain the Hon. J. Egerton, was to have been out of the hands of the dockyard artisans at Plymouth on the 4th inst. She received a draught of 35 men from the flag-ship Impregnable on Saturday. This ship is reported to be fitting for the reception of Prince Alfred on his return from the Cape of Good Hope.

Scout, 21, screw-corvette, Captain John Corbett, was at Chusan on the 26th of April.

Simoom, 8, troop-ship, Commander J. M. Cooke, was at Chusan on the 26th of April.

Skipjack, screw gunboat, Lieut.-Com. J. Murray, was at Bermuda on the 10th of June.

Snipe, 2, cutter, has been ordered to be broken up at Devonport.

Sparrow, 2, cutter, has been ordered to be broken up at Devonport.

Spitfire, 5, paddle-wheel steamer, Lieut.-Commander C. O' D. Allingham, was at Ascension on the 14th of May, undergoing repairs.

Sprightly, steam-vessel, Master Allen, left Portsmouth harbour on Wednesday afternoon, with supernumeraries for the Channel fleet, which is not expected to call at Spithead, but proceed down Channel direct for Plymouth.

Steady, new contract-built screw steam gun-vessel, went on Wednesday from Hamoaze outside the Plymouth Breakwater, and tested her machinery a second time.

Styx, 6, paddlewheel-sloop, Commander Vesey, left Bermuda for Newfoundland on the 31st of May.

Terrible, 21, paddle-steamer, Captain H. H. Glasse, C.B., left Plymouth on Tuesday last for the Mediterranean.

Terror, 16, floating-battery, Captain Frederick Hutton, was at Bermuda on the 10th of June.

Thunder, 14, floating-battery, was taken into dock at Chatham on Thursday, and is to be reported when ready for service.

Torch, 5, screw steam gun-vessel, Commander F. J. Smith, fitting at Chatham, has commenced shipping her victualling stores, and has obtained nearly the whole of her seamen. According to present arrangements she will take her departure from this port on the 10th inst.

Tribune, 31, screw-frigate, Captain E. T. P. Hornby, was at Rio de Janeiro on the 8th of June, preparing to leave for England, and may therefore be daily expected.

Victoria, 121, screw, landed her propeller for some slight alteration at Portsmouth yard on Saturday, and reshipped it again on Monday. The trial of this ship's machinery was resumed on Wednesday at Portsmouth with the most perfect success, whether as regards the working of her machinery or the results obtained. The huge mastless vessel steamed out of Portsmouth Harbour at half speed at 11 a.m., in charge of Capt. George T. Gordon, commanding the steam reserve. On clearing the narrow harbour channel the speed of the ship was increased until nearing the Warner lightvessel, when full speed was put on, and the ship's head shortly afterwards brought round and directed towards the trial ground in Stokes Bay. Much interest has been felt as to the results of the Victoria's screw trial, from the power of her engines—1000 horse nominal; and also from the probability of her being the last three-decked ship which will be built in Portsmouth Dockyard. The ship's draught of water was—forward, 18ft. 7in.; and aft, 23ft. 11in. The weather was all that could be desired for the purpose of testing the steaming powers of the ship at her present light draught of water, which, when she has all her weights and crew on board, ready for sea, will be increased by nearly five feet. Six runs were made at the measured mile, with and against the tide with the following results:—1st run, 13·533; 2nd run, 12·631; 3rd run, 14·063; 4th run, 11·803; 5th run, 14·694; and 6th run, 11·323, giving a mean of 13·129 knots per hour. The ponderous machinery worked well in every part, and there was a plentiful supply of steam. Steam pressure was 20 lb.; vacuum, 21 lb.; revolutions of engines, mean, 60; diameter of screw, 20 feet, with 25 feet pitch. The screw is Messrs. Maudslay's adaptation of the common screw with their shifting pitch, removeable and the leading corners cut off. At the conclusion of the sixth run the ship was again steamed out for the Warner lightship, on reaching which her helm was put hard a-port, and she made a complete circle in 4½ minutes. Great difficulty was, however, found in steering the Victoria, as in all other full-powered screw-ship, as, with even eight men at the wheel when under full steam, only 1¾ turn could be got to port and two to starboard. The immense pressure brought to bear on the rudder by the action of the screw, it is well known causes this; still the fact remains the same, and the safety and efficiency of our high-powered ships of war are thereby considerably imperilled. The speed obtained by the Victoria is in advance of any yet obtained by a line-of-battle ship, and the results, so far, may be considered quite satisfactory. She is fitted with Suffield's patent engine-room telegraph. The stokeholes of the ship are—forward 54 feet in length, and containing 20 fires. The after stokehole is 26 feet in length, and contains 12 fires. The engine-room is 31 feet long. Total length of ship's hold occupied by engine-room and stokeholes, 111 feet. The Victoria, at the close of the trial, was brought into harbour, and berthed alongside the Duke of Wellington, at the upper part of the harbour. From the manner in which everything on her upper deck is being housed in, there seems no probability of this fine ship being commissioned at present.

Violet, steam gunboat, Lieutenant and Commander Eugene C. Batty. The defects of this vessel will be made good at Devonport about Monday or Tuesday next.

Viper, 1, gun-vessel, Commander W. N. W. Hewett, V.C., has arrived at Devonport from the Coast of Africa, and has been inspected, and will be paid off at that port. The Viper has been a very successful cruizer during her commission.

Vivid, Admiralty yacht, having been fitted at Woolwich with Mr. J. Lee Stevens's patent regulating air doors, for the prevention of smoke, under a special order from the Board of Admiralty, went down the river on Wednesday, in order to test the advantages of the invention. The trial was superintended by the Commodore Superintendent of the dockyard, the Hon. J. R. Drummond, C.B., Aide-de-Camp to the Queen, accompanied by Mr. D. Patridge, inspector of steam machinery afloat. The result, it is stated, proved that a considerable economy in fuel can be effected by the application of this invention to furnaces.

Wellington, 72, Captain Astley C. Key, C.B., guard-ship of steam-ordinary, Devonport, was inspected on Tuesday last by Rear-Admiral the Hon. F. T. Pelham, one of the Lords of the Admiralty, and it was subsequently reported that a more roomy vessel was to be selected in lieu of the Wellington, and the Indus, 78, has been named. The Indus measures at least 300 tons more than the Wellington.

Vice-Admiral William James Hope Johnstone, on Monday last, hoisted his flag, white at the fore, on board Her Majesty's ship Formidable at Sheerness, and saluted the flag of Admiral Edward Harvey, blue at the main, with 17 guns, which was returned by the Cumberland, 70 guns, Captain Schomberg, with 13 guns.

By the death of Vice-Admiral Sir G. R. B. Pechell, Bart., on the reserved list, Rear-Admiral Richard A. Yates becomes a Vice-Admiral, under the Order in Council of the 25th June, 1851.

Captain Charles Wise (1847), who was lately senior officer on the West Coast of Africa, having been nominated Captain-Superintendent of Sheerness Dockyard (vice Captain R. B. Watson, C.B., resigned on account of ill-health), has taken up his appointment and commenced the discharge of his official duties. Captain Watson held the appointment which he has now been compelled to relinquish exactly one year. His predecessor, Captain Fitzgerald, died before the expiration of his term of service. Captain Halsted, who had command of the steam ordinary at Sheerness for three years, is still suffering from the effects of fever and ague contracted there. It is therefore evident that the climate of Sheerness, to say the least of it, is very indifferent.

By the death of Captain Rundle Burges Watson, C.B., a vacancy has been created in the number of naval aides-de-camp to the Queen. The patronage is vested in the hands of the First Lord of the Admiralty.

The death of Captain Watson brings Captain George Giffard, C.B., on to the 14*s.* 6*d.* half-pay list, and Captain G. S. Hand, C.B., on to that of 12*s.* 6*d.*

Lieutenant F. M. Bennett, who was last week appointed by the Admiralty to command the Bulldog was, it now appears, intended for a very different vessel, the Bloodhound. We saw the mistake, and therefore did not publish the appointment.

Mr. A. J. Armstrong, master of the Gorgon, has effected a change of ship with Mr. David Batt, master of the floating-battery Terror, at Bermuda.

The promotion of Mr. G. H. Dominy, Second Master of the Nile, to the rank of Master arose from the death of Mr. Tarrant, late Master of the Styx, Rear-Admiral Sir Alexander Milne having selected him to fill the vacancy.

The following is a list of the officers of the Royal Navy and Marines, whose deaths have been officially reported since the 20th March last:—Flag-officers on Reserved List: Admiral Edward Hawker, 1853; Vice-Admiral Alexander R. Sharpe, C.B., 1855. On Retired List: Vice-Admiral Robert M. Fowler, 1854; Vice-Admiral Hon. Chs. O. Bridgeman, 1857.—Captains: Stephen G. Fremantle, 1842; William W. Chambers, 1846; Charles Barker, 1850; Augustus F. Kynaston, 1855. On Retired List (H.I.K.): Thomas Heddington, 1851; Richard Stuart, 1856; Adam Cuppage, 1856.—Commanders: James Wood, 1850; James Hunt, 1854; Charles J. P. Glinn, 1856. On Reserved List: William Walker, 1828; William R. Davies, 1853. On Retired List of 1816: John W. Bailey, 1845; William L. Symonds, 1847; Alexander Young, 1854; Benjamin Ashley, 1856; William R. B. Sellon, 1857; Samuel Roscoe, 1860. On Retired List of 1830: William Meadows, 1849; William Snell, 1853; James S. Britton, 1860.—Lieutenants: Tathwell B. Collinson, 1850; George S. Peard, 1859. On Reserved Half-Pay: Charles Okes, 1807; John Jenkins Loney, 1807; John Thomson, 1815; George E. Cocksedge, 1816; William Carpenter, 1824; Alexander Cotton, 1828.—Masters, on Reserved List: Benjamin Hazell, 1804; Samuel E. Pearse, 1811; Alexander Weir, 1828.—Mate: Alfred A. Duff, 1854.—Chaplain: Percival A. Fothergill, B.A., 1859.—Retired Deputy-Inspector-General of Hospitals: William Gladstone, 1840.—Surgeons: William H. B. Jones, 1837; Hugh O'Hagan, M.D., 1846; William Culhane, 1856. On Retired List: Joseph H. Hughes, 1805; Alexander Dewar, 1805; Felix A. Donelly, 1815.—Assistant-Surgeons: John Whitmarsh, 1809; William O. Roberts, 1855. On Retired List: John Lizars, 1809.—Paymasters: George F. C. Bateman, 1847; Thomas A. Telfer, 1852; John M. Forster, 1859. On Retired List: John Warden, 1805; Joseph Jacobs, 1803.—Assistant-Paymaster: John H. Shirreff, 1853.—Royal Marines, Lieutenants on Reserved List: Richard G. Amyott, 1804; Paul H. Nicholas, 1808.

The following names have been removed from the list of the Royal Navy during the last three months:—Lieutenant William B. A. F. Paterson (1854), Paymaster Sydney E. Wright (1855).

In the House of Commons on Tuesday, Mr. Esmonde moved for a select committee to inquire into the present system of nomination to cadetships in the Royal Navy.—Lord C. Paget said he had not heard that any complaint was made against the Admiralty for the mode in which cadets were appointed to the Navy. He was in favour of a limited system of competition for cadetships, but it was found that an examination of boys of 12 years was

Digitized by Google

hardly a test of their fitness for the Service. A system of competition for cadetships in the Marines, who were generally older than the naval cadets, had been established, and, if it should be found to answer, it might be extended to the Navy. Three-fourths of the nominations for cadetships were given to the sons of naval officers as a reward for the services of their fathers.—Mr. Lindsay, in reference to the mode in which the Admiralty exercised their patronage of naval cadetships, said he had made two applications on public grounds for an appointment for a son of the distinguished General Neill.—Mr. Whitbread said that the only ground which the mover of the committee went on was that he wanted to know how the nominations were made; but no complaint was made against the system, or of its being abused. After a brief discussion, on a division the motion was rejected by 81 to 24.—Mr. Esmonde is entitled to the thanks of the public for having made this motion. We shall be glad to hear the statement of Lord Clarence Paget confirmed in reference to "three-fourths of the nominations;" for we rather think the noble lord must, in the hurry of debate, have made a mistake. We would ask, why should Mr. Lindsay have made two applications at the Admiralty for a nomination in favour of the son of that most gallant man, General Neill?

Iron Defences for Ships' Sides.—Workmen are engaged on the sheer jetty in Portsmouth dockyard in putting together Jones's target of ships' angular plate armour. The whole, when placed in position and in readiness to be affixed to the Sirius target-ship, will weigh about 25 tons. Several other targets are already attached to the sides of the Sirius's broadside for experimental gunnery practice. Two of them consist of slabs of 4-inch iron, 15 feet 9 inches each in length, by 3 feet in breadth. One of these consists of three-quarters scrap and one-quarter puddle. The other slab is composed of all scrap iron. Two other targets on the Sirius's side may be termed "chain armour," as it is composed of half-inch round steel bars interlaced with each other, and representing a flat and closely wicker-worked iron hurdle. Six of these are bolted together, and then present a mass of chainwork protruding 11 inches from the sides of the vessel it is intended to protect. Two other targets have yet to arrive, and be attached with the others to the Sirius's side. The experiments will be under the superintendence of Captain R. S. Hewlett, C.B., of Her Majesty's ship Excellent.

Launch of Two Gunboats at Liverpool.—Mr. W. C. Miller, of Liverpool, launched on Thursday from his ship-building yard two timber-built gunboats, named respectively the Heron and the Dotterell. Each boat is 120 feet long and 22 feet wide, and of an actual tonnage of 268 tons. They will be propelled by screw-engines of 40-horse power, from the manufactory of Messrs. Ravenhill & Salkeld, of London.

The Gun-Boats.—We take the following account of the state of the gun-boats at Portsmouth from the *Times*:—"Since our last notice of the condition of the gun-boats in Haslar yard, an order has been received at the Master Builder's office in Portsmouth dockyard from the Lords of the Admiralty, to open up six more of the coppered boats for examination as a means of affording additional evidence for the use of the Gun-boat Commission now holding its sittings. These six vessels are now sufficiently exposed to enable us to offer a few remarks on their state, which will be interesting to the public in general, and may possibly be of use to the members of the Commission themselves. As has been before stated, the sheds at Haslar, underneath which the boats are stowed, consist of a range of zinc-covered roofs, partitioned by brickwork ribs, each partitioned space being arranged to contain 10 boats. The names of the six vessels now under examination are the Skylark and Charger, built by Messrs. Pitcher, of Northfleet; the Fervent, built by Messrs. Green, of Blackwall; the Whiting, by Messrs. Wigram, of Blackwall, and the Raven and Redbreast, by Messrs. Laird, of Birkenhead. The two latter may be the quickest disposed of, as it will be sufficient to say that they are all that could be expected; let them have been built where or by whom they would. They, however, afford a proof, and a most conclusive one, that if a vessel is constructed with proper materials, Haslar sheds will not cause its decay. The remaining four are of about equal value. The Skylark has been found to have had 'dumps' or short bolts freely used in her construction, and her butts are also stated to have been fastened, or pretended to be fastened, by the same means, instead of the through bolt. She has scarcely a timber which does not display sap freely. The Charger, by the same builder, has her timbers in as bad a state from sap as they can well be—they can scarcely be worse. Her fastenings are good. Her planking has been badly worked on to her timbers, so much so that the fingers may be freely passed between her bilge streak and timbers. The Fervent has her timbers showing sap and rot fore and aft. Her planking is badly worked on to her timbers. Her fastenings are stated to have been found good. The Whiting is sap and rot fore-and-aft; not a sound timber in her; no complaint, however, as to her fastenings. The watercourses in nearly all the vessels have, as a rule, been found to have been so entirely neglected in their construction as to stop nearly all communication between the pumps and the water in the ship. The caulking, too, has been found to have been of the most superficial description. The copper on the vessels' bottoms has considerably preserved the elm planking underneath, but this has tended to no saving to the country, except in similar cases to the Redbreast and Raven, as the amount of sappy timbers in the vessels has necessitated the removal of any plank that might be sound on its inside as well as on its outside. No better evidence could be offered to the commission than the six boats we have named above."

The Navy Gazette.

ADMIRALTY, June 26.

Corps of Royal Marines—Gentleman Cadet Charles Cooper King to be Second Lieutenant; Gentleman Cadet Walter Miller Lambert to be Second Lieutenant; Gentleman Cadet Charles Henry Hullett to be Second Lieutenant; Gentleman Cadet Henry Dixon to be Second Lieutenant; Gentleman Cadet William Albert Rutherford to be Second Lieutenant; Gentleman Cadet Thomas Everard Hungerford to be Second Lieutenant; Gentleman Cadet Orlando Robert William Wood to be Second Lieutenant; Gentleman Cadet Edward William Sampson to be Second Lieutenant; Gentleman Cadet Henry Commins to be Second Lieutenant.

THE EFFICIENCY OF THE NAVY.

There is an old adage in the Navy that "one volunteer is better than two pressed men." We have been reminded of this by perusing a brochure which has just been published by Stanford, of Charing Cross, under the title of "The Present State of the Navy; its Defects and their Remedy." The author, who conceals his name under the initials "W. H." is a civilian, but he writes so zealously, and is so much at home in the use of every nautical term, that we feel perfectly warranted in taking up the above antiquated saying and applying it to him. The author dedicates his pamphlet to the Duke of Somerset, and after paying a well-merited compliment to His Grace, proceeds to develop the plan which he proposes to remedy the many existing evils of our naval service. He alludes first to the difficulty which many meritorious officers without "interest" have in obtaining employment, and to the obnoxious system which flourishes as much under the present Board of Admiralty as it ever did when Lord Melville ruled and Croker bullied in Whitehall, of pitchforking a set of men belonging to one family into every desirable vacancy that occurs. He deals with the questions of promotion, pay, and retirement, and recommends as a panacea to cure defects, and remove all heartburnings, the institution of a Standing Navy. Our author is disposed to be very liberal, and in this we are entirely with him, although in the present state of the public finances we do not think he will succeed in converting the Chancellor of the Exchequer to his opinions; but it is only fair to him to say, that he suggests the expediency of diverting the twelve millions, recommended to be spent on the National Defences, to the strengthening of the Navy. Sir John Pakington gave a few weeks back a very dolorous account of the state to which a relative of his, to whom he was about to offer the command of a ship, had been reduced by a previous term of service. Now, if the following suggestion of our author had been adopted we should have been saved the laceration of feelings which the right honourable gentleman's picture caused us:—"To meet the heavy expenses of fitting-out, notwithstanding the Government allowances of furniture, glass, plate, &c., for the use of which, however, a charge is made of 7 per cent., and to enable an officer to entertain at his own table, as he is expected to do, not only his own officers, but, if on foreign or colonial station, the officers of foreign nations (the American and French captains, better paid than our own), also British and foreign officials, the following scale of pay is suggested, to go with the ship, so that whoever is actually in command will alone be entitled to it:—To captains of first and second rates, in addition to whatever class of pay they may be entitled to, at present by seniority, but hereafter by service, 150*l.* per annum; to captains of third and fouth rates, 120*l.* per annum; to captains of fifth and sixth rates, 100*l.* per annum; to commanders in command, 80*l.* per annum; to lieutenants in command, 60*l.* per annum; flag-captains not to be entitled to it, unless they have to keep a separate table, and captains of ships in the home ports and coast-guard ships to receive two-thirds of the above scale. Perhaps, instead of the rating, the tonnage of a ship might be a fairer rule by which to be guided." We can do no more than tender our thanks to "W. H." for the industry he has displayed, and to express a hope that, with the abundant materials at the command of the First Lord of the Admiralty, we shall not have long to wait before seeing the British Navy in the way of becoming that which there is no earthly reason why it should not be—thoroughly efficient.

New Naval Uniform.—The *Gazette* of last night contains the new regulations regarding Naval Uniforms. We have no space at command this week, but we shall give all particulars *in extenso* next week.

THE MILITIA.

Mr. Sidney Herbert received on Friday at the War-Office a deputation to present a requisition signed by 47 colonels and 109 Members of Parliament, directing his attention to the present unsatisfactory state of the Militia surgeons, and urging on him the justice and propriety of placing these gentlemen in a more remunerative and satisfactory position. The following members attended:—Lord Burghley, Sir Edmond Lacon, Sir Henry Stracey, Colonel Dickson, Colonel Vandeleur, Colonel Sir James Fergusson, Colonel Forde, Major Edwards, Captain Gladstone, Captain Esmonde, Hon. Colonel Bernard, Mr. Lefroy, Mr. Beamish; G. B. Childs, Esq., surgeon, Royal London Militia; J. F. Nicholls, Esq., Royal Wiltshire; Dr. Barr, Northampton; Dr. MacCormack, Bedfordshire. Besides the above, several noblemen and gentlemen who had promised to attend, were prevented doing so, in consquence of the unavoidable postponement of the deputation on two successive occasions. Lord Burghley introduced the deputation, and in presenting the requisition, informed Mr. Sidney Herbert that, in addition to those who had signed, 71 Members of Parliament had promised to support the case when brought before the House, and 29 more colonels were favourable, besides those who had signed. After a few remarks from Lord Burghley, he introduced Dr. MacCormack on behalf of the Militia surgeons, who very forcibly and convincingly proved the unsatisfactory position of these gentlemen, and from returns showed that a large sum would be saved to the country by placing the surgeons on the permanent staff, and employing them for all military duties in the head-quarter towns where Militia regiments are stationed. Mr. Sidney Herbert gave the case a most careful and patient hearing, and promised in a few days to give his reply, which he felt unable, from the importance of the subject, to give at that moment.

The Louth Militia have left the Curragh Camp for the purpose of being disbanded. The quarters which they occupied will be appropriated to the 36th Regiment.

2nd Stafford Light Infantry.—A conductor's bâton, of extremely elegant design and highly-fininished workmanship, selected from the establishment of Messrs. Chappell and Hammond, Regent Street, London, has recently been presented by the officers of the above corps to Mr. Weston, their late bandmaster, as a testimonial of the high sense they entertain of the valuable services he has rendered to the regimental band. Mr. Weston has recently joined the 30th Regiment, as bandmaster.

The 5th West York Regiment, which assembled at Knaresborough on the 4th June, under the command of Lieut.-Colonel Lister Kaye, was inspected on the 27th by Major-General Douglas. After the usual battalion movements of a field-day, the officers and non-commissioned officers were called upon to exercise separate companies and squads, and the adjutant put the first musketry class through the new rifle drill. The Major-General expressed his great satisfaction at the efficient state of the regiment, and addressed the men at considerable length, urging on them the necessity of making themselves thoroughly acquainted with their duties, that they might the better discharge the important trust reposed in them, as the protectors of the hearths and homes of their country. The number present was upwards of 400, there being only 13 absentees. In the evening the officers gave a ball at their head-quarters at the Crown Hotel. Dancing was kept up with great spirit in the mess-room, which was handsomely decorated for the occasion, and a pleasant party was brought to a termination at a late hour next morning. The regiment was dismissed on the 30th ult.

The 6th West York Militia (above 500 strong), commanded by Colonel Hind, was inspected at Halifax last week by Lieut.-Colonel Willis, C.B. After undergoing a minute inspection, and having been put through various evolutions, the reviewing officer expressed himself well satisfid with the general appearance and efficiency of the regiment, and said he should make a favourable report of the state of discipline in which he had found it.

The Militia Gazette.

WAR OFFICE, PALL MALL, July 3.

Royal Cumberland Regiment of Militia—Alured Augustus Darby L'Estrange, Esq., to be Captain, vice Sanderson, promoted; Louis Irwin Hoskins, Gent., to be Lieutenant.

WAR OFFICE, PALL MALL, June 29.

Advertisement substituted for one which appeared in the *Gazette* on the 27th April.

Artillery Regiment of Royal Lancashire Militia—Captain Benjamin Remington Williams to be Major, vice Henry Thomas Fyers, resigned.

Memorandum.—Warwickshire Militia—2nd Regiment—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant James Satterthwaite Rudd.

Memorandum—Fife Artillery Regiment of Militia—Her Majesty was graciously pleased on 25th June, 1860, to accept the resignation of the Commission held by Second Lieutenant Cecil Edward Lyon.

Norfolk Artillery Regiment of Militia—First Lieutenant Shovell Henry Brereton to be Captain, by augmentation; First Lieutenant the Honourable Harbord Harbord to be Captain, by augmentation.

Fife Artillery Militia—William Inglis to be First Lieutenant, vice George James Williams, resigned.

VOLUNTEERING FROM MILITIA REGIMENTS INTO THE LINE.

The following Circular has been issued to commanding officers of militia regiments:

"War Office, June 14, 1860.

"Sir,—I have had under my consideration the conditions on which men belonging to the disembodied militia have hitherto been permitted to transfer their services to Her Majesty's regular forces. It is most important to the efficiency of the militia, as a reserve force upon which dependence can be placed in case of national danger, that it should be raised from among men of settled habits, and fixed residence within the county to which the regiment belongs.

"A militia regiment, however short of its quota, which can annually muster as effectives for training the men who have been enrolled, is far more efficient, and contributes more to the security of the State, than one which having a large force upon paper can neither produce nor account for them subsequently. Militia officers, therefore, should not seek to attract temporarily to their ranks men who would otherwise enlist into Her Majesty's regular forces, of whose services the Army is thus deprived, and who, by leaving the militia for the line after receiving the militia bounty, disorganise the militia, while they enter the Army at an increased and unnecessary expense to the public

"The regulations at present in force for carrying on volunteering from the militia to the line will therefore be modified in the following manner:

"Stringent orders have been issued prohibiting any line or other recruiting parties from attempting in future in any way to induce militiamen to leave their respective regiments in order to enlist in Her Majesty's regular forces or marines, militiamen having no more right to do so than men of one line regiment have to enlist in another without the consent of their commanding officer. Such a proceeding on their part amounts to desertion, and will expose them to the penalties attached to that offence, a liability which every opportunity should be taken to make known. Volunteers, therefore, who may be anxious to enlist in the regular Army, should apply for permission to their commanding officers, who will exercise their discretion as to granting their request, bearing in mind the policy of granting conditional releases to men who are bent on enlisting, and over whose movements, except during the one month's training, they have little or no practical control. In such cases, I shall be prepared, on your recommendation, to give you a covering authority for the release of any such men to whom you may think it right to grant the indulgence. But it is to be clearly understood that in all such cases the men will be required to refund 18*s.* 6*d.*, to cover the bounty and other expenses incurred on their enrolment; also any balance of bounty they may have received in advance on account of their first engagement, if re-attested for a second. The Act under which the temporary embodiment of the militia has been sanctioned will expire on the 25th March next, and the entire force will then revert to its normal and constitutional state, as a reserve force, to be annually trained, but not to be embodied except in time of national danger; and there is every reason to hope that, by a careful observance on the part of the Government of the principles on which the militia force is founded, the disorganisation of the regiments of which it is composed will be prevented, and commanding officers will be enabled to reap the fruits of their unremitting exertions to maintain the efficiency of their corps.—I have the honour to be, sir, your obedient servant,

"Sidney Herbert."

VOLUNTEERS.

DUMBARTONSHIRE.

10TH DUMBARTONSHIRE RIFLE VOLUNTEERS.—On Saturday afternoon took place, in a large field near Campsie Junction, the presentation, by Miss Gartshore, of a beautiful flag to the 10th Dumbartonshire (Kirkintilloch) Rifle Company. There was a large assemblage of people on the ground. Immediately after the ceremony another of an interesting nature took place—the presentation of a handsome sword by the Kirkintilloch Company to their commanding-officer, Lieut.-Colonel Gartshore. The presentation was made by Dr. Stewart, surgeon to the corps. Several excellent and spirited speeches were delivered, after which the corps formed into line, and went through a variety of manœuvres in presence of the spectators, the West York Militia Band performing appropriate airs at intervals.

ESSEX.

The Volunteer movement throughout this county betrays no indication of diminished interest; on the contrary, a conviction of its importance and utility appears to deepen with the progressive stages of military knowledge through which the members of the respective corps are passing, and new bodies are springing up in various districts, and organising into a very efficient force. There are, it is true, none of those large corps which have been formed in the manufacturing districts, but there are scattered through the entire county small but compact bodies of men, adapted for the defence of their own localities, and who, if brigaded, would present a very powerful front to any enemy.

CHELMSFORD.—A vacancy having occurred in this corps by the resignation of Ensign J. A. Hardcastle, Esq., M.P., the corps have chosen S. J. Crabb, Esq., as his successor. Mr. Hardcastle has resigned simply because he found the duties of the corps interfered with the discharge of his not less important duties in the House of Commons. This corps, which numbers about 70 effective men, and is under the command of W. O. M. Tufnell, Esq., has commenced ball-practice at a butt erected about two miles from the ground, and notwithstanding the short period since the first cartridge was fired, some very excellent shooting has been witnessed.

COLCHESTER.—This corps has commenced firing by sections upon their new practice-ground near the park of J. G. Rebow, Esq., Wivenhoe Park. The most assiduous attention has been paid by all the members of this corps to manual and platoon exercises, and for general efficiency it stands the first in the county.

DUNMOW.—This corps united with the Braintree and Felstead companies on Monday, and had a field-day in the latter village, where they were joined by the elder youths of the Felstead grammar-school. The skirmishing and firing were very creditably executed, and the evolutions generally betokened the good training of the corps.

HORNCHURCH.—A corps called the South Essex Rifle Volunteer Corps (16th Essex) has been formed in this town, near Romford, and Her Majesty has expressed her approval of it. The officers elected are Peter Edward Bearblock, Esq., Captain; William Mashiter, Esq., Lieutenant; and Richard Dendy, Esq., Ensign.

TENDRING HUNDRED.—This district, which lies at the eastern extremity of the county, has been subdivided, and corps have been formed at Manningtree and Great Bentley. In the latter place the committee guarantee that the cost of the outfit shall not exceed three guineas, and they undertake to supply it to any party requiring such assistance for the sum of 1*l.* 10*s.* In other parts of the county, including Ilford, Brentwood, Witham, Harwich, Barking, and Romford, corps are in existence, and are progressing most satisfactorily. It is expected that during the ensuing autumn there will be a grand inspection of all the Volunteers in the county by some general field-officer.

KENT.

1ST KENT RIFLE VOLUNTEER BATTALION. This battalion, formed on the 8th June last, now consists of the following Kent Rifle Volunteer corps:—3rd (Lee) Company; 4th (Woolwich) Company; 7th (Kidbrooke) Company; 8th (Sydenham) Company; 13th (Greenwich) Company; 18th (Bromley) Company; 21st (Lewisham) Subdivision; 25th (Blackheath) Company; 27th (Deptford, Royal Victoria Yard) Company; 28th (Charlton) Company; 32nd (Eltham) Company; 34th (Deptford, St. John's) Company. Colonel G. E. Thorold, R.F.P., late Lieut.-Col. 92nd Highlanders, and Captain 4th Kent Rifle Company, has been appointed the Lieut.-Col. Commanding; Captain H. B. Farnall, Captain 3rd Lee Rifle Company, has been appointed Major; and Captain Jacson, Captain 7th Kent Rifle Company, has been appointed Adjutant to the battalion, which has its permanent headquarters at Blackheath, and is formed under the 2nd head of the Secretary of State's arrangements for the amalgamation of Rifle Corps, dated February, 1860, *i. e.*, for drill and administrative purposes. The dress of the battalion is dark green, without facings. Accoutrements, black patent leather. Arms, long Enfield, pattern 1853, from Government; and some members have their own short Enfields, of Government gauge. One Company (the 7th) has no Government arms, but is entirely armed (75 members) with short Enfields of their own purchasing, and Government gauge.

5TH KENT ARTILLERY VOLUNTEERS.—A notice is issued by the commanding officer, A. B. B. Brandram, Esq., stating that the members of the corps will meet for drill on Tuesdays and Fridays at 7·30 p.m., in undress uniform.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, JULY 3.

Kent Artillery Volunteers—14th Corps—Captain Philip Thornton, to be Captain-Commandant; Octavius Barrington Piers, Esq., to be Captain; Richard Piper Chaplin, Gent., to be First Lieutenant; Edward Montague Browne, Gent., to be Second Lieutenant.

Kent Rifle Volunteers—39th Company—Maximilian Hammond Dalison, to be Captain; Frederic Devon, to be Lieutenant; Henry Dudlow Wildes, to be Ensign.

Memorandum—Kent Rifle Volunteers—The 1st Battalion comprises the following companies and subdivision:—Nos. 3, 4, 7, 8, 13, 18, 21, 25, 27, 28, 32, and 34.

17th Company of Surrey Rifle Volunteers—Lieutenant Charles Hampden Turner to be Captain; Ensign Granville Leveson Gower to be Lieutenant, vice Turner, promoted; John Henry Sharp, Esq., to be Ensign, vice Gower, promoted.

19th Surrey (or Lambeth) Rifle Volunteer Battalion—Theodore Edward Ladd, Esq., M.D., to be Surgeon, vice Matthews, resigned.

Wiltshire Volunteer Rifle Corps—12th Company—George Cranmer Kenrick, Gent., to be Honorary Assistant-Surgeon.

13th Essex Rifle Volunteers—John Barrett Gordon to be Ensign, vice Alderson, resigned.

6th Essex Rifle Volunteers—Lieutenant John Fitzsimmons Bishop to be Captain, vice Sir Claude de Crespigny, promoted; Ensign Henry Egerton Green to be Lieutenant, vice Bishop, promoted; John Forster Pettikin Osborne to be Ensign, vice Green, promoted.

1st West Riding of Yorkshire Rifle Volunteers (York)—Lieutenant Edward Lloyd to be Captain, vice Briggs, promoted; Ensign Thomas Herbert Severne to be Lieutenant, vice Lloyd, promoted; Richard Leonard Wood, Gent., to be Ensign, vice Severne, promoted.

Memorandum—The 9th (Wakefield), 28th (Goole), and 29th (Dewsbury) Corps of West Riding of Yorkshire Rifle Volunteers have been formed into a Battalion for administrative purposes, with a staff, consisting of one major and one adjutant. The battalion is numbered as the 3rd in the said West Riding, and the several corps composing it will retain their present numbers and designations in the county force.

WAR OFFICE, PALL MALL, JULY 6.

2nd Hampshire Rifle Volunteers—Edward Weatherhead, Gent., to be Lieutenant; Francis Lankester, Gent., to be Lieutenant; Henry Dennett Cole, Gent., to be Ensign; Walter Perkins, Gent, to be Ensign; Henry Clark, Esq., M.D., to be Assistant-Surgeon.

2nd Hampshire Artillery Volunteers—Samuel William Hall, late of Her Majesty's 73rd Regiment, to be Captain-Commandant.

14th Gloucestershire Rifle Volunteers—Sir Alexander Ramsay, Bart., to be Captain.

7th Gloucestershire Rifle Volunteers—Reverend Fraser Handcock, Honorary Chaplain.

8th Lancashire Artillery Volunteers—Captain William Clay to be Captain-Commandant; First Lieutenant George Swainson to be Captain; Second Lieutenant John Clay to be First Lieutenant; Charles Inman, Gent., to be First Lieut.; Edward Cox, Gent., to be Second Lieutenant.

1st Battalion of Lancashire Rifle Volunteers—Assistant-Surgeon Robert Thomas Lodge, M.D., to be Surgeon.

Warwickshire Rifle Volunteers (Birmingham) 1st Battalion—Henry Rose, Gent., to be Ensign.

9th Hertfordshire Rifle Volunteers—William Parker, Gent., to be Captain; Charles Cass, Gent., to be Lieutenant; James Collyer, Gent., to be Ensign.

7th Surrey (or Southwark) Rifle Volunteer Battalion—Lieutenant James Vogan to be Captain; Ensign Alfred Barry to be Lieutenant; Robert Golding Ledger, Gent., to be Ensign; George Charles Porter, Gent., to be Ensign.

35th Staffordshire Rifle Volunteer Corps—Offley Francis Drake Wakeman, Esq., to be Captain.

6th North Riding of Yorkshire Rifle Volunteer Company—Lieutenant Tindall Hebden to be Captain; Ensign Harcourt Johnstone to be Lieutenant; William Hebden, Gent., to be Ensign.

London Irish Rifle Volunteer Corps—William O'Connor, Esq., M.D., to be Surgeon.

Isle of Wight Rifle Volunteers—1st Battalion—Lieutenant-Colonel Charles Dunsmure, late 42nd Highlanders, to be Lieutenant-Colonel; Captain Sir John Simeon, Bart., to be Major.

8th Company—Benjamin Temple Cotton, Gent., to be Lieutenant; William Charles Plumley, Gent., to be Ensign.

Memorandum—The 2nd Company of the Perthshire Rifle Volunteers has been incorporated with the 1st Company, and Her Majesty has been graciously pleased that Captain George Moncrieff, of the 1st Company, shall bear the rank of Captain-Commandant.

1st Cumberland Artillery Volunteers—John Bateman Wilson, Esq., to be Honorary Assistant-Surgeon.

3rd Fifeshire Artillery Volunteers—David Archibald, M.D., and Surgeon, to be Honorary Assistant-Surgeon.

5th Fifeshire Rifle Volunteers—Thomas Hodge to be Lieutenant, vice Sir Charles Metcalf Ochterlony, Bart., resigned; Walter Fogo Ireland to be Ensign, vice Thomas Hodge, promoted.

8th Fifeshire Rifle Volunteers—Robert Mungall, M.D., and Surgeon, to be Honorary Assistant-Surgeon.

ERRATA in *Gazette* of May 1.

1st Fife Rifle Volunteers—For John Laudah, read John Landale, to be Lieutenant.

4th Fife Rifle Volunteers—For William Robertson Ketchen, read William Robinson Ketchen.

5th Fife Rifle Volunteers—For Walter Thomas Hilton, read Walter Thomas Milton, to be Captain.

Kent Rifle Volunteers (2nd Battalion)—The 11th, 14th, 17th, 23rd, 33rd, 35th, and 39th Companies and subdivisions have been formed into a Battalion, and which has been numbered as the 2nd in the county of Kent; the several Corps composing such Battalion will retain their present numbers and designations.

1st Clackmannanshire Rifle Volunteer Corps—Alexander Mitchell, Esq., to be Captain-Commandant; William Bennet Clark, Esq., to be Captain; John Bald Harvey, Esq., to be Lieutenant; William Paton, Esq., to be Lieutenant; Robert Buchanan, Esq, to be Ensign; John Younger, Esq., to be Ensign.

2nd Clackmannanshire Rifle Volunteer Corps—James Snowdowne, Esq., to be Captain; Robert Walker, Esq., to be Lieutenant; John Vicars, Esq., to be Ensign.

87th Lanarkshire Rifle Volunteers (Busby)—The Reverend James Dick to be Honorary Chaplain; John Ross, Esq., M.D., to be Honorary Assistant-Surgeon.

City of Edinburgh Rifle Volunteer Corps—Ensign George Simson to be Lieutenant, vice Macgibbon, promoted; David Crerar to be Ensign, vice Simson, promoted.

1st Edinburgh Engineer Volunteer Corps—John Miller, Esq., to be First Lieutenant; James Campbell Walker, Esq., to be Second Lieutenant.

1st Zetland Rifle Volunteers—John Cowie, Esq., M.D., to be Honorary Assistant-Surgeon.

The following Appointment is substituted for that which appeared in the *Gazette* of the 26th June last:

4th Durham Rifle Volunteers—Matthew William Stobart, Gent., to be Lieutenant. Dated 19th June, 1860.

The following Appointments are substituted for those which appeared in the *Gazette* of the 19th June last:

East York Artillery Volunteers—Hull Brigade—Simeon Mosely, Esq., to be Captain in augmentation; Charles Copland, Esq., the younger, to be Second Lieutenant in augmentation.

Toll charges are still a vexed question as regards the Rifle Volunteers, some of whom, in sundry communications, complain of the questioning to which they are subjected on passing some of the bridges, Waterloo being a favourable exception, while Hungerford, Vauxhall, and one or two others are cited as rendering the rifle corps passengers liable to disagreeable and inquisitorial remarks as to their being on drill, &c. In some instances the toll-keepers appear to have received instructions "to accept the toll when proffered, but not demand it." This obviously leaves the matter an "open question," which it is very desirable should be settled as soon as possible upon legal or magisterial authority.

THE FORTHCOMING VOLUNTEER SHAM-FIGHT.—It has now been finally determined that the sham fight and bivouac of the Metropolitan Volunteer Corps shall take place on Saturday, the 14th July, on a large tract of land lying between Bromley and Chislehurst in Kent. It is understood the Volunteers will assemble on the ground on Friday afternoon, the 13th, when a sort of rehearsal of what is to be done on the next day will take place between the various corps engaged. The War Office, it is understood, is to provide the tents, cooking, and other necessary apparatus, and as evening approaches the various corps will pitch their tents, and the contending armies are to form their own encampments. It has been announced that the actual expense to each Volunteer attending is not to exceed 2*s.* per man, including railway fare to the field of evolution and back again to town. Every movement is to be carried out by the sound of the bugle, and the sham fight will commence about 11 o'clock on the Saturday morning, and conclude about three in the afternoon, so as to enable the Volunteers to reach town again before evening.

[ADVERTISEMENT.]—MAPPINS' RIFLEMAN'S KNIFE, 12*s.* each.—"No Volunteer should be without one: invaluable for campaigning."—Manufactured by MAPPIN BROTHERS, Queen's Cutlery Works, Sheffield, and 67 and 68, King William Street, London Bridge, E.C.

FACILITIES FOR VOLUNTEERS TRAVELLING BY RAILWAYS.

The following document has been issued from the War Office to commanding officers of Volunteer corps, in reference to the charges to be made to Volunteers when on duty and in uniform:

"War Office, Pall Mall, 30th June, 1860.

"Sir,—I am directed by Mr. Secretary Herbert to acquaint you that, having placed himself in communication with the various railway companies in Great Britain, with a view to the extension to the members of the Volunteer force privileges similar to those which are granted to Her Majesty's military and other forces when proceeding by railway, the following companies have kindly consented to convey Volunteers, when on duty and in uniform, at the undermentioned rates:

"Blythe and Tyne Railway Company, Stockton and Darlington Railway Company, Taff Vale Railway Company, Deeside Railway Company, South Eastern Railway, London and South Western Railway, London, Brighton, and South Coast Railway, Great Western Railway, Great Northern Railway, North Eastern Railway, West Hartlepool Railway, Maryport and Carlisle Railway, Midland Railway.

"In accordance with the provisions of the Act 7th and 8th Vict., cap. 85, sec. 12, viz.: At fares not exceeding 2*d.* per mile for each commissioned officer proceeding on duty, such officer being entitled to conveyance in a first-class carriage; and not exceeding 1*d.* per mile for each soldier, such soldiers being conveyed in carriages which shall be provided with seats with sufficient space for the reasonable accommodation of the persons conveyed, and which shall be protected against the weather.

"London and North Western Railway, and Oxford, Worcester, and Wolverhampton Railway: First-class, 2*d.* per mile; in carriages protected from the weather, 1*d.* per mile, on producing route. Bristol and Exeter Railway: The double journey at single fare. North Staffordshire Railway: 1½*d.* per mile second-class, for going and returning; officers 2*d.* per mile first-class; to go and return for 3*d.* per mile, or fare and a half. South Devon Railway: First-class to officers, first or second to privates, at Government fares, on giving verbal assurance that the Volunteers are going to drill, &c. Eastern Counties Railway: First-class, 2*d.* per mile; second-class, 1*d.* per mile. Great North of Scotland Railway: First-class, 2*d.* per mile; third-class, 1*d.* per mile.—I have the honour to be, sir, your obedient servant, DE GREY AND RIPON.

"The officer commanding —— Volunteer Corps."

REVIEW OF NORTHERN VOLUNTEERS.—The proposal made for a general gathering of the members of the different Volunteer Rifle Corps in the North of England is likely to be carried out in an imposing manner. A circular has been sent by Sir John Fife, the Lieut.-Colonel of the Newcastle Volunteers, to the commanding officers of all the northern corps, asking them, if they approve, to sign the following memorial, which, Sir John says, will be presented when signed, to Her Majesty by the Right Hon. the Secretary of State for War:—"May it please your Majesty,—We, the commanding officers of your Majesty's Volunteers of the Northern Counties of England, humbly beg to approach your Majesty with the expression of our loyalty and attachment to your Majesty's person and throne, and to avow our readiness, as in duty bound, to assist in defending both, if ever assailed by foreign or domestic foe. Impressed with the conviction that a review and inspection by our gracious Sovereign of all our comrades who could muster on the occasion would prove most grateful to their zeal and devotion, and afford, we trust, gratifying evidence of their ability to aid in case of need the military force of the kingdom, we humbly solicit the honour at such time and place as your Majesty may be pleased to command."

PRESERVATION OF LIFE FROM SHIPWRECK.—On Thursday a meeting of the Royal National Life-Boat Institution was held at its house, John Street, Adelphi. Sir Edward Perrott Bart., V.P. in the chair. Mr. Lewis, the secretary, read the minute of the previous meeting. A reward of 5*l.* 2*s.* was paid as expenses on the Alnmouth life-boat, which rows only four oars, in putting off and rescuing the crew of eight men from the brig Ann of Blyth, which during a gale of wind was wrecked near Alnmouth, Northumberland, on the 12th ult. It was reported that the shipwrecked crew had hardly been taken off before the wreck's mast fell, providentially clear of the life-boat, otherwise every one on board of her would have been instantly killed. A reward of 8*l.* was also voted to the crew of the Shoreham Harbour life-boat for their persevering exertions, aided by the coast-guard, in rescuing, after three noble attempts, and at the peril of their lives, the crew of nine men from the brig Pike of Shoreham. Rewards amounting to 39*l.* were likewise voted to the crews of the Institution's life-boats stationed at Newhaven, Brighton, Camber, Boulmer, and Seaton Carew, for either going off with the view of saving life or assembling their crews so as to be ready for any emergency during the heavy gales which prevailed at the beginning of last month, the effects of which will long be remembered. The Silver Medal of the Institution was granted to Gunner Leese, and 2*l.* to Corporals D. Bannister and Allen Kay in acknowledgment of their gallant conduct in aiding to rescue the crews of the brig Annie of Shoreham, and schooner Woodside of Shields, which were wrecked between Bletchington and Newhaven, on the Sussex coast, during the heavy gale of the 2nd ult. Various other rewards were also voted for saving life from wrecks. Measures were about to be taken by the Institution to supply, wherever practicable, each of its life-boat stations with an excellent barometer to be specially manufactured by Messrs. Negretti & Zambra. The Duke of Northumberland, president of this Society, had some time since given orders to supply the fishing villages on the Northumbrian coast with similar instruments. It was reported that some members of the Society of Friends had decided on presenting the cost of a life-boat to the Institution, and on subscribing annually towards its future maintenance. If other denominations or large towns throughout the kingdom followed this laudable example, our coasts would soon be covered with life-boats. It was satisfactory to find that public meetings, in aid of the objects of the

Digitized by Google

National Life-Boat Institution, had last week been held in Sheffield and Bradford. The Duke of Newcastle, Secretary of State for the Colonies, had kindly promised to forward the instructions of the Institution for the Restoration of persons apparently dead from drowning, to all our colonial governors. Reprints from Australia of the pamphlet of the Institution, on the management of boats in heavy surfs, and of its life-boat regulations, were produced at the meeting. Payments amounting to 455*l.* having been made on various life-boat establishments, the proceedings closed.

THE ARMY AND NAVY CLUB AND MR. STONE.

In the course of the action which Mr. Stone brought against Lord Llanover in the Court of Queen's Bench, it appeared, on the evidence of the plaintiff, that he was a member of the Army and Navy Club. By the 4th rule of the club it is provided that :—

"In case the conduct of any member, either in or out of the club-house, shall, in the opinion of the Committee, or of any fifty members of the club, who shall certify the same to them in writing, be injurious to the character and interests of the club, the Committee shall be empowered to recommend such member to resign ; and, if the member so recommended, shall not do so within a month from the date of the letter of such recommendation, the Committee shall then call a general meeting of the members, and if a majority of two-thirds of that meeting agree to the expulsion of such member, his name shall be erased from the list, and be for ever afterwards ineligible for re-election, except under circumstances set forth in the preceding rule ; provided that no such recommendation be sent to any member unless the resolution to send the same shall have been agreed to by two-thirds of the members of the Committee actually present, all of whom to have been specially summoned for that purpose. Provided also that if, on the meeting of the Committee specially summoned, they unanimously are of opinion that the offence of a member is sufficient for the interests of the club to warrant his immediate expulsion, they be empowered to suspend from such member the use and advantages of the club until the next extraordinary or general meeting of the club."

Acting upon this rule, the Committee met a few days after the trial had concluded, and affixed the followed notice in the principal rooms of the club :

"The Committee give notice that an extraordinary general meeting of the members of this club is summoned to take place on Saturday, the 14th July next, at 2 o'clock precisely, for the purpose of confirming the summary suspension, by the Committee, of a member, under the 4th Rule. (Signed) HENRY MURRAY, Chairman,
(and the other Members of the Committee)."

"Army and Navy Club, 27th June."

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance ; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

WILLIAM O. MITCHELL,
MILITARY BOOKSELLER AND PUBLISHER,
39, CHARING CROSS, LONDON, S.W.
Catalogues sent on application.

NEW THEATRE ROYAL, ADELPHI.—Sole Proprietor and Manager, Mr. B. WEBSTER.

Volunteer Bands furnished with instruments and music of every description.

NOTICES TO CORRESPONDENTS.

When we assure our correspondent "Veritas" that the officer of the Fusilier Guards to whom we happened to allude as an Acting Brigadier at the Curragh Camp last year was not Colonel Seymour, he will see that we are not called upon further to notice his remarks.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, JULY 7, 1860.

Upwards of a month has now elapsed since there was placed upon the table of the House of Commons, a Return of men entered in the Navy in 1859, and of the numbers deserted and apprehended, and of bounty paid to them. It was moved for by Sir Charles Napier. It was prepared and presented accordingly; but, except three lines in the newspapers noticing a few of its results, nothing more has been since heard of it. We are aware that this is the ordinary fate of the very numerous Returns prepared for Members of Parliament. If we "perish" politically, as a people, it will not be "for lack of knowledge;" for at all events our representative institutions keep us well supplied with facts and statistics, which would indeed be extremely satisfactory, were it not that the barrenness of facts has also become proverbial. Our own opinion is, that each Member of Parliament who moves for a "Return" shall state "the reasons why," and afterwards make some use of the facts he thus obtains. Though it may not have taken the form of a positive expression in words, we are certain the question has been asked in thought by many, when a Return has been moved for by some dull "Honourable Member,"—What will he do with it? The answer to this question might, however, generally be—Nothing!

The gallant admiral who moved for this Return of desertions of bounty men, had no doubt a purpose in doing so. He had a notion that desertions had increased in consequence of bounty being paid; but the Return being somewhat negative on this point, compared with previous Returns of desertions from the Navy, he has not honoured the document on this subject with any further notice. But let us assume that there is nothing abnormal in the number of desertions shown in this Return. Are its facts all therefore "barren," and is nothing to be made of them?

Let us see what it contains. It informs us that, in the year 1859, no less than 2338 seamen deserted from the Royal Navy; and if this is about the usual number of desertions, the fact may be regarded as barren as to the effect of bounty upon desertions. But let us go a little deeper, and think. Of these deserters, 712 received bounty, amounting to 4571*l.*, or an average of 6*l.* 8*s.* 4*d.* each, which was lost by their desertion, and would have been saved had bounty not been granted. Now, 6*l.* a year represents 4*d.* a day; and we would ask, what would be the probable effect as regards desertion, if, instead of paying this money as bounty, it was thrown into wages? One result would certainly be that the man who served a year would get it, while, as to those who deserted, it would be saved. One other certain result would be that the seamen would really get it for themselves and families, if they earned it as wages; whereas probably three-fourths of all that is nominally paid to them as bounty goes to crimps, women, and in drink. The public pay the money, but Jack gets little or none of it.

There is some imperfection in this Return for the purposes to which we are applying it. It gives 712 deserters who received bounty, and the remaining 1626 are put down as "deserted without bounty," the numbers of those who were paid "half-bounty," and the amount, being omitted. If we abate one-fourth of the 1626, as having deserted early in the year, before the bounty proclamation, we shall probably be near the mark. This will leave 1200 half-bounty men as deserters; and taking the half-bounty at 3*l.* 4*s.* 2*d.* per man, being half the full bounty average, we have then 3850*l.* in addition to the 4571*l.* shown in the Return, as that thrown away in 1859, in the shape of bounty and half-bounty paid to deserters. Again we therefore ask, what would be the probable effect, if this money had been added to wages, not to be paid till earned, instead of being given in a lump sum on entry as bounty?

Nor is this all. In the bounty proclamations last year, men were also to receive mess-traps and bedding gratuitously on entering the Navy, instead of being charged with their value at a moderate estimate as formerly; and all men entering for 10 years' service were to have clothing given to them, in addition, of the value of 2*l.* 12*s.* 6*d.* each man. The loss to the public thus arising from the deserters who had these boons conferred upon them is also omitted from the Return. The value of these articles will probably average a sum representing another 3*d.* per day, if converted into wages.

Instead, then, of bounty and these boons, the wages of seamen in the Navy might be raised from 6*d.* to 7*d.* a day above their present rate, without any grant of more money from Parliament. And, once more, we ask—with what probable result? 1st. A rush of seamen to the fleet, till men were refused. 2nd. The saving of what has not been earned unpaid, when men desert. 3rd. The great decrease of desertion itself, which would practically cease (except in the case of scamps, well out of the Service), as men would be most anxious to remain in the Navy were wages so raised. 4th. The Queen's ships must have the pick of the merchant service, and we should have an unlimited Reserve, always ready to join the Navy when men could be entered. 5th. The saving of short-service pensions, there being no necessity then for such inducements to attach seamen to the Navy. And, 6th, besides many other indirect advantages affecting the whole tone of the Service—a smaller staff of officers raising men, and of ship police, and a consequent saving in these respects.

But this Return of "barren facts" is pregnant with still further matter worthy of consideration. Of the whole deserters in 1859, three-fourths were petty officers and able seamen; while of those who received bounty and deserted, no less than 466 were petty officers and able seamen, and only 246—about one-half—were ordinaries and landsmen. What a lesson ought this to teach us? It is precisely to the petty officers and A.B.'s our faulty system of bounty holds out the greatest bribe to join the Navy; and it is precisely to these men that we afterwards give least pay, compared with the wages they can earn in the merchant service. The bounty paid to the 466 A.B.'s amounted to 3666*l.* 10*s.* being an average of nearly 8*l.* per man. The increase of wages in lieu of bounty and gratuitous clothing and bedding, ought therefore to be greatest as regards these men. When we cease to tempt them with large bounty, and when we pay them higher wages, they will enter the Navy soberly and with a settled preference for it. Those who enter the Service will then remain in it and not desert, as the greatest inducement to desertion will be at an end.

We hope and pray that the omen of our peaceful occupation of Chusan may be auspicious, that we may not be called upon to renew the massacres of Chinghae and Ningpo, and that, even at this ninth hour, some loop-hole may be found to escape from the toils of a mad and mischievous policy of our own weaving. In folly it resembles the recent act of the mischievous fool, who for a lark toppled over the rocking-stone in Cornwall. A very small impulse sufficed to send the tottering mass crashing and thundering down the cliff, but "all the king's horses and all the king's men" might have vainly exerted every effort to replace and poise it on its base again. So with the present weak and unfortunate government of China, which, though long, shaky, and tottering, ruled over half the world's population, after a fashion of its own, but pretty efficiently till we meddled with it. A very slight shock will now overthrow it, and no earthly power will be able to replace it, and we, the agents of the mischief, must repair as well as we can the evil work of our hands.

The same hands which overturn the present rule must be prepared to take up the reins; for no one can doubt that the hostile occupation of the capital of a country so centralised as China, will be as decisively subversive of credit, confidence, and order, as a similar occurrence to our own capital, the disastrous condition of which under such a calamity has been so recently described.

Our success will bring with it its own punishment, and, once entered into Pekin, we may find that we have caught a Tartar indeed; that we can only release our capture at our proper peril, and that it may be quite as impracticable to recede from conquest in China, as in India and South Africa.

Apart from the question of humanity, which should compel us to extinguish the conflagration, and to quell the anarchy we cause, we are bound to maintain

Digitized by Google

order in our own heavy recognisances of 10,000,000*l.* of revenue derived from duties on opium and tea, independently of the profits on our commerce, and, but for our equivocal policy, an increasing trade. We are increasing our expenditure and jeopardising our income at the same time, when, under favourable circumstances, they can barely be made to balance one another.

With the prospect before us of finding it as impossible to leave Pekin, as Canton, after having once entered it as conquerors, we must be prepared, at the base of operations, not only with everything which may be required for an army in a Siberian winter, but also with the means of subsistence for the population, whose usual supply of food from the south will certainly be interrupted by our presence in the Gulf of Petcheli; the only other channel of communication—the Grand Canal—being intercepted by the rebels. Our own interest will compel us to look to this; for if famine, with pestilence in its train, fall upon the people, our own troops will not escape scatheless from the contagion.

The Emperor and the court, if they do not resort to *suicide*—the Chinese mode of meeting political difficulties, consecrated by previous imperial examples—will not improbably retire to Jehal, the Emperor's summer residence in Tartary, which, though an unpleasant alternative in the winter for themselves, will be embarrassing to us, as it will leave on our hands the Government of Pekin, and of the Empire; and we shall, in all other respects, be as far from the final settlement of our difficulties as ever. If then, as may be expected, civil war, brigandage and anarchy spread to the rich provinces where the rebels have hitherto been kept at bay by the Imperial Government; and if the Tartars, unrestrained by the presence of their own imperial race in China, break in along the unprotected frontiers extending from Hindostan to the Amoor, we shall have created an amount of mischief, which will make a set-off against all the good we may have been able to accomplish since we became a nation.

Russia will look on with glee; for while we and China are doing ourselves mutual harm, she stands by and collects the spoil. While we were busy at mischief in Canton she acquired Saphaliere and part of Mantchouria. Our presence at Pekin will justify her annexing Corea and the remainder of Mantchouria, whence she can exercise an overwhelming influence over Japan. We have already afforded a pretext for a further advance by our occupation of Chusan and Footo, and by the ominous pact we have made with the French for a division of the plunder which is to gild our unholy alliance.

Once entered on this path of evil and mischief, we can see no outlet or escape. We have arranged to share the spoil; we may be dragged or driven into a partition of the provinces, and the wretched people, not impossibly, may quarrel with both French and Russians regarding the proportions into which the shares are to be divided—for he "maun hae a lang spune whae'd sup wi' the deil."

The Military Organisation Committee met again yesterday for the further consideration of their Report. From all we hear there is not likely to be an unanimous decision respecting the larger questions upon which the recommendations of the Committee are sought; but we believe that a clear definition will be given of what ought to be the respective duties of the Secretary of State for War and the Commander-in-Chief, as well as their relative positions towards each other. At present the commission of the Secretary of State excepts from his jurisdiction the discipline and patronage of the Army, and we are inclined to anticipate that this exception will not be permitted to continue. The effect of this will be to make the Commander-in-Chief formally and virtually the subordinate of the Minister responsible for the conduct of the department.

We are glad to find that Mr. Sidney Herbert has made some concession respecting the Sandhurst cadets, whose case we brought before the public last week. Besides the twenty commissions without purchase, promised by the Duke of Cambridge, eleven more are now to be given; and, as we believe seven or eight more would provide for all who passed the examination, we trust that full justice will be done eventually to these young gentlemen. Mr. Herbert seemed to think that because the cadets were told that no one would be appointed who did not obtain 3000 marks, they had no right to assume the converse, and suppose that every one attaining that number would be appointed to an ensigncy without purchase. Strictly speaking, they were not justified in so arguing, although Government announcements ought to be made in so clear and distinct a manner that there could not be left such an excuse for the hypothesis as might be fairly pleaded in the present instance. But Mr. Herbert did not think proper to allude to the rule under which these students entered the Royal Military College, and on the faith of which the parents of the young gentlemen spent their money in giving them a military education. That rule we quoted last week, and it distinctly promised that commissions would be given to those who passed, not a competitive, but a qualifying examination.

Judging from the number of letters we receive respecting uniform, there appears to be an impression among the officers of the Army that another change is meditated by the authorities. As far as we can learn, the anticipation is unfounded. The opinions of our correspondents vary much upon the subject, but there seems to be an unanimous, and we think a very rational desire to get rid of the infantry sash; a decided predilection is manifested for epaulettes, or rather light infantry wings, while, although it is hotly combated by some, a weakness evidently exists for that "smartness" which is associated with the idea of a peakless cap.

The drafts of various regiments embarking for India at present number more than 6000 of all ranks; and owing to the fact that no drafts have been sent out since last year, the young soldiers are more forward in their drill and generally efficient than the reinforcements dispatched to regiments in India since 1857.

Lieut.-General Gascoigne, who is commanding the force engaged in field evolutions at the Curragh, will in consequence, retain the Dublin District until the 1st of October next.

Major-General C. W. Ridley, C.B., late of the Grenadier Guards, will be appointed to the command of the Cork district, in the room of Major-General the Hon. A. A. Dalzell, who, as we intimated in our last number, is to be transferred to the Dublin district, in succession to Lieut.-General Gascoigne.

As we anticipated in our impression of the 23rd ult., Major-General J. Wharton Frith has been appointed to the Colonelcy of the 2nd West India Regiment. Although General Frith had not taken part in the larger and more brilliant achievements of the Army in the early part of the century, he has very excellent claims to this promotion. He served in the Travancore War, and at the capture of the Isle of Bourbon and the Isle of France in 1810. He has been 56 years in the Army, and has seen a great deal of Colonial service in trying climates.

Colonel R. C. H. Taylor, C.B., late of the 79th Highlanders, and since commanding the Walmer Depôt battalion, has been appointed Assistant-Adjutant-General of the South-eastern district in succession to Colonel Bunbury, C.B.

The office of Major of Brigade to Major-General Craufurd's brigade at Dover and Shorncliffe, will be shortly vacant by the promotion of Major Barnard, Grenadier Guards.

Captain R. J. E. Robertson, 1st battalion, 60th Rifles, has been provisionally appointed Assistant-Military-Secretary to Major-General Pringle Taylor, commanding the troops in Jamaica.

Captain Norman Macdonald, 2nd battalion 5th Fusiliers, has been provisionally appointed Assistant-Military-Secretary to Major-General H. W. Breton, commanding at the Mauritius.

Lieutenant Lord Garlies, of the Royal Horse Guards, has been appointed Aide-de-Camp to Brigadier-General Lord George Paget, C.B., commanding the Cavalry Brigade at Aldershot.

Captain Hardy, 84th Regiment, has been appointed Aide-de-Camp to Brigadier-General D. Russell, C.B., commanding the 3rd Infantry Brigade at Aldershot.

Major H. Buck, of the 53rd Regiment, is provisionally appointed Aide-de-Camp to Lieut.-General Wynyard, C.B., commanding at the Cape.

Lieutenant S. S. Connell, 21st Fusiliers, has been appointed Fort Adjutant at Demerara in succession to Lieutenant Kerr, 3rd West India Regiment.

Lieutenant Shearman, 3rd West India Regiment, has been appointed Fort Adjutant at St. Lucia, vice Lieutenant Eustace, 49th Regiment.

The preparations for the departure of His Royal Highness the Prince of Wales for Canada are nearly completed. The day of embarkation in Plymouth Sound is positively fixed for the 10th inst. The whole of the Channel Fleet are ordered to assemble inside the Breakwater. The ships will be "dressed," and will fire a royal salute. The sight will be a very imposing one, and it is resolved that nothing shall be wanting to give *éclat* to an event which is not only interesting to the people of England but to Her Majesty's loyal subjects on the other side of the Atlantic.

HOUSE OF COMMONS.—FRIDAY.

VOLUNTEERING PRACTICE GROUNDS.

Mr. Selwyn asked the Secretary for War whether it was the intention of Her Majesty's Government to introduce any measure to facilitate the acquisition by Volunteer Corps of grounds for rifle-practice by purchase with their own money or by voluntary grants from landowners, pursuant to the suggestions made in the House on the 5th day of July, 1859, and the 1st day of June, 1860.

Mr. Sidney Herbert said that he had given the subject as much consideration as the numerous claims on his attention would allow of, and he had come to the conclusion that there were great difficulties to be overcome before the object which the hon. and learned member had in view could be attained. If the hon. and learned member would himself bring in a bill on the subject, the Government would afford him every assistance to carry it through Parliament.

THE RESERVE FUND.

Lord Hothan observed that the Secretary for War had on two or three occasions lately referred to the Reserve Fund, of which few members of the House had probably ever heard, and of the disposal of which no one but the right hon. gentleman himself knew anything. He begged to ask whether the Right Hon. Secretary would lay upon the table any accounts to show the state of the Reserve Fund.

Mr. S. Herbert said that the subject of the Reserve Fund had occupied the attention of a committee sitting upstairs; and as the report of that committee would be presented very soon, he thought it best not to enter into any explanation at that moment.

ENLISTMENT.

Mr. Humberston called attention to the petition of John Bishop, complaining of the enlistment of his son into the 7th Dragoon Guards on the 27th of June, 1859, his son being at the time of his enlistment a lawfully bound apprentice.

Mr. Sidney Herbert explained that the recruit in question was apprenticed for only five years, which was not a legal apprenticeship under the Mutiny Act. The only apprenticeship recognised by the Mutiny Act was one of seven years.

INDIAN PRIZE-MONEY.

Colonel Dunne asked the Secretary for India to state what determination the Government had come to respecting the distribution of Indian prize-money. Was it intended that each corps of the Indian Army should have the prize which it had obtained, or was it intended that all prizes should be thrown into a common fund and distributed among all the corps generally?

Sir C. Wood said that the prize taken at Delhi would be given exclusively to the troops engaged in the reduction of that place. As regarded all other prize, he must beg to be allowed to abstain from stating whether it would be thrown into a common fund or not; but he was bound to say that a recommendation to that effect had come from India, founded on the difficulty of ascertaining what troops had contributed to the capture of particular places.

IRISH VOLUNTEERS.

Captain O'Connell asked the First Lord of the Treasury whether the Government had taken, or intended to take any steps to enable the people of Ireland to form Volunteer Corps in that country?

Lord Palmerston said that the Government had no intention to propose to Parliament any alteration of the law bearing on volunteering in Ireland.

THE OFFICIAL NAVY LIST

The official Navy List for the quarter beginning the 1st July has been issued to the public with, we venture to say, more blunders than usual. Surely if it is worth while to bring out a work of the kind, it is desirable to have it as correct as possible. We can make allowance for a few errors in so copious a volume, but when page after page teems with mistakes, our patience becomes exhausted. We took the trouble in a number of this journal, some weeks back, to correct a few of the inaccuracies in the list for April; and we naturally thought the lesson would not have been neglected; but we have been mistaken. We have neither space nor patience to give all the mistakes we have noticed in the "By Authority" number before us, and we will, therefore, content ourselves with giving a few, in the hope that before the 1st of October the whole will be examined and correctly revised. At page 10 we are requested to turn to the Appendix, and under the letter (C) we are informed that we shall there find the particulars of Her Majesty's Order in Council affecting certain admirals and vice-admirals on the retired list. We accordingly refer to the page indicated, 383; we there discover an irregular array of capital letters, but no (C), and we are consequently disappointed in the result of our search. At page 30, Commander Salmon, V. C., is posted to a ship numbered 352; we turn to this and find that it indicates Her Majesty's ship Oberon, commanded by Lieutenant F. G. C. Paget. At page 53, Lieutenant E. St. John Daniel, V. C. (the editor of the Navy List, as Mr. Murray calls Lord Clarence Paget, appears to treat the wearers of the Victoria Cross very cavalierly), is said to belong to the ship answering to the number 309, the Mars; but such is not the fact, there is no lieutenant of the name belonging to her. At page 337, Mr. Charles J. Parker is said to belong to the Castor training-ship at Greenhithe, whereas he has been serving in the Victory flagship at Portsmouth since January, 1859. Lord Clarence affects to give us a list of the effective ships of the Royal Navy with their present stations, and at the risk of offending Sir Charles Wood, who lately said that he had had a lengthened experience in nearly all the public offices, and that he could safely assert business was better conducted in the Admiralty than any other, we will say that nothing could be worse than this "list of effective ships." Lord Clarence will insist that store-ships, receiving-ships, target-ships, and ships with their keels just laid down, and others just cut in two, like the Arethusa, are "effective," while every other man who knows the Service, will say that they are the very reverse. We are also informed that this list contains 548 ships of different classes. We have taken the trouble to check it, and have got a total of 572. "The Navy List, by Authority" will not, however, make any addition to the reputation of the Admiralty administration.

NATIONAL RIFLE ASSOCIATION.

The first great trial of skill amongst the members of this Association took place on Monday on Wimbledon Common, Her Majesty the Queen inaugurating the meeting by firing the first shot from a Whitworth rifle at a range of 400 yards.

The general character of the practice ground and the arrangements made for the convenience of spectators have been already detailed. It will therefore be sufficient to say that the fineness of the day attracted an unexpected number of persons from London, and at an early hour in the afternoon the enclosure was well filled with company, who in the vicinity of the Queen's marquee increased to a dense crowd. There was a considerable attendance of ladies of distinction.

There were 10 pairs of targets on the ground, each pair supported by a butt of earth, the latter divided by a space of 80 yards. The ranges varied from 200 to 1000 yards. At the lesser distances the targets are 6ft. by 2ft., with a bull's-eye of eight inches; and at the greater ranges the targets are 6ft. square, with a 2ft. centre and no bull's-eye. The following code of signals has been adopted:—When a bull's-eye is hit, a red and white flag is shown and three points are scored; when a centre is hit, a dark blue flag is shown, and two points are scored; when an outer—that is, the target outside the centre—is struck, a white flag is shown, and one point is scored. All comers are permitted to shoot as they like, except that they must not use an artificial rest.

Shortly before four o'clock His Royal Highness the Duke of Cambridge, accompanied by Colonel the Hon. James Macdonald, arrived. Her Majesty reached the ground a few minutes after four. The royal party occupied seven of the Queen's carriages, and were escorted by a detachment of the 10th Hussars. Her Majesty was received on alighting by the Right Hon. Sidney Herbert, M.P., the Earl Spencer, Lord Elcho, the Hon. A. Kinnaird, M.P., and Captain E. St. John Mildmay, by whom the illustrious party were conducted through the royal marquee to the daïs overlooking the practice-ground.

The formal business of the day commenced with the presentation of an address from the members of the Association to Her Majesty, whose pleasure to receive it was signified through the Lord Chamberlain. The Queen and the Prince Consort, standing a little forward from the remainder of the Royal group, were now approached by a deputation of members of the Association, headed by its President, the Right Hon. Sidney Herbert, M.P., Secretary for War, who read the address to Her Majesty as follows:

"May it please your Majesty—We, the President and Council of the National Rifle Association, humbly approach your Majesty with sentiments of devoted attachment to your throne and person.

"We tender to your Majesty our grateful acknowledgments for the patronage and encouragement so graciously extended by your Majesty and your Illustrious and Royal Consort to our Association, which has been formed to give permanence to the Volunteer force. This force, of which a small portion had recently the honour of being reviewed by your Majesty, has sprung from the intuitive loyalty and patriotism of your Majesty's people.

"We hope that, wide as is the present development of the Volunteer force, it may yet attain to much larger proportions. To aid in this development, and to give permanence to this force by fostering and diffusing a taste for rifle shooting, are the objects of the National Rifle Association. These, we think, can best be effected by establishing a great annual meeting for competition in rifle shooting similar to the Tir Fédéral of Switzerland, where every two years prizes to the value of 10,000*l.* are competed for, and where riflemen from the different cantons meet together in friendly rivalry.

"The use of the long bow and the cloth-yard shaft was once the pastime of the English people, and at the same time the terror of England's foes. The spirit which animated our fathers still lives in their descendants, and the National Rifle Association hope, by establishing rifle shooting as a national pastime, to make the rifle what the bow was in the days of the Plantagenets—the familiar weapon of those who stand forth in the defence of their country.

"Such being the objects of our Association, it has been honoured in a special degree with your Majesty's favour and countenance; for not only has your Majesty been graciously pleased to express your approval of our undertaking, and munificently founded a prize which will be the highest honour that can be gained by the competitors, but your Majesty has even condescended to inaugurate in person this, the first prize meeting of the Association. We most cordially and respectfully thank your Majesty for this special mark of your favour; and we fervently pray that health and happiness may long attend your Majesty, your Royal Consort, and every member of your illustrious family."

Her Majesty rose from her chair, and in a very clear and distinct manner made the following reply:

"I receive with sincere satisfaction the sentiments of attachment to my throne, person, and family, which have been expressed by the President and Council of your Association; and I assure you that I, together with my Royal Consort, have gladly given encouragement to a body whose object it is to render permanent an armed force, limited exclusively to defensive purposes, and founded upon voluntary exertions.

"I have witnessed with pleasure the manner in which the ancient fondness of the English people for manly and sylvan sports has been converted by your Association to more important ends, and has been made an auxiliary instrument for maintaining inviolable the safety of our common country."

The Right Hon. Sidney Herbert then read the following address to His Royal Highness the Prince Consort:—

"May it please your Royal Highness,—We, the President and Council of the National Rifle Association, humbly approach your Royal Highness, and eagerly embrace this opportunity of expressing to your Royal Highness our grateful acknowledgments for the patronage and support which you have been graciously pleased to extend to our Association.

"Your Royal Highness is ever found either originating or giving your enlightened and discriminating support to such schemes as have for their object the advancement of the public good and the prosperity of the United Kingdom. To this Association your Royal Highness has, however, shown a special mark of favour by deigning to become its patron, and no further proof is wanted of the value and importance of the objects we have in view.

"We thank your Royal Highness for the active interest you have shown in our undertaking, and for the valuable counsel and assistance which we have frequently received at your hands, as well as for the prize which your Royal Highness has generously offered for competition by all nations.

"We trust that the National Rifle Association, honoured as it is by the favour of Her Majesty, and patronised by your Royal Highness, will meet throughout these realms with that countenance and support which its national and patriotic character may be found to justify."

To which His Royal Highness replied as follows:

"Gentlemen—I thank you sincerely for your kind address, and beg you to be assured that I am very sensible of the flattering matter in which you speak of any support which it may have been in my power to afford to objects of national interest.

"Fully appreciating the value and importance of the National Rifle Association, as a means of encouraging the Volunteers in their endeavour to acquire that skill in the use of their weapon on which their whole efficiency depends, it is with peculiar pleasure that I have accepted your invitation to become its patron; nor can I doubt, when I look around me and see the manner in which the call of the council has been responded to, that the result will answer the most sanguine expectations of those who set the present movement on foot.

"In establishing a prize open to the competition of all nations, my object was to give our British marksmen an opportunity of comparing their own arms, and their own skill, with those of other countries. And I am convinced the result will be to show that, as the British manufacturer is already second to none in the fabrication of the arm itself, so the people of this country are not to be surpassed by any in the knowledge of how to use it."

This ceremonial completed, Her Majesty and the royal party were conducted from the reception marquee along a raised platform, covered with crimson cloth, to the royal shooting tent, where Mr. Whitworth was presented to the Queen, and had the honour of explaining the mode in which Her Majesty was to fire the first shot from one of his own rifles. The Queen appeared to be somewhat amused at Mr. Whitworth's assurance that she might rely upon hitting the centre of the target set up at 400 yards distance. Her Majesty lost no time, however, in testing the accuracy of his statement, by pulling the silken cord attached to the trigger of the rifle, the sharp snap of which was almost instantaneously followed by the exhibition of a red and white flag, showing that the bullet had struck the target in the "centre of the centre," or to speak with perfect accuracy, about one inch from the intersection of two lines drawn horizontally and vertically across the target. Her Majesty expressed her admiration of the accuracy of his weapon to Mr. Whitworth, who modestly expressed his regret that the fresh wind then blowing across the common would probably prevent a series of bullets fired from the rifle used by the Queen successively striking exactly the same mark on the target. After examining Mr. Whitworth's long-range gun, which carried a five-and-a-half pound ball more than five miles at the recent trials at Southport, the Queen and the royal party returned to their marquee, where several presentations were made to Her Majesty.

After a short interval, during which the Prince Consort, the Duke of Saxe-Cobourg Gotha, and the Prince of Wales, examined a collection of arms laid out for inspection in an adjoining tent, the royal carriages were ordered round, and Her Majesty re-entering, made the circuit of the shooting-ground amidst enthusiastic cheering from the spectators and volunteers.

The royal party left Wimbledon about six o'clock on their return to Buckingham Palace.

After the Queen's departure the trial shooting commenced. The ranges were all at the comparatively short distance of 300 yards, and the results are not, therefore considered important. The following were the successful competitors out of five rounds to which the trials were limited:—

Corps.	Name.	No. of Points.
4th Northampton	Sergeant Tomalin.....	8
9th Middlesex.....	Lieutenant Dear	8
5th Kent	Mr. Edward Pant ...	8

On Tuesday, though the interest was wanting of a Queen to fire a rifle and make a bull's-eye, nevertheless the actual business of our *Tir National* was more engrossing than on Monday. The shooting was not only much better, comparatively speaking, but it would have passed for highly creditable practice anywhere and under any circumstances. This was the general opinion, not only of military men present, but also of the competing foreigners who came amongst us to contest our laurels. On the whole, it will be perceived that we have beaten the Swiss. The way these Switzers shoot is something extraordinary. They violate the Hythe maxims absolutely, but nevertheless adopt a system well in accordance with their small bore, heavy rifles. Instead of placing the left hand well forward, as our men are taught to do, holding it firmly with that hand, and using the right hand for little else than to pull the trigger, the Swiss merely rest the barrel upon the left hand, or rather the left fist, planted just in front of the trigger-guard. Instead of raising the piece to the level, and gently drawing the trigger at the proper instant, a Switzer goes to work in a way directly opposite. Step by step we will endeavour to describe it. Slung from his shoulders, he carries a powder flask, for the Swiss have no cartridges. He takes a charge—some 2¼ drachms—and turns it into the piece. From his pocket he next extracts a linen patch—not lubricated. The lubrication difficulty he solves in a very ready way, by saliva. Putting the linen disc in his mouth and turning it round and round, as Jack would his quid, the next movement consists in laying it flat upon the muzzle of the gun. One thrust of a heavy ramrod, worked with both hands, drives the picket home—that picket, the celebrated Swiss ball, of which in recommendation so much has been said. It is a conoidal projectile, having two deep cannelures or grooves, and weighing about 350 grains. The chief intent of these cannelures is to diminish friction, for the picket fits very tightly, and without cannelures it could not be got down. All is done very deliberately, and done in this wise: Stretching his legs far apart, like the Rhodian Colossus on a smaller scale, the Switzer takes an enormous inspiration. Puffed out like the bull-frog emulous of passing for a bull, the inflated Switzer can no more bend to one side or the other than a hard-rammed sausage. A limited power of vertical movement remains to him, and the Switzer avails himself of it. A boss projecting from the butt-end is tucked between his arm and his ribs, both arms are gathered up closely as possible, and the nose—that organ only given to man for ornament, as some affirm—is made subservient to the Switzer's rifle shooting. He uses it as a lateral rest. He steadies his rifle with it. A Switzer could no more shoot creditably if deprived of his nose than General Hay could shine at target practice if deprived of his right forefinger. You see the muzzle pointed aloft; then coming downwards to the target almost imperceptibly, you hear a crack and a grunt together; picket and imprisoned breath go off simultaneously. Almost for the first time the Whitworth small-arms were loaded with cartridges. Into a paper case picket is thrust, with the charge of powder underneath it. The powder is retained by a parchment stop, withdrawn before loading, and the ramrod is pushed quite through the cartridge. This method is somewhat clumsy, as we heard more than one complain. All the Enfield rifles were shot with the small regulation-bullet, viz., of diameter ·55. This was a subject of complaint with many Volunteers; nor do the complaints seem unreasonable.

Thirteen of the candidates made upwards of 13 points, winning thereby a Whitworth rifle each. Of these thirteen the highest number of points was 17, gained by an Edinburgh gunmaker named Petre. Nineteen made 13 points, and will have to shoot for ties in competition for seven Whitworth rifles, 20 of which are given for the 20 best shots. Afterwards this fortunate 20 will shoot against another 20 for the Queen's prize of 250*l.*

Next came the prizes for the winners of all nations—namely, 15 prizes at 200 yards. The best shooting on Tuesday was as follows:—

	Points.
M. Pièce, Swiss	12
Sergeant Freeman, Royal Marines ...	12
Edward Ross, Teesdale	11
M. Peter, Geneva	11
M. Chessex	11
M. Knecht	11
Mr. Lawley	10
M. Morrisson, Swiss	10
Mr. Collins	10
Mr. Prince	10
M. Thorel, Swiss	10
M. Thomin	10
Sergeant Wilson, Hythe	9

The match next in order was that for comers of all nations, in which the following points were made at 300 yards. The prizes were 5 of 30*l.* each.

	Points.
Edward Ross	9
M. Morrisson	9
Mr. Ingram, of Glasgow...	9
Sergeant Wilson	9
Mr. Forbes	8
Sergeant Dillon, Hythe	8
Colonel Lindsay	8
Captain Marryatt...	8
M. Heit	8
Mr. Jackson	8
M. Knecht...	8

From the above it will be seen that the best shots of to-day at the two ranges are Edward Ross (20), M. Knecht (19), and Sergeant Wilson (18).

On Wednesday the Volunteers went punctually to their work, and the result was that the following 15 may be considered winners of prize rifles:—

	Points.
Henry—City of Edinburgh	17
Sharpe—9th Sussex	17
Bainbrigge—1st West York	17
Collinson—6th North York	16
Pout—5th Kent	16
Burg—10th Gloucestershire	15
May—5th Sussex	15
Baker—Bristol	14
Wood—Edinburgh	14
Fielding—Flintshire	14
Jenkin—5th Glamorgan	14
Jackson—32nd Kent	14
Caiger—2nd Middlesex	14
Cocks—11th Middlesex	14
Phillips—1st Shropshire	14

Mr. Gye's prize was decided on Wednesday; it was given as a commemoration of the Volunteer Ball in Covent Garden Theatre. It is a money prize—100*l.* to the best shot, and four sums of 25*l.* to the next highest number of points. The conditions were—five rounds each person, at the three ranges of 300, 500, and 600 yards.

The following are the names of the winners:—

	Points.	£100
Whomes—4th Kent	20	
Sandford—St. George's	19	25
Robertson—10th Perth	19	25
Dove—91st Lanark	18	25
Murray—1st Perth	18	25

The prize of 20*l.*, given by this journal, was gained on Wednesday by Mr. Cox, of the St. George's Rifle Volunteers.

On Thursday the following was the result of the competition, at 500 yards, for the Whitworth rifle given by Mr. Fairbairn for foreigners:—

	Points.
Thorel	9
Von Matt	7
Thormann	6
Roth	6
Van Berchen	5
Pièce	4
De Gendre	4
Knecht	3
Wessel	3
Chessex	3
Peter	3
Staub	3
Heit	1

Won by Thorel with a Whitworth rifle. Von Matt, Thormann, and Van Berchen, also fired with Whitworth

Digitized by Google

rifles. One of the Swiss rifles made a four, and two others three each. Nine points is the largest score made during the week at 500 yards.

The following were the five additional winners of Whitworth rifles :—

	Points.
Plasket, 21st Middlesex	13
Wylie, 1st Lanark	13
Blackburn, Edinburgh	13
Russell, Edinburgh	13
Ross, 7th North York	13

The winners of the 20 Whitworth rifles, and the undermentioned 20 next in order of merit, to shoot for her Majesty's prize, at 800, 900, and 1,000 yards, on Saturday :—

	Points.	
Owen, Glamorgan	13	Ties.
Cowan, 1st Lanark	13	
Marshall, 1st Lanark...	13	
Sandford, St. George's	13	
Lawley, Derby	13	
Howard, Essex	13	
Tinley, 2nd Lancashire	13	
Heaton, 3rd Manchester	13	
Fenton, 9th Middlesex	13	
Beard, 4th Surrey	13	
Stearn, 6th Suffolk	13	
Baty, 9th Surrey	13	
Potter, 5th Surrey	13	
Johnson, Victoria Rifles	13	
Williams, Buckingham	12	Ties.
Gosnell, 1st Norfolk	12	
Murray, Peebleshire	12	
Mariott, 4th West York	12	
Bridgman, 9th Middlesex	12	
Brooks, 12th Middlesex	12	

Her Majesty's prize and the gold medal of the Association will be shot for on Saturday. Her Royal Highness the Duchess of Cambridge and the Princess Mary have graciously intimated their intention of attending the meeting on Saturday. The admission will be 1s. ; carriages 2s. 6d.

Yesterday was quite a business day, and a quantity of work was got through. The day was fine, with just enough sun to be agreeable, without the eyes being dazzled. The ground was very thinly attended, and at no time were there five hundred persons present. The Aunt Sally targets were the centres of attraction; and we heard of one lucky sergeant from the Hythe School of Musketry who made 10 centres; this would give him a "pot" of money. The competition for Miss Burdett Coutts' prize promised to be so tedious, with so little prospect of any decision being arrived at yesterday, that it was resolved to withdraw it, and a notice was posted up to the effect that all who had entered for it would have their money returned.

The firing was considered better yesterday than on any other day of the trial, and the skill of the Swiss was the theme of praise amongst all who witnessed their efforts to win. The following is the result of the firing for the prizes including those given by the Prince Consort and His Royal Highness the Duke of Cambridge :

Lieutenant de Lacy Lacy, of the 12th Regiment of Foot, instructor of Musketry to his regiment, gained the Prince Consort's prize of 100*l.*, he scored 22 points. Sergeant Lawley of the 2nd Derbyshire Rifle Volunteers was second, having scored 18 points, and to him was awarded a cup value 52*l.* 10*s.*, given by the London Rifle Brigade. Peter Swiss was third, having scored an equal number with Sergeant Lawley, but was subsequently beaten by him on deciding the tie. The prize gained by him is a Smith's rifle, valued at 35*l.*

The Duke of Cambridge's prize of 50*l.* was won by Kenecht (Swiss), who scored 10 points. Lieutenant Lacy was second, having scored 9 points; and he was awarded a Westley Richards' rifle of the value of 30*l.*

Turner, of the 1st Berkshire Rifle Volunteers, was third, and obtained a Westley Richards' rifle, value 20*l.*

Edwards, 4th West York Rifle Volunteers, was fourth, and he received a prize of 11*l.* 11*s.*

The number of competitors yesterday amounted to 99 English, 1 Russian, and 5 Swiss.

The range was from 800 to 1000 yards.

To-day the firing begins at 8 o'clock, for His Grace the Duke of Wellington's prize, and at 9 o'clock the contest for that given by Her Majesty the Queen commences.

The gold medal given by the Rifle Association will also be contended for, and the proceedings will then terminate.

Mr. Whitworth was present at the close of yesterday's firing, and much curiosity was excited among the marksmen to see one of his breech-loading rifles, which was on the ground, and from which much is expected.

THE WIMBLEDON PRIZES.

The distribution of the prizes won at Wimbledon by the competitors at the National Rifle Association will take place at the Crystal Palace on Monday next, at 3 o'clock. To afford proper official *éclat* to the occasion, the successful candidates will receive their well-earned distinctions from the hands of the Right Hon. Sidney Herbert, M.P., the Minister for War, who will be supported by the members of the Council of the Association. The Handel Orchestra will be appropriately decorated for the occasion with flags and trophies and the names of the competing corps, and a raised dais erected in front, along which the winners will proceed in turn to receive the prizes won by them. Military bands will occupy the space round the great organ, the front rows of the orchestra being occupied by the members of the Rifle Association and their friends. On either side of the military bands seats will be reserved for the members of the Rifle corps, and it is anticipated that the most imposing display will be presented on the great orchestra which has yet been seen. The ceremony of presentation will commence at 3 o'clock, and is expected to occupy about two hours. At its conclusion a series of athletic sports and exercises, in which the Volunteers will take part, will commence in the grounds, and be continued until dusk; thus enabling those who are unable to leave London at an early hour to take some part in the proceedings connected with this great national work. As no alteration will take place in the usual Monday admission —viz., 1s., a large attendance is anticipated. Reserved seats will be provided.

ARMY AND NAVY PENSIONERS EMPLOYMENT SOCIETY.

The first annual meeting of this society took place at the Royal United Service Institution on the 21st ult., General Sir J. Burgoyne, G.C.B., Inspector-General of Fortifications, in the chair. Among the subscribers present were—General Buckley, Major-General Ridley, Major-General Williams (late 2nd Life Guards), Colonel Lord F. Paulet, C.B., Colonel the Hon. J. Lindsay, M.P., Colonel the Hon. P. Herbert, M.P., Lieutenant-Colonel Hatton, Lieutenant-Colonel Owen, R.E., Lieutenant-Colonel Sir H. Havelock, V.C., Major the Hon. H. Powys, Captain the Hon. G. Wrottesley, R.E., Captain Morley, Captain Walter, &c. The chairman entered fully into the objects of the society, which is to provide a means of obtaining situations for all men who have been engaged in Her Majesty's naval or military services, and leave with a pension and good character, by establishing a permanent office or place of registry where the public can engage them without any expense or trouble. He adverted to the education and habits of the good soldier, which rendered him invaluable to his employers, and by the pension he had gained afforded them a material guarantee not to be met with among any other class of men. The registry of the institution comprised an immense selection of men, with every variety of qualification. Many of them—especially the superior grade of non-commissioned officers—were fit for the most responsible situations, such as book-keepers and clerks in any establishment. There was no expense either to employers or the pensioners, the former of whom had at present the choice of a large number of men, which in future would be greatly increased in consequence of a late recommendation of His Royal Highness the Duke of Cambridge to the commanding officers of regiments, who were invited to send to the office in London from time to time a descriptive return of every discharged soldier. Under this system the whole body of pensioners would pass through the registry of the institution, and the public would have an unequalled field of selection, which he was sure would be as advantageous to them as to the Service at large. Particular care would be taken that no man was recommended for any situation unless his regimental character and other testimonials were in all points satisfactory. It was evident that the encouragement thus given to the soldier, by providing him with a certainty of employment on his discharge with a good character and pension, would not only increase the number and quality of the present recruits, but materially conduce to the retaining of those men whose term of enlistment ended at the expiration of 10 years. This latter consideration would, he was sure, entitle the institution to the thanks of the public and the especial support of the officers of the Army, who could justly estimate the value of this particular class of men and the importance of their remaining in the Service. The chairman then paid a high compliment to Major-General Williams and the other members of the provisional committee for the time and energy they had devoted to the re-establishment of the institution, particularly alluding to one of their number, Captain Walter, who, by the formation of the corps of Commissionaires, had not only relieved the registry of the society from a large number of wounded men who previously had been unable to procure employment, but had conferred a great benefit on the men themselves, and those places where the corps had been established. He concluded by hoping that the existing debt of 225*l.*, which the provisional committee had taken over from their predecessors, would be speedily liquidated, and the institution rendered capable of effecting all the good its supporters desired. The secretary then read the report, which showed that upwards of 1000 men had obtained situations through the registry of the society, and that during the past year the expenditure had for the first time been brought within the receipts. It was hoped that every regiment in the Service would subscribe, and that sufficient funds might be forthcoming to pay off the old debt, and permit the establishment of branch offices in Dublin and Edinburgh.—After the unanimous adoption of the report, the proposed rules were, with some slight additions, agreed to. The trustees, Rear-Admiral the Earl of Shrewsbury and Talbot and Colonel the Hon. James Lindsay, M.P., were then elected, the latter officer expressing his conviction of the utility of the institution, and the important influence it would exercise on the ranks of the Service. General Ridley then proposed a vote of thanks to the chairman, and the proceedings terminated.

The question as to how far officers ought to hold commissions in Militia, Yeomanry, and Volunteer corps, was brought before Parliament this week by Mr. Cayley, who asked the Secretary of State for War whether it was allowable for officers of Yeomanry regiments to receive commissions in Volunteer corps. Mr. S. Herbert said that applications had been made to him by lords-lieutenant to know whether or not they ought to grant commissions in Volunteers corps to officers of Militia and Yeomanry, and the decision of the War Office had arrived at was that which he believed some lords-lieutenant had acted upon. In certain cases the raising of a Volunteer corps depended upon the local influence of some particular person, and though a better officer might very well be found to command it when once formed, yet such an officer might not have local influence enough to raise the corps. Under those circumstances there was no objection to give Yeomanry or Militia officers who raised Volunteer rifle corps leave to hold commissions in these corps, but upon the condition that in the event of the Yeomanry and Militia being called out for active service, they must choose in which service they would remain.

The sum required to be voted towards defraying the expenses of naval and military operations in China, beyond the ordinary grants for army and navy services, for the year 1860-1861, including a repayment of 443,896*l.* to the government of India, for advances on account of former expeditions to China, is 3,800,000*l.*

THE CHANNEL SQUADRON.—The Royal Albert, the Edgar, the Trafalgar, the Donegal, the Algiers, the Aboukir, the Conqueror, the Centurion, the Mersey, and the Greyhound arrived in the Downs on Monday from Yarmouth Roads. The Mars was not in company with the rest of the squadron, having been left off Yarmouth owing to the loss of an anchor, but she rejoined on Wednesday. The squadron will leave the Downs immediately, and rendezvous in Plymouth Sound, where they are ordered to assemble on the 9th inst.

STATIONS OF THE ROYAL NAVY IN COMMISSION.

With the dates of Commission of the Officers in Command.

Aboukir, 90, sc., Capt. D. Curry, 1846, Channel Squadron.
Acorn, 12, Com. R. B. Pearse, 1856, East Indies.
Actæon, 26, surv.-v., Com. J. Ward (b), 1858, East Indies.
Adventure, sc. store-ship, Com. E. Lacy, 1856, East Indies.
Agamemnon, 91, sc. Capt. T. Hope, 1852, Mediterranean.
Ajax, 60, sc. Capt. J. M. M'Niell Boyd, 1856, Coast Guard.
Alacrity, 4, sc., Com. J. K. E. Baird, 1857, Mediterranean.
Alecto, 5, st.-vcs., Com. H. J. Raby, V.C. 1855, Coast of Africa.
Alert, 17, sc., Com. W. A. R. Pearse, 1855, Pacific.
Algerine, sc. gunboat, Lieut.-Com. W. Arthur, 1854, East Indies.
Algiers, 91 sc., Capt. G. W. D. O'Callaghan, 1846, Channel Squadron.
Amethyst, 26, Capt. S. Grenfell, 1853, Pacific, ordered home.
Amphion, 36, sc., Capt. T. Cochran, 1857, Mediterranean.
Archer, 13, sc., Capt. W. N. W. Hewett (acting), Coast of Africa.
Ardent, 3, st.-v., Com. J. E. Parish, 1857, S. E. Coast of America.
Argus, 6, st.-v., Com. H. F. W. Ingram, 1856, Mediterranean.
Ariadne, 26, sc., Capt. E. W. Vansittart, 1856, special service.
Arrogant, 47, sc., Commodore W. Edmonstone, Ascension.
Asia, 84, Capt. G. T. Gordon, 1846, Portsmouth.
Assistance, sc. store-ship, Com. C. J. Balfour, 1859, East Indies.
Assurance, 4, sc., Com. C. M. Aynsley, 1856, Mediterranean.
Atholl, 4, Com. E. Wilson, 1845, Greenock.
Bacchante, 51, sc. Rear-Admiral Sir J. Maitland, C.B., Capt. D. M. L. Mackenzie, 1859, Pacific.
Banshee, 2, steam-vessel, Com. C. A. Campbell, 1858, Mediterranean.
Banterer, sc. gunboat, Lieut.-Com. H. P. Knevitt, 1855, East Indies.
Barracouta, 6, st.-v., Com. W. Wood, 1854, Portsmouth.
Beagle, 4, sc., Com. E. Hay, 1858, East Indies.
Black Eagle, st.-yac., Mast.-Com. J. E. Petley, 1844, particular service
Blenheim, 60, sc., Capt. E. Tatham, 1854, Coast Guard.
Bloodhound, 3, st.-ves., Lieut.-Com. F. W. Bennett, 1854, Woolwich.
Boscawen, 70, Rear-Admiral the Hon. Sir F. W. Grey, K.C.B., Capt. R. A. Powell, C.B., 1855, Cape of Good Hope, ordered home.
Bouncer, 2, sc. gunboat, Lieut.-Com. A. R. Owen, 1852, East Indies.
Brilliant, Com. C. H. Gardner, 1848, Naval Reserve Training Ship.
Brisk, 16, sc., Capt. A. F. R. D'Horsey, 1857, Cape of Good Hope.
Britannia, training-ship, Capt. R. Harris, 1849, Portsmouth.
Brune, st.-ves., Lieut.-Com. E. F. Lodder, 1854, Coast of Africa.
Buffalo, screw, Mas.-Com. A. Brown, 1854, particular service.
Bulldog, 6, st.-ves., Capt. Sir F. L. M'Clintock, Kt., 1854, Sheerness.
Bustard, 2, sc. gunboat, Lieut.-Com. F. W. Hallowes, 1856, E. Indies.
Buzzard, 6, st.-v., Com. F. Peel, 1855, S.E. Coast of America.
Cadmus, 21, sc., Capt. H. S. Hillyar, C.B., 1854, N. America, and W. Indies.
Cæsar, 90, sc., Capt. T. H. Mason, 1849, Mediterranean.
Calypso, 18, Capt. F. B. Montresor, 1851, Pacific.
Cambrian, 40, Capt. J. J. M'Cleverty, C.B. 1848, East Indies.
Cambridge, gunnery-ship, Capt. A. W. Jerningham, 1851, Devonport.
Camilla, 16, Com. G. T. Colville, 1855, East Indies.

Wrangler, 4, sc., Com. H. H. Beamish, 1858, Coast of Africa.

Mr. Charles E. H. Farrant, Master of H.M.S. Styx, died a few weeks since while serving on the West India Station. Mr. Farrant's seniority was of the year 1858.

Mr. John Watkins, the artist and photographer, of Parliament Street, had the honour of attending at Buckingham Palace on Wednesday last, and taking sittings of His Royal Highness the Prince of Wales, prior to his departure for Canada. Major-General the Hon. R. Bruce, governor, and Captain Grey, equerry to the Prince of Wales, also sat to Mr. Watkins on Wednesday. The Earl of St. Germans and Major Teesdale having previously given sittings to the same artist, a series of photographs has been completed by him of the gentlemen who will officially accompany the Prince of Wales to the United States.

THE PROPOSED FORTIFICATIONS.

Major-General S. H. Williams, of the Royal Engineers, has addressed to the Right Hon. Sidney Herbert an elaborate letter on this very important subject, of which we reproduce as much as our space will permit. The gallant officer, after expressing his regret that he cannot agree with the Royal Commissioners, that the dockyards, when well fortified, could become "places of refuge from which the defence of the country could be conducted after the defeat of the Army in the field," says :

It is readily granted that whatever additional works may be requisite to defend the approaches to our seaports by sea, should be constructed forthwith ; but the enormous expenditure proposed for their defence by land may be safely excluded from your consideration, and a portion of the money that would be swallowed up in their unprofitable fortification devoted to more important and more pressing wants. Indeed, it appears to me that the probability of attack on the land side has not been duly weighed.

It is not protection from invasion, in the real acceptation of that term, that our seaports require, but such works only as would constitute a sufficient defence against a few thousand men carried in small squadrons of light vessels ; and such defence will, in my judgment, be best found in a moderate *enceinte* with a garrison of 5000 men, and in the occupation of an intrenched post, at a convenient distance, by a disposable relieving force.

If the invasion of England should ever be seriously contemplated, it is but reasonable to conjecture that it would be planned on a scale commensurate with the means and resources of a powerful enemy—no little war, no little invasion, but a mighty armament, destined by its master to achieve the capture of London ; for I contend that no minor object would be deemed sufficient to compensate for the risk of failure, and the loss of life and the fruitless cost of treasure it must entail. If such a force were landed on our coasts it would undoubtedly push forward, and hazard all, in a rapid march to seize the capital. Procrastination in the enemy would be his inevitable ruin.

The whole of our Army, except the garrisons now taken into account, must be held disposable in the field, or we are lost in the event of invasion. The enemy must be met on the shores he attempts, and, if possible, repelled there ; but if unsuccessful in that endeavour, a chain of intrenched camps between the coast and the metropolis, which shall afford the best and most speedy means of concentrating every available gun and soldier, until strong enough to meet and beat the foe, offers the only hope of ultimately defeating him.

The late Duke of Wellington's words on this point cannot be too often repeated, and I quote them as a proof that my argument is sound :

"There is no mode of resistance, much less of protection, from this danger, excepting by an army in the field capable of meeting and contending with its formidable enemy."

Were the lamented hero living you would doubtless call him to your councils ; disregard not, then, I beseech you, this voice from the tomb of one of the most renowned generals of this or any other age, but meditate on the sentence as one of the most profound maxims of that great captain, who knew so well how to employ the resources at his disposal.

A large moveable force in the field, resting upon points of support in the shape of intrenched camps, is the system, I stedfastly maintain, upon which alone the country can be put into a posture to render invasion a very hazardous enterprise, if not to defy it, and one which will make an enemy think profoundly before he ventures to embark his legions.

* * * * *

I observe that Colonel Jebb recommends the "distance of not less than thirty or forty miles from London" for points of support on a first line of encounter, in which I entirely concur ; though I am still very much inclined to rest the left of that line on Chatham and the Medway, and the right on Beachy Head, the latter post being a spur somewhat in advance of that line. But whether Colonel Jebb or I have indicated the precise lines or localities, and the exact number of camps, are mere matters of detail, not worth the least controversy, and must be left for decision after an accurate investigation of the features of the different counties.

I recur to Beachy Head, because from position, height, and formation, I deem its occupation of immense importance.

The coast line from Dover to Portsmouth is about 150 miles, and the Head is central between these places. The shores eastward and westward of it are, without dispute, the most vulnerable, and it does not require the perception of a strategist to make manifest the expediency of selecting such a position for a strong military post. It would be seagirt by inaccessible cliffs in nearly half of its contour, and any height of escarpment, or depth of ditch, would be easily practicable in the stratum of chalk.

An intrenched camp there would be an eye and an arm of the highest consequence to a base of operations, and I do not scruple to affirm the absolute necessity of establishing a camp there, nor of adding my conviction that it should be commenced without delay. Employ military working parties, to whom the lesson would be of great instructive use, and thus the cost would be inconsiderable.

I emphatically declare that this is not a country for fortresses. We want not brick and mortar, but brain and muscle ; the courage and discipline of Britain's sons will do the rest, and be their Sovereign's best safeguard. Supply them with good arms, give them points of support in such earthworks as they would construct for themselves in an enemy's land, mature your plans for defence, perfect the communications by railways and by roads, and practise the troops over the surface of the counties which come within the scope of your defence, and then confidence may take the place of apprehension.

But, once more, Beachy Head is a position on the coast of too great natural strength to leave undefended, for if seized and intrenched by an enemy he would not only be secure, but master of a stronghold to cover the landing of his supplies and reinforcements.

Let me now suppose, but only for the sake of viewing the whole subject under another aspect, that you are prepared to recommend to Parliament to expend nine millions of money in conformity with the report of the Commissioners.

In that case, surely you should calculate that 40,000 men must be raised, when the works are completed, and retained for their garrisons, in whatever way the men may be located in time of peace ; or otherwise the full complement must be abstracted from whatever strength we may possess, on the alarm of war, to be put into the fortresses, and there to remain almost inoperative with regard to repulsion of an invader, whilst the field force would be diminished to the same extent. The troops required for their defence must form a constituent part of the army to be maintained in peace, as well as in war, as long as the uncertainty in the state of continental affairs which at present subsists may last—a problem, you will concede, of very difficult solution. The reasoning of the Commissioners relative to the garrisons for the fortresses is, to me, painfully inconclusive.

I am led to ask whether you are prepared to recommend the augmentation to the Army which the proposed enlargement of the fortifications would require, because they might prove mischievous rather than useful, unless provided with the due number of well-disciplined soldiers and skilful artillerymen to man them efficiently. That increase would amount to 40,000 men more than would be required for our defences as they exist, or if slightly extended ; which increase at the minimum cost of 60,000*l.* per one thousand men, as stated in clause 11 of the Commissioners' Report, may be taken at 2½ millions per annum, or the interest of 80 millions at 3 per cent. ; to which should be added about two millions for raising, training, and lodging, without the fortresses, in time of peace, a portion of that increase ; and be it remembered that all this cost would not furnish a single additional soldier to the present disposable field force. Nor should we keep out of sight items which must inevitably and shortly be brought forward to provide for the security of London, and the construction of a second arsenal.

It seems apposite to ask here why may not the greatest portion of the more perishable stores of our dockyards, such as sails, cordage, &c., &c., be kept at inland stations in time of war ?

But, again, is the Chancellor of the Exchequer prepared with ways and means for all this almost incalculable expenditure ?

Is the House of Commons prepared to vote it ?

Is the country prepared to concur in it ?

By all means occupy the hills with field works in the proximity of Woolwich ; and also establish others for the protection of Sheerness, because that station is the left of the line of defence for the capital, either through Kent and Sussex, or Kent and Surrey. The sum put down for defending the Thames is very moderate and unobjectionable, and what is estimated at Portland is doubtless required for the safety of the fleet at anchor there ; but the aggregate cost, "recommended by the Royal Commission," for the augmentation of the fortifications at Portsmouth, Plymouth, Milford Haven, and Chatham, amounting to 7,020,000*l.*, would, I submit, be a misapplication of treasure.

May it not be advisable to revise and curtail the estimates for those four stations to defences by sea absolutely necessary ?

The two following principles are at issue ; the Commissioners themselves have mooted them antagonistically. Which is to prevail ?

1. Fortresses garrisoned by a war complement of 60,000 men, with a small disposable force in the field.

2. The greatest attainable numerical force in the field, resting upon intrenched points of support, with moderate fortifications around our dockyards, requiring 20,000 men for their defence.

The issue is of too great magnitude to be decided by any seven gentlemen, however eminent in their respective walks in life ; nor is it one for the engineer, however able, to determine.

The defence of the kingdom must be committed to the general officers of the Army and the troops of all arms under their command. Therefore, I respectfully invite you to assemble a council of eleven of the most distinguished general officers in Her Majesty's service, to deliberate and report on those two principles.

If their report should confirm the views of the Commissioners, it would doubtless allay much of the existing distrust, and greatly promote acquiescence on the part of the public.

But the council might lean to the tactics of the late Duke of Wellington, and any difference of opinion which may be entertained, and there does exist a difference, should be known before parliament should be asked to decide upon the course to be pursued.

Sir, I have written without reserve, but the inexpressible importance of the subject is an unanswerable plea for the fearless disclosure of every Englishman's thoughts ; yet, if in the earnest advocacy of a great principle the conventional limits of discussion have been overstepped, I apologise.

Fifty-six years have nearly elapsed since I entered into the service of the crown. I have ever served my sovereign zealously and faithfully ; I love the land of my birth very dearly ; and I dare not now refrain from tendering my opinions upon this subject, the result of long and anxious study, to Her Majesty's Ministers, because those opinions may probably not be in accordance with their own.

The time of my departure from this earthly scene cannot be far distant ; but, come when it may, I shall go to my rest with the consoling reflection that I bequeath to my country a legacy to which I pray God she may administer ere it be too late.—I have the honour to be, sir, your most obedient humble servant,

S. H. WILLIAMS,
Major-General Royal Engineers.

In consequence of a statement made in the House of Commons during the debate on the Indian Army question, respecting a treasonable correspondence between the mutinous European force and the Sikhs, Mr. Torrens put a question upon the subject to Sir Charles Wood an evening or two since. Sir Charles Wood said he had no information that letters had been sent by the local European troops in India to the Sikhs inviting them to join in driving the Queen's Army out of India.

The squadron under the command of Vice-Admiral W. F. Martin was at Navarino on the 25th of June. The Admiral intended to visit Suda Bay, and then proceed to Corfu.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CUPPAGE—June 26, at Fermoy, the wife of Major J. M. Cuppage, 89th Regiment, of a son.

HOARE—July 2, at Sydney, near Southampton, the residence of her mother, the wife of Captain Hoare, of a son.

MAJENDIE—June 28, at Kingsbridge, Devonshire, the wife of Captain Majendie, R.N., of a daughter.

MEYLER—June 22, at Holy Well, Dundrum, county Dublin, the wife of George Meyler, Esq., late Captain 65th Regiment, of a son.

PHILLOTT—June 28, at the Craven Hotel, London, the wife of Major H. R. Phillott, 25th Regiment Madras Infantry, of a son.

SAVAGE—June 28, at St. Helier's, Jersey, the wife of Major-General Savage, Royal Engineers, of a daughter.

MARRIAGES.

BRIDGE—GORDON—June 28, at St. Columbus Church, Nairn, N.B., by the Rev. R. G. Mead, Major Lionel Bridge, H.M.'s Madras Horse Artillery, to Katharine Grant, daughter of Captain James Gordon, of Ivy Bank, Nairn, N.B.

CAMPBELL—BAILLIE—June 30, at St. George's, Hanover Square, by the Right Rev. the Lord Bishop of Winchester, assisted by the Rev. T. B. Murray, M.A., Colonel George Campbell, C.B., late of the 52nd Regiment, to Emma, widow of Evan Hamilton Baillie, Esq., and youngest daughter of the late Major-General Sir William Douglas, K.C.B., of Timpendean, Roxburghshire.

LOCKWOOD—HOEY—June 30, at Walcot Church, Bath, Augustus Purefoy Lockwood, Esq., Surgeon, Scots Greys, Knight of the Legion of Honour, to Mary Eliza, only child of Lieut.-Colonel Simmonds, late of the 61st Regiment, and widow of Lieut.-Colonel W. F. Hoey, 30th Regiment. The Rev. J. P. Horsford, prebendary of Bath, Killaloe, and the Rev. Mr. Wynne, officiating.

LUMLEY—WAKELING—June 28, at St. John the Baptist's, Kentish Town, by the Rev. W. Calvert, M.A., incumbent, Edward Lumley, Esq., of the Admiralty, Somerset House, to Emma, youngest daughter of the late Mr. Wakeling, of Gerrard Street, Soho.

MURNE—ADDISON—June 28, at Fleet Church, near Weymouth, by the Rev. W. G. S. Addison, vicar of Hartpury, Gloucestershire, Charles Edward Nairne, Esq., Bengal Artillery, third son of Captain Alexander Nairne, H.C.S., to Sophia Bishop, eldest daughter of the Rev. John Dupré Addison, M.A., vicar of Fleet.

RADCLYFFE—SAUNDERSON—July 3, at St. George's, Hanover Square, by the Very Rev. the Dean of Winchester, uncle to the bridegroom, Charles Edward Radclyffe, only son of the Rev. Charles Edward Radclyffe, of South Sydenham, to Constance Albuera, daughter of Colonel and Lady Maria Saunderson, of Charges Street, London, and Northbrook House, Hampshire.

SEWELL—BURN—May 7, at Singapore, by the Rev. T. C. Smyth, M.A., Henry Fane Haylett Sewell, Esq., Lieutenant and Adjutant H.M.'s 40th Regiment Madras N.I., son of Lieut.-General Sewell, C.B., to Violette Anna, only daughter of Brigadier Burn, Commanding Troops in the Straits.

UNTHANK—WILLIAMS—July 3, at Penshurst, Kent, John Unthank, Esq., a Master of the Court of Queen's Bench, to Mary, daughter of the late Lieut.-Colonel Monier Williams.

DEATHS.

BOLTON—May 16, at Cape Town, Cape of Good Hope, Major-General Daniel Bolton, Royal Engineers, aged 66.

BOWYER—July 1, at Dresden, Sir George Bowyer, Bart., aged 77.

COCHRANE—June 30, the infant son of Admiral Sir Thomas and Lady Cochrane.

COX—May 31, at Barbadoes, of yellow fever, Howard Pistow Cox, Ensign H.M.'s 21st N.B. Fusiliers, aged 20, youngest son of G. H. Richardson Cox, Esq., Ashbourn Road, Derby, and late of 62, Upper Berkeley Street, Portman Square.

MACKINTOSH—July 2, at 6, Bury Street, St. James's, Agnew Mackintosh, Esq., M.D., late of H.M.'s Madras Medical Service.

MOORE—May 22, on board the P. and O. steamer Nemesis, aged 20, Rose Frances, the beloved wife of C. W. Moore, of the Bengal Civil Service, and second daughter of Colonel Sir Samuel Falkiner, Bart.

PARTRIDGE—June 30, at Cambridge Street, Hyde Park West, Lieut.-Colonel S. H. Partridge, of the Indian Army, aged 51, second son of the late Arthur Partridge, Esq., of Epping, Essex.

PECHELL—June 29, at 27, Hill Street, Vice-Admiral Sir George Brooke Pechell, Bart., M.P. for Brighton, aged 71.

READY—June 28, at Douglas, Isle of Man, Ellen, daughter of Lieut.-Colonel Ready, aged 6 years and 3 months.

SCOTT—June 25, at his residence, Woodville, Lucan, county Dublin, Sir Hopton Stafford Scott, K.C.B.

SOMERVILLE—June 25, at Florence, aged 91, William Somerville, M.D., formerly one of the principal Inspectors of the Army Medical Board, and Physician to the King—June 30, at Kennington, aged 64, James Forbes Young, M.D., a Magistrate and Deputy-Lieutenant of the county of Surrey.

Also to the Royal Hospital at Chelsea.

Vice-Admiral (on the reserved list) Sir George Richard Brooke Pechell, Bart., M.P., died last Saturday, after a short illness, at the age of 71. This officer entered the Navy in 1803, and shared in the usual number of conflicts with the enemy from that date to the general peace in 1814. He proved himself a gallant and excellent officer whenever the opportunity was permitted him to exhibit talent and bravery. Sir George subsequently served on the West India Station, and received his first rank in 1822; since then he has been on half-pay. The gallant deceased sat for Brighton from the year 1835 up to the period of his death.

We regret to have to announce the death of Captain Rundle Burges Watson, C.B., late Superintendent at Sheerness Dockyard. The event, which was not unexpected by the friends of the gallant deceased, took place at an early hour on Thursday morning. The health of Captain Watson had been declining for some time past. Captain Watson entered the Navy in 1821, and, after serving in a variety of ships as midshipman, mate, and lieutenant, he proceeded, in 1840, to China in the Calliope, then commanded by Sir Thomas Herbert. Captain Watson highly distinguished himself in the first China war, and was rapidly advanced to the rank of Commander and that of Captain, and had the honour of the Bath conferred on him. Captain Watson was also Aide-de-Camp to the Queen.

CRYSTAL PALACE.—THE GREATEST NATIONAL BRASS BAND CONTEST EVER HELD.—Tuesday, 10th, and Wednesday, 11th July.

Arrangements have been made for a Grand Monster Brass Band Contest on the above days, in which ONE HUNDRED BANDS from all parts of England are engaged to take part, comprising in all TWO THOUSAND BRASS INSTRUMENT PERFORMERS. Valuable prizes in Money and Cups will be given by the Company, and, in addition, the principal Musical Instrument Makers in London have signified their intention to present several first-class instruments as special prizes.

The contest will commence in the Grounds each day at 10 o'clock, and continue till dusk, and on both days the whole of the bands will meet at 3 o'clock precisely in the Handel Orchestra, and perform Mendelssohn's "Wedding March," Haydn's chorus, "The heavens are telling;" Handel's "Hallelujah;" "Rule Britannia," and "God save the Queen." A monster Gong Drum, 7 feet in diameter, manufactured expressly for the occasion by Mr. Distin, will accompany the combined bands.

Admission: Tuesday, Half-a-Crown; Wednesday, One Shilling.

Notice.—Excursion trains will run from all principal towns on the Great Western, Midland, London and North Western, Great Northern, South Western, and other railways, for full particulars of which see the companies' advertisements and bills.

CRYSTAL PALACE.—BRASS BAND CONTEST.—In accordance with Regulation No. 5, the Leaders of the Brass Bands entered for this Great Contest are instructed to attend at Exeter Hall on MONDAY NEXT, JULY 9, at 7 o'clock in the Evening, to Draw Lots for the Choice of Platforms,—which will be 8 in number, situate in various parts of the Crystal Palace Grounds,—during the two days' Contest. At this Meeting Orchestra Tickets, including Admission to the Palace, and Railway Passes, will be issued. On account of the unprecedented number of performers (nearly 2000 in number) who will be assembled together, and will be sufficient to entirely fill the Great Handel Orchestra, where each desk and performer will be numbered, no Bands can be admitted to the Orchestra or Palace unless strictly conforming to the above Regulation.

By order, ENDERBY JACKSON, Manager.

CRYSTAL PALACE.—MONDAY, 9TH JULY, 1860.—DISTRIBUTION OF THE PRIZES OF THE NATIONAL RIFLE ASSOCIATION by the Right Hon. SIDNEY HERBERT, M.P., &c. &c.—After the presentation of the Prizes of the National Rifle Association, ATHLETIC SPORTS AND PASTIMES will take place in the Park, for which MONEY PRIZES will be offered. Competitors must be Members of Volunteer Corps in uniform, or have competed for prizes at Wimbledon. Earl Grosvenor, M.P., and Lord Elcho, M.P., have kindly consented to act as umpires.

PRIZES.

Hurdle Race	... ...	Five Guineas.
High Jump	... ...	Five Guineas.
Flat Race (100 yards)	... ...	Five Guineas.
Ditto (300 yards)	... ...	Five Guineas.
Running Broad Jump	... ...	Five Guineas.
Hop, Step, and Jump	... ...	Five Guineas.
Putting the Stone	... ...	Five Guineas.
Picking up Stones (50 stones 1 yard apart)	... ...	Five Guineas.

Admission, One Shilling. Children under Twelve, Sixpence. Open at 9. Distribution of Prizes at 3 o'clock. Sports at 5 o'clock.

THE PRIZES WON AT THE COMPETITION OF THE NATIONAL RIFLE ASSOCIATION, will be PRESENTED to the WINNERS on the Great Orchestra in the Centre Transept of the CRYSTAL PALACE on MONDAY, 9th JULY. Admission, One Shilling; Reserved Seats, Half-a-crown each. Persons desirous of securing any of these tickets should apply at once to the ticket offices at the Crystal Palace, or at Exeter Hall, or to the Council of the National Rifle Association, Wimbledon.

NATIONAL RIFLE ASSOCIATION.—The PRIZES WON at WIMBLEDON will be PRESENTED to the WINNERS in the Central Transept of the CRYSTAL PALACE on MONDAY NEXT, JULY 9th, at Three o'Clock precisely, by the Right Hon. Sidney Herbert, M.P., Minister for War.

ELCHO, Chairman of the Council.

ROYAL CREMORNE GARDENS.—MONDAY, JULY 9, GRAND AMATEUR BRASS BAND CONTEST.—For this highly interesting occasion, Four Hundred Performers are engaged. The trial pieces will be rendered in the Ashburnham Pavilion, which will be fitted up expressly for the occasion, and will accommodate 10,000 persons, and the Grand Performance of all the Bands will take place on the Lawn. Admission, One Shilling only.

THURSDAY, 12TH.—GRAND JUVENILE FETE and VOLUNTEER BALLOON RACE, with Balloon Ascent, Rustic Sports upon the Lawn, and Elizabethan Dances in Costume. The interesting ceremony of Drawing for the Prize Balloons will commence at 6 o'clock, and the highly appropriate Fireworks at 10.

DAILY.—A Grand Vocal and Instrumental Concert, the Comic Ballet of "Stella, or, The Fairy Volunteers," the Marvellous Poletti, the Talented Delapierre Children, an Alfresco Bal, a highly talented Circus Performance, the highly interesting Mahomet, Sullivan and his little Son, Splendid Illuminations and Pyrotechnic Displays. Suppers from 9 o'clock. Sunday Promenade. Table d'Hôte at 6, *2s. 6d.* The Musical Performance of the Aerephon at 5.

ROYAL UNITED SERVICE INSTITUTION, WHITEHALL YARD, S.W.

LECTURE at Three o'clock, Friday, July 15th.—Colonel R. A. Shafto Adair, Suffolk Militia Artillery, A.D.C. to the Queen, "The Defence of London."

By order of the Council,

5 July, 1860. B. BURGESS, Captain, Secretary.

LADIES' GARIBALDI BENEVOLENT ASSOCIATION for the RELIEF of the SICK and WOUNDED, WIDOWS and ORPHANS of Garibaldi's followers, and of the sufferers at Palermo and other places.

This Association has been formed for the purpose of collecting money in sums, from a penny upwards, to provide for the sick and wounded of Garibaldi's followers, and in some degree to relieve the sufferers at Palermo and other places. None of the money will be applied to warlike purposes, but solely to those of charity and benevolence; and it is therefore hoped that many will join in this labour of love.

The subscriptions, when collected, will be at once transmitted to General Garibaldi, who will find the proper agents for the distribution of the same.

The London Central Committee of the Association will be happy to communicate with such local committees as may be formed for the same purpose throughout the country.

Ladies wishing to collect can have subscription papers by written application to the Ladies of the Committee, or the Hon. Secretaries, at the Office.

Subscriptions will be received, addressed to any of the Ladies of the Committee, as also by the Honorary Secretaries, addressed to the Offices, Waterloo Chambers, 20, Cockspur Street, Pall Mall, S.W.; and by the bankers of the association, Messrs. Ransom and Bouverie, 1, Pall Mall East, S.W.; and Messrs. Barnett, Hoare, and Co., 62, Lombard Street, E.C.

LADY PRESIDENT—The Countess of Shaftesbury.

COMMITTEE.

The Hon. Mrs. William Cowper, 17, Curzon Street, Mayfair, W.
Lady Goldsmid, 14, Portland Place, W.
Mrs. Bazley, 3A, King Street, St. James's, S.W.
Mrs. Grant Duff, 20, Queen Street, Mayfair, W.
Mrs. Russell Gurney, 8, Kensington Palace Gardens, W.
Mrs. Samuel Gurney, 25, Princes' Gate, Hyde Park, S.W.
Mrs. Gideon S. Lang, 31, Albion Street, Hyde Park, W.
Mrs. Salis Schwabe, Abbey Lodge, Hanover Gate, Regent's Park, N.W.
Mrs. Montgomery Stuart, 28, Cambridge Terrace, Hyde Park, W.
Mrs. Hensleigh Wedgwood, 6, Queen Anne Street, Cavendish Square, W.

HONORARY SECRETARIES.

Gideon S. Lang, Esq. J. Montgomery Stuart, Esq.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., VIA EGYPT.

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

UNITED STATES MAIL STEAMERS BETWEEN SOUTHAMPTON & NEW YORK.—The magnificent steam-ships belonging to the North German Lloyd are appointed to leave Southampton for NEW YORK direct, carrying the United States Mails:

BREMEN, 3000 tons, 700-horse power, July 11.
NEW YORK, 3000 tons, 700-horse power, August 8.

The speed and accommodation of these steamers are unsurpassed by any steamships crossing the ocean, and the dietary and general arrangements for the convenience and comfort of passengers are unexceptionable. Fares—First class, 20 guineas; Second class, 13 guineas; Third class, 8 guineas. Freight taken on moderate terms. Apply to PHILLIPPS, GRAVES, & PHILLIPPS, Rood Lane, E.C.; GRINDLAY & Co., St. Martin's Lane, Charing Cross, S.W.; or to the undersigned, CROSKEY & Co., Southampton, and 84, King William Street, London, E.C.

GREAT WESTERN RAILWAY.—TEN DAYS EXCURSION TO THE WEST OF ENGLAND, offering facilities for visiting Tavistock, Truro, Penzance, Land's End, &c.—On SATURDAY, JULY 21st, an EXCURSION TRAIN will leave PADDINGTON at 8 a.m., and READING at 9·5 a.m., for Weston-super-Mare, Highbridge, Bridgewater, and Taunton (Fares 20*s.* and 14*s.*); Tiverton and Exeter (22*s.* 6*d.* and 16*s.*); Barnstaple and Bideford (30*s.* and 20*s.*); Starcross, Dawlish, and Teignmouth (25*s.* and 17*s.*); Newton, Torquay, Paignton, and Totness (27*s.* and 18*s.*); and Kingsbridge Road and Plymouth (30*s.* and 20*s.*) returning on TUESDAY, JULY 31st, from Plymouth at 6 a.m., and intermediate stations as per handbills.—Passengers wishing to proceed to any station on the Tavistock, Cornwall, or West Cornwall Railways, will be furnished at Plymouth, upon producing their Excursion Tickets, with 1st, 2nd, or 3rd Class RETURN TICKETS, available up to the 30th JULY, at a SINGLE FARE for the Double Journey.

SOUTH-EASTERN RAILWAY.—THE ROYAL AGRICULTURAL SOCIETY'S EXHIBITION AT CANTERBURY, on 4th, 5th, 6th, 7th, 9th, 10th, 11th, and 12th JULY, 1860.

Digitized by Google

TO EMPLOYERS.—THE ARMY & NAVY PENSIONERS EMPLOYMENT SOCIETY, No. 22, Parliament Street, S.W., has on its registry men of unexceptionable character, who have served as non-commissioned officers and privates in different branches of Her Majesty's Army and Navy. They are still in the prime of life, and besides the advantage of their military training and discipline, possess the material guarantee afforded by a pension, and are satisfied with moderate wages. Among them will be found men of every qualification, and fitted for situations of trust and responsibility. They are peculiarly fitted for places of the following description:—Hall and door-keepers to public and private establishments, messengers to ditto, grooms, helpers, and occasionally in-door servants and gardeners, porters, watchmen, gate, office, and time-keepers, constables, storekeepers, and park-keepers. No fees or expenses to employers or employed. N.B. The men belonging to the London Division of the Corps of Commissionaires have been obtained at this office.

FARMS, ESTATES, &c.

MESSRS. HEARLE & CO., LAND AGENTS AND SURVEYORS, 5, Crescent Place, Blackfriars, E.C., direct attention to the very great facility for Letting and Selling Farms and Estates, afforded by the extensive circulation of their printed Lists, containing upwards of 200 farms and estates, which are published twice per month, and distributed to some hundreds of applicants, free. These Lists contain estates throughout England to be let or sold, especially suitable to the requirements of noblemen and gentlemen of the Naval and Military profession.

Their July List is just published, and ready for distribution, on application at their offices, 5, Crescent Place, Blackfriars, London, E.C.

MONEY.—TO OFFICERS, NOBLEMEN, and GENTLEMEN.—Wanted to place out several sums of money upon Real and Personal Estate. To those having reversionary interests, life estates, and property in settlement, and to whom payment of interest would be a consideration, can have it deferred till in possession. Advances made and Loans effected for short periods upon approved Personal Securities. Apply by letter, or personally between 1 and 5 o'clock, to Mr. COLLINS, 13, Duke Street, St. James's, S.W. Reversions purchased.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

NOTICE OF DIVIDEND.—BANK OF DEPOSIT (Established A.D. 1844), No. 3, Pall Mall East, London, S.W.—The WARRANTS for the HALF-YEARLY INTEREST, at the rate of 5 per cent. per annum, on Deposit Accounts, to the 30th instant, will be ready for delivery on and after the 10th July, and payable daily between the hours of 10 and 4.

June, 1860. PETER MORRISON, Managing Director.

Prospectuses and forms sent free on application.

STATUTORY NOTICE TO CREDITORS.—Major GEORGE BULKELEY TATTERSALL, Deceased.—Pursuant to an Act of Parliament made and passed in the 22nd and 23rd years of the reign of her present Majesty, cap. 35, intituled "An Act to further Amend the Law of Property, and to Relieve Trustees," NOTICE is HEREBY GIVEN, that all persons having or claiming to have any DEBTS or CLAIMS against the ESTATE of GEORGE BULKELEY TATTERSALL, late of No. 13, Shaftesbury Crescent, Pimlico, in the county of Middlesex, and late a Major in the Ceylon Rifle Regiment, deceased, who died on the 21st day of February, 1860, and whose will was proved on or about the 14th day of June, 1860, in the Principal Registry of Her Majesty's Court of Probate, by Frederick Webb Pettigrew, of No. 9, Belgrave Road, Pimlico, and Richard James Wilmot, of No. 19, King Street, Covent Garden, both in the said county of Middlesex, Esquires, the Executors named in the said will, are REQUIRED, on or before the 31ST DAY OF AUGUST NEXT, to send in to the said executors, at the office of their solicitor, Mr. Arthur Bingham Trevenen, situate at No. 8, Danes Inn, Strand, London, the particulars of their respective debts or claims upon or against the said estate, with the nature and particulars of their securities, if any. And Notice is Hereby further Given, that after the said 31st day of August next the said Executors will be at liberty to distribute the whole of the assets of the said deceased among the parties entitled thereto, having regard to the claims (if any) of which they shall have had notice, and will not be liable for or in respect of the assets so distributed, or any part thereof, to any person of whose claim they shall not then have had notice.—Dated this 16th day of June, 1860.

ARMY, NAVY, EAST INDIA, AND COLONIAL AGENCY.

The undersigned act as GENERAL AGENTS in England for Officers and Members of the above services. A detailed Prospectus forwarded on application.

Gen. Sir George Pollock G.C.B.
Rear-Adm. Michael Quin.
Vice-Adm, Sir G. R. Lambert, K.C.B.

ASSURANCES are granted upon the lives of persons in every profession and station in life, and are extended to Tropical and other Climates, on conditions more favourable (especially to the NAVY and ARMY) than heretofore have been deemed practicable.

WILLIAM M. JAMES, Secretary.

13, Waterloo Place, London, S.W.

PERSONS DESIROUS TO EFFECT LIFE ASSURANCES at the smallest outlay, are requested to examine the System of the LIFE ASSOCIATION OF SCOTLAND, whose arrangements have been specially adopted with that view.

The Association was founded in 1838, and is one of the most extensive Life Offices in the Kingdom.

PROFIT SCHEME.—A Share of Profits is allocated YEARLY to every Policy-holder of five years' standing at the preceding annual balance, and is applied so as to reduce the present outlay for his policy. The allocations to Policy-holders of the First Series (namely those as yet entitled to Profits), have this year been so much as 37½ per cent. (namely 7s. 6d. per £1) of the Annual Premiums.

POLICIES OF £1000.	Age 60.	Age 50.	Age 40.	Age 30.
STIPULATED Premiums	£65 10 0	£44 5 0	£32 11 8	£25 0 0
SHARE of Profit for Year	24 11 3	16 11 10	12 4 4	9 7 6
PREMIUMS THUS REDUCED TO	40 18 9	27 13 2	20 7 4	15 12 6

HALF-CREDIT SYSTEM.—Policies of 500l. and upwards may be effected and kept up by payment of only One-half the Premiums for the first Six Years, with interest on the other half.

THOMAS FRASER, Res. Sec.

London, 20, King William Street, City, E.C.

THE RIFLE VOLUNTEER'S COMPANION specially adapted to the probable Requirements (Medical and Surgical) of Her Majesty's Volunteer Forces, on the Field, the Practice Ground, or the March. Designed and arranged by SAVORY & MOORE, Chemists to H.M. Army, &c., No. 143, New Bond Street, London, W.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

CURES OF COUGHS BY

DR. LOCOCK'S PULMONIC WAFERS.—From Mr. Edward Thornton, Chemist, Lyn Regis.—"Gentlemen,—Dr. Locock's Pulmonic Wafers have proved most beneficial in pulmonary complaints and coughs to many persons in our town and neighbourhood; and if my testimony is of any value to you you are quite at liberty to make use of it in any way (Signed) E. THORNTON." They have a pleasant taste. Price 1s. 1½d., 2s. 9d., and 11s. per box. Sold by all druggists.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

MR. EDWARD DAVIESON'S EVER-LASTING TEETH.—Of such EXQUISITE BEAUTY and such ADMIRABLE Fit that Nature appears to have made good the ravages of Time, Disease, or Accident. At TEN SHILLINGS per TOOTH, which price can only be exceeded by expensive mountings.

DAVIESON'S LIQUID ENAMEL, for Stopping Decayed Teeth without pain, is ENAMEL WHITE and lasts for ever. Attendance from Ten till Six. Consultation Free.

448, WEST STRAND, LONDON, W.C., over the Electric Telegraph Office. Descriptive Pamphlets free by post, two stamps.

YOUTH AND BEAUTY.—The FLEUR DE L'AGE, or Bloom of Youth, a vegetable preparation, so innocent that it may be applied to an infant, but yet imparts the most dazzling brilliancy to the complexion, and renders the skin beautifully soft; prevents and cures all eruptions. Sold in cases at 5s. and 11s.—To be had only at ED. DAVIESON'S, 448, West Strand, London, W.C. (over the Electric Telegraph Office). Descriptive Pamphlet free for two stamps. Remittances by postage stamps.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, free, on receipt of a stamped directed envelope, a WARNING VOICE, a new medical work on the effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The guide to those who desire a speedy cure. Every young man should peruse this excellent little work, who values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Bugs, Beetles, and every other insect, by this Powder, which is perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in Packets, 1s., 2s. 6d., and 4s. 6d. each, or post free for 14, or treble size for 36 postage stamps, by T. KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the name and address. Sold by all druggists.

BLIGHTS, MILDEW, BED-BUGS, GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle, Cottage Gardener*, and *Field*. In packets, 1s., 3s., 10s. 6d., retail of all Nursery and Seed Shops. Wholesale of PRICE'S Patent Candle Company, London.

London: EDWARD MOXON & Co., Dover Street, W.

Just published, in demy 8vo. price 7*s.* 6*d.*

THE PATHOLOGY AND TREATMENT OF VENEREAL DISEASES, comprising the most recent doctrines on the subject. By JOHN HARRISON, F.R.C.S.

"Mr. Harrison has evidently had a very extensive experience in this branch of surgery, and has used both his own and other men's researches to good profit in shaping for himself a trustworthy guide to practice. This work will be found useful by the student, or by the practitioner at the commencement of his career."—*British and Foreign Medico-Chirurgical Review.*

"The claim to a scientific character which Mr. Harrison puts forward in favour of the subject of Venereal Diseases will be found amply justified by a perusal of this work. It contains much information. To the practitioner, who wants merely a view of the most recent doctrines on the subject, it is not too long; to the student, who wants practical instruction, it is not too short."—*Lancet.*

Also, by the same Author, demy 8vo. price 7*s.* 6*d.*

THE PATHOLOGY AND TREATMENT OF STRICTURE OF THE URETHRA. Second Edition, with Four Plates, illustrating some of the chief points alluded to in the work.

London: SIMPKIN, MARSHALL, & Co., Stationers' Hall Court, E.C.

WARNE & Co., India-rubber Manufacturers, 9, Gr am Street West, E.C.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of
GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.
Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.
Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.
This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—
1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.
2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.
3rd. It is easy to manufacture, and can be made entirely by machinery.
4th. It is so constructed that accident from careless loading, or otherwise, is impossible.
5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.
6th. The action is always in good order, requiring no adjustment in use.
7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.
8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.
Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.
A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60s. per 1000; blank, 33s. per 1000.
Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

ELEY'S AMMUNITION, comprising WIRE CARTRIDGES for killing game at long distances, WATERPROOF PERCUSSION CAPS, GUN-WADDINGS, BREECH-LOADING CARTRIDGES, and every description of Sporting and Military Ammunition.—ELEY BROTHERS, Sole Contractors to the War Department for Jacob's Rifle Shell Tubes, Cartridges and Caps for Colt's, Adams', and other Revolvers; Enfield Ammunition, &c.; Gray's Inn Road, London, W.C. Wholesale only.

Established 108 years. Engravings free by post.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

MESSRS. OSLER, 45, Oxford Street, London, W., beg to announce that their NEW GALLERY (adjoining their late premises), recently erected from the designs of Mr. Owen Jones, is NOW OPEN, and will be found to contain a more extensive assortment of GLASS CHANDELIERS, Table, and Ornamental Glass, &c., than their hitherto limited space has enabled them to exhibit.

CLARK'S PRIZE MEDAL LAMPS, FOR INDIA, are so arranged to burn under the Punkah. The very numerous testimonials received from India is a guarantee of the sterling merits of these lamps. They are so substantially made that they cannot get out of order. Prospectuses of new designs sent upon application. To be had only of the Metropolitan Light Company, 447, West Strand, W.C.
JOHN CLARK, Manager.

TO OUR VOLUNTEERS.—The simple system of training may be summed up in two or three words—moderate eating and drinking, exercise, and constant use of the Sponge Bath, with the aid of A. & T. DAVIES'S CHAMPION TRAINING TOWELS, Nos. 1 and 2, and FLESH GLOVES. Any man may train. See *Times*, Wednesday 18th April, on the condition of the Boxers for the Championship. No. 1, 1s. 6d.; No. 2, 2s. Flesh Gloves, 1s. per pair. Sponge Gloves, 6d. per pair. All the improved makes in English and Foreign Training Towels, Flesh Gloves, &c., at A. & T. DAVIES'S Linen Warehouse, 121, High Holborn, corner of King Street, W.C.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of
CROSSE & BLACKWELL, 21, Soho Square, London, W.

SAUCES.—Connoisseurs have pronounced LEA & PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea & Perrins' name on Bottle, Label, and Stopper.
Sold by CROSSE & BLACKWELL, London, and all respectable Oilmen and Grocers.
Sole Manufacturers—LEA & PERRINS, Worcester.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND
Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.
Black or Green Tea, 2s. 8d., 2s. 10d., 3s., 3s. 4d., to 4s.
A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.
Sugars are supplied at Market Prices.

TEA.—The Newspapers and Price Currents daily report that COMMON Teas are dearer, and FINE are cheaper. What is the reason of this? Because common (and not fine) is sold to the Public. STRACHAN & Co. guarantee that their Black Teas, from 3s. 8d. to 4s. 2d., consist only of the FINEST descriptions.
26, Cornhill, E.C.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY, AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
WOTHERSPOON & Co., Glasgow and London.

THE GUINEA COAL COMPANY'S (double screened) WALLSEND COAL, One Guinea per Ton (All the Year Round). HORATIO MORGAN, Sole Consignee for London, Office, 17, Wellington Street, Strand, W.C., where all orders are to be sent.
N.B. No Agents or Travellers employed.

GARIBALDI,
OR,
THE IRRESISTIBLE.
The perfume of the day. Price 2s., 3s. 6d., 5s., &c.
HENRY RIGGE, 35, New Bond Street, London, W.

GAY & SONS' DRESSING-CASES are the best and most reasonable.
113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey; at the office of Messrs. BRADBURY & EVANS, in the precinct of White friars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, July 7, 1860.

THE Report of the Commissioners on the defences of the United Kingdom, although only recently presented to Parliament, and thus brought before the public, is dated as far back as 7th February last. It has therefore been in the hands of Her Majesty's Government nearly half a-year, without the least indication having been given of the views of the Cabinet on this all-important question. Not the least provision was made by the Chancellor of the Exchequer, when he produced his Budget, for any portion of the expenditure recommended by the Commissioners, though even then Ministers had had time to make up their minds to something; but nothing was heard of it till Lord Palmerston promised on Tuesday last to make a statement on the subject on Friday, which is probably being made as we are going to press. On 20th August, 1859, Mr. Sidney Herbert urged the Commissioners to report what had best be done "within as short a time as possible"; but now, fairly settled down in office, the War Department takes its ease; and the "one responsible head," —which was to do so much, and act so vigilantly— dreams no longer of "any sudden emergency," and forgets all the bitter lessons which roughly woke us up again and again when previously found "too late." The spurt of preparation that was made by the Derby Cabinet, and rivalled for a moment by their successors, has long since ceased. The Blues being upset, the Blue-and-Yellows no longer exert themselves, but are content to pull lazily along, and finish anyhow.

This will not do. Nor will it do to slur over the consideration of such a subject in the few last days of the session. Neither will the country be content with any plausible proposition of Mr. Gladstone, to raise some six millions with which to commence some of the defensive works recommended by the Royal Commissioners. Paltry preparations would be as ruinous in expense as "little wars;" and they will certainly be of as little avail for any satisfactory results hereafter. The country is not in a humour to be trifled with in this matter. To secure us thoroughly and for ever— as far as human means can—no expense will be grudged; but not a penny will be willingly granted to carry out a scheme which leaves London and Liverpool and Glasgow unprotected, and at best only provides that the Royal Dockyards may become places of refuge for the Army and Navy after the defeat of our fleet at sea and our soldiers in the field. Few can indulge in the vain hope of our then being able "to protract the defence of the country and organise fresh means of resistance"!

We have already pointed out that the recommendations of the Commissioners are altogether inadequate for the object desired, namely, to place "the United Kingdom in a complete state of defence," according to the express terms of Her Majesty's Commission. We have proved this inadequacy, both from the evidence taken, and from the admissions made in the Commissioners' own Report, that the main object of any invasion of this country would be London, and that, London in the hands of an enemy, he could dictate terms. We have glanced at the plea that has been set up on behalf of the Commissioners for omitting London from their scheme of defence, founded upon the terms of the Memorandum of Instructions which Mr. Secretary Herbert thought proper to issue, along with the Commission he had signed "by Her Majesty's command;" and we have shown that even this Memorandum—injudicious as it probably was—though it expressly called attention to the existing fortifications, only required that they should "be treated as part of any general scheme of defence which the Commissioners might recommend," while the defence of Woolwich was explicitly also connected with "the defence of the Metropolis." So in this respect the terms of this Memorandum cannot serve to excuse the Commissioners from omitting London, and proposing no "general scheme" whatever for "the defence of the United Kingdom." Indeed it is not in this respect that the Memorandum can be regarded as very faulty. It is true it dwells rather absurdly upon the fact that existing works, "now completed or in progress, have already received the Queen's sanction after long and mature consideration." As much as to say, "Don't venture to find fault with anything already done by my department!"—We have heard of the legal fiction that "the Queen can do no wrong," but were certainly not prepared to find it applied to fortifications! But the Commissioners were evidently quite aware that this official caution need not cramp their freedom; and we find they could set at nought another and much stronger injunction, which we are surprised should ever have emanated from a statesman of large views like Mr. Sidney Herbert. The paragraph we refer to is as follows:—

"In deliberating on the various plans, and forming their conclusions, the Commission must take into consideration the small amount of force generally maintained by this country, and especially the limited number of Royal Artillery which is likely to be disposable for the defence of our fortified places."

Surely Mr. Herbert is aware—and must have known in August, 1859—that in considering what is now necessary for the defence of England, we must not be influenced by considerations as to "the small amount of force generally maintained by this country," nor "the limited number of our Royal Artillery." Has he forgotten the days when our armed force on shore was half a million? What is necessary we must and shall have, and no other "must" can be regarded.

The answer of the Commissioners to this instruction is however so extravagant as almost to justify the caution having been given. They not only utterly disregard the "small amount" of our troops and "limited number of Royal Artillery," but recommend a series of fortifications which the whole regular available force in the kingdom, if converted altogether into Royal Artillery, could not garrison! It is clear, therefore, that the Royal Commissioners cannot be excused for making inadequate recommendations, upon any plea of their being over-scrupulous in obeying Mr. Sidney Herbert's instructions. We are perfectly right, therefore, in criticising their Report entirely upon its merits.

Enough has already been written—and indeed Lord Overstone's admirable reply to the Commission is in itself enough—as to the glaring defect in their recommendations, the omission of any plan for the defence of the Metropolis. But while attention is now given to this, we must keep in mind that a plan for the defence of London, as well as the Royal Dockyards, is not all that is wanted. Next to London in importance is Liverpool, and the swarms of manufacturing cities in its vicinity. Glasgow and Bristol are also of the greatest importance; and any "general scheme for the defence of the United Kingdom," must be such as to promise, in degree, full protection to these and all our principal seaports. Fortunately for us, in a financial point of view, the means which, according to the very highest authority, will enable us best to protect London, and even the Dockyards, from an attack on land, will also enable us as completely to protect any other portion of our shores.

Our fleet, including our Coast-Guard ships and gunboats (organised so as to serve for more than the suppression of smuggling), will be our first great security. But, in connection with it, our regular troops and Artillery, our Militia and Volunteers, must be so organised that a strong force may be thrown upon any point, almost at a moment's notice, to meet an invading army, should our fleet by some strange accident fail to prevent a landing. The spirit of the old song is far from extinct:—

"And should their broad bottoms in darkness get o'er,
Still Britons they'll find who will fight them on shore!"

And if now the invader might come in greater force and with greater facility than in former days, we are now determined to have a force sufficient to meet him, while our facilities for doing so at once, whenever and wherever he may land, are still greater than even his means of rapid transport. On this subject the Report of the Commissioners is very weak. In the world's history probably there is not to be found such marts of commerce and centres of wealth as are found in the Mersey, the Clyde, the Severn, and the Tyne, so completely unprotected. An attack on Liverpool or Glasgow need certainly be on no very "great scale" to be successful; but that is scarcely a consideration, either for us or for the enemy, suggestive of the security of these places. An invader in possession of Liverpool and Manchester, and threatening London, would almost have as much in his power as if he held the capital itself; while more immediate damage might probable be done by an invading force in the Mersey than in the Thames. Do the Commissioners mean it to be believed, that our commercial ports, if left unprotected, would remain unassailed, while the enemy would choose to attack only our best fortified Dockyards?

Had there been an unprotected Liverpool in the Baltic, do they imagine the allied fleet would have passed it by, to anchor before the casemates of Cronstadt or Sveaborg? It is true that Odessa was for a time spared, but that was because of its cosmopolitan character; and it behoves us to keep in mind that the *Tiger* was destroyed by the Russian guns brought to bear in defence of Odessa.

The House of Commons will never vote six millions of money, to be expended in building fortifications for the defence of the Dockyards, leaving London and our commercial ports unprotected. The Commissioners admit, what every high military authority has said, that the most obvious means of defence against an invader, besides a Channel fleet, is an army in the field. Sir John Burgoyne is of opinion that the Russians with 2000 men and a few light guns, well handled, might have prevented our landing in the Crimea; and that "at Sandown 2000 men would prevent any landing whatever, as light batteries would be sufficient, a 3-pounder being as good as a 68-pounder against a boat, which it would sink to a certainty." (Q. 623, 626.) He also thinks that rockets would be very effective against boats, a subject to which we are glad a Committee is now giving its attention.

All that we want is a well-organised scheme,—a fleet of ships and smaller vessels, with preconcerted arrangements against surprises, feints and decoys, and aided by means of electric telegraphs and light signals, —a proper distribution of the Army and Militia inland, with such railway and telegraphic communications as will enable us to concentrate two or three thousand troops, supported by Armstrong batteries, upon one or more points simultaneously at a moment's notice. We shall certainly be in evil case, if notwithstanding such preparations both afloat and ashore, an enemy might still find it possible to effect a landing. We do not of course say that none of the additional fortifications recommended by the Royal Commissioners ought to be built. But we do say, that few of those proposed for the defence of the Dockyards from the land side should be sanctioned; and that the capital and great ports should be specially secured against a sudden assault. Our chief reliance, however, would certainly still be placed in our Fleet and Coast-Guard, and upon troops and batteries brought to bear unexpectedly upon our enemy's ships and transports, by a thorough system of internal organisation, which would in fact enable us to feel that the kingdom is in a complete state of defence, and that we have apparently no weak points upon our shores, which might not be found upon trial the very strongest and best prepared to resist the invader.

THE ARMY.

3rd Dragoon Guards. Captain Francis has passed an examination in Hindostanee.

4th Light Dragoons. Are ordered to move from Manchester to Dublin, to be stationed. A portion of the regiment embarked at Liverpool on Thursday.

5th Lancers. The regiment, which, on account of glanders appearing in one of the troops, had been detached to Pyestock under canvas, returned to Aldershot on Tuesday, with the exception of the C troop, which is directed to remain at Pyestock until all trace of the disease shall have disappeared from among the horses.

7th Hussars. We lately notified the appointment of Lieutenant Topham to a command in the Rohilcund Horse, and on Monday night, in the House of Commons, Colonel Sykes asked the Secretary of State for India whether there was any foundation for a statement that Major Kirby, of the 94th Foot, and Lieutenant Topham, of the 7th Hussars, had been successively appointed to the command of the Rohilcund Horse, vice Major Crossman, removed, without having a competent knowledge of the language of their men, neither having passed the prescribed examination for interpreter, or for colloquial proficiency in the Hindostanee language. Sir C. Wood said he had made inquiries at the India House, and found that no information had been received to enable him to answer the honourable and gallant member's question either one way or the other.—A lieutenancy and four cornetcies are vacant in the regiment.

16th Lancers. Lieutenant and Adjutant Cowtan is about to retire from the service.

Military Train. Private Reddy, belonging to the Military Train, stationed in the west square of the Royal Artillery Barracks, Woolwich, committed suicide in one of the stables, by placing the muzzle of his carbine in his mouth, and blowing away the back part of his head. On hearing the report of the carbine, his comrades, who were near at hand, rushed to the spot, and found that the unfortunate man on the commission of the act had fallen forward, and was lying on a wheelbarrow on his stomach, quite dead.

Grenadier Guards. It is expected that the Duke of Cambridge will make an inspection of the 1st and 2nd battalions of the Grenadier Guards, at present quartered in the Metropolis, in the course of the ensuing week.

Scots Fusilier Guards. The Duke of Cambridge, Colonel, will inspect both battalions of the regiment this morning in Hyde Park.

4th Regiment. Lieutenant Todd is acting as Adjutant during the absence of Adjutant Sandys. Captain Lawrie has been appointed Interpreter to the regiment vice Sheppard.

6th Regiment. The death of Paymaster Allan M'Donald, of the 1st battalion, is announced as having taken place at Barrackpore on the 23rd of April. He was appointed paymaster in October, 1858.

10th Regiment. Previously to his leaving India, Colonel M. G. Sparkes, who has just been placed on half-pay of this regiment, applied to the Governor-General to know if he could obtain a zemindaree, or lands to settle on, in the event of his retiring from the Service. The Governor-General replied that he can obtain a grant of waste lands in any part of India where such lands are at the disposal of Government, on the prescribed terms for such grants, which can be ascertained by applying to the local Government, but the Governor-General cannot give him a zemindaree. Without undervaluing his long services, the Governor-General was unable to make any exception from the rules which regulate the grants of waste lands in favour of Colonel Sparkes, according to which no distinction is drawn between officers of the Army and other applicants.

14th Regiment. The 2nd Battalion, now at the Curragh, will shortly embark for New Zealand, receiving the 65th Regiment, ordered to return home as soon as tranquillity shall have been restored in the Colony.

16th Regiment, 1st Battalion. Lieutenant Jefferson is on sick leave, from Aldershot, to the 7th proximo.

18th Regiment. We are sorry to announce the death of Captain John Canavan, of this regiment, at Secunderabad, on the 25th of May. Captain Canavan, who was in his 31st year, entered the Service in 1847, and became a captain in 1855. He served with the 18th in the Burmese war of 1852-53. By his death Lieutenant Bryant becomes a captain and Ensign Nicolls a lieutenant without purchase.

19th Regiment, 2nd Battalion. Lieutenant Harris is on leave to the 6th of August, on medical certificate.

21st Regiment. Lieutenant O'Connell is about to retire from the service.

24th Regiment. Lieutenant G. Scott left Calcutta for England on the 18th of May, in the Contest. Lieutenant Thomas has arrived out at Bombay.

44th Regiment. A draft, under orders for China, and consisting of Major Faussett, Lieutenant Maguire, 1 sergeant, and 96 rank and file, has left the camp at Colchester for Hong Kong.

57th Regiment. Colonel Warre, C.B., has gone to Calcutta to take up his appointment as Military Secretary to Sir Hugh Rose.

64th Regiment. Captain D. M. Murray is appointed to act as Aide-de-Camp to Sir William Mansfield, Commander-in-Chief at Bombay.

70th Regiment. Lieutenant C. W. Quin is on his passage home from Calcutta in the Contest.

76th Regiment. Lieut.-Colonel Collingwood Fenwick, of this regiment, died last week at the Pigeon House Fort, Dublin, after a short illness. The commissions of the late lieut.-colonel bear date as follows:—Ensign, 4th September, 1835; lieutenant, 7th April, 1837; captain, 3rd April, 1840; brevet-major, 11th November, 1851; brevet-lieut.-colonel, 26th October, 1858; major, 1st March, 1860. The loss of this esteemed officer will be much felt by the whole of the regiment, who knew him as an upright and good man, and as a faithful soldier. His demise will give promotion to the undermentioned officers:—Brevet-Major Dennis, to be Major; Lieutenant Tripp, to be Captain; Ensign Austin, to be Lieutenant.

86th Regiment. Assistant-Surgeon Ryall is on leave to the 31st of August, on private affairs. Ensign Shaw is also on leave to the 7th of August.

89th Regiment. Lieutenant H. L. Harvest left Calcutta for England, *viâ* the Cape, on the 18th of May.

95th Regiment. Lieutenant Gabbett is on leave to Bombay to October 30, to appear before the General Examining Committee in Hindostanee.

Rifle Brigade. The two companies respectively of the 2nd and 3rd battalions of the Rifle Brigade, attached to Ross's Camel corps, are to rejoin their regiment, the corps having been broken up.

St. Helena Regiment. Forty volunteers for this corps from the 86th Regiment, have left Chatham to join their new regiment.

Malta Fencibles. It is confidently stated that the Malta Fencible regiment is about to be strengthened by the addition of two companies to their present force, the whole to be trained as artillerymen; and that the important increase of 2*d.* per diem will be made to the pay of the private soldiers of this regiment. Nothing has been decided about any increase to the rates of pay of the officers.

Gold Coast Artillery. The detachment under Captain de Ruvignes, with Lieutenants Williams and Horner, have returned to Cape Coast Castle from the Quittah fort, which has been abandoned by the English.

A Circular Memorandum has been issued by the Adjutant-General, the Hon. Sir James Yorke Scarlett, addressed to the Army at home and abroad, in which it is stated that His Royal Highness the General Commanding-in-Chief, having brought under the consideration of the Secretary of State for War the question of the personal allowance of officers detained at ports of embarkation or on court-martial duty, it has been decreed that the allowance granted by the Royal Warrant of 23rd December, 1857, will in future be paid to all officers so situated who may not join a military mess as an honorary member.

A Circular Memorandum, bearing date the 3rd instant, has been promulgated from the Horse Guards, addressed to infantry regiments, by the Adjutant-General, wherein the Duke of Cambridge, as General Commanding-in-Chief, desires that all officers of infantry shall have in their possession a copy of the latest edition of the regulations for conducting the musketry instructions of the Army, which they are to produce at the half-yearly inspection.

The Adjutant-General, the Hon. Sir James Yorke Scarlett, has issued a Circular Memorandum by the desire of His Royal Highness the General Commanding-in-Chief, directing attention to the correspondence relative to the mode of reckoning the service of militiamen enlisting into the regular army, as published for general information. The document bears date the 5th inst. Major-General Rokeby, commanding the division of Guards, addresses the Adjutant-General, in a letter dated 9th May last, as follows:—"Sir,—With reference to the 49th clause of the Mutiny Act, pages 90-91, I have the honour to request to be informed whether a man who has been released by the Secretary of State for War from his militia engagement can claim to commence counting his service for a good conduct badge from the date of his enlistment in the regular army, or from the date of his release from the militia by the Secretary of State, or only from the date of the expiration of his militia term of service. Also, whether a man is to be held to serve his ten years in the regiment into which he has enlisted, from the date of his enlistment into the regular army, from that of his release from his militia engagement, or from the date of the expiration of his services in the militia regiment from which he deserted." Sir Benjamin Hawes gives the following reply, dated the 2nd ult.:—"Sir,—I am directed by Mr. Secretary Herbert to acknowledge the receipt of your letter of the 14th ult. (the Adjutant-General's letter), making inquiry regarding the period from which militiamen who enlist in regiments of the Line may commence to count service. In reply, I am to acquaint you, for the information of His Royal Highness the General Commanding in Chief, that a man who volunteers for the Line, after having been granted a release from the militia, commences to reckon service for good conduct pay from the date of attestation for the regiment to which he volunteers. On the other hand, however, if a militiaman fraudulently enlist in a Line regiment, without having obtained a release, he cannot, even though held to serve in a Line regiment, count his service for good conduct pay until the expiration of the period for which he engaged to serve in the militia. Similarly, with reference to the second paragraph of your letter. In the first case, the man would commence to count service towards the completion of ten years' limited service from the date of attestation; in the second, from the expiration of his engagement for the militia."

Athletic Games at Fort Cumberland.—On Thursday last the Royal Marine Artillery stationed at this fort held their annual sports and games on the glacis. The day was brilliant, and the spectators numerous, so that the holiday passed off in the most agreeable manner. The games commenced at half-past one, and proceeded in the following order:

Description of Race, &c.	Prizes. 1st £ s.	2nd £ s.	3rd £ s.
1. Putting a 32-pound shot—3 trials, one foot kept fast on the line	0 3	0 2	0 0
2. Flat race of 440 yards	0 6	0 4	0 2
3. Running high jump	0 5	0 3	0 0
4. Running backwards 200 yards	0 6	0 4	0 2
5. Running wide jump	0 5	0 3	0 0
6. Hopping race, 150 yards	0 6	0 4	0 2
7. Hurdle race, 440 yards in 3 heats, over 8 flights of hurdles	1 0	0 10	0 6
8. Hop, step, and jump, (running)	0 7	0 5	0 2
9. Flat race, 1000 yards	0 12	0 8	0 4
10. Leaping with a pole...	0 5	0 3	0 0
11. Standing high jump	0 5	0 3	0 0
12. Flat race, 220 yards for drummer boys under 17 years of age (2 yards allowed for every year under that age)	0 5	0 3	0 0
13. Sack race, 80 yards	0 5	0 3	0 2
14. Consolation Stakes (for losers only). Hurdle race of 300 yards, 6 flights of hurdles	0 6	0 4	0 2

The arrangements were very complete, and conducted by Captain Dowell and Lieutenant Brydges, Foster, and Colomb. At the termination of the games there was a grand ball given by the officers, which was a very brilliant affair. A magnificent display of fireworks concluded the festivities, which were kept up until a late hour.

On Thursday the troops in garrison at Woolwich, consisting of Captain W. B. Saunders's T Battery of Horse Artillery, Field Batteries, Foot Artillery, and Military Train Corps, assembled on parade, and proceeded in marching order to Dartford Heath, for the purpose of testing the improved army cooking-apparatus invented by Captain Grant. Two of Captain Grant's ambulatory apparatuses, fitted with every convenience for baking, stewing, boiling, &c., and a number of pontoons, were placed in charge of the Military Train Corps, and the furnaces were lighted before leaving Woolwich. On arriving at the heath, tents were pitched, and trenches dug for the pontoon kettles, and chimneys quickly constructed with earth. At one o'clock rations, consisting of meat, vegetables, &c., cooked by means of the apparatus and pontoons, were served out to each man; Major-General Sir R. Dacres, commandant, and a numerous staff of officers, dining on food cooked in the same manner. By means of a cylinder placed over the chimney of the pontoon trench, coffee was roasted, and afterwards prepared in a mill fixed to one of the gun carriages. The result of the experiments fully confirmed the utility of Captain Grant's invention, which will be used at the Volunteer sham fight.

On Saturday afternoon Mr. George Palmer, of the Bengal Civil Service, the son of Lieutenant-Colonel Palmer, of Nazing Park, who has been compelled to return to England for the restoration of his health, was received at Waltham Abbey by his old comrades, the members of the West Essex Yeomanry Artillery, with a salute of fifteen guns, the band playing appropriate airs. He was greeted most cordially by all, and by none more so than by Sergeant-Major Livesey, from whom he had received in former days that instruction which enabled him to organise and command a corps of native artillery in India, which did much service during the mutiny, and by whom he was congratulated upon the dangers he had encountered before Delhi and other places in 1857 and 1858. This is a strong proof of the advantage that may be derived by the country from young men joining Volunteer corps and acquiring a knowledge of military discipline and duty. Mr. George Palmer was also heartily welcomed with a peal from the old tower of Nazing Church.

A portion of the Aldershot Division, consisting of a cavalry regiment, a field battery of artillery, detachments of the Royal Engineer Train, Royal Engineers, and Military Train, with three regiments of infantry of the 1st Brigade, the whole under Major-General Lawrence, C.B., marched from Aldershot on Thursday for Woolmer, halted there yesterday, were to proceed to day to Beacon Hill, halt there to-morrow, march on Monday to Sandhurst, and return to Aldershot on Tuesday. The infantry battalions sent are ordered not to exceed 500 rank and file each.

Lord Clyde's Farewell Order to the Indian Army. "Adjutant-General's Office, Calcutta, May 26, 1860.—The labours necessary to complete the pacification of this empire are now over. His Excellency the Viceroy has consented to permit that I may resign the command of Her Majesty's forces in India, and retire to England in search of a repose which my age and long service demand. Lieutenant-General Sir Hugh Rose, G.C.B., who conducted most gloriously an important part of the late campaigns, will assume the command in my place on the 4th of June. On leaving this country I take the opportunity of thanking the officers and soldiers of the two Services for their valour and endurance so severely tried, especially in the early part of the insurrection. History does not furnish a more remarkable exhibition of heroical resistance to very adverse circumstances than was shown by the British troops during these mutinies. The memory of their constancy and daring will never die out in India, and the natives must feel that while Britain contains such sons the rule of the British Sovereign must last undisputed. Soldiers! both English and native, I bid you all farewell; and I record as my latest word that the bravery and endurance of which I have spoken with admiration could not alone have ensured success. That success was owing, in a great measure, to your discipline, the foundation of all military virtue, which I trust will never be relaxed.—Clyde, General Commander-in-Chief."

The Wuzeeree expedition has been brought to a successful and not inglorious termination by Brigadier-General Chamberlain and the troops under his command. From other parts of India there is little to tell, except that some trifling disturbances have broken out in the petty Rajpoot State of Banswarra, on the borders of Guzerat. There has also been a slight movement among the Bheels, for the suppression of which four guns and a detachment of infantry had been despatched from Ahmednuggur. It is likewise stated that the Karen Levies have been seized with the mutiny mania, and have gone off, with their arms and ammunition, on a plundering expedition. As they number no more than 120 men, and as five different bodies of military police, under European officers, are in pursuit of them, their lawless career may be expected to close early and ignominiously.

Some three or four hundred mules have arrived in Bombay from Poona, *en route* to China. Cattle of this description will doubtless be found, either for ordnance or commissariat purposes, far more enduring and serviceable in the forthcoming China war, than the oxen of the country, which are reputed to be of a weak, slender habit of body, and altogether unfit for following an army, so that the despatch of a large troop of mules to the seat of war is a measure calculated to be of inestimable value.

Barracks at Malta.—The Barracks now building at St. George's Bay are progressing so rapidly, that, by the end of this month, accommodation will, it is expected, be ready for 200 men. But in consequence of the great want of workmen to execute other parts of the building, the Royal Engineer Department have called for tenders to execute the remaining parts, which, when finished, will accommodate 1000 soldiers, 30 officers with mess establishment, commanding officer's quarters, and commissary and regimental stores for a complete regiment. Owing to the scarcity of private workmen, H. E. the Governor has sent out a company of the Royal Malta Fencibles to assist in forwarding the progress of the work. The construction of the building is under the direction of Captain Bland, R. E., and Mr. Munro, Clerk of Works, Royal Engineer Department.

In the House of Commons on Tuesday Mr. Dodson asked the Secretary of State for War whether there was any foun-

Digitized by Google

dation for the report that the Government had purchased the patent of Whitworth's gun. Mr. S. Herbert replied that it was not true; they had purchased some guns, but not the patent.

A sergeant of the Army Hospital Corps calls attention to the inferior cloth and mean badges in which the non-commissioned officers of his department are clothed. The corps receives a superior rate of pay, and without drawing comparisons which after all may not be invidious, the sergeant-major and non-commissioned officers may reasonably complain that they wear the coarsest description of army cloth, and white cotton badges, whilst the non-commissioned officers of the Military Train and of other special corps rejoice in gold lace, swords, sashes, &c.

We regret to hear that Captain Farrington, of the 2nd Royal Fusiliers, shot himself at Roorkee on the 10th of May. No one can account why he committed the deed.

The eldest son of Major Aylmer Dowdall, late of the 54th and 89th Regiments, an old and gallant officer, has been one of the successful candidates at the recent examinations before the Council of Military Education at Chelsea for direct commissions in the Line. We trust that he will be ere long gazetted to the Service.

A Paris letter in the *Indépendance* says :—"The Emperor Napoleon has just authorised the institution of a National Shooting Association in France, on the same principle as that recently inaugurated in England. Jules Gérard, the famous lion-killer, is to have the management of the enterprise, and a commission has already been appointed to make the necessary arrangements."

SHORNCLIFFE CAMP.

Nos. 8 and 9 Batteries of the 4th Brigade Royal Artillery are under orders to proceed on Monday next, unless the orders are countermanded, to Romney Marsh, a range for shot and shell practice having been secured between Dymchurch and New Romney. The men will be under canvas, and will be absent about a month from camp. The reason that the site selected has been Romney Marsh is, that none of a suitable range could be obtained nearer Shorncliffe.

ROYAL ANTRIM MILITIA ARTILLERY.—A General Court-Martial assembled on Wednesday last, in the Clerk's Room at the Brigade Office, for the purpose of trying Lieutenant Lambert McKellop, on a charge preferred against him, arising from a private quarrel with a brother officer at Sandgate some time in June last, Lieut.-Colonel Devonport, of the 2nd Royal Cheshire, being president. Major Gamble, of the Staff, deputy-judge-advocate, and Captain Carleton, brigade-major, prosecuted. The trial commenced at four in the morning, and adjourned till 1 p.m. on Thursday, for the purpose of hearing the defence. Mr. McKellop, solicitor, of Ballymena, Ireland, defended the prisoner.

The new drainage to the General Hospital being now completed, it is expected that the B Range will be soon evacuated by the patients, thus leaving room for another regiment of infantry; the brigade will then be complete, and the duties at present carried out by two comparatively weak regiments of Militia made less harassing to both officers and men.

The officers of the Royal Artillery are engaged in getting up some military sports to come off next week, the prizes to be competed for by non-commissioned officers and privates of the Royal Artillery. Some excellent sport is expected, as the men are daily training to take part in the matches.

The dangerous *chevaux de frise* which surrounded the enclosure in front of the Artillery Barracks, and by which several horses have been injured, has been removed, and a number of old 18-pounders, that have been cast for many years, have been erected as a fence, a strong chain being suspended from one to the other.

The reading-rooms in the camp being now finished and ready for occupation by the troops, much surprise is expressed at their not being furnished; but procrastination seems the order of the day, and of course the above office will take some further time yet before the wheels will be put in motion. The hint thrown out in this Journal some time back respecting the supplying of the soldiers with tea and coffee at a cheap rate, under the superintendence of a respectable pensioner, and also the indulgence of a pipe of tobacco whilst reading the newspaper or entertaining book will, it is hoped, not be thrown away; nor would it militate against the contemplated improvement in the morals of the soldier, which institutions like these are calculated to afford, if the indulgences suggested above were carried out; at all events, the necessity of wearing a stock and being buttoned up as if for parade order, by the visitors to the rooms, will not be insisted upon by any of the powers that be.

COLCHESTER CAMP.

The Rev. E. L. Walsh, chaplain to the Indian depôts stationed in this camp, has received orders immediately to enter upon his new duties at Parkhurst. The reverend gentleman during his residence in Colchester has secured the esteem not only of those amongst whom he carried on his ministerial labours, but of a large circle of lay and clerical friends.

The embarkation of drafts for India and China has commenced, the depôts of the 44th and the 1st Royals having sent off detachments to join the service companies of their respective regiments abroad. A draft of 145 rank and file from the 56th, under Ensign Grimes, will embark on the 24th inst. on board the Star Queen at Tilbury, for Bombay. The additional accommodation thus afforded in camp will be very acceptable, the crowded state of the huts during the present warm days being inconveniently felt, especially by the young soldiers. Notwithstanding the great heat, however, there is comparatively but little sickness, the hospital patients numbering only about 130 out of 2650 non-commissioned officers and men now in camp.

During the present week about 30 men belonging to the several regiments in camp, have joined their depôts on their return from India, and have claimed their discharge. They were chiefly old campaigners who had passed through much service, especially during the Indian mutiny.

The practice of robbing jewellers' shops appears to have assumed the form of a mania amongst some of the soldiers of this camp, who are undeterred by the capture and conviction of their comrades for similar offences. During the present week another depredation of this nature (making the fifth within a few months) has been committed by two men of the 5th Fusiliers, assisted by two privates of the 1st battalion of the 6th Regiment. The men appear to have watched their opportunity, during the temporary absence of the jeweller, to break the window and steal seven valuable gold and silver watches and chains, three of which fell out of their hands, but with the other four they decamped in different directions. The alarm was raised and all but one were captured by the police; he, however, fell into the hands of the piquet, and was removed to the guard-room, and most of the property was recovered. The frequency of these and other robberies by soldiers, creates some alarm in the town, and strengthens the general impression that the fresh recruits comprise an unusual number of convicted thieves and ticket-of-leave men.

The spirit of "larking" amongst officers, which has been so strongly deprecated by the Commander-in-Chief, has unfortunately manifested itself in Colchester. A short time since, in one night no less than thirteen knockers were wrenched from doors, three sign-boards were taken from tradesmen's houses, and several bell-pulls were destroyed, by some young officers from the camp, who escaped from the clutches of the police merely by the fortunate possession of a key of one of the garrison gates, which enabled them to enter before they could be captured. The matter has come under the notice of the military authorities, who have closed the gate.

The Duke of Cambridge has directed a Circular Memorandum to be forwarded to all commanding officers and those in charge of recruiting districts, directing that when any recruit has been punished by two justices as a rogue and a vagabond, immediate information is to be forwarded of the circumstance to the Horse Guards, in order that it may be determined whether he is deemed to be enlisted as a soldier.

The Army Gazette.

WAR OFFICE, PALL MALL, JULY 10.

2nd Regiment of Dragoon Guards—Captain Arthur Cassidy, from the Military Train, to be Captain, vice Bushman, who exchanges, receiving the former difference between infantry and cavalry; Ensign Thomas Gerard Elrington, from the 91st Foot, to be Cornet, without purchase, vice Betty, promoted.

5th Light Dragoons—Lieutenant Henry Norman Salis to be Captain, by purchase, vice Rendall, who retires; Lieutenant William Lloyd Browne, from the 12th Light Dragoons, to be Lieutenant, vice Ridley, superseded for being absent without leave; Cornet John Chaffey to be Lieutenant, by purchase, vice Salis.

Military Train—Captain George Bushman, from the 2nd Dragoon Guards, to be Captain, vice Cassidy, who exchanges.

1st Regiment of Foot—Gentleman Cadet George Paterson, from the Royal Military College, to be Ensign, without purchase, vice Bainbridge, superseded for being absent without leave; Assistant-Surgeon Thomas Turnville Gardner, from the Staff, to be Assistant-Surgeon, vice Atkinson, appointed to the Staff.

2nd Foot—Gentleman Cadet William Charles Hood, from the Royal Military College, to be Ensign, without purchase, vice Robinson, appointed to the 17th Light Dragoons.

3rd Foot—Gentleman Cadet Edward Girdleston Graham, from the Royal Military College, to be Ensign, without purchase, vice Twining, appointed to the 35th Foot.

4th Foot.—Gentleman Cadet Francis Plummer, from the Royal Military College, to be Ensign, without purchase, vice Bayly, deceased.

8th Foot—Lieutenant William Unwin, from the 20th Foot, to be Lieutenant, vice Lovekin, who exchanges; Gentleman Cadet Bowland Ganard Moffatt, from the Royal Military College, to be Ensign without purchase, vice Wingate, appointed to the 74th Foot; Gentleman Cadet Thomas George Crawley, from the Royal Military College, to be Ensign, without purchase, vice Cooper, who resigns.

14th Foot—Captain William Henry Gresson, from the 27th Foot, to be Captain, vice Cowell, who exchanges.

15th Foot—Gentleman Cadet Howard Molyneux Edward Brunker, from the Royal Military College, to be Ensign, without purchase, vice Shaw, promoted in the Military Train.

16th Foot—Gentleman Cadet George Griffiths, from the Royal Military College, to be Ensign, without purchase, vice Cooch, promoted.

17th Foot—Lieutenant James William Mitchell, from the 42nd Foot, to be Lieutenant, vice Elgin, who exchanges.

20th Foot—Lieutenant John Henry Herbert St. John, to be Captain, by purchase, vice O'Shea, who retires; Lieutenant James Magenis Lovekin, from the 8th Foot, to be Lieutenant, vice Unwin, who exchanges; Ensign Clifford Gabourel Gibaut to be Lieutenant, by purchase, vice St John: Gentleman Cadet Charles Thomas Doorly, from the Royal Military College, to be Ensign, without purchase, vice Gibbs, promoted.

21st Foot—Gentleman Cadet Henry Beresford Nangle, from the Royal Military College, to be Ensign, without purchase, vice Cox, deceased.

23rd Foot—Assistant-Surgeon Francis Alfred Turton, from the Staff, to be Assistant-Surgeon, vice Sylvester, appointed to the Staff.

24th Foot—Gentleman Cadet William Dinwiddie, from the Royal Military College, to be Ensign, without purchase, vice Hennessy, appointed to the 46th Foot.

27th Foot—Captain Henry Cowell, from the 14th Foot, to be Captain, vice Gresson, who exchanges.

42nd Foot—Lieutenant Edward Arthur Elgin, from the 17th Foot, to be Lieutenant, vice Mitchell, who exchanges; Assistant-Surgeon Edwin Wilkes, from the Staff, to be Assistant-Surgeon, vice Mackinnon, appointed to the Staff.

46th Foot—Ensign Alexander Carden Hennessy, from the 24th Foot, to be Ensign, vice Priestley, deceased.

52nd Foot—Assistant-Surgeon George Park, M.D., from the Staff, to be Assistant-Surgeon, vice Innes, appointed to the Staff.

60th Foot—Captain and Brevet-Lieut.-Colonel Dunbar Douglas Muter to be Major, by purchase, vice Bligh, who retires; Lieutenant Philip Julian Curtis to be Captain, by purchase, vice Brevet-Lieut.-Colonel Muter.

65th Foot—Major and Brevet-Colonel Alfred Francis W. Wyatt to be Lieut.-Colonel, without purchase, vice Brevet-Colonel Charles Emilius Gold, promoted to the rank of Major-General; Captain and Brevet-Lieut.-Colonel George Freeman Murray to be Major, without purchase, vice Wyatt; Lieutenant George Buck to be Captain, without purchase, vice Murray; Ensign John Shrews Talbot to be Lieutenant, without purchase, vice Buck.

72nd Foot—Lieutenant Gustavus Lambert Basset to be Captain, by purchase, vice the Hon. H. W. Fitz-Maurice, who retires; Ensign Francis George Sherlock to be Lieutenant, by purchase, vice Basset.

75th Foot—Lieut.-Colonel and Brevet-Colonel Augustus Halifax Ferryman, C.B., from the 89th Foot, to be Lieut.-Colonel, vice Bourchier, who exchanges.

76th Foot—Captain Henry Fowler Mackay, from half-pay Unattached, to be Captain, vice Captain and Brevet-Lieut.-Colonel Mortimer, who exchanges; Lieutenant John Vincent to be Captain, by purchase, vice Mackay, who retires; Ensign Henry Bouverie Pusey to be Lieutenant, by purchase, vice Vincent.

79th Foot—Lieut.-Colonel and Brevet-Colonel George Monkland, from half-pay Unattached, to be Lieut.-Colonel, vice Brevet-Colonel Richard C. H. Taylor, C.B., appointed to a Depôt Battalion; Major William Chauval Hodgson to be Lieut.-Colonel, by purchase, vice Monkland, who retires; Captain and Brevet-Major Alexander Cockburn M'Barnet to be Major, by purchase, vice Hodgson; Lieutenant John Miller M'Nair to be Captain, by purchase, vice M'Barnet.

80th Foot—Thomas Theobald Willington, Gent., to be Ensign, by purchase, vice Dowling, who retires; Assistant-Surgeon Robert Muir Gilchrist, M.D., from the Staff, to be Assistant-Surgeon, vice Frank, appointed to the Staff.

89th Foot—Lieut.-Colonel Legendre Charles Bourchier, from the 75th Foot, to be Lieut.-Colonel, vice Brevet-Colonel Ferryman, C.B., who exchanges.

91st Foot—Ensign Charles Lacon Harvey to be Lieutenant, by purchase, vice Spearman, whose promotion, by purchase, on the 11th of May, 1860, has been cancelled.

94th Foot—Ensign Ramsay Steuart to be Lieutenant, without purchase, vice Aytoun, killed in action; Sergeant-Major John Humphreys to be Ensign, without purchase, vice Steuart.

95th Foot—Assistant-Surgeon John Smeeton Allanby, M.D., from the Staff, to be Assistant-Surgeon, vice Sharpe, appointed to the Staff.

3rd West India Regiment—Alexander Stewart Hincks, Gent., to be Ensign, by purchase, vice M'Cormick, promoted.

HOSPITAL STAFF.

Assistant-Surgeon Robert Atkinson, from the 1st Foot, to be Assistant-Surgeon to the Forces, vice Allanby, appointed to the 95th Foot.

Assistant-Surgeon Henry Thomas Sylvester, M.D., from the 23rd Foot, to be Assistant-Surgeon to the Forces, vice Gardner, appointed to the 1st Foot.

Assistant-Surgeon William Alexander Mackinnon, from the 42nd Foot, to be Assistant-Surgeon to the Forces, vice Turton, appointed to the 23rd Foot.

Assistant-Surgeon Charles Alexander Innes, M.D., from the 52nd Foot, to be Assistant-Surgeon to the Forces, vice Wilkes, appointed to the 42nd Foot.

Assistant-Surgeon Philip Frank, M.D., from the 80th Foot to be Assistant-Surgeon to the Forces, vice Park, appointed to the 52nd Foot.

Assistant-Surgeon William Sharpe, from the 95th Foot, to be Assistant-Surgeon to the Forces, vice Gilchrist, appointed to the 80th Foot.

VETERINARY MEDICAL DEPARTMENT.

First-class Veterinary Surgeon F. Delany, from the 1st Dragoon Guards, to be Staff Veterinary Surgeon, vice James George Philips, appointed to the Cavalry Depôt at Maidstone.

BREVET.

Brevet-Major William Ready, Captain, on half-pay, unattached, Staff Officer of Pensioners, retired on full pay, to be Lieut.-Colonel in the army, the rank being honorary only.

Captain Henry Fowler Mackay, 76th Foot, to be Major in the army.

Brevet-Major Henry Fowler Mackay, 76th Foot, to be Lieut.-Colonel in the army.

Paymaster Robert William Duff, Depôt Battalion, to have the honorary rank of Major, under the Royal Warrant of the 27th of January, 1860.

Paymaster James Arnold Bazalgette, 42nd Foot, to have the honorary rank of Captain, under the Royal Warrant of the 27th of January, 1860.

WAR OFFICE, PALL MALL, JULY 13.

BREVET.

To be Aides-de-camp to the Queen with the Honorary Rank of Colonel in the Army:—Colonel the Honourable Sir Allan Napier Macnab, Bart., Commanding 7th Military District, Upper Canada; Colonel The Honourable Sir Etienne Paschal Taché, Commanding 2nd Military District, Lower Canada.

ENLISTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—May I beg space for a few remarks in your next GAZETTE, relative to the parliamentary report in your last paper, headed "Enlistment." It is stated that Mr. Humberston called attention to the petition of John Bishop, complaining of the enlistment of his son into the 7th Dragoon Guards, on the 27th of June, 1859, his son being at the time of his enlistment a lawfully bound apprentice. Mr. Sidney Herbert explained that the recruit in question was apprenticed for only five years, which was not a legal apprenticeship under the Mutiny Act; the only apprenticeship recognised by the Mutiny Act was one of seven years. That my son was then, and is still, a legal apprentice in the eye of the law, he having been duly bound on a stamped indenture, as prescribed by the Stamp Act, for five years, and being fifteen years old when bound, no person will deny; nor do I believe that the 62nd clause in the Mutiny Act can, nor ever was intended to, make null and void the Act under which my son and thousands of other youths are yearly bound apprentice; if so, the Act of Enlistment is not necessary to invalidate such deeds of apprenticeship; for all such deeds of apprenticeship are necessarily of themselves illegal, and that too in consequence of this 62nd clause of the Mutiny Act over-riding the Apprenticeship Act; and therefore the sooner one or the other of these Acts is altered the better.

The clause alluded to is: That no master is entitled to claim an apprentice who shall enlist unless he shall, within one calendar month after the apprentice left his service, go before some justice and take the oath required; nor unless the apprentice was bound (if in England) for seven years, not having been above fourteen years of age when bound, nor unless the apprentice when demanded shall be under twenty-one.

I cannot believe this clause will bear any other construction than simply this: That masters cannot claim their apprentices when bound for less than seven years, and if above fourteen years of age when bound, unless he shall be under the age of twenty-one when claimed; but it certainly does not wholly invalidate these deeds of apprenticeship. If then my views are correct as to the legal construction of that clause in the Mutiny Act, I cannot conceive how it happens that the recruiting sergeant is so badly instructed, that in this particular case he tells the apprentice that his deed of apprenticeship is not legal, and not worth twopence, because he was not bound for seven years, and was above fourteen years' old when bound. Now if my son had flatly told the sergeant that he was not an apprentice until after the act of attestation, then I admit Mr. Sidney Herbert's argument and decision to be correct; for under these circumstances I had no right to claim the restoration of the money, and the 62nd clause certainly excludes the master's claim. But as this apprentice did tell the sergeant of his apprenticeship at the time of his enlistment (which the sergeant admitted to me), my application was against the illegality of the whole transaction; and upon that ground alone did I apply for and expect the restoration of the money. It follows then that it must be through the delusion under which the sergeant laboured as to the meaning of the 62nd clause that he was induced to tell this apprentice that his apprenticeship was not legal, because he was not bound for seven years, and was above fourteen years old when bound; and with this idea the sergeant records in the deed of attestation in answer to question 5 (are you an apprentice?) the answer, no. And when on his way to the magistrate's court with the sergeant, the boy having had his ideas opened by a hint from a friend that he was a legal apprentice, asked the sergeant whether or not he was so, he was again told by the sergeant that he was not a legal apprentice. This then was my ground for appeal against the enlistment as being wholly illegal, which I still assert, and on which I rested my hope of justice being done to me, on the restoration of the money paid by me for the boy's discharge, when ignorant of the above features in the enlistment.—I am, &c.,

JOHN BISHOP.

WESTERN AUSTRALIA AS A SANATORIUM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The *Lancet* of April 14th contains a leading article on the subject of a sanatorium for invalids from China about to be established at the Cape. So early an allusion to the preparations made for our sick and wounded must satisfy the public the interests of soldiers and sailors are not lost sight of, and that should war with the Celestials be inevitable our medical men, ever vigilant, will have an asylum where the bullet-stricken or climate-affected invalid should find an asylum.

One of the subjects prominently engaging Government attention at the present moment is the selection of some site in the southern hemisphere eligible as a permanent sanatorium for our sufferers from India, Ceylon, and China. We hear of men of the first experience devoting their energies to the solution of the difficulty. As the subject, however, involves the double consideration of finance and eligibility, a mass of evidence must be forthcoming ere the question can be finally settled. Before steam communication with India was fairly established, the Cape route was the only route; and as most vessels visited the Cape colony on the homeward voyage, Cape Town became a sort of half-way house and resting place for many an old Indian. Thus its reputation became established as a climate well suited to the Indian debilitated constitution, and held out the advantage also of permitting an officer to retain his Indian pay and allowances. This reputation the colony has maintained; but the facilities for reaching England have multiplied so greatly by the overland route, that few think of rounding the Cape unless proceeding with their families.

Simultaneously with the progress of steam conveyance distant lands have arisen from their hitherto savage state to the summit of public estimation, and colonies only recognised fifteen years ago as the resort of adventurers and transported felons, have now attained the position of independent possessions, with wealth in unknown abundance—I allude to the Australian colonies. I have no intention to describe here the use and progress of each separate colony, but shall confine my observations to the one bearing most on the subject of a sanatorium, and whose interests are being advocated by the colonists themselves.

Western Australia, the least known of the Australian group, has hitherto been in a state of obscurity, and, but for the timely introduction of convicts in 1850, must, with the gold crisis which followed the year after at Melbourne and New South Wales, have been erased from the list of colonies. To so low an ebb had the population subsided, that I believe 5000 comprehended the entire numbers, who, perhaps, with a few individual exceptions, had resolved upon leaving their all to emigrate to the more successful neighbouring settlements. The timely resolution of Government saved many a now successful settler whose ruin was otherwise inevitable. The continuous stream of exiles annually poured into the colony, with its attendant Government expeditions, has induced fresh vigour among the inhabitants. Lands once allowed to go waste are now rich with cultivation, and the amount of stock for human consumption proportionately increased.

With the influx of increasing population, attention has been directed to the peculiar salubrity of the colony. Its thorough immunity from all epidemics, such as smallpox, measles, scarlatina, cholera, &c.

Diseases of zymotic origin are uncommon, and constitute rare occurrences. Nature appears to have granted the resident of Western Australia a total exemption from the maladies peculiar to our race; so that man dies not from endemic causes, but from diseases of congenital origin and from actual wear and tear of constitution, flesh and blood yielding to the distinctive laws operating throughout the universe whether on animate or inanimate material.

Prefacing with these remarks, I shall compare the relative merits of the Cape and Western Australia as a site for a sanatorium, and I conceive the balance will be in favour of the latter.

Western Australia.	Cape of Good Hope.
1. Freedom from epidemics.	1. Subject to every epidemic.
2. Proximity to India, China, and Ceylon.	2. Distance from each.
3. The facilities for conveyance from Ceylon and China, and certainty of smooth voyage after crossing the equator.	3. Certainty of gales and frequency of hurricanes off Mauritius and Cape St. Mary, Madagascar.
4. The excellent qualities of meat and flour, and other productions.	4. Superior to Cape produce.
5. Cheaper living for sick officers.	5. Cape is notoriously expensive.
6. No risk of loss of life from reptiles and wild animals, or Caffres.	6. Greater from all these causes.
7. Western Australia being a penal colony, the presence of convalescents constitutes a protective force.	7. No such necessity existing at the Cape.
8. No means for desertion.	8. Great facilities afforded.
9. Immunity from syphilis.	9. Abundance at the Cape.

The Cape has hitherto been renowned for its vines and peculiar wines. Having paid three visits to the Cape and spent four years at Swan River, I have no hesitation in saying the produce of the latter surpasses in abundance, variety, and lusciousness the grapes of the Cape, though the manufacture of wine is in its infancy from the reasons formerly mentioned, viz., the deserted condition of the colony, and the want of skilled labour.

In writing the foregoing, the main object has been to secure a locality in the southern hemisphere, within easy distance from India, China, and Ceylon, where the Indian invalid may enjoy total immunity from all causes tending to prejudice his health, at a considerably reduced cost to Government, and where, also, justice may be meted out to the colonists by affording protection against the hosts of malefactors introduced from Great Britain and India,—these at present are nearly equivalent to the free population,—giving a preponderating strength likely to inspire confidence and endanger life.

The method of conveying invalids I propose to be by steam; that each fortnight or month such as require removal from the Presidencies and China, shall be conveyed to Ceylon by Peninsular and Oriental steamers, whence they can be transported by a Government steamer to Freemantle, West Australia. By this method, in a little more than a fortnight, a sick man would be landed at the sanatorium, or the sick from China be transported from Singapore, the more immediate and direct route.

Western Australia affords many ports, among which King George's Sound is pre-eminently adapted for shipping, but as visiting this would involve rounding the stormy Cape Leivin, I would give preference to Freemantle, which is nearer and safe at all seasons, and is within thirteen miles of the capital, Perth, and contains the chief convict establishment. I fear already prolixity. The above advantages held out by Swan River as a sanatorium over the Cape may I hope direct public attention to it. I feel confident of its peculiar suitability to the Indian invalid.—I am, sir, &c.,

Scinde, June, 1860. M.D.

THE CIVIL OFFICERS OF THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Would you have the kindness to permit me through your journal to draw attention to a most singular Order which has just been issued from the Horse Guards, viz., "That the members of the civil departments attached to the Army are not entitled to a salute from soldiers unless they hold a commission." Now, sir, the effect of this order will be to deprive the officers of the military store, royal engineer and barrack departments of that respect which has heretofore been accorded to them when in uniform. These gentlemen have relative Army rank from lieutenant-colonel to ensign, according to the class of the officer. They are frequently brought into contact with the troops, in the performance of their duty, and are thereby subject to insulting remarks and coarse language, which the soldier is by no means sparing of towards an officer who is not protected by regulations entitling him to the respect due to his rank.

I trust, sir, that you will use the influence of your journal to have the insulting order rescinded, or that our appointments should be transformed into commissions.

I am, &c., A CIVIL OFFICER.

RETIRED ARMY CAPTAINS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—One of your military cotemporaries last week inserted a letter from "A Retired Army Captain," begging that we might be allowed to retain our rank. "Once a captain always a captain," is an old saying; and a civilian would hardly believe that this honorary rank is denied to the captain in the Line who retires, after having commanded his company for years, and only granted to retired quartermasters and captains of militia. Can the Secretary for War call this just? A War Office Memorandum granting this much desired favour would cost nothing. Do plead our cause.—I am, sir, &c., ANOTHER RETIRED CAPTAIN.

SUBALTERNS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The generous columns of the ARMY AND NAVY GAZETTE have for some time past laid before the public statements, drawing attention to the sad pecuniary condition of the subalterns of the Army. The melancholy lot of such of these unfortunates as happen to be without private resources to meet the extravagant demands upon their income is so notorious that I am astonished no decisive steps have been taken to place matters on such a footing as would at least ensure decent attention to Her Majesty's Regulations on the subject of mess and band expenses, and relieve those officers who are unable to defray them from charges altogether beyond the means placed by the public at their disposal.

How it is that military discipline, on all other matters so stringent and effective, should on this particular subject be so feeble and impotent, is an anomaly that I must leave for wiser heads than mine to explain, but I trust that something will ere long be done to put a stop to the infamous manner in which poor officers are compelled to make payments which ultimately oblige them to leave the Service ruined and broken-hearted men.

As the Minister for War appears to be unable (for I do not believe he is unwilling) to increase the pay of the subalterns, cannot the Commander-in-Chief prevent the attendance of these officers at mess from being any longer compulsory? Common justice and fairness require this; and hoping that you will use in our behalf that influence of yours which has already effected so much good for the Army,

I am, &c. A SUBALTERN.

THE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As the opinions of practical men ought to have a certain value in the eyes of those who have the direction in effecting so momentous a change as that contemplated, and, I may add, necessary, I have lifted up my feeble voice in the hope of being of assistance in the settlement of the *questio vexata*.

The great stumbling block appears to be the military funds. This obstacle to a complete amalgamation of the Indian with the Royal army must be removed; and that justice is but due to the present subscribers and incumbents will be, I doubt not, readily admitted. From the feelings which I hear generally expressed in regard to regimental duty in India since the mutiny, I incline to the opinion that if each officer, especially of the Bengal army, were asked if he were disposed to forego his privileges, and sacrifice what he has already subscribed to the military fund, on condition of being transferred at once to the Royal army with the rank he holds, that very many (especially bachelors) would readily accept the terms. The disgust created by the mutiny being general, the growing antipathy to an Indian sun and to Indian duties in general is intense; and as many would lose but little, they would weigh the loss of a prospective pension to their widows (yet unmarried) and their children et(y unborn) against the present chances of enjoyment out of India in the Royal army.

The first indispensable step, however, to be taken, is to allow no more additions to the number of subscribers; and to this end those who come under the regulation last year put forth of not being posted to regiments pending the contemplated changes, should not be required to subscribe, or become members. Any loss which would necessarily arise from this cause, as well as from those who are willing to forego their fund privileges, would not be of very great importance, as their subscriptions would be of the lower and not of the higher grade of subscribers; but those who do not wish to forego the advantages they deem their privilege, must be put on another footing; and as the absorption of the military funds is a necessity towards the amalgamation of the two armies, change is absolutely requisite; doubly so, by reason of the civil and staff corps about to be initiated, separating virtually the incumbents from military service, practically or in toto. The process of dissolving the military funds must be either progressive or immediate.

If progressive, the capital in hand and the subscriptions of those who hold to the fund must be the source whence flows the pension to widows and children; and in time both capital and pensioners would be absorbed, and the funds cease to exist. I do not advocate this; but suggest it as a means, leaving the question of time as an objection or otherwise for those who have the direction of affairs. If the dissolution of the funds be immediate, and the new system arising, from the amalgamation be desirable, Government should be put in possession of all funds, and become guarantee for all payment under the regulations now in force in the respective funds. To this I anticipate objections would be raised by those who have hitherto had a voice in creating, modifying, and regulating the funds from time to time, but who do not attach sufficient importance to the fact that Government subscribes very largely to the charity, but is at liberty to withdraw its subscription whenever it chooses. I question much whether any subscriber would withhold his sanction to this measure with such a guarantee as proposed and with the certainty that should the Government grant be withheld, his wife and his children's pensions in case of his death would suffer a diminution he little contemplates when living, and this withdrawal is perfectly legitimate according to the tenor of the Annual Gift. The next point to which I would refer is the absorption of the present body of officers. The colonels of regiments I presume would remain in *statu quo* on the principle that they have fulfilled their contracts, and are entitled to their privileges, better known as "off reckonings." I leave them then out of the category, to be absorbed by casualties. The lieut.-colonels, brevet-colonels, of the Indian army are for the most part men of from thirty to forty years' service and upwards. A general shelving appears to me indispensable, and the *modus operandi* in justice to all should be on the sliding scale, a collective service of so many years forming the basis for the douceur which must be a *sine qud non* to this forcible measure, for it would be hard on the man of forty years' service to be placed on the same footing as he of thirty, and equally so that he of thirty should enjoy the same benefits as he of thirty-five or forty-five; or if the shelving is according to rank, then the brevet-colonel of 1854 should have an advantage over him of 1860. I use the word "douceur" on the supposition that where a forcible measure is necessary, not arising from any fault of the forced, a compensation is not only just but righteous. The amount of that compensation I do not pretend to dictate; but the form of an addition to the colonel's retiring pension appears most in accordance with policy, as admitting of a gradual absorption, and consequently a gradual eventual benefit to the State.

The Staff Corps appears to me a necessity, and the proposed gift of military advancement after certain periods of service an unobjectionable measure; but there is one rock on which the vessel must not split, viz., the possibility of the military and civil coming in contact as military officers; the civil should be honorary rank, the military official, and a transfer at any time from civil employ to military made impossible. A system which was allowed of the nomination to a divisional command of an officer who had been upwards of 40 years in the commissariat, and another to a brigade who has been holding the first staff appointment at the presidency for 20 years, cannot be too severely condemned as unjust to individuals, and far from beneficial to the public service; and as nepotism has been generally speaking the great source of advancement to the exclusion of talent without interest (a fact too palpable to be denied notwithstanding all the addresses of East India Chairmen to the incipient juvenile heroes of Addiscombe), this error may be rectified. It is well known in India that if Dowb has a letter from an influential politician in England to a Governor-General in India, that Dowb will speedily partake of the loaves and fishes, even were the said Dowb a fool; and to counteract such a system let the civil employé remain in civil employment so long as he is fit, and if unfit be transferred to half-pay unattached, or some such situation suited to his capacity. If it is intended that officers unfit for civil or staff employ should revert to regiments, do they not come in with a superior rank to the regimental officer because of the greater rapidity of his promotion each five years in civil employ! This requires to be looked to.

The shelving then of the brevet-colonels (regimental lieut.-colonels) on the sliding-scale system; the staff corps under any conditions which involve permanent removal from the regimental books as effective; the transfer of officers to irregular corps and native police; the volunteering into the Royal army on the terms proposed, would make such a hole in the present army of India in regard to officers as would render the immediate amalgamation a matter of little difficulty; and as a commission seems the favourite mode of dealing now-a-days with such questions, I would venture to suggest that it should be composed of officers of both the Royal and Indian Services, men of regimental experience, still having a certain interest in the questions submitted, and not off reckoning major-generals or retired full pay officers, with either antiquated ideas or wanting in personal interest. No greater mistake has ever been made in the composition of these commissions, than to place those who have been away from regiments the greater part of their lives as members, and who, though they may fancy they know much, do in reality know little of regimental matters, still less of regimental requirements.

C. H. G.

A committee appointed by the Great Yarmouth Town-Council has met Col. Haddon, R.E., with respect to a site for a fort at the mouth of the harbour. A space of about three acres was selected and approved. The estimated expense of the works contemplated is stated to be from 10,000*l.* to 12,000*l.*

NEW ZEALAND.

(From a Correspondent.)

Taranaki, 4th April, 1860.—You will have heard ere this reaches you of the disturbed state of affairs in New Zealand, bordering on war, caused by a feud between the government and the natives of the unimportant and obscure settlement of Taranaki, in which H.M.S. Niger has been actively, and so far very successfully, engaged in assisting to suppress it; and, as it is likely to awaken some interest at home, I will endeavour to furnish you with a sketch of the origin and progress of the revolt up to this time. It may be necessary to inform most of your readers of the whereabouts of Taranaki. It is the south-west angle of the northern island of New Zealand, its capital, New Plymouth, situated on the coast at the base of Mount Egmont. The population of the entire settlement is about 2600, of which about 2000 are in New Plymouth, the rest constitute the outlying settlers, employed in agriculture and stock farming. The climate of this district is about the finest in the world; the land the most picturesque, and the soil the richest of New Zealand. Notwithstanding these natural advantages, the colony is the least prosperous of any, owing, I suppose, to counterbalancing impediments. The first of these that strikes a visitor is the total want of a harbour or place of refuge for vessels of heavy or light draught, not a spot affording shelter to the smallest craft, and the sea sets in with such violence that for days together communication between the shore and a ship would be impossible; at the best of times it can only be effected by large surf boats. Owing to these disadvantages, the first impression is of surprise that any one should have thought of planting a town in such a position. But another cause of the backwardness of this colony is the difficulty of getting land to attract emigrants and extend the colony, and this arises from the greater number and affluence of the natives here than in most other parts of New Zealand, and their appreciation of, and tenacity to, the land.

It may be necessary to inform your readers also of the mode of acquiring land from the natives. It is fixed by an Imperial and salutary edict that no native's land can be acquired but by voluntary sale and purchase, the sole right of negotiation being vested in the Governor, who buys on the part of the Government, and then it is transferred to the government waste lands and sold to the first and highest bidder with a government title. Were any other mode of transfer sanctioned, interminable war would be the result, as the native lands are owned by a number of chiefs and tribes in common, so that all their claims require to be investigated and satisfied ere the purchase can be completed. It is obvious that the Government only possesses the means of sifting all such claims. Moreover the Government does not recognise any title to land save that possessed by the natives in possession, or that derived from the Queen through her representative the Governor.

After this digression I will to the point. About two years ago the Governor, while on a visit to Taranaki, purchased a small block of land, about 700 acres, situated on a small tidal river, the Waitera, about twelve miles north of New Plymouth. Any acquisition of land here where the natives are so jealous of parting with it, is considered important, and this small block particularly so, as the Waitera is navigable over the bar for small craft, and affords good anchorage when in it, for any vessel that can enter; so this block of land was destined for a township that would be the future capital of the settlement.

The purchase was made from the chief of an adjacent tribe (named Tirei), having, it was alleged, the sole claim to it; but another claimant soon turned up, named Wuremi Kingi, or William King. The latter not only claimed to be consulted in the matter, but entirely forbade the sale, declaring he would resort to arms, rather than give up the block of land. His protest was deemed so important, that the Governor abstained from taking possession for the time, but set on foot an investigation of William King's right to interfere, giving him to understand that unless he (King) had a valid title to the land, he (the Governor) would eventually proceed to take possession. The matter remained under deliberation two years, as before said, when it seems the Governor was sufficiently satisfied that King's claim was fictitious; and then, in the latter end of February last, orders were sent from Auckland to the executive of Taranaki, to survey the land preparatory to occupation. Opposition to the survey was anticipated; the rights and wrongs of the matter having been continually debated both by settlers and natives without arriving at any better understanding. Accordingly the orders from Auckland provided for opposition, and even that the surveyors should go unarmed, and if opposed retire quietly; that martial law should be immediately proclaimed at New Plymouth, and the outlying settlers be called in, the militia and volunteers called out, &c.

As anticipated, the surveyors were interrupted, but principally by women, who it seems came so as to avoid collision. They merely interfered with the laying of the chain, offering no violence; but the surveyors abandoned it, retired to the town, and the colonel commanding proceeded to put in force the instructions he had received from Auckland, and immediately wrote thither, acquainting the Supreme Government with the state of affairs. The latter, expecting the course events would take, had made preparation for it. Her Majesty's ship Niger was kept in readiness, and despatched with the Royal Artillery, two 24-pounder field-pieces, and all available munitions of war. The next day the Governor and colonel commanding the forces, with his staff and two companies of the 65th Regiment left for Taranaki, and all rendezvoused at New Plymouth on the 1st of March. Some days were spent in deliberation; and on the morning of the 5th, Her Majesty's ship Niger proceeded round to the Waitera to the contested piece of land and residence of the hostile chief, three companies of the 65th regiment and some volunteers marching overland. The Niger was first there; and Captain Cracroft proceeded on shore followed by his boats manned and armed, the ship's guns pointed on William King's pah—stockaded residence — to cover the the captain's landing in the event of resistance. King and his retainers, however, fled at his] approach, and he landed without firing a shot; and, having placed a guard there, proceeded to disembark the military stores and camp equipage, all of which was done before the arrival of the 65th, and they came up and encamped for the night, King and his people falling back on the bush. As no resistance was made, the Niger was about to proceed back to New Plymouth, when signals of alarm were made from the shore. The Niger's boats again landed, when it was discovered that the enemy had built a stockade in the night close to the 65th's camp, on the road between them and New Plymouth, as it were to cut off communication. The position was reconnoitered, communication with the enemy opened, and, after some remonstrance, he abandoned his position, falling back on the bush, both parties unwilling to proceed to extremities. The stockade was then pulled down, and the pah, or stockaded village, he had before left was that day burnt down, which caused some excitement in New Plymouth, lest the enemy might attack, and for revenge try to burn down the town. Alarming rumours of a general rising of the natives, with or without foundation, continued to be circulated, to the great distress of the settlers, most of them by this time having fallen back on the town; and on the 17th it was discovered that King had built another pah, with hostile intent. Attempts were made to drive him out; and now for the first time violence and bloodshed ensued. The pah was bombarded for a long time with little apparent effect; the enemy returning the fire effectually with muskets, killing and wounding some of the regular and irregular forces. Meantime the Niger had gone to Auckland for fresh supplies, leaving a small brigade to co-operate with the troops.

On the 18th the colonel, despairing of reducing the place by artillery, decided on sinking a sap to blow it up. A warm fire was kept up for some time, and the slower process of mining began; but as all now appeared quiet, some one, suspecting the true state of the case, went up to peep in, and found the enemy clean gone, leaving not a trace behind. This collision rather increased than lessened the panic of the settlers, who hoped for better results from an encounter. It also seemed to increase the native confidence in their expressed contempt for the military; but worst of all, rumours now came in of the accession of several fierce tribes, south of the settlement, to King's assistance. They came, heralded by threats of vengeance, that they would drive all the Europeans (English) into the sea; and on the 26th gave proof at least of their ferocity by seizing and brutally murdering three men and two boys (four miles out), caught stock-collecting. This completed the panic in town, and the worst was feared for some outlying settlers as yet not come in.

On the 28th the whole of the available military in town (two companies from the Camp at Waitera) having now returned for its protection; the naval brigade before adverted to, and also the militia and volunteer forces, mustered and went out to seek and escort in some settlers still out, among others the Rev. W. Brown. The Niger having now returned with supplies, Captain Cracroft was called on, by requisition, from his excellency the Governor (who has been here since the beginning), to furnish a brigade for the temporary defence of the town. Captain Cracroft immediately landed himself at the head of 60 seamen and marines, and occupied the best position; but, ere the escort, in all about 200 men, including the 65th Regiment, naval brigade, and volunteers, under Colonel Murray, had gone more than four miles, they found themselves in front of and warmly engaged with the enemy, posted in a strong position. Advance they could not, and retreat would be disastrous; and the men were fast falling by the fire of the enemy's expert skirmishers.

The colonel in charge, Murray, despatched an express to the colonel commanding the forces (Colonel Gold) for reinforcements; the latter applied to Captain Cracroft, who immediately set out with his small force, a 24-lbs. rocket tube, and full supply of ammunition. Arrived on the ground, he sent to inform Colonel Murray of his advance, and to say that he purposed marching on to storm the enemy's stronghold. He had erected a pah on the summit of the hill, his skirmishers occupying the ravine beneath, from which they handled our forces very roughly before Captain Cracroft's opportune arrival. Of the small naval brigade that accompanied Colonel Murray, its leader, Lieutenant Blake, was already carried to rear dangerously wounded in the chest, and a marine was killed; at such a conjuncture, it being now late, near 6 o'clock, it was a bold, but as the result proved a wise measure, to march direct for the enemy's pah, as it effectually relieved us, now in great danger, and most effectually defeated the enemy. Captain Cracroft now took a different direction to that occupied by Colonel Murray, but the most direct to the pah; and drawing up his men, addressed the small band in very animating words, pointed to the rebel flag, now clearly seen, declared his intention of leading them direct to it, and offered 10*l.* to the man who would haul it down. Arrived within 800 yards, he first planted his rocket-tube, resolved to try the effects of it first, after dragging it so far with so much labour. Very good practice was made with five or six shell and shot rockets alternately; but the enemy gave unequivocal signs of his disregard of such a mode of attack. Captain Cracroft appeared, as well as his men, impatient for closer quarters, and the shades of night were fast approaching.

The rocket was now set aside, and the order to fall in given. At this moment a message was received from Colonel Murray, announcing his intention of retreating on the town, and advising Captain Cracroft to do the same; to which the latter observed, "I purpose taking that pah, first," and soon after the retreat was sounded in the direction occupied by the troops. The naval force, nothing discomfitted, marched boldly forward; the road to the pah was very uneven, and crossed a deep portion of the ravine, where it was closely wooded, and from which the enemy directed their fire with a fatal effect all the day; but the enemy seeing the troops retire from their front, quite lost sight of the small brigade now marching boldly on their flank, and, aided by the approaching night, they crossed the formidable gorge unchallenged and without firing a shot. Rising from the ravine very precipitately, the road takes a sharp turn, and soon brought them in sight of the enemy's stronghold, built on the road-side, at the summit of the hill, a high gorse hedge on the left-hand side of the road; and on the road a crowd of the enemy were stationed, now not 200 yards off, and evidently perplexed to discover in the sombre twilight whether the approaching force was their friends returning victorious from the ravine and gorges they had so well occupied all day, or an enemy. The small force advanced rapidly but silently, without in the least betraying their character; and it was only when they reached within sixty yards of the enemy, and the latter by his movements gave signs of his discrimination by dropping under the pah pailing and gorse hedge in a kneeling attitude, as if to fire with surer aim, that the order to double was given. In an instant a cheer was uttered, a volley fired, and they were in the midst of the enemy. The latter resisted bravely, returned the fire, and two of the brigade fell, severely wounded; but when it came hand-to-hand, some escaped to the left through the hedge, some to the right, into the pah, and in an instant not a Maori was visible where they lately stood so thick, save the dead and dying. A fresh defence, however, commenced from the pah, on which the sailors and marines, now enraged, rushed like tigers, some over, some through, regardless of the enemy, who now used his tomahawk, or rushed into the pits, firing out, the men following and bayoneting or shooting them, till every vestige of resistance was annihilated. Meantime there had been sundry rushes for the prize flag, all more eager doubtless for the glory it implied than the prize itself, which no single hand could claim, but which, as I hear, they preferred dividing equally, all having fought so well.

All this occupied but a very brief time, much less than it requires to write it. It was now quite dark, and Captain Cracroft resolved to return to town, being unsupported; and so completely had he subdued the enemy, that he returned, leisurely leading his wounded. Not a shot was fired after him; though had he been less successful, or even lingered till the enemy recovered his panic, he must have sustained a fearful loss. The whole affair was boldly planned, skilfully conducted, and most happy in results. During the whole of this day nothing but weeping and lamentation, audible in the helpless female population of New Plymouth, almost increased on the return of the troops with report of such hard fighting and severe loss; but it was converted into rejoicing on arrival of news from Cracroft's brigade; and well it might. The enemy, discomfited and beaten, retreated for south next morning, carrying off loads of dead and wounded, some of them their most celebrated chiefs and head men, having been killed by the distant practice of the 65th and Volunteers, as well as by the more dreaded carnage from their hand-to-hand conflict with the Niger's brigade. It may be as well to state that the expedition, on first starting, was merely to bring in the outlying settlers; there was no idea of a fight; and Colonel Murray's orders were, to be back by sunset to protect the town, and which he was compelled to obey.

CAPTAIN TYLER AND MR. FERGUSSON.

To the Editor of the Army and Navy Gazette.

Sir,—Mr. Fergusson may be right in supposing that, as far as he is personally concerned, the public is indifferent to his changes of opinion; and it is certain that, if he had not assumed so prominent a position and asserted so perseveringly the economy and impregnability of his system of fortification, no one would have had the right or the desire to question his views or his principles in the manner in which I have presumed to do. But as he has now held them forth for ten years as a pattern for all nations, and as he states that his principles are immutable, even while he repudiates the details of his model and of his published works, I am justified in asking him to be a little more explicit in regard to the changes which his views appear to have undergone during the past twelve months. And it is only due to himself, to the public, and to those who have taken some trouble in discussing the subject with him, at his own request, that he should state what those principles are in a straightforward manner, instead of sheltering himself behind vague generalities and false accusations; attributing his inconsistencies to my fancy, stating incorrectly the object and tenor of my letters and papers, and imputing to me, as a member of council of the Royal United Service Institution, advantages which I do not possess.

I had access properly to his letters to the secretary of that institution, not as a member of the council, but because they referred to me personally and to my paper on the subject of his system, because he requested that one of them might be published with that paper, and because he reserved to himself the right of publishing them hereafter. If I had really given garbled extracts from them, nothing could have been easier than to have shown at once any error that I had committed; and he is not justified in making an accusation of this description without, at the same time, adopting so simple a means of proving it.

Mr. Fergusson asks whether I have ever read Molière. In one of the best known of the plays of that author—*Le Médecin malgré lui*—*Sganarelle* is believed, upon the assertion of his wife, to be a great physician, but turns out to be quite the contrary. He places, in his conversation, the heart on the right side, and the liver on the left, and when the mistake is suggested to him he justifies himself by saying,—"*Oui, cela était autrefois ainsi, mais nous avons changé tout cela, et nous faisons maintenant la médecine d'une méthode toute nouvelle.*" *Sganarelle* was enabled to affect an apparent cure in the case of *Lucinde*, because her disease was a pretended one; but the morsel of cheese which he prescribed for the woman who was suffering from dropsy, would hardly have been of much service to her, in spite of the gold, the coral, and the pearls, which he represented it to contain.

It had not occurred to me to prove that Mr. Fergusson was a Hindoo; and I do not desire to do so; but if he should embrace that faith, and if, after finding out his mistake, he should afterwards revert to the religion of his forefathers, it may be expected, reasoning from analogy, that his principles will remain immutable; that he will only alter his forms; that the great merit of his system of religion will be that it adapts itself to all countries and all circumstances,—that what is true can afford to wait,—that all the principles which he may enunciate under Hindoo convictions will remain for ever correct,—that any criticisms that may be made upon his change will only prove them to be more and more so,—and that all such criticisms will only serve to show that no real or solid objections exist, or could be made against them.

—I am, sir, yours, &c., H. W. Tyler, Captain R.E.

The Admiralty and the Official Navy List.—The promotion to the rank of Commander of Lieut. H. B. Woolcombe, late senior of the Doris on the Mediterranean station, has only just been announced by the Admiralty, whereas their Lordships' list informs the public that this officer was promoted so far back as the 14th of June.

Digitized by Google

THE NAVY.

ADMIRALTY, JULY 10.

PROMOTIONS AND APPOINTMENTS.

Commanders—R. Gordon Douglas, late flag-lieutenant at Sheerness; W. B. Elphinstone, to the Hornet (commissioned).

Lieutenants to be Commanders—Henry Bedford Woolcombe (1853), recently serving as senior of the Doris, 32, in the Mediterranean.

Lieutenants—Edward F. Kerby (1854), from the Centaur to the Chesapeake, 51, flag-ship at China; Harry Smith to the Monarch; William G. Silverlock to the Geyser, B. J. Cooper to the Centurion, and Richard E. Tracey to the Conqueror; James T. Pringle to the Megæra, and Wm. Brogden to the Hornet.

Master—George Allen, to the Hornet.

Mates—Andrew R. Gordon to the Edgar, and H. Dolphin to the Trafalgar.

First-Class Assistant-Engineer—Richard L. Canney to the Asia, as supernumerary.

Third-Class Assistant-Engineers—William A. Houghton to the Cumberland, 70, at Sheerness, for service in the Adder; (Acting) Archibald King to the Torch, 5, screw gun-vessel at Chatham; (Acting) John Purdie to the Greyhound, 17, Channel Squadron; (Acting) E. Chambers, to the Bloodhound, as supernumerary; and (Acting) Joseph Wooton to the Asia.

Surgeon—Wm. Loney to the Emerald.

Assistant-Paymasters to be Paymasters—James Charles Meagher (1851), recently serving in the Cressy, 80, in the Mediterranean, and Edward William Gordon (1851), recently serving in the Rhadamanthus.

Clerk—H. Grey, to the St George.

JULY 12.

Master—C. G. Johnson, to the Asia, for the Immortalité.

Acting Second-Class Assistant Engineer—James N. Slade, to the Cumberland, for charge of the machinery of the Fly.

Acting Third-Class Assistant-Engineers—James Howey, Henry Clyde, and William Gentles, to the Nile, as supernumeraries for disposal.

Paymaster—Robert Taylor, to the Hornet.

Assistant Paymaster—George Prince, to the Hornet.

JULY 13.

Master's Assistant—Stanley G. Tattersall, to the Hornet.

Chief Engineers—Edward W. Baker, to the Donegal; John Henty, to the Hogue.

First-Class Assistant-Engineer—Wm. M'Dowell, to the Hornet.

Third-Class Assistant-Engineer—Edwin Gassage, to the Hornet.

Acting Third-Class Assistant-Engineers—Wm. Willings, to the Hornet, for temporary service; George Quick, to the Asia, for service in the Bullfinch.

Surgeons—John McSwiney, to the Retribution; Michael Walling, to the Atholl.

Paymaster—George W. D. Simmonds, to the Hastings.

Alecto, 5, paddlewheel steamer, Commander H. J. Raby, V.C., sailed from Lagos on the 9th of June. All well.

Archer, 13, screw corvette, Captain F. A. B. Crauford, was at Old Calabar on the 3rd of June.

Ariadne, 26, screw frigate, Captain E. W. Vansittart, left Plymouth on the 10th instant in company with the Hero for Canada.

Barracouta, 6, paddlewheel steam-vessel, 200 horse-power, Commander W. Wood, has been taken out of dry-dock, in Sheerness Yard, where she has undergone a thorough examination as to her condition with the most satisfactory results; she is now being coaled, and will shortly be ready for sea.

Blenheim, 60, screw, Captain E. Tatham, steamed out to Spithead on Wednesday.

Bombay, 84. The hazardous operation of cutting asunder this large line-of-battle ship was successfully performed at Chatham dockyard on the 7th instant, it having been found necessary to lengthen her considerably amid-ships in order to adapt her for a screw steamer. The entire vessel having been cut through, the operation of half-launching the stern portion the distance to be added to her length was commenced at 11 o'clock under the direction of Mr. O. W. Lang, master-shipwright, and the staff of the establishment. The huge mass was moved slowly, by means of powerful hydraulic levers and blocks, at the rate of about one foot in three minutes, but owing to some impediment which was met with the entire operation was not completed until half-past 12, by which time the stern portion had been moved a distance of 33 feet 9 inches, the length to be added to the vessel. The interesting operation was accomplished without any accident, and the vessel will now be completed with the utmost dispatch.

Cæsar, 90, screw steam-liner, Captain T. H. Mason, was in the Bay of Naples on the 7th instant.

Cockatrice, a new gun-boat, with steam-engines of 60 horse-power, was brought up to Woolwich on Saturday last, from Newcastle-on-Tyne, to be fitted for service.

Cygnet, screw gun-vessel, has commenced receiving her boilers and machinery in the steam basin at Portsmouth.

Dee, 4, troop-ship, Master-Commander T. C. Pullen, came into the steam-basin, Portsmouth, on Monday last, with boilers and machinery for the Pelican, new steam-sloop, daily expected from Milford Haven.

Duncan, 101, screw, in the steam-basin at Portsmouth, is having two large metal knees, or brackets, affixed to her stern and outer sternpost, with a view of counteracting the effects of vibration on that part of the ship, caused by the screw when under steam.

Emerald, screw steam-frigate, Captain Arthur Cumming, left Plymouth Sound on Tuesday afternoon for the purpose of going into dock at Keyham steam-yard. After passing St. Nicholas Island, and when in the narrow part of the entrance to Hamoaze, a merchant brig, in tow of a steam-tug, from Stonehouse Pool was observed suddenly rounding Stonehouse Point, and, in order to avoid injuring the brig, the frigate was backed astern towards Barn Pool, when the ebbing tide caught her bow, and she grounded on the beach at about half-past 2 o'clock. It was not low tide until half-past 3, and she did not float off until 7, when she was moored to a buoy, and was on Wednesday morning taken up Hamoaze.

Fire Queen, paddle, Master-Commander Paul, at Portsmouth, is painting up on the completion of her late extensive repairs, and will shortly be ready for further service.

Greyhound, 17, screw-sloop, Commander F. W. Sullivan, parted from the Channel Squadron, on Tuesday evening, and returned to Plymouth. The Greyhound is now refitting for further service.

Griper, old sailing-vessel, lately employed in the service of the Coast-Guard in Chichester Harbour, has been stripped of her copper, which has been on her upwards of 35 years. The metal is of the best quality, and exhibits not so much wear, and is in many respects in a better condition than the present compound used for sheathing ships would be after five years' service.

Havannah, 19, sailing-ship, has left Plymouth, in tow of the Lion, for Cardiff, where she is to be stationed as a school for boys.

Hawke, 60, screw coast-guard-ship, Captain William Crispin, arrived in Plymouth Sound on Thursday morning from the coast of Ireland. She saluted the Hero, with the Prince of Wales on board, on Tuesday last, 25 miles north of the Scilly Islands. The Hawke also spoke the Channel squadron a few hours later the same evening.

Hero, 91, screw liner, Commodore G. H. Seymour, left Plymouth on the 10th instant, with His Royal Highness the Prince of Wales on board, for Canada.

Himalaya, Captain Seccombe, with the astronomers and intended observers of the eclipse, sailed from Plymouth on Saturday last for the coast of Spain, and arrived at Bilboa on the 9th inst.

Hornet, 17, fitting for first-class steam reserve, entered the steam basin in Portsmouth, to receive her boilers, &c. The report that this vessel is to be put into commission forthwith is now stated to be premature.

London, 90, screw-liner, Captain Henry Chads, was in the Bay of Naples on the 7th instant.

Lynx, 4, screw gun-vessel, Lieutenant and Commander H. Berkeley, was at Sierra Leone on the 21st of June.

Nightingale, gun-boat, is under examination alongside the Devonport Dockyard to ascertain her condition.

Perseverance, screw troop-ship, Commander E. R. Power, has been removed from dock to the steam-basin at Portsmouth, and has commenced coaling alongside the eastern quay.

Philomel, 5, new screw three-masted schooner, built by Messrs. White of Cowes, has been placed in No. 8 dock at Portsmouth for the purpose of being thoroughly surveyed by the master builder and his staff before receiving her copper.

Princess Royal, 91, screw, is alongside of the jetty, Portsmouth, fitting for second-class steam-reserve, to take the place of the Colossus, lately commissioned.

Prometheus, 5, paddle-steamer, Commander S. S. Skipwith, was at Sierra Leone on the 21st of June.

Rhadamanthus, paddlewheel steam-vessel, Master-Commander F. R. Sturdee, arrived at Woolwich on Sunday. The officers of the ship give a most favourable account of the working of Mr. Wetherhed's superheating steam-apparatus, and state that the economy in fuel, as verified by the consumption in coal, was equal to from 20 to 25 per cent., and that the labour of the stokers is considerably reduced, two watches being now sufficient to keep up the fires in the place of three as heretofore.

Sirius, old sailing frigate, has been put into No. 1 dock, Portsmouth, to be stripped of her copper, and to start her bolts. Several descriptions of plate armour are secured to her side, and she is still having additional targets fastened to her. It is now proposed to fix Jones's angular target on a lump undergoing the necessary alterations to receive it, but whether these arrangements will be carried out, nobody seems to know. Jones's angular armour is now lying on the jetty, and is worked on to a frame ready for fixing. It consists of two plates of iron, each 4½ inches thick, and two plates of steel, one of 3½ and the other of 4½ inches in thickness. The Sirius, as soon as she is ready, will be towed to Porchester Lake for trial, the result of which will be of very great importance. The whole of the arrangements are under the supervision of Captain Hewlett, C.B., of the gunnery ship Excellent.

Snipe, built at Milwall, one of the new class of screw steam gun-vessels, to carry five Armstrong-guns, has been brought to Woolwich for fitting out.

St. George, 91, screw-liner, Captain the Hon. F. Egerton, is in Plymouth Sound. There is a report that she will be ordered to Liverpool, as she is yet shorthanded.

Torch, 5, screw gun-vessel, Commander F. G. Smith, is ready for sea at Chatham. Her destination is the West Coast of Africa.

Trident. A neat stone obelisk has just been erected on the beach at Southsea, to the memory of forty-four officers and men of Her Majesty's ship Trident, who died of yellow fever in the space of six months during the unusual epidemic at Sierra Leone in 1859. The obelisk is upon the crown of the beach, and is conspicuous from the Esplanade. On its sea face are engraved the names of the officers and men. It has been erected by the Commander, F. A. Close, and the surviving officers and men of the Trident.

Triton, 3, iron paddle-steamer, Lieutenant and Commander R. H. Burton, was at Sierra Leone on the 21st of June.

Victoria and Albert, royal yacht, Captain the Hon. J. Denman, left Osborne for Plymouth on the 9th instant, with their Royal Highnesses the Prince Consort and the Prince of Wales on board. She returned to Osborne on Tuesday, with the Prince Consort.

Violet, steam tender to the Blenheim, was taken out of the covered dock at Devonport dockyard on Friday week. The Violet left Devonport for Portland with supernumeraries on Tuesday.

Wasp, 13, screw-sloop, Commander C. Stirling. Private letters from this ship, dated Madeira, June 29, announce her safe arrival there on the day previous, all well. She was to proceed on her voyage to the Cape of Good Hope on the 1st of July. A seaman had fallen overboard during her passage out, but had been saved by the presence of mind and personal exertions of the senior lieutenant, Mr. W. R. Kennedy.

Zephyr, steam-tender, J. Bond, master, which left Plymouth Sound on Tuesday, with dispatches for Admiral Fremantle, returned to the Sound on Wednesday. She did not succeed in communicating with the squadron.

The Commander-in-Chief, at Portsmouth, Vice-Admiral Bruce; the Lieutenant-Governor, Lord W. Paulet; and the Admiral-Superintendent, the Hon. George Grey, on Saturday last embarked on board the Sprightly, tender, Master-Commander George Allen, and proceeded to Osborne to pay their respects to Her Majesty the Queen. The Sprightly conveyed the Duke of Newcastle to Osborne on Sunday.

Captain George H. Seymour, C.B., of H.M.S. Hero, will, during his absence in command of the Prince of Wales' squadron, hoist the pendant of a commodore of the second class.

The vacant out-pension of Greenwich Hospital will, it is stated, be awarded to Lieutenant James R. E. Lilburn, (1829) on the reserved list.

The Mayor of Southampton entertains this evening at a banquet at the Royal Victoria Rooms, Captain Allen Young, and the officers of the steam yacht Fox, previous to their departure from that port to survey the route of the intended line of telegraph to America *vid* the Faroe Islands, Iceland, and Greenland, several distinguished scientific men having been invited to join in this deserved compliment to Captain Young, the origination of which is highly honourable to the chief magistrate of Southampton.

The experiments ordered by the Admiralty on Jones's Patent Angulated Armour-Cased Sides for Ships, will shortly take place at Portsmouth, under the direction of Captain Hewlett, C.B., H.M.S. Excellent. It is understood that the plates will be affixed to the sides of the Griper. The thickness of the plates are four and a-half inches, some being made of steel, and others of iron.

It is said that six new gun-boats, of a very superior description, are to be laid down in Portsmouth Dockyard. There is every reason for supposing that the report is true; for although the large ships now in course of construction in that yard—such as the Dryad, 90, and the Alfred, 90—are seemingly at a stand-still for want of timber to proceed with their frames, yet there is plenty of timber of small scantling admirably adapted for gun-boats now in store in the yards. After the late exposure respecting the gun-boats at Haslar, we hope the Government will proceed with the vessels in question, particularly now that they have some good, sound, seasoned wood at their disposal.

At the commencement of this year, boring operations were performed upon the "Horse," "Dean," and "Nomansland," shoals, at Spithead, to ascertain the nature of their foundations previous to the erection of forts upon them for the protection of the eastern entrance of our great naval roadstead. It has since then been ascertained that the channels between the contemplated forts would be upwards of 2000 yards wide, and that their cross-fire would be ineffectual in preventing the passage of steam ships of war if propelled at great speed. It is now proposed to construct casemated forts on the "Horse" and "Nomansland" shoals, and another between the "Horse" sand and Portsea Island; another on the "Spit;" and a fifth on the "Sturbridge" shoal. In addition to the above forts at sea, batteries are recommended to be placed on the Isle of Wight near Nettlestone Point and Appley House, to support the works on the Nomansland and Sturbridge shoals. The most important of these sea defences are to be built of three tiers of guns in casemates, with guns and mortars on the roof; and the batteries to be constructed with masonry faced with hard granite, having embrasures of wrought iron, and of as small dimensions as will allow of the free working of a gun. The number of guns required to arm these forts will be 915, and the barrack accommodation will be sufficient for 2860 men. The expense is estimated at 1,100,000*l*.

In the Appendix to the Report of the Defence Commission, there are a series of tabular statements showing the number of men between the ages of 15 and 60, taken at the census of 1851. The object being to show the number capable of bearing arms in defence of the country in case of need. And now that the Volunteer movement has taken healthy root, these returns, showing the available manhood within reach (say twenty miles) of such important places as Portsmouth, Plymouth, Chatham, and other insufficiently garrisoned arsenals, indicate the amount of extra resistance at hand, should it be required. There is also another gratifying fact to be gleaned from these tables, viz., that the men of the conscript age, 20—25, have increased of late years, much more rapidly in England than in France. For, although the population of France is 36,000,000 against 28,000,000 in England, still, the number of young Englishmen of 20—25, nearly equals the Frenchmen of that age. These facts, although well known, and having no novelty to recommend them, are nevertheless of considerable importance, as showing the military strength of the people, particularly just at this time, when almost every man between 15 and 60 is either a Volunteer or thinking about being one. The attention of the Government cannot be too seriously engaged in determining how this martial enthusiasm of the people can be utilised; and there seems to be no reason to doubt, that if properly organised, our Volunteers, with an addition of well-trained Militia and soldiers of the Line, would be able to defend our dockyards and arsenals against very superior numbers. Thus within 20 miles of any of our principal arsenals, the tables put forth by the Royal Commissioners show us how large a force might speedily be collected from the adult population if trained to the use of the rifle, where their services would be employed most advantageously within fortified places. Without going into details, the following figures show the number of men available within 20 miles of Portsmouth. Between 15 and 20 there are 21,650; between 20 and 40 66,669; between 40 and 60, 36,976: or in round numbers 125,000 men. These are exclusive of any military in the locality.

THE CHANNEL FLEET.—The Channel Fleet, under the command of Vice-Admiral Sir Charles Fremantle, had Admiralty orders to keep company with His Royal Highness the Prince of Wales' squadron till sunset on Tuesday evening. The fleet was then to bear up for Bantry Bay, to which place all communications intended for it should for the present be addressed.

ARRIVAL OF TIMBER.—The Mojosen, H. Anderson master, has arrived from Christiania with a cargo of Norwegian spars for Chatham dockyard.

Digitized by Google

THE OFFICIAL NAVY LIST.—As the "By Authority" list, owing to the many glaring errors which exist in it, must be thoroughly revised before another issue takes place, we would point out to the Duke of Somerset that at page 11 there is a very extraordinary error, which a "Minute" from himself would speedily correct, unless indeed he wishes to allow the matter to rest in abeyance until he sees if his scheme of retirement will still find favour with the House of Commons this session. We allude to the number of retired vice-admirals. It is stated at the page mentioned that the number of these officers should be retained at 25, yet we have only 22; and what is very strange, the last promotion to this list took place on the 19th of March, 1857.

THE DEFECTIVE MORTAR VESSELS.—Admiralty orders have been received directing the whole of the mortar-vessels lying in Yantlett Creek—which were inspected a short time since by Lieut.-Gen. Sir F. Smith, M.P.—to be opened, and the timbers exposed to the atmosphere, in order to give them as much ventilation as possible, to prevent their decay.

THE GUN-BOAT COMMITTEE.—The committee sitting on the gun boat question have not yet, contrary to all expectation, terminated their proceedings. Mr. Richard Green, the shipbuilder was examined on Monday last. There will be at least another meeting of the members before the report is drawn up.

LIFE-BOAT SERVICES.—It appears that during the terrific gales of the few months that have passed of the present year, the life-boats in connection with the Royal National Life-boat Institution have been instrumental in rescuing one hundred and fifteen of our fellow-creatures from a watery grave. The boats have also, on several occasions, assisted vessels with valuable cargoes safely into harbour; and their crews have assembled in rough weather many times, so as to be ready for any emergency that might arise. Nearly all the services of the life-boats took place, as usual, during stormy weather and heavy seas—and frequently in the dark hour of the night: yet not a single accident happened either to the crews or the boats. For these valuable life-boat services the institution has paid their gallant crews 482*l*. It is gratifying to observe at the present day, on so many dangerous points of our coast, that no sooner is the minute-gun heard, or the signal of distress seen, than the life-boat speeds her way to the stranded ship. Who that has seen a life-boat put forth in the very fury of a storm, but has watched the fight with the elements with intense excitement! Who that has seen the same boat return, laden with rescued human life, but has felt a sublime emotion such as we experience only by witnessing heroic and self-denying acts!—*The Life-Boat Journal.*

NAVY DISCIPLINE.

The Duke of Somerset introduced in the House of Lords on Monday last the Naval Discipline Bill. The object of this is to abrogate the existing obnoxious Articles of War. It will be unnecessary here to say what those Articles of War are, they are familiar to every one of our naval readers, and we will be bound to say that no one of them will stand up in their defence. Their very severity has long made them a laughing-stock. The great object of the bill now introduced is to define the exact punishments for offences committed in the fleet, so that it might be practicable to inflict them, for as the law stood, death was the penalty of nearly every crime that a seaman could be guilty of, and it has long been felt as a great difficulty to find a proper commutation of such a sentence when passed. The Duke stated that what really was wanted more than anything else was a clear definition of offences, so that the men could not possibly plead ignorance of them, and that they should know that no punishment would be inflicted except such as was actually necessary to enforce discipline, and maintain order and good conduct on board ship. The men knew very well that there was a certain quantity of work to be done, and that it must be done. The thing then was to let the men know that punishment would certainly follow wrong doing, and that those who worked diligently would be protected. This bill would do away, except in cases of mutiny and where upheld by the general law, with the punishment of death, which by the existing law was the penalty for almost every offence committed at sea. As he wished to get the opinion of those most competent to form one on this bill, he should ask their Lordships to read it a second time and commit it pro formâ, so as to introduce a variety of small amendments in it, which were suggested by officers whose opinions he had taken, and some of which he meant to adopt. He thought it very desirable that the measure should be passed this year. He had been informed that one thing which was required was that greater protection should be given to the petty officers, who were the medium of communication between the officers and the seamen. At present those officers were of course protected while on board ship in the performance of their duty, but they were very often exposed to insult from insubordinate seamen while on shore, and he thought it desirable that some check should be placed on such conduct. He also proposed by this bill that corporal punishment should not be inflicted until the case had been reported upon, which would relieve the various captains from a great deal of responsibility and obloquy. There were various other points in which he thought the law might be judiciously amended. The details had been carefully considered in the bill before their Lordships, and he trusted that it would be found a satisfactory measure.—The Earl of Hardwicke and Lord Colchester gave their general support to the bill, but stated that they would propose some amendments in Committee. Both of these noble and gallant lords expressed their anxiety that the responsibility of captains in command of ships should not in any way be diminished, and that their authority should be maintained.—The bill was read a second time. We hope that before it leaves their Lordships' hands a clause will be introduced, authorising the holding of courts of inquiry on board individual ships, while at sea or on detached service for the trial of serious offences, the members of the court to consist of all the executive officers of ward-room rank. If this plan were adopted, captains would not have in future to bear the odium of having exercised undue severity, and the men would not be exposed to the effects of the caprice and cruelty of one man.

THE NAVY AND THE BOARD.

On Tuesday, in the House of Commons, Mr. Baillie Cochrane moved that an humble address be presented to Her Majesty, praying that Her Majesty will be graciously pleased to place the officers, marines, and seamen of the fleet serving in China on the same footing as Her Majesty's troops, with respect to extra pay and allowances, and to assure Her Majesty that the House will make good the same. He did not wish then to provoke a debate upon the general question of the Chinese war, but he wished to impress upon the House the fact that while the Army and Navy had fought side by side in various Chinese wars, and had shared the same dangers and privations, they had not shared in the same rewards, and he thought it unfortunate that there should be a feeling of injustice entertained on the part of the naval and marine Service. Ample testimony had been borne to the gallantry and efficiency of both branches of the naval Service by the most competent authorities, in the various conflicts between this country and China, and sometimes the most perilous services had been imposed upon them; yet while the Army had been allowed batta, the naval forces had received no extra allowance. What he complained of was, that the same justice had not been meted out to both Services. Great praise had been given to the Army for the exhibition during a short period of forbearance and patience under injustice; but how much more did the Navy deserve praise when it was known that throughout a long course of years they had been suffering from a similar injustice? A war was about to be commenced as to which it was impossible to tell how it might terminate, but it was a war in which the utmost concord and good feeling between the two Services would be required. He trusted therefore that the Secretary for War would give his attention to the subject.—Sir Michael Seymour seconded the motion, and bore testimony to the excellent and gallant conduct of the seamen and marines of the fleet during the time that he was commander-in-chief in China.—Admiral Walcott supported the motion and concluded an energetic speech by saying that he could not imagine for the life of him how any naval officers could sit on the Board of Admiralty and neglect the duty they ought to perform to their own profession. But he was quite certain whether they did justice or not to the sailor he would still continue to perform his duty.—This called up Lord Clarence Paget, who thanked the hon. member for the able manner in which he had introduced his motion and advocated the claims of the Service to which he (Lord C. Paget) had the honour of belonging. But he thought the hon. member had not done justice to the authorities either of this or a past day. During the wars in China and India the sailors had received extra pay in the shape of donations or batta money. But paying the Navy on the principle suggested by the hon. member's motion was impossible. The Army received batta, which was in fact field allowance. It was impossible to give sailors field allowance, because they were never in the field, though they might grant a recompense to sailors for their services, particularly when acting in conjunction with the Army. He did not think that sailors suffered so much privations as soldiers during war. They might be subject to similar dangers, but not privations, and he did not think they had a right to claim similar allowances. With regard to the men, their additional allowance was provided for by discontinuing the reductions for provisions, &c. In the Navy there were no such reductions. It was therefore impossible to place the two Services on the same footing. Whatever government might be in office a proper reward would be given to those officers, seamen, and marines engaged in these operations. The Admiralty were at that moment engaged in distributing the Canton prize money, in which both the Army and Navy would participate. In a few days he was going to propose an estimate for the purpose of giving batta donations to those engaged in the last operations, and then he would enter into the details of the intentions of the Government.—Colonel North having expressed himself in favour of the motion, Sir Charles Napier rose and said that complaints were made of the difficulty of getting men for the Navy. How could it be expected that men would come when they found that they were treated differently to the Army. The Admiralty now, two years after the gallant services had been performed, were going to consider what should be given. The Admiralty were always preparing to do something; they never did it. Why half the sailors engaged in the Canton operations were dispersed over the world—many were dead, and not one-third of them would ever get the grant; and those who did get it would have forgotten what it was for. The Admiralty had better mend their manners and treat the men properly. There ought to be no difference between the soldier and the sailor. The gallant officer, to show how men were sometimes treated by the Admiralty, read the case of a man who had lost his arm in the Chinese operations, and who had been awarded a pension of 18*l*. for one year only. He hoped in a few days to be able to bring the case of Greenwich Hospital before the House, when he would show that the funds of that institution had been most nefariously administered for the last 80 years, and money left for the provision of widows and orphans misappropriated.

After a few unimportant observations from various members, Mr. Cochrane, on the express understanding that the subject should have the best attention of the Admiralty, withdrew his motion.

We would recommend the hon. member not to lose sight of this question. The Admiralty have much business on hand, and unless "whipped up," they may be apt to pass over affairs of an inconvenient character; and Lord Clarence Paget's answer certainly does not put an end to the question. Lord Clarence was wrong in asserting that sailors never took the field. He cannot have forgotten that the seamen of the Baltic fleet contributed to the capture of Bomarsund by their services ashore. Has his lordship permitted the gallant deeds of the naval brigade before Sebastopol to be obliterated from his memory? Was not Sir William Peel struck down before the walls of Lucknow while at the head of his sailors?

If Sir Charles Napier will redeem his promise and expose the mal-administration of the funds of Greenwich Hospital, he will earn for himself the gratitude of the British Navy; he will have the public thoroughly with him, and we will, beforehand, engage to give him our hearty assistance in his attempt to bring about a better state of things in an institution which should be as well ordered as any public or private charity in the country.

COAST DEFENCES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—When the preparations were going forward for invading the Crimea, where it was known that a large army was concentrated, backed by a gigantic fortress abundantly supplied with all the materiel of war, I ask, "Did it ever enter the head of any true-hearted man that the landing would not be effected on some part of the coast where forts did not exist, and where heavy artillery could be carried sufficiently near to cover the landing?" Did not every Englishman make up his mind to do it in spite of all obstacles?

Again, what were the principal anxieties of the naval commanders-in-chief during the passage of that wondrous flotilla across the Black Sea? Certainly not the resistance that we should meet with on the beach, but lest the Russian fleet should attack us in transit. I put it to any practical man, be he soldier or sailor, if he were one of an army to attempt a landing on any shore, and ask him which he would sooner encounter—troops with flying artillery on the shore, or a flotilla of demon gunboats, flying hither and thither through crowded transports and troop-boats, carrying death and destruction in their path, whilst an efficient fleet of heavy ships engaged the convoying fleet of the enemy, going at them after the fashion of our great forefathers—*vide* Sir Richard Grenville, Nelson, and a host of others, who felt it their duty to die or conquer?

It is not easy for a naval man to impress such views upon the public mind, but I feel it to be a positive duty to call upon my countrymen to stay their hands in bricks and mortar, and bestow a very small portion of the fifteen millions (query 25 millions!) upon the seamen of the country; to put their trust, as heretofore, in England's national arm, her Navy, which is acknowledged by the most able men of both Services to be her first line of defence, as it must be made her surest, whenever her vital interests may be attacked.

It has been said "that the fleet may be called off from the Channel;" "the Channel may be open." It is utter folly so to talk. If steam has given facilities for attack it has given to England (whence it sprung) ten-fold power to resist. The Channel must never be open. Throw up earthworks in advance of London, or have a plan for doing so; protect your naval arsenals so as to ensure your fleets egress, but beyond that do not go. Lay up the engineers' plans as records of ingenuity; pass an Act or some instrument by which every tug-boat of the United Kingdom shall be armed; establish depôts for the guns and ammunition in every harbour, river, and creek, with a mounting crane available at lowest tide if need be; invite the crews by the offer of a retaining fee to serve in them in case of emergency; they will be found ready and willing as they are intelligent, able-bodied, and active, the masters being the best pilots. What better auxiliary could the regular naval force have? Depend upon it, if we organise such a flotilla, keep up our Navy proper, and double the strength of the Volunteers to work with our small but gallant Army, that our coasts will not be meddled with.

Bricks and mortar will never keep England in the position she has inherited and now enjoys under our dearly-loved Queen. England must sink or swim according as she is weak or strong in seamen. For obvious reasons ships have ever been and must continue to be the safeguard of Britain.

I am, sir, &c., A NAVAL OFFICER.

THE GUN-BOAT QUESTION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I beg to send you the manuscript copy of a letter, which I have just forwarded to Vice-Admiral Sir Charles Napier, on the subject of the gun-boat investigation; and, as it contains remarks which may be of public service, you may think it advisable to give it a place in your valuable paper.—I am, &c., J. P. DRAKE.

"Dear Sir,—As you have had much experience of, and have taken much trouble to bring to an honourable conclusion, many subjects of complaint against England's Admiralty, may I ask what good to the public Service do you presume will result from the inquiry into the notorious Gun-boat question? I fear but very little; and I frankly believe, with your experience, you have not much greater confidence than myself in the undertaking.

"Admiral Duncombe's motion for revising the Admiralty prerogative must be first settled, and the naval administration based upon a responsible foundation, before any committee of inquiry should be convened by the sanction of the legislature, touching royal dockyards, or complaints on such subjects as that on which you are engaged. To improve the fruit produced by the roots from which that fruit grows, leaving the root in its original impure state, appears to me a natural impossibility; but, I regret to say, many strange impossibilities are undertaken in these days of immaculate progress, both by the Government, and those who take example by its superficial success. I make these remarks with the hope that you, as a member of the committee, may see how difficult is the task in which you are engaged, and as I have had some interviews and correspondence with you in times past, touching such questions as that which now commands the attention of the Committee.

"My individual experience is not much short of sixty years, about forty of which I have zealously devoted to the service of the state, in my endeavours to command the attention of the Admiralty to the necessity of revising the shipbuilding branch and the royal dockyards, and for which I have received the thanks of several Boards of Admiralty; still, no valuable reformation has taken place; and this no doubt is due to the root which remains unchanged, and not even arrested. The whole system was pronounced to me about thirty years since by a zealous and distinguished member of the House of Commons, as 'rotten to the very core;' and, if so, how can it be expected that the subordinate branches can be so sound as to be depended upon in evidence? It has been remarked to me also by others of high experience, and whose integrity would do honour to the Crown, that the Admiralty have the power of 'reporting sound ships rotten and rotten ships sound, and to sustain such official reports against all the efforts of the legislature to ascertain the real state of the question;' and if it be asked if I believe this to be more than an opinion,

Digitized by Google

I answer in the affirmative, for I have seen too much to doubt its validity.

"With such 'terrific power,' and with such applicative inducements at command, the Admiralty can waste millions of the public money in defiance of the Crown itself, which you will recollect Sir James Graham, when last presiding at the Admiralty, openly declared, when he stated that 'the Sovereign had no control over the prerogative of the Board of Admiralty;' and you are no stranger to the way that Sir James availed himself of that prerogative for years before he so frankly, and apparently so exultingly, made known the extent of the power with which he was invested to a House of Commons, which, if it felt astounded with the declaration, certainly took no steps to control that power. In the face of this prerogative, it is very clear that if a First Lord of the Admiralty undertook to say, as Sir James Graham one day said to my face when I personally called his attention to maladministration which he knew to exist, 'We don't choose to investigate them,' it is only on chance the efforts of the Committee can rest its hopes of success; and you know too well, when men have the power to defy investigation or to defeat it, if it affects their individual interest or official credit, it is not reasonable to expect them to comply with the wishes of a Committee, unless the power of the Committee be above the Crown and that of the Admiralty. As I make it a rule not to express my opinion on public transactions in secret, you are at liberty to place this letter before, and to have it duly recorded by, the Committee, if you consider it calculated to be productive of public good.

"I am, &c., JOHN P. DRAKE.

"Vice Admiral Sir Charles Napier."

THE MILITIA.

ROSS, CAITHNESS, SUTHERLAND, AND CROMARTY RIFLES.—This regiment was inspected on the 2nd instant by Major-General Douglas, Inspector of Militia. The present training having been exclusively devoted to squad and company drill, and musketry instruction, no battalion movements were attempted until the inspection, when after marching past, Lieut.-Colonel Ross obtained the general's permission to put the regiment through some manœuvres, giving the necessary explanations for each movement; these were performed in a manner which showed that if men are properly instructed in company drill, any battalion movement can be executed by them. The general then inspected each company, making the officers drill their companies, and afterwards made the sergeants drill squads, and questioned a number of men in the theoretical principals of musketry, and the lessons on cleaning of arms; the answers which they gave showed great intelligence, and proved the attention they had paid to the lectures of the adjutant. The regiment was afterwards formed into square, when the general presented a medal for good conduct to Colour-Sergeant Sim; he then expressed himself highly satisfied with the appearance of the regiment, with the proficiency to which it had attained in drill, and with its excellent conduct during the training. He congratulated the regiment on the distinction which was about to be conferred upon it by the change of dress (from trousers to kilt), which has been recently sanctioned, reminding the men that they would be the only regiment in the Army equipped as a Highland Rifle Corps, and that they should therefore use every exertion to maintain their character for good conduct and soldier-like bearing. The training of next year is to be on a plan drawn up by Lieut.-Colonel Ross, of calling out the regiment in three divisions of two companies each; the companies have been re-organised into county companies (three Ross-shire, two Caithness, and one Sutherland), which will be called out at those seasons most suitable for the interests of the several districts. During the present training the regiment mustered 411 effectives, exclusive of officers and permanent staff; there were only 28 absentees.

1ST DEVON MILITIA.—Lieut.-Colonel Fergusson Davie and the officers of the 1st Devon Militia have presented Captain Pitman with a handsome silver claret jug and pair of goblets in testimony of their universal esteem for him, and their high appreciation of his character and services during the time he was Adjutant of their regiment; and likewise of the deep sympathy they have entertained for him in his late illness, and their deep regret for the cause which has led to his retirement. The gift bears the following inscription:—"To Edmund Pitman, from his old friends and brother officers of the 1st Devon Militia, 1860."

The Militia Gazette.

WAR OFFICE, PALL MALL, JULY 10.

Royal Cornwall and Devon Miners Regiment of Militia—William Edwards Michell, Gent., to be Second Lieutenant.

4th or Royal South Regiment of Middlesex Militia—Ensign Michael Angelo, to be Lieutenant, vice Gilbard, resigned.

7th Regiment of Lancashire Militia—Lieutenant Charles William Fennell to be Captain.

1st Regiment of Royal Surrey Militia—Ensign Boyle William Minchin to be Lieutenant, vice Miller, resigned.

Memorandum—Her Majesty has been graciously pleased to approve the 6th Lancashire Militia bearing for the future the title of "Royal."

WAR OFFICE, PALL MALL, JULY 13.

1st or Royal East Middlesex Regiment of Militia—Edgar Akerman Dowell, Gent., to be Ensign, vice Norris, resigned.

Royal Pembrokeshire Artillery Regiment of Militia—John Delaware Lewis, Gent., to be First Lieutenant; Frederick William Hall, Gent., to be First Lieutenant.

MEMORANDUM.

Warwickshire Militia—2nd Regiment—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant Erasmus H. Vaughton.

Royal South Gloucester Light Infantry Regiment of Militia—Lieutenant Henry Le Patourel to be Captain, vice Merryweather, removed; Ensign Arthur Ryves to be Lieutenant, vice Earle, resigned; Ensign John Carrington to be Lieutenant, vice Goldney, promoted; Ensign Edward Daniel Gibson to be Lieutenant, vice Partridge, promoted.

1st Somerset Regiment of Militia—Lieutenant Thomas Warry to be Captain, vice Marsh, resigned; Clifford Wharton Charles Kemeys Tynte, Gent., to be Ensign, vice Dettmar, promoted.

Important improvements in diving apparatus have been made and patented by Mr. C. Heinke, submarine engineer, London. His apparatus has been lately used at Spithead or submarine operations in connection with the fortifications.

VOLUNTEERS.

METROPOLITAN.

WORKMEN'S RIFLE CORPS.—On Wednesday evening a crowded meeting of working men was held in the reading-room of the Workmen's Institute, Euston Road—Lord Elcho in the chair. It being the parade night of the London Scottish, his lordship was dressed in the costume of the corps, and on his entering the hall was most enthusiastically cheered. His lordship in opening the proceedings recommended that, if they resolved in co-operating in the movement, they should attach themselves to some corps already formed, whereby they would be saved a great deal of expense in the formation of butts, procuring targets, &c. He said the corps with which he was more immediately connected (the 15th Middlesex) being a purely national one, he did not see how they could intermix with them; but he should convene a meeting of that corps, and endeavour to have them added as a second battalion of the 15th. Some discussion ensued respecting the expense of the dress, on which his lordship explained that an entire suit could be procured from about 3*l.* upwards, and that to enable working men to join, some of the corps were receiving the price in weekly instalments. He undertook to have a sample dress made for them by next week; and, after a hearty vote of thanks to his lordship for presiding at the meeting, it was adjourned till next Thursday.

HAMPSHIRE.

2ND HANTS ARTILLERY VOLUNTEERS.—This corps was assembled a few days since on the Governor's Green, Portsmouth, and presented with a couple of silver bugles, in the presence of upwards of 10,000 spectators. The bugles were raised by subscription by the ladies in the neighbourhood. The corps marched into the Green, under the command of Major Hall. Mrs. Hall then stepped forward, and, delivered the following address:—"2nd Hants Artillery corps. I have accepted with much pleasure the duty which I have been requested to perform this evening, a duty in which I have a double satisfaction, as it not only places me in the agreeable position of expressing the good wishes of the ladies whose names appear on the subscription list, for the success and efficiency of the Artillery Volunteers, but also in a measure to evince my own feelings towards the corps, who have done my husband the honour to elect him as their commanding-officer. When the first and greatest lady in the land has shown the marked approbation and lively interest which she takes in this great national movement by the reception of her Volunteer officers, and her great condescension in personally inaugurating the first meeting of the National Rifle Association, it would ill become the subjects of her own sex to view with apathy or indifference the patriotic and martial feeling which has prompted Englishmen in all ranks of the social scale, from the peer to the railway labourer, to stand side by side as the defenders of their native land. Nor while this feeling animates England need we fear that her defence shall ever be committed to other hands than those of her sons, or that the spirit is dead within us which has inscribed such a glorious roll of victories upon our banners, and which has illustrated them with so many feats of chivalry from the days of Agincourt to Balaklava. I therefore, in the name of the lady subscribers, present these trumpets to the 1st Artillery Volunteer Company; let their sound ever remind you of the good-will and interest of your countrywomen—the wives, sisters, and daughters you have enrolled yourselves to guard, and should the voice of the bugle ever call you to your guns in your military capacity, emulate the alacrity with which, in 1803, your predecessors, the Portsmouth Volunteers of those days, assembled at their posts to repel the then threatened invasion. Volunteers of the Artillery Company, I present you with these trumpets as a memento of the interest and esteem with which you are regarded by the ladies who have deputed me to present them." The buglers then advanced and received the two silver trumpets; when Major Hall returned thanks on behalf of the corps to the lady subscribers, and also for the honour they had done him in selecting his wife to present them. Lieut. Galt then proposed "Three cheers for Mrs. Hall and the ladies," which was enthusiastically responded to by the vast assemblage. The band then struck up, and the corps marched past in excellent style and left the Governor's Green.

MIDDLESEX.

29th (NORTH) MIDDLESEX.—A day or two since a lady in deep mourning waited upon Mr. John Austin, the treasurer of the Regent's Park district for the North Middlesex (St. Pancras) Rifles, and stated that she had observed the steady and attentive conduct of the effectives of the above corps on their passage to and from the Regent's Park barracks for the purposes of drill, and she considered it the duty of every one to contribute towards the support of such a noble institution as that of the Rifle Volunteers. The lady then handed the treasurer a donation, with the further instruction that her name was to be registered as an annual subscriber or honorary member of the North Middlesex Rifles. On inquiring the lady's name and address it turned out that the benefactress was no other than Lady Franklin, the widow and relict of the late-lamented Sir John Franklin, the Arctic voyager. Lady Franklin is not the only patriotic lady of distinction who has contributed to the above corps. Miss Burdett Coutts, and one or two other ladies of standing have subscribed, and it is rumoured that a ladies' committee is about to be formed for the purpose of presenting the corps with some embroidered flags, or some other tokens of respect and admiration. Another remarkable instance—as showing the popularity of the movement in the district—is the following. A young lady waited also upon Mr. Austin at his residence, 28, Gloucester Road, and left in a letter, he being from home at the time, the sum of 1*l.* 11*s.* 6*d.*, the letter, which was dated "Victoria Wharf, Camden Town," stating that it was the proceeds of a subscription of pence saved up by children of the neighbourhood, in aid of the objects of the St. Pancras (North Middlesex) Rifle Volunteers. These examples speak volumes as to public feeling, and are really worthy of emulation.

STAFFORDSHIRE.

STAFFORDSHIRE VOLUNTEERS.—Captain Harrison, of the Brownhills and District Rifle Volunteer Company, has offered a prize of 10*l.* to any member of this company who shall gain the first prize at any future meeting of the National Rifle Association.

YORKSHIRE.

3RD WEST YORK RIFLE VOLUNTEERS.—The officers of this fine regiment held a meeting at the Orderly Room, St. George's Hall, last week, and unanimously agreed to add a very handsome sum to the pay allowed by Government to their most efficient and zealous adjutant, Captain F. Lepper, late Captain of the 7th Lancashire Militia, and Her Majesty's 81st Regiment. This corps is taking the right way to produce a good number of marksmen, by going through a steady course of musketry instruction before firing a shot; and the corps is also improving daily in battalion and company drill. The arms are kept in perfect order by Drill Instructor Watts (late Colour Sergeant 20th Regiment) in the armoury, St. George's Hall. The targets are regulation size, but of rolled iron, light and handy. From all that we hear the regiment in its drill and interior economy promises to be a pattern corps, under the able command of Major S. C. Lister.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, JULY 10.

Victoria Rifles—Abraham Trew, Esq., Captain, to be Adjutant, from 10th May, 1860.

Staffordshire Rifle Volunteer Corps, 4th Battalion—Captain Thomas Segrave, late 14th Regiment, to be Adjutant, from the 14th of June, 1860.

3rd Cambridgeshire Rifle Volunteer Corps—Ralph Leeson, Esq., late 31st Regiment, to be Adjutant.

Queen's (Westminster) Rifle Volunteer Corps—Lieutenant Henry Stilwell, to be Captain, vice Twining, promoted; Ensign Thomas Partington Scrivener, to be Lieutenant, vice Stilwell, promoted; Charles Farlow, Gent., to be Ensign, vice Scrivener, promoted.

Memorandum—22nd Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the commission held in this corps by Captain the Hon. Arthur Egerton.

Memorandum—29th Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the commissions held in this corps by Lieutenant James Joseph McSwiney and Ensign William Huskisson.

36th Middlesex Rifle Volunteer Corps—William Fenton, Gent., to be Assistant-Surgeon.

Staffordshire Rifle Volunteer Corps (3rd Battalion)—Brevet-Lieut.-Colonel the Hon. Arthur Charles Legge to be Lieut.-Colonel-Commandant; Captain Henry Elwell, of the 1st Company, to be Major.

26th Company (4th Battalion)—Charles Quinton, Gent. to be Honorary Assistant-Surgeon.

29th Company (4th Battalion)—Daniel Granger Ward, Gent., to be Ensign.

35th Company (3rd Battalion)—Offley Francis Drake Wakeman, Esq., to be Captain.

Staffordshire Rifle Volunteer Corps—29th Company (4th Battalion)—John M'Nabb Ballenden, Esq., to be Honorary Assistant-Surgeon; the Rev. William Lewis, Clerk, to be Honorary Chaplain.

4th Essex Rifle Volunteers—John Seabrook Crabb, Esq., to be Ensign, vice Hardcastle, resigned.

9th Lancashire Rifle Volunteers—Captain James Fenton Greenall to be Captain-Commandant; Richard Assheton Cross, Esq., M.P., to be Captain; Ensign Sylvanus Reynolds to be Lieutenant; Thomas Litton, Gent., to be Ensign, vice Reynolds, promoted; Henry Cunningham, Gent., to be Ensign.

Her Majesty has been graciously pleased to accept the resignation of the commission held by Major John Frederic Wieland, in the 12th Lancashire Artillery Volunteers.

16th Suffolk or Hadleigh Rifle Volunteers—James Hamilton Lloyd Anstruther, Esq., to be Captain; John Frederick Robinson, Gent., to be Lieutenant; George Freeman, Gent., to be Ensign.

Approved by Her Majesty as Assistant-Honorary-Surgeon, in the above regiment:—John Thomas Muriel.

4th Westmoreland Rifle Volunteers—Thomas Gaskarth Postlethwaite, Gent., to be Ensign.

Keynsham or 7th Somerset Rifle Corps—Her Majesty has been graciously pleased to permit the resignation of Captain James Ireland Clayfield-Ireland.

6th Gloucestershire Rifle Volunteers—Robert Blagden, Gent., to be Honorary Assistant-Surgeon; the Rev. Edward Cornford to be Honorary Chaplain.

3rd Brecknockshire Rifle Volunteers Corps—The Rev. John Howell, clerk, to be Honorary Chaplain.

15th Derbyshire Rifle Volunteers—Robert Wilmot, Esq., to be Lieutenant; Lawrence Reynolds, Esq., to be Ensign.

Wincanton, Buxton, and Castle Carey, or 23rd Somerset Company of Volunteer Rifle Corps—William Sandford Wills Sandford, Esq., to be Captain; Thomas Englesby Rogers, Esq., to be Lieutenant; Herbert Messiter, Gent., to be Ensign.

3rd Hertfordshire Rifle Volunteers—William Henry Evans, Gent., to be Ensign.

4th Hertforshire Rifle Volunteers—The Right Hon. John William Spencer Brownlow Egerton, Earl Brownlow, to be Lieutenant, vice William Paxton, resigned.

1st Hampshire Artillery Volunteer Corps—Frederick Peere Williams Freeman, Gent., to be Second Lieutenant, vice Oldfield, resigned.

5th Hampshire Rifle Volunteers—Lieutenant Thomas John Bridge to be Captain; Ensign Alexander Hellard to be Lieutenant; Ensign Edward Griffin, to be Lieutenant; Josiah Joseph Webb, Gent., to be Ensign, vice Hellard, promoted; William David King, Gent., to be Ensign, vice Griffin, promoted; George Rake, Gent., to be Ensign.

8th Hampshire Rifle Volunteers—Thomas Warner, Gent., to be Lieutenant; John Gater, Gent., to be Ensign; Robert Bates, Gent., to be Honorary Assistant-Surgeon.

12th Hampshire Rifle Volunteers—Joseph Thomas Kirkman, Gent., to be Honorary Assistant-Surgeon.

14th Hampshire Rifle Volunteers—Alexander Hugh Lexborne Popham, Esq., to be Lieutenant; William Clement Drake Esdaile, Esq., to be Ensign; John Shepard Maskew to be Honorary Assistant-Surgeon.

16th Hampshire Rifle Volunteers—Francis Joseph Peter Marx, Esq., to be Lieutenant.

Kent Artillery Volunteers (14th Corps)—Captain Philip Thornton to be Major.

Kent Rifle Volunteers (2nd Battalion)—The Right Hon. Charles Stewart, Viscount Hardinge, to be Lieut.-Colonel, 3rd Company; Lieut.-Colonel Henry Temple Hillyard to be Captain, vice Farnall, promoted.

8th Lincolnshire Rifle Volunteers—Lieutenant Henry Peacock, to be Captain, vice Wilson, promoted.

Robin Hood Rifle Volunteer Corps—Lewis Samuel, Gent., to be Ensign.

The Southwell, or 8th Nottinghamshire Rifle Volunteers—John Henry Becher, Gent., to be Captain; Thomas Elliot, Gent., to be Lieutenant; Harrington Offley Shore, Gent., to be Ensign; Jonas Bettison Warwick, Gent., to be Hon. Surgeon; the Rev. John Murray Wilkins, to be Hon. Chaplain.

7th Durham Rifle Volunteers—Lieutenant James Monks, to be Captain; Ensign William Henry Bramwell, to be Lieutenant, vice Monks, promoted; William Greenwell, clerk, to be Lieutenant; Henry Smales, jun., Gent., to be Ensign; Christopher Rowlandson, Gent., to be Ensign.

Memorandum.—7th Durham Rifle Volunteers—Her Majesty has been graciously pleased to approve Captain John Fogg Elliot bearing the title of Captain-Commandant in this corps.

WAR OFFICE, PALL MALL, JULY 13.

West Middlesex Rifle Volunteer Corps—George Penymore, Gent., to be Adjutant, from the 10th May, 1860.

2nd Battalion Oxfordshire Rifle Volunteer Corps—John Augustus Fane, Esq. (late Captain 46th Regiment), to be Adjutant, from the 8th June, 1860.

9th Lancashire Artillery Volunteers—Philip Kewley, Gent., to be Second Lieutenant.

15th Lancashire Rifle Volunteers—John Kennedy Stuart, Gent., to be Ensign, vice Baron, resigned.

27th Lancashire Rifle Volunteers—Edward Haeffely, Gent., to be Ensign; Assistant-Surgeon Robert Settle, M.D., to be Surgeon.

North Lonsdale or 37th Lancashire Rifle Volunteers—William Butler, Gent., to be Ensign.

38th Lancashire Rifle Volunteers—Lieutenant George Frederick Martin to be Captain; Ensign William Clarke Deeley to be Lieutenant; Edward Lister, Gent., to be Honorary Assistant-Surgeon.

66th Lancashire Rifle Volunteers—Thomas Berry, Gent., to be Lieutenant.

67th Lancashire Rifle Volunteers—Peter Rasbotham the younger, Gent., to be Ensign; Francis Hepworth, Gent., to be Honorary Assistant-Surgeon.

74th Lancashire Rifle Volunteers—George Stanley Willings, Esq., to be Captain; George Turner, Gent, to be Lieutenant; Joshua Ashley, Gent., to be Ensign; John James Flinn, Gent., to be Honorary Assistant-Surgeon.

76th Lancashire Rifle Volunteers—Alfred Barnes, Esq., to be Captain; Alfred Topp, Gent., to be Lieutenant; Thomas Kershaw, Gent., to be Ensign.

MEMORANDUM.

Her Majesty has been graciously pleased to accept the resignation of the Commission held by the Reverend Lewis Frederick Thomas, B.A., in the 12th Lancashire Artillery Volunteer Corps.

15th North Riding of Yorkshire Rifle Volunteer Corps—George Roper, Esq., to be Ensign, vice Robinson, resigned.

2nd Battalion of the North Riding of Yorkshire Rifle Volunteer Corps—The Honourable William Ernest Duncombe, M.P., to be Lieutenant-Colonel.

2nd Glamorgan Artillery Volunteers—James Sheppard Starbuck, Esq., to be Captain; George Charles Tuttle, Gent., to be First Lieutenant; George Young, Gent., to be Second Lieutenant.

3rd Glamorgan Artillery Volunteers—William Alexander, Esq., to be First Lieutenant.

4th Glamorgan Artillery Volunteers—Samuel Wallace, Esq., M.D., to be Honorary Assistant-Surgeon; Robert Antony Hardcastle, Gent., to be First Lieutenant; Gwylim William Jones, Gent., to be Second Lieutenant.

18th Glamorganshire Rifle Volunteers—Frederick Charles Allen Royds, Esq., to be Lieutenant; Samuel John Hornsby, Esq., to be Ensign.

1st Company Cinque Ports Artillery Volunteers—Henry Blyth Hammond, Second Lieutenant, to be First Lieutenant, vice Daniel, resigned; Benjamin Sicklemore, Esq., to be Second Lieutenant, vice Hammond, promoted.

2nd Battalion Warwickshire Rifle Volunteers—5th (Coventry) Company—Alexander Rotherham, Gent., to be Ensign.

Wiltshire Volunteer Rifle Corps. 3rd Company—Alfred Francis William Jeston, Gent., to be Honorary Assistant-Surgeon.

1st Battalion Cumberland Rifle Volunteers — Major Charles Hamilton Wake to be Lieutenant.

10th Cumberland Rifle Volunteers—Henry Jefferson, Esq., to be Captain-Commandant.

Worcestershire Volunteer Rifle Corps; 12th Company—Allen Lankester Haynes, Esq., to be Honorary Assistant-Surgeon.

12th Sussex Rifle Volunteer Corps—George Ryding, M.D., to be Honorary Assistant-Surgeon.

15th Sussex Rifle Volunteer Corps—William Thompson to be Honorary Assistant-Surgeon.

18th Sussex Rifle Volunteer Corps—Walter Wyndham Burrell to be Ensign.

6th Cambridgeshire Rifle Volunteers—Edward Calthorpe, Esq., to be Captain; Henry Waddelow Marten, Esq., to be Lieutenant; Charles Theodore Harlock, Esq., to be Ensign; Robert Muriel, Esq., to be Honorary Surgeon; the Reverend William Edward Dickson, M.A., to be Honorary Chaplain.

11th Subdivision of Dorsetshire Rifle Volunteers—Robert Sadler Freame, Esq., to be Ensign.

12th Subdivision of Dorsetshire Rifle Volunteers—John Radcliffe Lyon, Esq., to be Lieutenant; Henry William Langdon, Esq., to be Ensign.

1st Battalion of Derbyshire Rifle Volunteers—Sir Thomas Gresley Bart., to be Lieutenant-Colonel.

6th Aberdeen Rifle Volunteer Corps—Ensign Patrick Cooper to be Lieutenant, vice Macdonald, resigned; Hector Allen, Gent., to be Ensign, vice Cooper, promoted; Ensign Alexander Pirie Hogarth to be Lieutenant, vice Adamson resigned; Richard Latter to be Ensign, vice Hogarth, promoted.

MEMORANDUM.

6th Aberdeenshire Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant William Adamson.

2nd Subdivision of Aberdeenshire Rifle Volunteers—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant James Forbes Leith.

11th Argyllshire Rifle Volunteers—Sir Angus Campbell, Bart., to be Captain; Duncan MacArthur, Gent., to be Lieutenant; Robert Corson, Gent., to be Ensign.

Renfrewshire Rifle Volunteers—1st Battalion—William McIlwraith, Gent., to be Ensign of the 13th Company, vice Crawford, resigned.

2nd Battalion—James Coats, Gent., to be Captain of the 3rd Company, vice Fullerton, promoted; James Turner Donald to be Surgeon; The Reverend Robert Stephen to be Honorary Chaplain.

1st Battalion of Galloway Rifle Volunteers—Captain William Kennedy Laurie, Esq., to be Lieutenant-Colonel.

1st Kirkcudbrightshire Rifle Volunteers—David Blair, Esq., to be Honorary Assistant-Surgeon.

Taunton or 3rd Somerset Company of Volunteer Rifle Corps—The Reverend William Robinson Clark, Clerk, to be Honorary Chaplain.

Yeovil or 16th Somerset Company of Volunteer Rifle Corps—The Reverend Rawlin Mallock, Clerk, to be Honorary Chaplain.

[The following Article is substituted for that which appeared in the *Gazette* of the 10th July instant.]

Wincanton, Bruton, and Castle Cary, or 23rd Somerset Company of Volunteer Rifle Corps—William Sandford Wills Sandford, Esq., to be Captain; Thomas Englesby Rogers, Esq., to be Lieutenant; Herbert Messiter, Gent., to be Ensign.

ERRATUM in date of Commission.

1st Suffolk Rifle Corps—John H. Josselyn, Gent., to be Ensign. Dated 14*th April*, instead of 16*th May*, 1860, as gazetted.

VOLUNTEER CADET CORPS.—The military spirit which has caused the formation of so many Volunteer rifle regiments throughout the land has extended itself to the boys. In various districts corps of cadets are being formed, in which the initiation of military discipline will be taught, and, at the proper age, the young fledgling will be able to join the ranks without the unpleasant matriculation of squad drill. In addition to the utility of such corps, the benefit conferred upon the boys themselves, by being taught to walk upright and graceful will be something worth acquiring. Previous to the rifle movement there was scarcely one man in a hundred who knew how to walk, although every one could manage to shamble along very well. Amongst some of the earliest of the cadet corps, one has been formed in connection with the Queen's Westminsters; and Earl Grosvenor, the colonel of the latter regiment, takes the warmest interest in the progress of his patriotic recruits. They are under the instruction of a late sergeant of the Guards, who is also a sergeant in the Westminsters, and they assemble for drill three times a week at the Carlton Ride, St. James's Park. The uniform is the same as the Westminster uniform. Twenty of them paraded in rear of the latter corps at the late review, and were heartily cheered by the people as they marched along. Her Majesty, observing youths from ten to fifteen years of age "put through their facings," made inquiries about them, and was much pleased on being told that many of their fathers and brothers were under arms before her upon the ground. Major Mayne has accepted the post of adjutant, and the head-quarters, *pro. tem.*, is at 20, Spring Gardens, the residence of Mr. H. Cross, the hon. secretary. In order to enable any boy to join, the subscription has been fixed at half-a-crown a year, with a five-shilling entrance fee.

VICTORIA RIFLES.

We have been favoured with the following report of the firing last Tuesday on the Practice Ground of the Victoria Rifles at Kilburn, for the 50*l.* prize given by Miss Burdett Coutts (withdrawn at Wimbledon for want of time to complete the competition), and 25*l.* presented by His Grace the Duke of Wellington, making a total of 75*l.* This sum was divided into three prizes, viz.: 1st., 30*l.*; 2nd, 25*l.*; and 3rd, 20*l.* Open to all comers, with any description of Rifle. The distance was 400 yards, and the number of rounds, 10. No entrance fee. The competition commenced soon after 12 o'clock, in the presence of the Duke and Duchess of Wellington, Lord Elcho, Lord Radstock, Major-General Boileau, and a large number of ladies and gentlemen. There were 53 competitors, among whom were the Count de Gendre (Swiss), Herr Thomann (Swiss), Lieutenant Lacy, 12th Regiment (winner of the Prince Consort's prize, and of Mr. Westley Richards's 30-guinea rifle), Lieutenant Archibald, 58th Regiment (winner of the Duke of Wellington's prize at Wimbledon), Captain Robertson, 9th Perth Volunteers, Captain Dove, 91st Lanark Volunteers (who secured one of the 40*l.* prizes given by the National Rifle Association, and one of 25*l.*, Gye prizes), Corporal Hodder, Grenadier Guards (winner of Messrs. Egan's prize), Lord Vernon, the Master of Lovat, Captain Greenhill, and several officers and members, both military and civil, of the Victoria Rifles. At the termination of the 10 rounds, the score stood:

Arthur Fellowes ...	Victoria Rifles ...	13
David Thornbury ...	,, ...	13
M. R. Smith ...	,, ...	13
Thomann (Swiss) ...	... ...	13
Corporal Hodder ...	Grenadier Guards ...	12
Major Talbot	... ...	10
F. Giles	Victoria Rifles ...	10
Captain Greenhill	,, ...	10
G. K. Matthews	,, ...	10
Captain Dove ...	91st Lanark	10

The firing was watched with the greatest interest throughout, which positively rose to a pitch of enthusiasm as the four first fired off the ties.

The score for the ties was as follows:

Fellowes	2
Thornbury	1
M. R. Smith	0
Thomann	2

Again a tie, which was decided by Fellowes scoring 1 and Thomann, 2.

The winners therefore were:

1st Prize, £30	Thomann
2nd Prize, £25	Fellowes
3rd Prize, £20	Thornbury

It is but right to remark that Thomann fired throughout with a superior Swiss rifle, with magnifier and shade to sight, and that he used a hair trigger, contrary to the rules adopted by the Association at Wimbledon. This would have most certainly been objected to had it been noticed at the commencement of the match. Fellowes and Thornbury, who tied his score, fired with the Government long rifle, regulation bore, with a pull of trigger equal to 4 lbs., made by the London Armoury Company on the plan of interchange, and with cartridges pattern 1853, supplied to the corps from the Government stores. Rifles of all bores and descriptions were used in the contest. At the conclusion of the competition which lasted six hours, the winners were loudly applauded. The target was six feet by three feet, with an 8-inch bull's eye, counting 3, centres 2, and uppers and lowers 1.

VOLUNTEER EFFICIENCY.

We copy from the *Globe* the following article, in the leading remarks in which there appears to us to be a great deal of sense.

"If we had not very great confidence in the inherent strength and solidity of the Volunteer movement, we should be sorely afraid of the evil influence likely to affect it from the proceedings of some prominent commanding officers in the metropolitan district. The zeal of these gentlemen is so great that it seems likely to outrun itself and spoil the result which we all desire to see arrived at. Unless the proceedings of the Volunteers be conducted sensibly the whole institution will be open to attack from the most destructive moral weapon that can be employed. There is but one step from the sublime to the ridiculous, and it will have been taken if the Volunteers suffer themselves to appear before the country, not as a body of earnest men, sacrificing their time and their money to form a useful adjunct to the regular forces, in the shape of a number of fairly trained battalions and companies available for service in case of need, but as a set of overgrown boys playing at soldiers for the purpose of show. Up to the present time the conduct of affairs has been on the whole worthy of the highest praise, because it has steadily kept in view utility and efficiency, to the sacrifice of other and weaker considerations. The moment we see a prospect of a departure from this wise and prudent course we raise our voice, and endeavour to prevent a noble institution from being turned into an object of ridicule, because of the weakness of those who desire to appear as Camden Park Cardigans, or Brompton Garibaldis.

"For some time past a great Volunteer sham-fight has been arranged to come off in a spot between Bromley and Chislehurst, in Kent. Lord Ranelagh is understood to have been the originator, and, of course, the Commander-in-Chief on the occasion. The details were all settled, and we have before us an elaborate plan of the anticipated contest prepared in Mr. Wyld's most careful manner, in which serried battalions in variously tinted colours are represented in different positions of attack and defence. Of the strategical ability evinced, we do not desire to say more than that the enemy to whom it might be opposed should be sincerely congratulated upon his good fortune. A number of metropolitan and suburban regiments, it was arranged, were to assemble; but in all this, one of the highest military qualities — obedience to superiors, appears to have been lost sight of. It was in an independent capacity that Lord Ranelagh organised the affair, and until the arrangements had far progressed, the War Office was not consulted. Military subordination, as well as the interests of the inhabitants of the interesting and 'usually peaceful neighbourhood' between Bromley and Chislehurst, required that the authorities should have had some control over the arrangements. The crowd which a fine day and any little piece of show near London inevitably gathers would have rendered some Government aid necessary for the safety and comfort of those assembled. Nevertheless the whole thing was planned upon strictly independent principles, and there was no official information as to what was to be the ultimate purpose of this army. For all Mr. Sidney Herbert could tell, it might seize upon this picturesque and productive district, confiscate and divide it into lots for the benefit of the Conservative Land Society. It might be the first step towards the reconstitution of the Heptarchy by the proclamation of Thomas Heron Jones, King of Kent, as well as Viscount of Ranelagh. Later in the day, indeed, some apprehension of the responsibility attaching to the assembling of an armed mass seems to have dawned upon the projectors, for we find Lord Sydney, the lord-lieutenant of the threatened county, and responsible for its preservation from the guerilla chiefs of Middlesex, making a representation to the War Office, the reply to which is now before us. In it Mr. Sidney Herbert intimates that there is no objection to a field-day under proper restrictions, one of which is that no corps shall attend without the permission of the military authorities. With a wise provision, and a regard for the safety of the public, and the Volunteers (not at all unnecessary, judging by the plan before us), he has directed a competent officer, Major-General Eyre, from Chatham, 'to superintend and watch the movements.' The affair will thus be brought under something like responsible control, and we trust all will end harmlessly, if not pleasantly.

"Our great admiration for the Volunteers, and especially for the absence of littleness or personal swagger which has hitherto distinguished them, induces us to make these remarks. They apply, we are aware, only to a few individuals, but if the metropolis were to set a bad example in this respect, it would be unfortunate and perhaps more mischievous than might be anticipated. The first erroneous step to our minds was that by which Lord Ranelagh, Lord Elcho, and others were invested with the position of brigadiers on the occasion of the great review before Her Majesty. It was, we think, contrary to the wholesome spirit in which the movement originated. The Volunteers did not band themselves together to make diagrams to enable military enthusiasts to practise the art of war. The object was to supplement the regular army by a number of battalions fairly drilled for service in case of national emergency. These commanding officers are supposed to have spent the winter in instructing themselves and their battalions: their appropriate place was at the head of these battalions; their pride ought to have been to show the battalion, from themselves downwards, as complete and efficient as possible. Yet, on the first important public occasion, they were taken away from the position which they had spent the winter in learning to fill with credit, and were placed on the staff, in a rank which officers can only hope to fill after many years' service, and close and constant experience. If an invasion were to take place, certainly neither Lord Ranelagh nor Lord Elcho would be entrusted with a brigadier's command: their place would be at the head of their respective corps, and that place they ought to accustom themselves to on all occasions. We take leave to tell them that many of the Volunteers, who are but too happy to attend at any inconvenience to learn their duty and improve themselves, are not so willing to be marched out to make part of a show ('Reserved seats, price 5*s.* Tickets to be had of Mr. Mitchell!') from which they return without having gained an iota of practical instruction. Officers should stick to their companies and battalions, and their great pride should be to have them thoroughly efficient as companies and battalions. By confining themselves to this, instead of trying to become amateur field-marshals, they will do more than anything else to render the Volunteers permanent, respected, and useful."

THE REGULATION BULLET.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I see you mention that the Volunteers complained of the regulation bullet given them to shoot with from the long Enfields, and well they might. There can be no doubt but that it was too small. Instead of the diameter being ·55, we should have had ·577. If we had been supplied with the latter, you would have had to record much better shooting, and the result would have been far different. I retired after firing fifteen rounds, perfectly satisfied that it would be useless contending for prizes with such worthless ammunition, where, however good and steady the aim might be, no dependence for accuracy could be placed on the flight of the projectile.—I am, &c.,

LIEUTENANT JOHN JERVIS BROADWOOD,
Commanding 14th Sussex Rifle Volunteers.

YORKSHIRE.—The recent review in Hyde Park and the shooting at Wimbledon last week, have animated the Volunteers in this county to renewed energy and interest in the movement, especially as more than one of the natives have proved themselves such excellent marksmen. On Monday last, a number of the York riflemen celebrated the anniversary of the formation of the corps, by partaking of an excellent dinner at the house of the Sergeant-Major, Mr. Crawford.—Ripon is not backward in the movement. On Sunday last, the corps at that place proceeded to the Minster, where an appropriate sermon was preached to them by the Bishop of Ripon. The ladies of Wensleydale have munificently presented a silver-mounted bugle for the use of the 12th North Riding Wensleydale corps, and also a silver medallion to each of the members, to be worn as an ornament on their belts.—The Hull Rifle Corps and the Artillerymen fraternised during the present week, and had a march out together.

A preliminary meeting was held on Wednesday in Her Majesty's dockyard, Portsmouth, during the men's dinner hour, when resolutions were passed unanimously for the formation of a Volunteer Artillery force, to be called the Portsmouth Civil Artillery Company. There is every reason to suppose that the corps will be very strong, from the known efficiency which distinguished the dockyard brigade which was disbanded a few years since. The formation of the corps now in contemplation will add very materially to the Volunteer strength of the locality.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL
OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance; and the postage—uniformly 1d. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

WILLIAM O. MITCHELL,
MILITARY BOOKSELLER AND PUBLISHER,
39, CHARING CROSS, LONDON, S.W.
Catalogues sent on application.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*

Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, ELSTOB, of 12, Avery Row, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

DAY'S PATENT CHAIR-BED, a perfect combination of Easy Chair, Couch, and Bedstead, adaptable to either purpose by one simple motion, without screw, nut, rack, or complication of any description. An illustrated and descriptive circular for one stamp. W. DAY & SON, Portmanteau Manufacturers and Military Outfitters, 353 and 378, Strand, London, W.C.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 21. 2s., from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, TWO GUINEAS.
SILVER BUGLES, for Presentation, from TWENTY GUINEAS.
ELECTRO-PLATED BUGLES, in Case, FOUR GUINEAS.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3s. each, giving instructions, and all the regulation sounds.
DRUM-MAJOR DUTY-BOOK, 4s. FIFE-MAJOR DUTY-BOOK, 3s.
PERCIVAL HUNTING-HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

BUGLES FOR VOLUNTEER CORPS, Government pattern, corresponding to those used in the Line, very best make, price, in copper, 42s., or strongly electro-plated, 63s.; green cord and tassels, 3s. 6d.; silk ditto, 8s.; enamelled leather case, with strap and buckle, 12s. Sent carriage free on receipt of a remittance.—BOOSEY & SONS, Military Musical Instrument Manufacturers, Holles Street, London, W. Volunteer Bands furnished with instruments and music of every description.

NOTICES TO CORRESPONDENTS.

SUBSCRIBER.—There is always an announcement in this journal of the day on which the Levée will take place.

We cannot pretend to decide questions between Railway Companies and Volunteer Corps in reference to fares for conveyance.

M. S. O. would assuredly subject himself to the full penalties of his refusal to obey orders.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, JULY 14, 1860.

Some weeks ago, Mr. Sidney Herbert was interrogated respecting the large extra prices which appear to continue to be paid for promotion in cavalry regiments, notwithstanding the lowering of the sum fixed by regulation some six months ago. He replied that means would be taken to abate the practice, though he did not consider that an Act of Parliament or penal measures, under the present law, would be the most effectual preventitive. Undoubtedly, as large sums as ever continue to be made up for retiring officers; and considering the warnings that have been given, we cannot but express our surprise that such should be the case, always presuming that the officers who pay these large sums expect to receive them back in substance on their leaving the Service. They appear to be strangely forgetful of the declared object which induced Mr. Herbert to lower the price of cavalry commissions to infantry rates. He did not merely want to attract 65 cornets at 450*l.* each, for whom there were that number of vacancies not to be filled at 840*l.*—he designed to change the whole tone of the cavalry, and to diminish the large extra prices as much as those paid according to regulation. We are quite sure that the time is not very far distant when his object will be achieved; for, notwithstanding the reduction of the commissions, extra prices remain as large as ever, expense is about the same, the boon of chargers from the ranks does not work practically very much in the young officer's behalf, and—45 cornetcies are still unfilled. The original plan was to introduce into this branch of the Service, gentlemen of smaller means—of the average incomes of infantry officers, in fact—and it was assumed that as they came up to the position to purchase their troops, being unable to pay the large extra amount still in vogue, they would thus be made the instruments of the reduction. In speaking of the large prices paid for promotion, and the sumptuary expenses of the cavalry, the Secretary for War has thus expressed himself to the Lords of the Treasury:

"We have to combat a system of expense, partly necessary and partly unnecessary, partly imperative through the rules of the Service, and partly conventional, through the habits of cavalry officers. If, as I have stated, the latter is the more difficult to deal with of the two, being less within the reach of authority, and more entirely dependent on the officers themselves, then it is only by the introduction into the cavalry of a large body of officers with the average means of infantry officers, that we can hope to create within the regiments a public opinion adverse to expense, and sufficiently powerful to overbear the strength of existing habit and tradition. In order, therefore, to attract these young men, to whom we must look to effect the changes which authority, unaided, cannot effect, authority, on its part, must make the changes which are within its power as effectual as possible. The larger the reduction in the regulation price of the commissions, the more certainly will the illegitimate be affected by it. A small change in the regulation price would, probably, have no effect at all; and a succession of small changes, each inoperative from its smallness, might practically leave the evil undiminished; but one immediate and sweeping change can scarcely fail to have its effect, and the evil is one which requires to be dealt with vigorously."

A portion of this view—that which assumes that a proportion will exist between the illegitimate and the regulation prices—will strike many as untenable; and so it would be if the system were allowed to continue untouched. But Mr. Herbert shows that under the new system the case is likely to be as he puts it:—

"In theory, doubtless, it might appear," he says, "that there was no connection between the two prices, but practically it would be found that the prices of first commissions having been lowered, the door would be opened in the cavalry (as in the infantry at present) to a poorer class of men to enter the Service, who from their means would be unable, even if willing, to pay large sums over regulation; officers wishing to sell out would thus be forced to be satisfied with the smaller sums which might be expected to be offered. It is true that many might prefer continuing in the Service to selling out at a sacrifice to themselves, and promotion might in consequence for a time be retarded; but in course of time the sellers would find themselves obliged to come down to the terms of the purchasers. It appears therefore that, indirectly, if not directly, the amount of the illegitimate price would be affected by the reduction of the regulated price."

The course thus pointed out by the Secretary for War is a pretty certain though a very slow one; and if we are not mistaken, further means are likely to be taken before very long to fill up the gaps which still exist to such a large extent in the commissioned ranks of the cavalry of the Line. Mr. Herbert indicated as much in the reply given by him to Captain O'Connell lately; and what the precise nature of the steps will be, may perhaps be guessed from another passage in his correspondence with the Treasury, in which the Secretary of State combats the claim of "My Lords," that penal measures should be taken against officers paying or receiving any sums beyond those fixed by regulation. He admits the difficulty of obtaining legal evidence of such a transaction, but the moral evidence, and what steps would be justified by it, he has no difficulty in seeing. And he pretty plainly intimates that the Commander-in-Chief will be asked to bring in officers from other regiments until the market shall have been forced down to a tolerably reasonable limit. In the face of all this, we confess that we cannot comprehend the recklessness which still influences officers in giving the large prices every day paid for cavalry promotions.

We have scarcely had time to do more than glance at the Duke of Somerset's Naval Discipline Bill, which was only ordered to be printed on the 29th June, though it has already passed through Committee in the House of Lords. From the few words said by His Grace on moving the second reading, we apprehend the 39th clause is the most important in the Bill; and that it was intended to remedy a grave evil materially affecting the discipline of the Navy, to which attention was recently called in a series of letters by Lieutenant D. Stewart, R.N., addressed to his father-in-law, Sir John M'Neill, and published for private circulation. The clause is headed "offences punishable on shore," and is to the effect that all offences within the category of "mutiny," "insubordination," or "desertion," and "absence without leave," if committed on shore within Her Majesty's dominions, may be tried and punished in the same manner as if on board ship. We fear His Grace's intention, as stated in the House of Lords, will not be fulfilled by means of this clause. It is very evident that "mutiny" can scarcely occur on shore, while, on the other hand, "desertion," or "absence without leave," can never occur "on board ship"! This practically limits the 39th clause to offences classed under "insubordination;" upon turning back to which (sections 18—21), all appears at first sight quite satisfactory; as they provide due punishment for "striking a superior officer," for "disobeying any lawful command of a superior officer," and for "threatening, insulting, or behaving with contempt to "superior officers," besides for "quarrelling, &c., with any person subject to the Act." But upon coming to the interpretation clause of the bill (section 76), we find that "officer" shall mean "an officer belonging to one of the ships, and include a subordinate and a warrant officer, *but shall not extend to Petty Officers.*"

Now, it was precisely as regards petty officers, according to Mr. Stewart's pamphlet, and certainly as we understood the Duke of Somerset's speech, that some remedy of this kind was required. A petty officer reports a seaman for some offence, for which the man is punished. He waits till he gets ashore, and gives the petty officer a black eye, for which there is no redress. Nothing of the kind is stated to exist as regards commission, subordinate, or warrant officers; but probably the lawyers on shore who drew the bill for their Lordships don't know the difference between "subordinate" and petty officers. We can only assure them the "sea lawyers" are better informed; and this matter had better be set right in the Lower House. We must, however, return to the subject hereafter, as the state of discipline in the fleet is becoming somewhat serious. This mistake, however, could scarcely have arisen if lawyers began with their "definitions," as we were wont to find it done in Euclid, instead of sticking them in at the end, and necessitating the reading of their bills backwards, in order to understand them.

The French journals direct a good deal of attention to the recent debates in Parliament on military and naval questions, and to the Report of the Defence Commission. The *Moniteur de l'Armée* declares that no one dreams of troubling us, and that our Volunteer Corps must be intended to act against the Chartists. It is significantly remarked, that if Volunteers are really intended for defence, Ireland should not be left out, as it offers an admirable base of operations in case of *war if left quite unprotected.* The Commission declare that a landing could easily be effected along hundreds of miles of our coast. Of what use then are defensive works? The enormous expenditure of our Army is also a subject of surprise. Meantime our neighbours are taking a step which recent events have proved to be necessary—to adapt cavalry to modern warfare. Baron d'Azemar, Colonel of the 6th Lancers, has given a new turn to the question by some remarkable essays, one of which is understood to have received the sanction of the Minister for War. He first propounds two questions—Should cavalry fight on foot? To which he replies, No. Should infantry mount on horseback? To which he says, Yes, as much as you please. Cavalry on foot is quite out of the question. The word impossible is not to be found in the French military dictionary. But French soldiers cannot be at once expert dragoons and good infantry. What he proposes, therefore, is to have such corps as the Zouaves, available whenever it may be required to send a body of men to a given point more rapidly than they could reach it on foot. Small and hardy horses only are required. Some experiments in order to test the means of accomplishing this object, and the drill necessary to effect it, will, we understand, be carried out in the camp at Chalon, concurrently with a special change in the whole cavalry force.

The *Moniteur de l'Armée*, in its last number, in reference to the Defence Commission Report, makes three observations. The first is, that no power menaces England, and that France in particular exhibits towards her as much loyalty as a spirit of conciliation in maintaining the alliance. The second, that the Government of Great Britain, in making such grand preparations, would seem to indicate that it has secret projects. The third, that the best way for the Government of Great Britain to protect itself from the attacks of other nations, is to follow a frank and loyal policy, which shall not disturb other nations, and which will enable her to acquire, to keep, and to count upon her allies. In the present number of our journal will be found a portion of an article on the state of Cherbourg, from which it would appear that no great activity was visible at the time the writer was at Cherbourg. However, the Admiral Romain des Fosses has brought forward his proposition for the increase of admirals of the fleet, and there is no reason to believe that the government will cease in its efforts to place the French navy on a footing which, sooner or

Digitized by Google

later, will make it a formidable rival to the Navy of England, unless we are determined to maintain our harmless preponderance.

We hope the Volunteers are not trying to run before they are able to walk. If they prove to-day that they have got the use of their legs and of their temper, and that they can stand the excitement and perform the manœuvres or a sham fight, we may safely leave them to themselves, for they will want no teaching of ours, and will fairly have established a reputation which shall in no respect be short of marvellous.

We know that tried soldiers, restrained by discipline and by the exertions of numerous officers, become highly excited on such occasions, and that accidents are not uncommon on heavy field-days. According to the plan which has been drawn out for the sham fight, the attacking force is to consist of four divisions or regiments, of six battalions or companies each, the defending force being divided into five similar bodies, so that the weaker force shall attack the stronger. The distance between the rival armies in the first position varies from 100 to 250 yards, and all the generals in Europe could not deploy either force on the ground which is occupied by the troops, if the map be a correct guide, or in the least degree an exponent of the ground to be actually held. The attacking column, by some agency which we do not understand, dislodges its enemy from its first position to another on the left of the original ground, where it appears drawn up in seven corps in double lines, judiciously posted on the least desirable ground which it could occupy; but having effected this change, the attacking force seems to have marched back across the stream again, and refusing its right, to have taken post from its enemy on low ground about 300 yards distance. Thence it would seem to have returned to the charge, and crossing the rivulet to have driven its enemy past the ladies' tents to a line of undulations near Camden Place, at which spot the attacking bodies, being now in an unknown formation of six corps, are faced by an equal number of divisions of their opponents, and finish the day with a drawn battle. We do not pretend however to criticise severely what is meant to be a lady's companion to the scene, but we must say, that we regard with some apprehension the assemblage of such a considerable number of armed men in such a narrow space, surrounded by horses and carriages, with crowds of women and children on the ground. The intelligence of individual Volunteers can not be expected to pervade masses of men acting together for the first time. We are inclined to doubt if they will find it so easy as they might expect to take up their ground on the Common, deprived of the assistance which was so useful to them on the occasion of the Review. They have admirable soldiers in positions of command attached to various corps, men who have seen service at home and abroad; and we can answer for it, that if they had canvassed all round, their opinion would be adverse to this demonstration, simply on the ground that their men are not fit for it. In unfitness there is always danger. The Volunteers, we trust, will not imagine for one moment that we in the smallest degree question their admirable spirit and their unspeakable utility, nor should they take it as any departure from the course which His Royal Highness the Commander-in-Chief has uniformly pursued in reference to their interests, that he has positively refused to increase the danger and excitement, consequent upon such an assemblage in a narrow space of ground, by permitting two batteries of the Royal Artillery to be marched from Woolwich to assist at Chiselhurst.

An able pamphlet has just been published by Colonel Sir Joshua Jebb, K.C.B., on the "Defence of London, with Suggestions as to the Necessary Works." It is entirely in accordance with the views we have already expressed in the ARMY AND NAVY GAZETTE as regards the Metropolis; and we doubt not the gallant officer will also entirely subscribe to what we have written this week as to the defence of Liverpool and our other great commercial ports. Colonel Jebb principally advocates a state of thorough organisation beforehand, the importance of which we have iterated again and again. He says:

"If the possibility of a near invasion be admitted, a little consideration will show the advantage of a state of preparation, which should leave no minor matters of detail to be determined when an emergency arose. Our means of resistance would thus be greatly increased, without, as a necessary consequence, entailing much additional expense. Peace and national independence we must, of course, have at any price; and as independent people we ought not long to hesitate whether to purchase it with money or with blood."

If the Government or Legislature blunder as regards the National Defences, it cannot be for want of the best advice, and sufficient warning.

A letter appeared in our leading contemporary a few days since, in which some very severe remarks were made respecting the quality of the stores supplied to the troops forming the China Expedition. It was stated that the knapsacks were of the worst quality,—of a kind served out to the disembodied Militia only, and that they were condemned in the Crimean War. We believe that the real facts of the case would considerably qualify the opinions thus expressed. When troops serve in the field their necessaries are procured through regimental arrangements, and very high prices are usually paid for the articles. When the operations in China were about to be undertaken, it was decided that necessaries should be supplied from the public stores, either free of expense, or at very reduced prices. The pattern of necessaries has been very recently altered; and those sent out to China, though not of the new pattern, were, we believe, serviceable in every way. A complaint was made that these articles should not have been sent out, which complaint was submitted to the referee who acts in cases of dispute between the officers commanding regiments and the Store Department. This officer gave it as his opinion that the articles were perfectly good and serviceable. With regard to the knapsack the only difference is, that the present pattern has a small stick fastened on to the back, and the slings are loose; whereas, the pattern sent out has no stick, and the slings are tacked on. The knapsack can be altered by the soldier himself without any difficulty whatever. With regard to the assertion that the knapsacks were condemned in the Crimea, the simple fact is, they were made after the termination of the War.

Some time ago it was stated in this journal that Sir William Mansfield had declined or refused to go to China as second in command to Sir Hope Grant, and the information thus given, though somewhat modified in a subsequent number of the ARMY AND NAVY GAZETTE, was rather confirmed by the general tenor of the news from India. We have, however, been informed on the best authority, that Sir William Mansfield neither declined nor refused to go as Sir Hope Grant's Lieutenant-General. When the Government requested him to accept that office, as much on their own confidence in his ability, as on the urgent representations of the Indian Government, General Mansfield did indeed strongly represent the inconvenience to which the course of the public service might be exposed, if the Government persisted in an arrangement which would place him under the orders of an officer, to whom for nearly three years he had been giving orders, and whose senior in rank he had been during warlike operations in India. He farther pointed out that Generals Mitchell and Napier had actually left India for their commands in China, and that considerable difficulty would therefore be experienced in arranging those matters with his own; but, in conclusion, Sir William Mansfield, having thus stated his case, informed the Government that he would proceed to Bombay, and there await their orders. This statement is due General Mansfield, and it shows that the General was ready to obey orders.

It is never too late to repair an omission which has some of the characteristics of an injustice. Well deserved praise was given to most of those connected with the management of the Volunteer Review in Hyde Park; but Sir Richard Mayne, who, with his assistant officers, had no small share in contributing to the most satisfactory result of the day's proceedings, somehow or another, has been passed over without the notice which his exertions deserved. It is customary, as indeed it is just, to give to the heads of departments full share of credit for any success which they may have achieved, and the police deserve large acknowledgments for the manner in which their duty was performed at the Volunteer Review. The vast multitudes which were unconsciously divided into surging rivulets, pent up by animated banks, are more indebted than they think to the care and forethought which controlled their movements. Sir Richard Mayne has added one to the many proofs which he has given of his fitness to deal with great emergencies, by the admirable disposition of the force under his command on the occasion of the Volunteer Review.

We find in the *Moniteur de la Flotte* a strange letter from Abd-el-kader, in reference to the disorders in Turkey. He writes to the editor of a journal in Arabic, called the *Eagle of Paris*, to tell him that in his excellent article, giving good advice to the Mussulmans, he has been writing to the dead and not to the living. The conduct of the Sultans has much to do with these evil days. All that is actually going on has, he says, been predicted by Mahomed. Although he clings to the faith of Mahomed, and relies on his prophecies, he writes in a liberal spirit. Mahomed had declared that the world will not come to an end till the majority of mankind are Christians, who have four qualities which insure them success—clemency in victory, courage in defeat, energy in attack, goodness to the poor and to the weak. To these Abd-el-kader adds, as greatest of all, the determination to resist the injustice and oppression of their kings. "My God!" he exclaims, "I weep over the annihilation of Islam! We are from God, and to Him we shall return."

We receive not a few anxious inquiries respecting the details of the amalgamation of the Imperial and Indian Armies, the principle of which Parliament has sanctioned by such large majorities. Inasmuch as these details are not yet settled, we are unable to satisfy our correspondents; but we believe that before long the whole scheme will be made public. With respect to exchanges, we have every reason to anticipate that the tendency of the new regulations will be to afford every facility to officers desiring to change from one portion of the Service to the other, that is now given for exchanging from one corps to another in the Imperial Army.

In courtesy and in justice to our excellect correspondent, we print his letters from Sicily, which have just come to hand, although his suspicions as to trifling delays in transit are amply confirmed by reference to dates. Our correspondent's letter from New Zealand gives rise to a suspicion of another kind, although it is delicately put. The commencement of actual hostilities and bloodshed seems unquestionably to be attributable to the force acting under the orders of the Government. It looks like a case of the Aborigines Protection Society.

We call attention to a letter in our correspondence on the defence of England, by an officer of high scientific and professional attainments, which certainly puts an excellent case in point as to invasion. Mr. Drake's letter to Sir Charles Napier will rather startle the quiet people who have a dreamy notion that the Admiralty, like every other body in the State, is responsible and controllable. It is an *imperium in imperio*—a Council of Three overruling the Council of Ten.

The printer at the House of Commons seems to have too much to do; probably the Printing Committee are used up by their difficult duties. Certain it is that the report on Military Organisation, presented by Sir James Graham, and laid on the table of the House and ordered to be printed nearly a week ago, has not yet made its appearance. We understand that even at the War Department they are yet without copies of the Report.

The ships of the coast-guard, eleven in number, are expected to rendezvous at Portland on the 15th inst., when they will be duly inspected if present, after which each will make the best of its course back to its station. We hope that none of the ships will have any difficulty in finding their way to the rendezvous and back again, and that the result of the inspection will be satisfactory.

We learn that the French contemplated not only a postal service from Suez to Shanghai, but from Galle to Calcutta; a Red Sea line, and a line between the Mauritius and Suez, with branches all over the world. —They say that 7 of the 13 steamers required for the Chinese line, are already on the stocks. These lines are, however, more easily traced on paper than worked out at sea.

The examination of those gentlemen who will be entitled to become surgeons, if as assistant-surgeons they pass the ordeal, is now going on. It is conducted by means of written questions prepared by the Department; and, although tolerably stringent, presents no real difficulties to a well-informed medical officer.

By a Parliamentary paper lately issued in compliance with an order of the House of Commons, we find that it would require, to man all the war-steamers now afloat, building, and in course of conversion, 112,742 seamen and marines. We have at present, serving in sailing-vessels and steamers, 70,000 seamen, marines, and boys.

By the death of Major-General G. C. Mundy, the following Army promotions will take place:—Colonel Richard French, Unattached, to be Major-General; Lieut.-Colonel M'Gee, 3rd West India Regiment, to be Colonel; and Major Savage, 91st Regiment, to be Lieut.-Colonel in the Army.

Major Paget Bayley, Unattached, and Captain Ellison, 47th Regiment, have joined the staff of Sir John Pennefather, commanding at Aldershot, as Aides-de-Camp.

The vacant post of Naval Aide-de-Camp to Her Majesty the Queen has been bestowed by the Duke of Somerset on Captain James John Stopford, late in command of H.M.S. Exmouth.

The Inspector-General of Volunteers, Colonel McMurdo, C.B., left town yesterday to commence a tour of inspection of Volunteers in the northern districts.

His Royal Highness the General Commanding-in-Chief held a levée at the Horse Guards yesterday, which was numerously attended.

Having had occasion to use Mr. Anthony's (of Birmingham) waterproof Enfield cartridges, Government gauge, we can recommend them to Volunteers on account of their waterproof properties, and their great strength. At our request some gentlemen have tested them severely with satisfactory results.

Some time since we had occasion to call attention to a court-martial on Lieutenant Berkeley, of Her Majesty's ship Lynx, which appeared likely to attract attention at a time when questions affecting the discipline of the Navy were warmly discussed. According to the statements which we read, Lieutenant Berkeley, though not found guilty of any very serious charge by the court-martial, had committed acts of harshness, which in some degree damaged the reputation he had acquired as an excellent service officer. We now place before our readers the copy of a Memorandum publicly read on the deck of the Lynx, which was addressed to Lieutenant Berkeley by the Admiral on the station:

Boscawen, in Simons Bay, 19th March, 1860.

Memo.—Having deemed it expedient to defer all proceedings relative to the charges adduced against you by Mr. R. Cooke, second master, in his letter of the 22nd January, and forwarded in your letter of the 25th of that month, until the termination of the Court Martial,

You are now informed that I do not intend to institute any further investigation into these accusations, and you are to acquaint Mr. Cooke that I consider them to be for the most part frivolous, and such as he should not have allowed himself to bring forward.

You are further to acquaint Mr. Cooke that the proceedings of the court-martial, as well as the spirit in which these accusations are framed, afford such conclusive evidence to my mind that he has been actuated more by motives of hostility to you, his commanding officer, than by zeal for the good of the Service, that I have ordered him to be discharged from the Lynx to the Hermes for a passage to England, for the disposal of the Lords Commissioners of the Admiralty, forwarding to them copies of the charges and your explanation.

You are also informed that it is my intention to call their Lordships' especial attention to the grave imputations against Mr. Cooke thrown out by you in your defence, leaving it to their Lordships to decide what measures they may think necessary relative to them.

(Signed) FREDERICK WILLIAM GREY,
Rear-Admiral, and Commander-in-Chief.

Lieutenant Berkeley, Commanding H.M's. steam-vessel Lynx.

This document has a very important bearing on the case, and we leave it to the consideration of our readers.

MILITARY DEFENCE OF LONDON.

A lecture was delivered yesterday afternoon by Colonel Shafto Adair at the United Service Institution, Pall Mall, upon the subject of the defences of London. There was an unusually large attendance of visitors and members of the military profession, and of both Houses of Parliament. The gallant Colonel commenced by pointing out that even if Dover, Portsmouth, and Plymouth were strongly fortified, it might still be possible for an invading force to effect a landing on our coasts upon points east and west of Portsmouth. The march thence to London afforded facilities for tactical warfare scarcely to be equalled in any other country. Assuming, then, that an enemy had landed, and after one or more engagements was in sufficient force to present himself before the metropolis, he proceeded to describe the plan which he would recommend for the defence of the capital. The topographical character of London is admirably formed for resisting the progress of an enemy. There are the hills of Highgate and Hampstead on the north, Shooter's Hill on the south, and the east is covered by the marshes of the River Lea. It would be upon the south that the great attempt would probably be made by the enemy. Commencing at Barking he proposed to construct there a fort, another at Stratford, a third at Leighton, and a fourth at Stamford. These he would arm with thirty and twenty-five guns. His great object would be to prevent London being exposed to the scourge of the vertical fire of the invading forces, and which they would be certain to employ in order to terrify and alarm the inhabitants. One great difficulty against which our military would have to contend would be the "non-confidence" of the unarmed portion of the inhabitants; but with our admirable powers of organisation, and extensive system of railways, those persons could be rapidly removed to a distance from the scene of conflict. If the forts were advanced at the distances, the enemy would be removed to such a distance as to render the vertical fire harmless to the inhabitants. Proceeding to encircle the metropolis, he recommended another fort and redoubts at Hornsey, to protect the reservoirs of water for the supply of London, communicating with others upon the natural glacis formed by the Highgate and Hampstead Hill, with a smaller one in advance upon Child's Hill. Descending from the slopes of Hampstead to the Edgeware Road, he would plant a fort at Willesden, where was another reservoir of water; one at Whembley, and one upon a commanding eminence known in the neighbourhood as Horsenton Wood. This he would arm with eighty guns, as it would be, to a certain extent, the key of the position, and it would "observe" as far as Brentford Bridge. The country in this part is traversed by the Brent and the Grand Junction Canal, and could be easily inundated. At Greenford he proposed a fort of 60 guns, to be supported by various batteries of 10 guns. The bridge head of Brentford, Richmond and Kingston, would be commanded by forts, and a large one to be erected in Richmond Park. Passing to the southern division, here commended forts at Wimbledon and Tooting, to be in communication with each other by a chain of earthworks across the plain, and the waters of the river Wandle could be applied for inundation. A fort would be required near the Beulah Spa, with an advanced work in the front of the Crystal Palace, and one about a mile and a half distant, in the plain of Kent, at a spot called Rushey Common; and, finally, he proposed a fort at Blackheath. With Shooter's Hill he had not dealt in any way, having left that to be treated of by more experienced engineers. It would require 870 guns to arm all these works, and seven men would be sufficient to man each gun. With respect to the trace of the forts, he should prefer the "polygonal" for the larger ones, and the old bastion system might be applied to the smaller works. An infantry force would be required to fill up the intervals between the forts and the redoubts, and this ought to be made up as far as possible of the local forces and Volunteers. Every Volunteer division or brigade should have its alarm point at which it was to muster as early as possible, and be prepared to move to the points indicated. Fire brigades should be attached to each corps or brigade, to be available for extinguishing conflagrations arising from the fire of the enemy; and it would be a useful addition, if to each company there were attached small bodies of artificers and skilled artizans. Even if London were invested by an enemy, there need be no cause of discouragement or alarm. Napoleon succeeded in relieving the open and unfortified city of Dresden, though overmatched in every respect, and with St. Cyr he held out with 136,000 against the allied army of 170,000, and 500 guns, and with a front of battle extending over six and a quarter miles. The zone of railways which now encompassed London from the East to North Woolwich the gallant colonel proposed to divide into artillery districts, with stations at North Woolwich, Stratford, the West London Junction, thence to the banks of the Thames, Clapham, Norwood and Woolwich, with moveable guns to traverse the lines of the railways. The utmost reliance could, he was convinced, be placed upon the Volunteer forces of the country, the zeal of the population, and our great powers of organisation; and he expressed his confident opinion that the greatest military reputation might be staked upon the successful military defence of the metropolis, provided only that we recognise the possibility of invasion and were wise in time.

Sir John Burgoyne, who occupied the chair, proposed a vote of thanks to the gallant Colonel for the very able exposition he had given upon a very intricate and interesting subject.

Sir C. Pasley wished to observe that when he first obtained his commission in the Engineers, it was at the time England was threatened by the French. He had devoted a great deal of attention to the subject of fortifying London. Napoleon had no chance of succeeding against us, and he directed his arms against Germany and Russia. His (Sir C. Pasley's) opinion was, that the best way to protect London would be that which had always been found to succeed the best, viz., to attack the enemy, and not wait for him. He had seen with great pleasure the review of the Volunteers in Hyde Park, and was firmly of opinion that as they now stand they are capable of beating, if properly led, an equal number of any of the finest troops in Europe.

HOUSE OF COMMONS.—FRIDAY.

LIEUTENANTS IN THE NAVY.

Mr. Dunn asked the Secretary to the Admiralty whether the Lords Commissioners have any intention of ameliorating the present position of the Senior Lieutenants of the navy, either by promotion or increase of pay; and whether their lordships have considered the effect of the present system of promoting Flag Lieutenants to the rank of Commander on the termination of an admiral's command?

Lord Clarence Paget said that if the scheme which he had laid before the house were carried out, the position of the gallant body of officers referred to by the hon. member would be improved, both as regarded increase of half-pay and promotion. With respect to flag lieutenants, he begged to state that the Board of Admiralty had recently issued an order directing that in future whenever a flag officer may be permitted to nominate an officer for promotion, it is to be understood that a lieutenant when so nominated must have completed at least five years' service in that rank at the date at which the flag officer may be ordered to strike his flag, of which five years not less than three years shall have been served in a sea-going ship.

THE CASE OF DR. GUYDIR.

Colonel Greville asked the Judge Advocate whether it was true that Dr. Guydir, Assistant-Surgeon, Royal Longford Rifles, who was tried by a General Court-Martial on the 1st and 2nd days of June last, was placed in arrest on the 10th day of May last, and still remains under arrest, and debarred from practising his profession, in consequence of the finding of the Court not having yet been promulgated by the authorities; and whether it is true that six field officers and seven captains of disembodied regiments of militia are still kept under daily pay and allowances awaiting the promulgation of the sentence upon Dr. Guydir?

Mr. Headlam said that in accordance with the rules of the service Dr. Guydir was arrested on the 10th of May, and it was true that owing to some delay he was not brought to trial by court-martial until the beginning of June. Subsequently it was his duty to have two interviews with Her Majesty relative to the finding of the court-martial, and afterwards the case was submitted to the consideration of the Commander-in-Chief. These circumstances of course led to some further delay; but he was happy to inform the hon. member that Dr. Guydir would now be released. With regard to the latter part of the hon. member's inquiry, he could only give it a general denial.

KNAPSACKS.

Colonel Dunne, adverting to a paragraph which had appeared in the *Times*, asked whether the knapsacks forwarded to our troops in China by the ship Clavering were fit for immediate service.—Mr. Sidney Herbert explained that the knapsacks in question were not of the last pattern, but were perfectly good and fit for use. The question as to what was the best knapsack, had never been solved, and never would in the time of the youngest man now living. Every regiment had a different opinion on the subject. The last pattern knapsack had a stick, but the Guards did not like it; they preferred the old pattern with a sling. Although the knapsacks sent to China were of the best material, they were not of the last pattern; and in that respect the officer who issued them was blamable, although he was actuated by no bad motive. He (Mr. Herbert) had recorded his opinion that in future no knapsacks or accoutrements should be issued except of the last pattern and first class.

IRISH VOLUNTEERS.

Mr. Brady complained of the determination of the Government not to permit the enrolment of Irish Volunteers. This determination was looked on as an imputation upon the loyalty of the Irish people, and it was the more extraordinary, as the noble Lord at the head of the Government was an Irishman, and was the first Volunteer entered in the London Irish brigade.

Lord Palmerston said that the Government did not think it expedient in the present state of things to adopt measures for organising a Volunteer force in Ireland. This resolution was not founded on any doubt of their loyalty. Feelings of animosity prevailed in that country which might lead to evil consequences if arms were placed in their hands. If national danger threatened, those feelings would disappear, and the population would unite as one man in defence of the empire.

Colonel French gave notice that on the 17th inst. he would move for leave to bring in a bill to extend to Ireland all laws and regulations applicable to volunteers in England.

ARMY ORGANISATION.

The subject of Army organisation has latterly attracted so much attention, that it is not surprising to feel the first few heavy drops of a smart shower of pamphlets falling upon us. It is a subject upon which most people have an opinion or two, more or less valuable, and which they seek to give publicity to in print with various degrees of ability. Nor is this to be deplored; the question is a very broad one, and it is only by its thorough "ventilation" that we can expect to arrive at anything like a proper comprehension of it.

Of course, we must expect to be invited to discuss a good many very crude notions, and to have a vast number of utterly impracticable crotchets submitted to our notice; but it is hardly possible that the multitude of our counsellors should be wholly devoid of wisdom, or that from this mass of tares and wheat we should be unable to glean a few blades of corn worthy of being stored away in our garners. But some skill will be necessary for this operation, and it is only by attentively considering the subject in all its bearings that we can hope to effect it successfully.

Let us take up a few favourable specimens, and see what results this system of broadcast sowing is likely to produce.

We have now before us three pamphlets, all treating of Army Organisation, and all anonymous, though the curious in such matters need not, we apprehend, have any very great difficulty in discovering the authors of at least two of them. It is not, however, with the authors that we have to do at present, but with the matter of the pamphlets themselves, and the manner in which the highly interesting subject, which they profess to discuss, is treated. They afford pretty good examples of the variety of *suggestions and opinions* which are likely to be advanced in the course of this discussion; on no two very important points do they disagree, but, on the other hand, they are as remarkable for never touching upon the same portions of the question. Each author looks at the subject through his own coloured spectacles, and sees it in a light with which he is perfectly satisfied, not in the least objecting to the glasses of his *confrères*.

A slight outline of these three pamphlets may perhaps assist to elucidate our meaning.

The first, "Note on the Re-organisation of the British Army,"* is written with the object of endeavouring "indirectly to urge attention to what is at present most defective in the executive powers and administrative efficiency of the British Army" (p. 4); and, with this view, the author, after discussing the difficulties of organisation, and those which beset the path of every administrator, proceeds to suggest the introduction of one uniform system, and the establishment of a military board. This board he proposes to constitute as follows: the Secretary of State for War, who is to be surrounded "by the best men obtainable as executive and administrative officers," viz., "1st. The Commander-in-Chief, representing the executive. 2nd. An able and experienced civil officer—the administrative. He should be a man of practical experience with troops in the field, and versed in finance and the science of administration. 3rd. A medical officer" (p. 8).

These he again assists by other officers, "each being responsible for his own arm of the Service."

For the executive staff he allows eight officers, all of them having seats at the Board, and comprising the adjutant and quartermaster-generals, officers representing each arm of the Service; an officer charged with the superintendence of the topographical and other scientific departments, and an officer charged with the manufacture of cannon, stores, and *munitions de guerre* of every possible description.

He also adds an extra executive staff, without seats at the Board, and consisting of the President of the Council of Education, the Military Chaplain, and an officer to superintend the recruiting, militia, volunteers, &c.

The "able and experienced officer above-named, who is to represent the civil element," our author proposes to assist by a commissariat officer, "with the control of all Army receipts and expenditure for effective or non-effective services," and a military storekeeper; while the director-general of the medical staff is to be accompanied by the purveyor.

Such is the scheme which our author proposes,

* *Note on the Re-organisation of the British Army, including Finance, Administration, and Legislation.* (London, 1860.)

Digitized by Google

assigning as he goes on the duties to each of its component members. The only remarkable change which he proposes in the division of labour is the giving to the commissariat, in addition to their present work, the superintendence of barracks, clothing, and finance; the first, with the view of consolidating the departments of the Army; the second in order that the clothing, as in France, may be "entrusted to administrators of a *specialité*;" the third, to insure uniformity, and to restore the commissariat officers to the positions of high trust which they occupied so worthily previous to the transfer of the commissariat from the Treasury to the War-Office. The working of this system is then explained, together with its advantages, also "the manner in which a competent and practical executive and administrative staff might, in case of a war, be transplanted from the War-Office to the Camp in perfect working order."

The second part of the pamphlet, with which we are not so immediately concerned, refers to "Army Legislation," and every officer will be prepared to second the author in his proposition for "a revision of all warrants, standing orders of the Army, and general or local regulations," which an accumulation of orders, frequently contradictory, has rendered very desirable.

Such are briefly the views of the author of this "Note on the Re-organisation of the British Army," upon the merits of which, however great, we do not wish to expatiate at present, but pass on at once to No. 2, and see what kind of glasses the "officer of high rank," who has devised this "Scheme for the Re-organisation, Recruiting, and Instruction of the Army,"* puts on when he wishes to examine the subject. They are rather dim, we fear, and want wiping sadly. One sees very little through them, and that little not very distinctly.

The chief points on which he dwells are the liability of the nation to attack; the defects of army organisation, both in numerical amount and distribution, and the great improvements which might be effected in the distribution, recruiting, and instruction of the army; important enough subjects, we admit, to arrest attention, but unfortunately the "officer of high rank" tells us so very little we did not know before, that we confess to a feeling of disappointment as we lay down the pamphlet.

The author objects strongly to the depôt system, as interfering "with the efficiency of the volunteer regular army;" he considers that every regiment at home should be raised as soon as possible to 1400 rank and file, "and on reaching that strength should be divided into two battalions, and the system of the two battalions gradually carried into effect as a permanent organisation." He proposes that the practice of giving bounties to recruits be discontinued, and that instead "voluntary enlistment for ten years be continued, under a stipulated condition that every soldier, after serving with good conduct for that period, should be entitled to an annuity or pension, calculated on one shilling per diem, and also a gratuity, with the option of continuing his service for seven years more, and all bounties and other pensions to be discontinued" (p. 6). Finally, our author suggests that all officers on obtaining their first commissions be ordered to join their home or reserve battalions at once, and there be subjected to a regular course of practical instruction in their professional duties, under masters attached to each corps for the purpose.

These are the more important of the suggestions which the "officer of high rank" has to make; it will be seen that they are not remarkable for their originality, although, with most of them, particularly regarding the abolition of the bounty system, we heartily agree, at least in principle.

We now come to some "Suggestions for the Organisation of the British Land and Sea Forces" (3)†, the author of which so far agrees with the writers of the other pamphlets we have noticed, as to dwell upon the necessity of improving our army organisation; having done which, he parts company, and sails away on his own peculiar tack, and treats the subject after his own manner.

He recommends an increase to our Artillery, Engineers, and Cavalry, in which he considers that we are deficient as compared with the French proportions; and he further suggests the division of our forces into seven army corps, three of which he considers should be devoted exclusively to the defence of Great Britain.

Each army corps is to consist of 3000 cavalry, 18,120 infantry, 3302 artillery, 600 engineers, 400 military train, and 200 hospital corps, giving a total of 25,622; which, multiplied by seven, brings our army up to 179,354 regimental effectives, to which he makes a further addition of 7968 siege artillery-men, and 4800 engineers for the defence of fortresses at home and abroad, and 29,301 men in the depôts, thus bringing his total up to 221,423. It will be seen that these numbers fall short of those actually voted by 6308 men; a startling proposition at first sight, but which we become somewhat reconciled to on being told that this will make a greater number of men actually available, owing to the Army being relieved from the defence of maritime fortresses, that duty being allotted, according to our author's scheme, to marine infantry and artillery.

The Guards, as they at present exist, our author would abolish, replacing them by a Guards' army corps, "complete in all branches, and composed of men who have served a full term, of which a considerable portion would have been on actual service abroad." These men are to receive increased pay; and the total saving which it is calculated this scheme would effect is 1,637,769*l*. We have now read our three pamphlets, and looked at the subject of army organisation from three very different points of view. *Cui bono?* we may be tempted to exclaim. What have we learned? For our own parts, we consider that the time spent in their perusal has been far from wasted; apart from the practical value of several of the propositions which we here find brought forward, —and some of them deserve to be weighed carefully and dispassionately,—we may at least learn this, that the question of army organisation is so much broader and more difficult a one than is commonly imagined, that we should control our impatience and dissatisfaction if all the improvements which we may consider needful are not effected as rapidly and simultaneously as we may wish, nor be surprised that those on whom the duty devolves of maturing the great military changes, which cannot be much longer delayed, think long and anxiously before deciding on a system of reorganisation involving so many points of detail, and affecting so many interests.

CAMP LIFE.*

Captain Wraxall need hardly have been so nervous about his little book being swamped in the great ocean of literature, as, judging from his preface, he appears to have been. When a cork floats up against the side of a three-decker, the result is not generally very serious to either; and "Camp Life" has a buoyancy and lightness about it which would secure it from injury or permanent submersion, even among the heaviest craft or in the most troubled waters.

We have done the heavy part of the Crimean business long ago. Our great three-deckers, in the shape of those bulky blue-books and those terrible commissions, have sailed or sunk out of sight, their course marked, it is true, at times by a nasty cross-swell, which surges up now and again, but which we hope soon to see settle down altogether, and leave the waters clear; and, with the exception perhaps of such of us as wear the little blue and yellow riband, or those whose thoughts wander at times through blinding mists of tears back to the dreary plateau before Sebastopol, and the little hallowed spot on "Cathcart's Hill," we seldom talk much now of those rugged, shot-paved ravines, or trouble ourselves to revisit that "Valley of Death," which we once all knew so well. If these passages of the story, then, have somewhat lost their interest, it is not surprising that the Turkish Contingent, too, has become a thing of the past, and that it is fading into an oblivion, from which not even the bickerings of a Skene and a Beatson can rescue it. But, be this as it may, we are never sorry to have an hour's chat with such an agreeable, good-humoured companion as Captain Wraxall; to recall our Crimean and Constantinople experiences so pleasantly; and to laugh with him over those innumerable *contretemps* and disagreeables inseparable from life among the "Bono Johnnies."

Those readers who take up this little volume in this spirit will not be disappointed; and, in this lazy summer weather, we might do many worse things than take a cruise across the Mediterranean and Black Sea to Kertch; pay a flying visit to the glorious Bosphorus; and be rowed about the Golden Horn, and down to the "Sweet Waters" in a caïque, with Captain Lascelles Wraxall lolling in the stern, and making us laugh, as he rolls literary cigarettes—not too full-flavoured—for our own mutual smoking. He will tell us all sorts of capital anecdotes about the Turks, and the Turkish Contingent, in which he held a commission; about Ibrahim, his Bimbashi; about his "picturesque ruffian" of a servant, Machmet, "who was a first-rate cook, and never got drunk before six;" about Captain Rufus Spinks of the "Star-Spangled Banner;" about "Jean Taureau," the French Hercules, and Captain Martinitz, the supposed Russian spy; he will act as dragoman for you in Constantinople, and sympathise with you when you are fleeced at the Hôtel de l'Europe, and with your sufferings as you toil over the red-hot, rugged stones of Top-Khanèh Hill; and eventually, after a glimpse of the Danube, and some "chaff" with an Austrian douanier, he will land you safely in England, with not very exalted opinions either of the Turks, the *entente cordiale*, or Lord Panmure.

We have a general sensation, however, of having had a by no means disagreeable tour, with a very agreeable companion, who, if he has not shown us much that is new, has at least beguiled the time so pleasantly that we are inclined to overlook some sufficiently apparent defects of style, and forgive him occasional flippancies (as when, at page 103, he talks of a "swell coffin"), which set our teeth on edge terribly, and are very far from improving this otherwise very readable little book.

OUR HOME DEFENCES.*

The object of this little pamphlet is to urge upon the people of England the necessity for providing adequate fortifications for the defence of the metropolis; it is, therefore, almost superfluous to state that it meets with our hearty approbation. The remarks which we have considered it our duty to make since the appearance of the report of the Defence Commissioners, sufficiently indicate our own opinions on the subject; and these opinions we believe to be shared by the majority of Englishmen. There are some, however, who differ with us upon this highly interesting and important question, and such we would recommend to devote half-an-hour to an unbiassed perusal of this very honest and temperate little *brochure;* we can promise them that if they do not become converts to the author's way of thinking, they, at least, are not likely ever to regard the time so spent as wasted.

The author of "Our Home Defences" heartily approves of the proposition of the Commissioners to establish an inland arsenal; but he rather goes beyound them in proposing that Woolwich should be dismantled and stripped "as much as possible of that which renders it the most tempting bait in the world to an invader—its vast magazine of all the munitions of war, the only considerable magazine of the sort in the country" (p. 21).

But although our author, as will thus be seen, is one of those who wish by reducing the value of the more tangible portion of the prize, proportionally to diminish the temptation; and glad as he would be to see the burglar put back his files and pick-locks into his pocket, and turn away with a sigh of "*Le jeu ne vaut pas la chandelle,*" he does not overlook the fact that, with some people, the propensity for thieving is so powerful as to outweigh all other considerations; and it will therefore be as well, he considers, to have doors which we can lock, and bars and bolts which we can make some use of to resist an intrusion which, as Lord Overstone truly said, "must never be."

Accordingly, our author, after briefly recapitulating the various arguments in favour of rendering London secure from attack, with which, by this time, our readers will be pretty well acquainted; and after alluding more especially to those portions of the evidence of Lord Overstone and Sir John Burgoyne before the Defence Commissioners, which justify the view which, in common with ourselves, he takes of the subject, he proceeds to urge the adoption of some such plan of defence as that proposed by Lieut.-General Shaw Kennedy, C.B., in his "Notes on the Defences of Great Britain and Ireland;" with which gallant officer's opinion he tells us his own pretty nearly coincides.

It will hardly be necessary to remind our readers that the leading feature in General Kennedy's scheme was his proposition to surround London, Woolwich, Greenwich, and Deptford with a chain of strong forts, thirty-nine in number; and, excepting in numerical and local details, this suggestion differed little from that since enunciated by the author of "London the Stronghold of England," in a recent number of the *Cornhill Magazine*.

The principle our author recommends to us is the same as that adopted by the Great Duke with such singular success at those celebrated lines before Lisbon; and, quoting from Sir J. H. Jones's "Memoranda Relative to the Lines of Torres Vêdras," he shows that not only on principle do the two plans of defence resemble each other, but at several essential points the positions happen to coincide.

Some such measures as those referred to, and recommended in this little pamphlet we consider to be necessary to the security of our capital; and we believe, as our author observes, they are calculated to ensure "a successful result to our defensive operations," should our first and great line of defence held by our fleets fail us for a moment.

Captain W. D. Malton has already prepared some of the very best manuals for Volunteer Corps. He possesses a power of lucid arrangement which is exceedingly valuable in military essays. In a little pamphlet of some twenty odd pages, called "Company Manœuvres, or Suggestions for Company Drill," published by W. Clowes and Son, 14, Charing Cross, Captain Malton has given a fresh proof of his ability and professional acquirements, which is not the less worthy of notice because he freely acknowledges his obligations to Colonel Lysons. We recommend with great confidence to the officers of Volunteer Corps and to Drill Instructors the exceedingly useful little manual.

About two years since it is said, Louis Napoleon, in the course of conversation with a member of the then existing English Government, said, "As long as I live, I will endeavour to avert a war between the two countries; but, as the sovereign of France, I have a duty to perform, and while I have the power I will place the French Navy in a position befitting the empire, for I will not give my successors any reason for saying, should they have to conduct a war with you, that I had not properly used all the resources at my command. Now," added he, "I intend to have 50 line-of-battle ships, none of your middling sort, but vessels with a propelling power averaging from 800 to 1000 horses; and, as you have to depend more upon your Navy than I have, and have such an extended colonial dominion to protect, I would recommend you to build 100."

NAVAL UNIFORMS.

Admiralty, 3rd July, 1860.

The following is the description of the uniforms which, in pursuance of Her Majesty's pleasure, are in future to be worn by the officers, seamen, and boys of the Royal Navy, viz. :—

ADMIRAL OF THE FLEET.

Dress Uniform. *Coat.*—Blue cloth, double breasted, ten buttons in each row, three inches apart across the breast; white collar sloped off in front, one and three-quarters inch gold lace of the navy pattern along the top and front edges, and one inch lace along the bottom edge, coming partly on the coat; blue cuffs, with one and three-quarters inch lace round the top; white slash pointed flaps in the sleeve with three small buttons, and one inch lace round the outside edge; four rows of five-eighths of an inch distinction lace round the sleeve above the cuff, at such distance from each other as place them within the length of the slash, *the upper row to form a circle, two inches in diameter, in the centre of the top sleeve, of* all *the coats of Officers of the Military Branch;* pointed blue flaps on the skirt, laced all round with one and three-quarters inch lace, and three buttons under them; a row of one inch lace to encircle the hip buttons and form a point above them on the seam; and bottom of lappel and front and back edges of the skirt to be laced with the same; the skirts to begin at one-fifth the circumference from the front edge, and to be lined with white kerseymere; one button at the bottom of each plait. *Buttons.*—Raised, gilt, and one inch in diameter, indented with a round rim, and within, an anchor and a cable, and a crown over between two wreaths of laurel; the small buttons to be half an inch in diameter. *Epaulettes.*—Two gold epaulettes with embroidered straps, oak leaf and acorn pattern, with pearl crescent and edging, three stars within the crescent and one star on the strap, above it crossed batons surmounted by a crown; a double row of dead and bright loose bullions three inches long, and one inch and a quarter in circumference. N.B.—The devices on all the Executive Officers' epaulettes to be embroidered in silver according to patterns, except batons and swords, which are to be solid. *Trowsers.*—Blue cloth, with one-and-three-quarters inch gold lace down the outside seam, to be worn over boots, between the 1st October and the 30th April; and white duck, over boots, between the 1st May and 30th September. *Cravat or Stock.*—Black silk. *Hat.*—Cocked; the flaps eight and a half inches in the back, seven and a half inches in the front, five and three-quarter inches at each corner, bound with gold lace two inches wide, showing one inch on each side. Black silk cockade, five inches wide, looped with six gold dead and bright bullions, three and a-half eights of an inch wide, the two centre twisted, with a button of the same size and pattern as that on the coat; and tassels with five gold and five blue bullions each. *Sword.*—The hilt solid, half basket guard, with raised bars, and crown and anchor badge, lion-head back piece, white fish skin gripe, bound with three gilt wires; outside length, five inches and three-quarters; inside length, four inches and a-half. The blade slightly curved, thirty-one inches and a-quarter long, and one inch and three-eighths wide at the shoulder, with a flat back and the blade ground hollow to within eleven inches of the end, with a double-edged spear point. *Scabbard.*—The top and middle lockets to be four and three inches and a-half long respectively; to have loops and rings, and to be ornamented with embossed oak leaves in bas-relief; the chape to be seven inches and a-half long, and to have oak leaves, as above, round the upper part, and a honeysuckle ornament at the end. *Sword Knot.*—Blue and gold rope, twenty three inches long, with ditto ditto vellum basket-work head, and twelve gold bullions; a piece of the same sort of cord, fourteen inches and three-quarters long, is to be fixed to the hilt, to which the knot is attached. *Sword Belt.*—Blue morocco leather, lined, full one inch and a-half wide in the girdle; single, one inch wide, sword slings on carriages; the whole embroidered in gold, with oak leaves and acorns down the middle, and margined with a straight line near each edge. Gilt mounting with circular clasp in front, two inches diameter, laurel embossed edges, crown anchor, and laurel on the centre; embossed carriage buckles, plain girdle buckles, and rings, the latter one inch and three-quarters diameter in the centre; a plain, strong gilt hook attached to the ring to suspend the sword short.

Undress Uniform.—*Coat*—Blue cloth, double breasted, eight buttons in each row, with padded turn-down collar; pointed flaps with three notched holes, and buttons under; round cuffs, with three buttons, the sleeves laced the same as the full dress coat, omitting the slash. *Buttons.*—The same. *Epaulettes.*—The same as in dress. *Waistcoats.*—White or blue cloth or kerseymere, single breasted, with small buttons. *Trowsers.*—Blue cloth, with or without gold lace on the seams; in warm climates or on the home station in summer, Officers may wear white duck. *Cravat or Stock.*—Black silk. *Hat.*—The same, or without lace. *Sword.*—The same. *Scabbard.*—The same. *Sword Knot.*—The same. *Sword Belt.*—Black morocco leather, of the same width as in full dress, but without embroidery, with round slings; the mountings and edges to be the same as in dress.

ADMIRAL.

Dress Uniform.—The same uniform and appointments as Admiral of the Fleet, except that there are to be three rows only of distinction lace on the sleeves; and the *Epaulettes*—are to have lace straps, with three stars within the crescent, above them crossed sword and baton, surmounted by a crown.

Undress Uniform.—The same as Admiral of the Fleet, except that the *Coat*—is to have three rows only of distinction lace on the sleeves. *Epaulettes.*—The same as in dress.

VICE-ADMIRAL.

Dress Uniform.—The same uniform and appointments as an Admiral, except that the *Coat*—is to have two rows only of distinction lace on the sleeves; and *Epaulettes*—two stars only within the crescent, under the crossed baton and sword.

Undress Uniform.—The same as an Admiral, except that the *Coat*—is to have two rows only of distinction lace on the sleeves. *Epaulettes.*—The same as in dress.

REAR-ADMIRAL.

Dress Uniform.—The same uniform and appointments as an Admiral, except that the *Coat*—is to have one row only of distinction lace on the sleeves; and *Epaulettes*—one star, of a larger size, within the crescent, under the crossed baton and sword.

Undress Uniform.—The same as an Admiral, except that the *Coat*—is to have one row of distinction lace on the sleeves. *Epaulettes.*—The same as in dress.

COMMODORES OF THE FIRST CLASS, AND CAPTAINS OF THE FLEET WHEN NOT FLAG OFFICERS.

Dress Uniform.—The same as a Rear-Admiral, with the following exception: *Epaulettes.*—The same pattern as the Admirals, but the bullions to be bright, with an anchor and chain cable within the crescent, above it a star, surmounted by a crown.

Undress Uniform.—The same as a Rear-Admiral, except that the epaulettes are to be the same as in dress.

COMMODORES OF THE SECOND CLASS.

Dress Uniform.—The same as Commodores of the First Class, with the following exceptions: *Coat.*—The one and three-quarters inch lace on the cuffs, the lace on the bottom edge of lappel and on front and back edges of skirt, to be omitted; the lace round top edge of the collar to be one and a half inch wide, and three-quarters of an inch along the bottom; one and a half inch lace round the flaps, and three-quarters of an inch on slash in sleeve; and one inch to encircle the hip buttons. The sleeves to have four rows of half inch distinction lace round them. *Buttons.*—The same as the Admirals, omitting the laurel wreaths. *Trowsers.*—The lace on the outside seam to be one and a half inch wide.

Undress Uniform—The same as Commodores of the First Class, except that the sleeves are to be laced the same as the dress coat, omitting the slash, and to have notched holes to the three buttons on the cuffs. *Buttons.*—The same as in dress.

CAPTAINS AND COMMANDERS.

Dress Uniforms.—The same as Commodores of the Second Class, with the following exceptions: *Coat.*—The sleeves to have three rows of half-inch distinction lace for Captains, and two for Commanders. The lace round hip buttons for Commanders to be omitted. *Epaulettes.*—Captains of three years' standing the same as Commodores. Those under three years' standing to be distinguished by the anchor, surmounted by a crown; and Commanders by the anchor surmounted by a star, and the bullions to be only two inches and three-quarters long, and one inch and one-eighth in circumference. *Hats.*—The same as the Admirals, but bound with black silk instead of gold lace, of the oak-leaf pattern, and looped with four *bright* gold bullions, the two centre twisted. *Scabbards.*—The same as the Admirals, but the chape to be only six inches and-a-half long; both lockets and chapes to be ornamented with fluted threads and scrolls instead of oak-leaves. *Sword-Belts.*—Black morocco leather lined, the same dimensions as the Admirals, embroidered in gold, with three straight lines, one down the middle, and one at each margin near the edge; gilt clasps, with circular fronts, with embossed laurel edges, crown and anchor in the centre; plain carriage and girdle buckles, and plain gilt ring and hook.

Undress Uniform.—The same as Commodores of the Second Class, with the following exceptions:—*Coat.*—To have three rows of distinction lace round the sleeves for Captains, and two rows for Commanders. *Epaulettes.*—The same as in dress. *Hats.*—The same. *Scabbards.*—The same. *Sword Belts.*—The same as the Admirals, omitting the laurel in the centre of the clasp.

LIEUTENANTS.

Dress Uniform.—The same uniform and appointments as Commanders, with the following exceptions: *Coat.*—The lace to be only one inch wide instead of one inch and a half; and half an inch instead of three-quarters of an inch; and the sleeves to have one row of distinction lace round them. *Epaulettes.*—To be the same as Commanders, with the anchor only within the crescent. *Trowsers.*—The lace on the outside seam to be one inch wide. *Hats.*—To be looped with only two bullions, twisted. *Sword Belts.*—To have only two straight lines, one near each edge.

Undress Uniform.—The same as Commanders, with one row of distinction lace round the sleeves. *Epaulettes.*—The same as in dress. *Hats.*—The same. *Sword Belts.*—The same as Commanders.

MASTER OF THE FLEET.

Dress Uniform.—The same uniform and appointments as a Commander, except that the *Epaulettes*—are to have crossed anchors, without cables, within the crescent, surmounted by a gold and silver star on the strap.

Undress Uniform.—The same as a Commander. *Epaulettes.*—The same as in dress.

MASTERS.

Dress Uniform.—The same uniform and appointments as Lieutenants, except that the *Epaulettes*—are to have crossed anchors, without cables, within the crescent.

Undress Uniform.—The same as Lieutenants. *Epaulettes.*—The same as in dress.

MATES.

Dress Uniform.—The same uniform and appointments as Lieutenants, with the following exceptions: *Coats.*—The lace to be only three-quarters of an inch wide, and the sleeves to have one row of quarter-inch braid round them instead of lace. *Trowsers.*—To have no lace on the outside seams. *Epaulettes.*—Instead of epaulettes, two shoulder-straps of the same pattern as Lieutenant's epaulettes, without bullion, with the anchor within the crescent.

Undress Uniform.—*Coats.*—The same as Lieutenants, except to have one row of quarter inch braid round the sleeves instead of lace. *Trowsers.*—Same as in dress. *Shoulder Straps.*—The same as in dress.

SECOND MASTERS.

Dress Uniform.—The same uniform and appointments as Mates, except that the devices on the straps are to be the same as the Masters.

Undress Uniform.—The same as the Mates, except that the devices on the straps are to be the same as the Masters.

MIDSHIPMEN.

Coat.—Blue cloth, single breasted, with nine notched holes on each breast, and three on each cuff and pocket-flap, with buttons to correspond, lined with white serge, stand-up collar, with a white turn-back on each side of the collar, with notched hole and button. *Buttons.*—The same as other officers. *Swords.*—No swords, but a dirk according to pattern. *Dirk Belts.*—The same as the Lieutenant's undress belt, but with frog instead of slings. *Hat.*—The uniform cap only.

MASTER'S ASSISTANT.

The same as Midshipmen, but instead of the white turn-back, a button-hole of blue twist at each end of the collar, with a corresponding button.

NAVAL CADETS.

The same as Midshipmen, but instead of the white turn-back, a button-hole of white twist on the collar, with a corresponding button.

GUNNERS, BOATSWAINS, AND CAPRENTERS.

Coat.—Blue cloth; if lined, to be with serge, *fall*-down collar, blue lappels to button across, and round cuffs; nine buttons on the lappels, and three on each cuff and pocket, with corresponding blue twist button-holes, and three buttons in the folds of the skirts. Plain gilt buttons, with an anchor and cable engraved thereon. *Waistcoat.*—White. *Cravat or Stock.*—Black. *Hat.*—Cap only. *Sword.*—Of the same pattern and length as Commissioned Officers, but the back-piece of the handle is to be plain, with a flute round the top and down the back, with a black fish-skin gripe, bound with three gold wires; the etchings on the blade not blued or gilt. *Sword-Knot.*—Of blue silk, mixed with gold fringe, but no bullion. *Sword-Belt.*—The same as Mate's undress belt.

PETTY OFFICERS, SEAMEN, AND BOYS.

Blue Cloth Jacket.—To be made of navy blue cloth, double-breasted, with stand and fall collar, sleeves sufficiently large to go easily over a duck and serge frock, to reach to the hip, with an opening at the cuffs on the seam, with two small black buttons, one inside breast pocket on the left side, and seven black-horn crown and anchor buttons seven-tenths of an inch in diameter, on each side, according to a pattern. *Blue Cloth Trowsers.*—To be made of Navy blue cloth, of the ordinary naval pattern, fitting tight at the waistband, with two pockets and a broad flap, and stained bone buttons. *Duck or White Drill Frock.*—To be made with collar and wristbands of blue jean, each having a border of three rows of three sixteenths of an inch white tape, one-eighth of an inch apart, with one white metal dead-eye button at each of the wrists. *Duck Trowsers.*—To be made of white duck, in a similar manner to the blue trowsers, with white metal dead-eye buttons. *Blue Serge Frock.*—To be made of the same material and pattern as that now in use. *Pea Jacket.*—To be of blue flushing, the same as the present pattern and material, with seven buttons on each side, black horn, navy pattern, one and one-third inch in diameter. *Black Silk Handkerchief.*—*Hat.*—To be black or white according to climate. The hat to be four inches high in the crown, three inches wide in the rim, and seven inches across the crown, and made of sennet, covered with brown holland painted black, with a hat ribbon bearing the ship's name; and in warm climates the same hat uncovered. A chin-stay to be attached to the hat. *Cap.*—To be worn at night, and at sea when ordered. The cap to be made round, of No. 1 cloth, and partially stiffened across the crown, similar in shape to that worn by naval officers, without the peak. Diameter across the crown, for men ten inches, for boys nine inches, with a ribbon bearing the ship's name. A chin-stay to be attached to the cap. *Woollen Comforter.*—To be of a dark blue colour. *Badges.*—Petty officers and leading seamen are to wear an embroidered mark of distinction on the upper part of the left sleeve of their jacket, viz.:—Chief Petty Officers—Crown and anchor, encircled with laurel; First Class Petty Officers—Crown and Cross anchor; Second Class Petty Officers—Crown and anchor; Leading Seamen—the anchor. On a blue frock the badge is to be white, and blue on a white frock. Gunnery Instructors and Seamen Gunners are to wear an embroidered mark of distinction on the upper part of the right sleeve of their jackets, viz.: Gunnery Instructors—A gun with rifle and cutlass crossed, and crown over; Seamen Gunners, 1st Class—A gun and crown; Seamen Gunners, 2nd Class—A gun. On the blue frock the badge is to be of red cloth, and blue on the white frock. Badges and buttons of the approved pattern will be supplied to Her Majesty's ships for issue.

CIVIL BRANCHES.

The coats of all ranks to be single breasted, at angles with the skirt; the distinction laces to be carried round the sleeves; the epaulettes to have silver instead of gold edging to the straps quarter-of-an-inch wide, to be continued round inside the crescent, and outside below it; the devices thereon to be embroidered in gold and silver; the loops of cocked hats to be of half-inch gold lace instead of bullion; the tassels to be flat; and the cap, badges, and peaks of caps of those officers entitled to wear them, to be embroidered in gold, as per patterns.

DIRECTOR-GENERAL OF NAVAL HOSPITALS AND FLEETS.

Dress and Undress.—The same uniform and appointments as Rear-Admiral, with the following exceptions: *Coat.*—Nine buttons to be worn on the breast placed by threes. *Epaulettes.*—The sword and baton to be omitted, and instead thereof an additional star on the epaulette strap.

INSPECTORS-GENERAL.

Dress and Undress.—The same uniform and appointments as Commodores of the First Class, with the following exceptions: *Coat.*—Nine buttons to be worn on the breast placed by threes. *Epaulettes.*—To have a crown on the strap, and a star placed within the crescent, omitting the anchor.

DEPUTY-INSPECTORS-GENERAL.

Dress and Undress.—The same uniforms and appointments as Captains, with the following exceptions: *Coat.*—Nine buttons to be worn on the breast placed by threes. *Epaulettes.*—To have a crown on the strap, and a star placed within the crescent, omitting the anchor.

STAFF SURGEONS.

Dress and Undress.—The same uniform and appointments as Captains under three years, with the following exceptions: *Coat.*—Nine buttons to be worn on the breast, placed by threes. *Epaulettes.*—To have a crown only placed within the crescent.

SURGEONS.

Dress and Undress.—The same uniforms and appoint

Digitized by Google

ments as Commanders, with the following exceptions: *Coat.*—Nine buttons to be placed on the breast by threes *Epaulettes.*—To have a star only placed within the crescent.

ASSISTANT-SURGEONS OF SIX YEARS' SERVICE ON FULL PAY.

DRESS AND UNDRESS.—The same uniforms and appointments as Lieutenants, with the following exceptions:—*Coat.*—Nine buttons to be worn on the breast placed by threes. *Epaulettes.*—The anchor to be omitted.

ASSISTANT-SURGEONS.

DRESS AND UNDRESS.— The same uniform and appointments as Mates, with the following exceptions:—*Coat.*—Nine buttons to be worn on the breast placed by threes. *Shoulder Straps.*—Omitting the anchor.

SECRETARIES TO COMMANDER-IN-CHIEF.

DRESS AND UNDRESS UNIFORM.—The same uniform and appointments as Commanders, with the exceptions specified above for the civil branches; and, *Coat.*—Eight buttons on the breast by pairs. *Epaulettes.*—To have an embroidered gold and silver star within the crescent. *Hat.*—To have the loop of half-inch gold lace instead of bullion, and flat tassels.

SECRETARIES TO JUNIOR FLAG OFFICERS.

DRESS UNIFORM.—The same as Secretaries to Commander-in-Chief, with the following exceptions: *Coat.*—The lace to be only one inch wide, instead of one inch and a half, and half an inch, instead of three-quarters of an inch, with one row of distinction lace round sleeves. *Epaulettes.*—The same size as Lieutenants, with silver edging to the straps and crescent as above, but without the devices thereon. *Belt.*—The same as Lieutenants. *Hat.*—The same as Secretaries to Commanders-in-Chief, but with a single loop of gold lace. Secretaries to Flag Officers may wear the uniform of the rank they hold.

UNDRESS UNIFORM.—The same as Secretaries to Commanders-in-Chief, with one row of distinction lace round sleeves. *Epaulettes.*—The same as in dress. *Hat.*—The same. *Belt.*—The same as Lieutenants. Secretaries to Flag Officers may wear the undress uniform of the rank they hold.

PAYMASTERS.

DRESS AND UNDRESS UNIFORM.—The same as Secretaries to Junior Flag Officers.

NAVAL INSTRUCTORS.

Naval Instructors are not required to wear any uniform whatever; but if they do it is to be the following:

DRESS AND UNDRESS UNIFORM.—Unless in Holy Orders, the same as Secretaries to Junior Flag Officers, except that the eight buttons on the breast of the coat are to be placed at equal distances, and without epaulettes, or lace to the trowsers.

ASSISTANT-PAYMASTERS.

DRESS UNIFORM.—The same as Paymasters, with the following exceptions: *Coat.*—The lace to be only three-quarters of an inch wide, and one row of a quarter of an inch gold braid round the sleeves. *Trowsers.*—To have no lace. *Epaulettes.*—Two shoulder straps, the same as Mates, without the device, but with silver edging to the straps and crescents.

UNDRESS UNIFORM.—The same as Paymasters, except one row of quarter of an inch gold braid round sleeves of coats instead of lace. *Epaulettes.*—The same as in dress.

CLERKS.

DRESS AND UNDRESS UNIFORM.—The same as the undress uniform of the Assistant-Paymasters, but without the shoulder strap. *Hat.*—Cap only; no sword.

ASSISTANT-CLERKS.

The undress uniform of Clerks, omitting the gold braid round sleeves of coats.

INSPECTOR OF MACHINERY.

DRESS AND UNDRESS UNIFORM.—The same uniform as Secretaries to Commander-in-Chief, except that the coat is to have eight buttons on the breast placed by fours. *Epaulettes.*—To have a gold anchor within the crescent, surmounted by a gold star.

CHIEF ENGINEERS.

DRESS AND UNDRESS UNIFORM.—The same uniform as Secretaries to Junior Flag-Officers, except that the coats are to have eight buttons on the breast placed by fours.

ASSISTANT-ENGINEERS—FIRST CLASS.

DRESS AND UNDRESS UNIFORMS.—The same as Assistant-Paymasters, except that the coats are to have eight buttons on the breast placed by fours; and to wear the uniform cap instead of the cocked hat. *Swords.*—Of the regulation pattern.

ASSISTANT-ENGINEERS—SECOND CLASS.

DRESS AND UNDRESS UNIFORM.—The undress uniform of Assistant-Engineers of First Class. *Caps.*—Same as First Class; no sword or dirk.

ASSISTANT-ENGINEERS—THIRD CLASS.

DRESS AND UNDRESS UNIFORM.—The same as the Second Class, omitting the gold braid round the sleeves of coats. *Caps.*—The same as the First Class; no sword or dirk.

MEMORANDA.—Full dress is to be worn only on State occasions. The undress coat, with epaulettes, cocked hat, and sword, are to be worn at Courts-Martial. On all special duties, such as Medical Surveys, examination of Candidates &c., as well as upon ordinary occasions of duty, frock coat, with the cap and sword, is to be considered sufficient dress. *Trowsers.*—On all occasions of full dress, officers shall wear white trowsers, over boots, between the 1st May and 30th September, and blue trowsers between the 1st October and the 30th April. *Great Coats.*—The great coats for Officers are to be of blue cloth, double breasted, with the number and arrangement of buttons according to the undress uniform assigned to their respective ranks, omitting the pocket flaps; with padded turn-down collar, and with the rows of lace or braid round the sleeves the same as the undress coats. All Officers, except Midshipmen, Master's Assistants, Clerk's Assistants, Cadets, and Warrant Officers, may wear a blue frock, made according to the directions given above for great coats, with the same distinctions of lace or braid on the sleeves. Admirals and Commodores of the First Class may wear epaulettes with their frock and great coats, and on such occasions the cocked hat and sword must also be worn. *Jackets.*—All officers may wear *on board their ship*, a round jacket, without skirts, with their respective arrangement of buttons and distinction lace, double breasted for the Military Branch, except Midshipmen, Master's Assistants, and Cadets, who are to wear single breasted jackets, the same as the Civil Branch. *Caps*—are to be of blue cloth, the diameter of the top to be eight inches, with a black mohair band one-and-a-half inch wide. Admirals and Commodores of the First Class, and officers of the Civil Branches ranking with them, to have the peak embroidered all round in gold; Commodores of the Second Class, Captains and Commanders, and Officers of the Civil Branches ranking with them, the peak embroiderd on the front edge only; and all other officers a plain peak. The Military Branch to be distinguished by the embroidery on the peak, which is to be of oak leaves, and a device placed in the front of the cap, consisting of a crown embroidered in gold and silver and a silver anchor, surrounded by gold laurel wreaths. The Civil Branches by plain embroidery and the same device embroidered in gold. The peaks of all caps not embroidered to be of patent leather, when embroidered, to be of blue cloth bound with patent leather. *Round Hats.*—Officers, during bad weather when on board their ships, may wear a round black hat, with a narrow black band and buckle, and a black silk or leather cockade, with a loop of gold lace half the width of the broad lace on their dress coats, or, if they have no lace on their coats, of black silk ribbon. Midshipmen, Master's Assistants, and those ranking with them, and Cadets, to have a loop of gold twist. *Belt.*—The sword belt to be worn over the coat. The new regulations may be adopted at once by officers requiring uniforms, and they are to come into full force after 1st January, 1861.

My Lords desire that the Commander-in-Chief and the Captains of Her Majesty's ships will prevent any Officer serving under their command from deviating, in any way whatever, from the foregoing Regulations.

By command of their Lordships,
C. PAGET.

To all Commanders-in-Chief, Captains, and Commanding Officers of Her Majesty's Ships and Vessels.

OFFICIAL NAVY LIST.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I beg to draw your attention to an error in the official Navy List, of equal, if not greater importance, than those you directed attention to in your last impression. At page 104, under the head of Royal Marines, we read, "Chatham, 1st division—Portsmouth, 2nd division, &c. Artillery, 5th division." Thus reversing the order of affairs, and placing the Artillery on the left of the Infantry.—I am, sir, yours, &c.,

OBSERVER.

SOLDIERS' RATIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the ARMY AND NAVY GAZETTE (some time ago) under the head of "Soldiers' Rations," that subject is so handled that the unprofessional reader, or the retired professional one, would feel assured that the soldier is not only the worst fed man, but the most imposed upon in the Queen's dominions. Let me detail the real state of the case. First, as to contracts. They are made six-monthly for bread and meat—a very excellent arrangement, as it enables middle men of the locality where the troops are quartered, to compete. The writer of the article is quite in error when he states "that a gentleman comes down who does nothing else but make contracts;" for in this district alone, the number of tenders for the current period is as follows:—Fuel, 8; Light, 16; Forage, 18; Bread, 18; Meat, 24.

To sneer at the system of analysing the bread, and talk of "wheels within wheels," is to accuse the officers deputed by Government to assure the soldier good food of connivance with fraudulent contractors. The following is the system. The district commissariat officer goes to the store at uncertain periods, and takes one of the loaves then issuing to the troops; he seals it and sends it up to F. Abel, Esq., chemist to the War Department, Woolwich. It is there subjected to chemical and microscopical examination, and I quote from the several reports I have had:—

"No adulteration was found; the loaves being of very fair quality."

"Of fair quality, and free from adulteration."

"Free from adulteration, that from ——— insufficiently baked."

"Free from adulteration, and of fair quality."

"The loaves are made of genuine wheat flour, free from mineral adulteration, and otherwise of fair quality."

"All the samples were free from adulteration of any description, and of excellent quality."

Thus, it must be allowed, if the "bread be highly adulterated, wretchedly baked and prepared," it would be discovered. The article goes on, "where practicable the Government should bake its own bread." Yes, so say I; and kill its own meat too. But when may that be expected, with a Secretary of State for War who refuses to include in his estimate some 1500*l.* or 1600*l.* for the erection of commissariat premises, and yet promises 2000*l.* for a soldiers' institute in this garrison?

Now for meat. The writer of the article says, "not the slightest trouble is taken to see whether the quality is good or bad," and in your issue of the 12th May, "Hic et Ubique" indorses this. Now, neither the one nor the other can be regimental officers, or, if so, they don't do their duty by their men. On the meat being delivered into barracks by the contractor a regimental board is held upon it. It may be argued, what do regimental officers know about meat? Probably, when they first join, as much as they do about drill; but attention to "Rations" may enable an officer to distinguish between lean meat and well-fed meat; between stale meat and sweet; between old bull and four-year old ox and heifer. Besides, has he not his quartermaster's experience; has he not (as I often witness) half-a-dozen men from the ranks (butchers before enlistment) to call in? Shame to any regimental officer who "depends on the judgment of the quartermaster-sergeant." That meat is sometimes brought into barracks not up to the contract is undoubted; that contractors, if they find the inspecting officers ignorant, or worse still, careless, will take advantage of it, I allow. But whether it be the honesty of Kentish contractors, or the strictness of the inspecting officers here, or the system adopted by the commissariat, I don't know, but after 16 years' experience in various parts of the world, I assert that nowhere have I seen such excellent bread and meat as are issued in this district. Meat has been and will be condemned, but, as a rule, I say it is first-rate here.

Now for the groceries. I quite agree with the writer of the article in your issue of the 5th May. For the soldiers' sake they should be issued through the commissariat. He will gain in quality and economy. Ask any non-commissioned officer or private, and he'll say, "No, let us buy our own," *i.e.*, let us get our quid and tot into the bargain! Where would he get the following unadulterated for 1½*d.*, ¼ lb. bread, 1⅜ oz. sugar, ½ oz. coffee, ⅛ oz. tea, 1 oz. salt, ⅛ oz. pepper. ✻ The arrangement answers well at Aldershot and the Curragh: why should it not forthwith be introduced into our large garrisons?

I enclose two forms of our contracts that you may see the system we are working on; and I conclude for the present with the assurance that I am, sir, &c.,

ONE WHO KNOWS.

SAILORS' HOME AND DESTITUTE SAILORS' ASYLUM.—The Monthly Meeting of the Directors of the above Institutions was held on Thursday last in the Museum of the Sailors' Home, Well Street, London Docks. Present—Admiral W. Bowles, C.B., President, in the chair; Vice-Admiral Harcourt; Captain Hon. Francis Maude, R.N.; Captain C. J. Bosanquet, R.N.; Captain A. Chapman, H.C.S.; Wm. Gaussen, Esq.; Montague Gore, Esq. The Secretary presented the accounts, by which it appeared that, during the last two months, the average number of boarders at the Home has been 241, while, since the opening of the Institution in 1835, 114,295 seamen have been received as boarders. The amount of money remitted by sailors to their friends in the country, during May and June, has been 482*5l.* 16*s.* 9*d.*, and the amount deposited in the Board of Trade Savings' Bank, 605*l.* 6*s.* It was also shown, that during the first six months of the present year, 154 seamen had been enrolled at the Sailors' Home for the Royal Naval Reserve Volunteer Force; and, in obedience to an order of the House of Commons, a return has been made, by which it appeared that the Sailors' Home had been erected entirely by private contributions, without any assistance by royal or parliamentary grants. With reference to the Destitute Sailors' Asylum, the return stated that the institution was also built, and had been sustained solely by private contributions; and since its opening in 1827, it has afforded shelter, food, and clothing to 39,234 distressed seamen of all nations, 86 of whom have been thus relieved during the last two months.

SYRIA.—The news which has just been received from Syria is of a very serious character, so much so as to render intervention on our part inevitable. Yesterday a despatch was received dated Beyrout, June 23rd, which says, "Affairs in this province are looking blacker and blacker. Yesterday we had the fearful news of the village of Dheis-el-Kamar being sacked, burnt, and every Christian male, to the number of two thousand and more, being put to the sword by the Druses, who a fortnight before had disarmed them, in cold blood. The women and children were allowed to escape and reached the mouth of the Damoor river, half way between this and Sidon, yesterday, whence they were brought up last night and this morning, to the number of 1100, by H.B.M. ships Gannet and Mohawk. Of the men of Dheis-el-Kamar, not more than thirty have escaped. The town is all burnt. The refugees say that the Turkish soldiers sided with the Druses, helping them to butcher the people, and that they, the Sultan's troops, were the only people who insulted the women, of whom not a few met with the worst treatment by them. Beyrout itself is in a panic to-day."

PERSIAN GULF.—A private letter from Kurrachee informs us (*Bombay Times*) that there is "a row in the Persian Gulf." It is rumoured that the governor of the island of Bahrein, famous, as our readers know, for its pearl fishery, has thrown off his allegiance to the Imaum of Muscat and hoisted the Persian flag, simultaneously dismissing every English agent from the island. Captain Jones is said to have visited the island in the Semiramis, with the view of reasoning the governor into submission, but without effect. The Tigris was thereupon dispatched from Bassadore to Kurrachee, and Captain Jones has gone on to Muscat. From the shape in which this rumour reaches us we can in no way vouch for its accuracy.

Mr. Eastman, whose name appears in our obituary, entered the navy in the year 1826, and served in the flag ships Spartiate, St. Vincent, Asia, and Vernon, under Lord Amelius Beauclerk, G.C.B., Sir Thomas Foley, G.C.B., Admiral Sir William Parker, Bart., G.C.B., and Rear-Admiral Samuel Hood Inglefield C.B., and five years in the Excellent gunnery instruction ship, Portsmouth. In 1851, Mr. Eastman began to prepare gentlemen for examination for naval cadetships with much success. He died almost suddenly of disease of the heart, on Sunday the 1st instant, at his residence.

We learn from Paris that the manœuvres which will take place this year at the camp at Châlons are principally intended to decide upon the expediency of transforming all the heavy cavalry of the French army into light cavalry. The Emperor, after the last campaign in Italy, entertained the idea of effecting this transformation, which was, however, opposed by Marshal Randon, the War Minister. To arrive at a decision, it has therefore been resolved to try the experiment at the camp of Châlons, and on his return from the baths of Aix-la-Chapelle, Marshal Randon will accompany the Emperor to the camp for this purpose.

On the 5th of June last the Pekin was to leave Point de Galle for China, having on board the two ambassadors and their suites. Up to that date the missing mails had not been recovered, and only 100 packets of bullion, together with Her Majesty's autograph letter to the Emperor of China, Lord Elgin's credentials and instructions, and his orders of the Thistle and the Bath. Baron Gros, also, has recovered, not, indeed, the autograph letter of the Emperor, but a blank sheet of paper on which the letter had been written. The luggage that was recovered might as well have been left at the bottom of the sea, so ruined was it by the sea water, &c.

INTELLIGENCE FROM THE SEAT OF WAR IN SICILY.

[From our Own Correspondent.]

Palermo, 20th June.—I continue to write in the faint hope that the series of advices I have sent, *viâ* Naples, may possibly have reached you. There is nothing more annoying than to be in a position to forward late and important intelligence, and yet, although availing one's-self of every opportunity of communicating, to be in perfect ignorance as to whether the advices so sent have reached you, or have been destroyed by the Neapolitan government. As there is, however, a possibility of the former of these hypotheses, I shall continue the chain of advices on the presumption that the former ones have all arrived safely. That some delay occurs at Naples—even in case the sbirri disgorge the detained letters afterwards—is evident from the date of the reception in England of the special correspondence of the *Times*. My last dates sent were up to the 11th inst., and, consequently, there remain now but the sayings and doings of one short week to record; half that time, however, judging by past experience, suffices to produce marvellous occurrences—at least, 'tis so in Sicily. Order and confidence are becoming more and more apparent in Palermo, and the government of Garibaldi now oscillates with all the regularity of an old institution; decrees, notices, and appointments emanate daily from the "Gabinetto del Dittatore," and are duly published daily in the *Giornale Officiale*. Amongst the mob of small newspapers, to which there seems to be an addition every day, two or three having sprung into existence since I last wrote, the *Officiale* may be compared to a Triton amongst the minnows, being not only four times larger in size than any of them, but the only gazette published with authority. The progress of events may be easily gathered from the contents and tone of this government organ, seeing that there is not an opposition in existence; and so popular is the government that the press can scarcely be accused of writing it up, or the government of needing such aid at present. Garibaldi still continues to head official documents with the words, "Italia e Vittorio Emmanuele, Giuseppe Garibaldi, Comandante in capo le forze Nazionale in Sicilia, in virtu dei poteri a lui conferiti," decrees, &c., &c.; so that whether the King of Sardinia be a consenting party or not, his name is pretty freely used. The articles of the military convention, held on the 6th inst. between the Dictator, General Garibaldi, on the one part, and General Joseph Letizia, for the Royal army, on the other part, were published on the 13th inst., and run as follows:—"Through humane views, the truce is prorogued until the fulfilment of the following operations:" 1st. The sick now in the two hospitals and in the other depôts to be removed with the greatest dispatch. 2nd. That the embarkation and movement of the army on shore, equipages, materiel, artillery, horses, baggage, families, &c., be left free. 3rd. Relates to the order of embarkation of the troops and materiel, &c. 4th. Defines the place of embarkation. 5th. Relates to the evacuation of Castelluccio del Molo and Batteria Lanterna by Garibaldi without fire. 6th. Enjoins that Garibaldi consign over (*consegnerà*) all the sick and wounded in his power. 7th. Promises an exchange of prisoners *in toto* and not by number. 8th. Guarantees the delivery of the seven persons detained in the Castellamare when all the operations of the shipment or embarkation will have been completed by the departure of the garrison of Castellamare, and the delivery of the aforesaid "detenuti" at the Mole. An additional article is added to the effect, that the embarkation is to take place by the Via di Mare to the Mole of Palermo. Garibaldi's popularity seems to increase daily: and committee after committee from all parts of the island present addresses of congratulation, and express the utmost devotion to the person of their liberator, who returns suitable answers to each. Three proclamations, each bearing the signature of the Dictator, and addressed severally to the Sicilians, the *Cacciatori delle Alpi*, and the *Squadre Cittadine*, which have been extensively posted up throughout the town, attract considerable attention; and, as they are surmounted by the royal arms of Sardinia, all that can be said is, that if the King of Sardinia does not reciprocate the feeling in favour of annexation entertained by the Sicilians, his arms, name, and authority are very unceremoniously made use of. The city is quickly regaining its former appearance, and such shops as have not suffered by the bombardment are again open. The barricades are being removed; and the rubbish and *débris* of the fallen houses, which rendered part of the Via Toleda almost impassable, will soon be cleared away by the workmen at present engaged in their removal. The usual illumination continues nightly ever since the arrival of the expedition; and a capital order it is, as it prevents the possibility of a panic being raised, or robbery committed, which, were the streets without lights, might under similar circumstances be of hourly occurrence. The "squadre" armed peasants are being sent back to their homes in the country, where their presence is required for the harvest-work. The levies for the standing army and the national guard are proceeding with great regularity and rapidity, whilst the general enthusiasm of the population has not abated in the least. Every one wears the tricolor rosette, and a tricolor banner floats from a balcony or window of every house in the town. Bands of music traverse the streets at all hours, and military patrols look after the safety of the inhabitants. Subscriptions in aid of the poor and the sufferers from the late bombardment are still open and progressing, whilst many opulent individuals have not only contributed largely to this benevolent purpose, but have presented money, clothing, &c., for the troops. In fine, nothing is deficient that would exhibit the universal interest taken in the welfare of the popular national cause. Yesterday, Tuesday, the 19th instant, the Neapolitan Royal Standard on the Castellamare was hauled down at 10·45 a.m., and the tricolor hoisted amidst loud and rapturous cheering of the patriots. Thus ceased the last trace of the Bourbon rule in Palermo. The afternoon of the same day presented more than usual evidences of joy and demonstation; additional banners were displayed, the principal streets were more densely crowded, and singing parties chanting the freedom of Italy and the praises of Garibaldi, were to be met with at every turning. During the last few days the "gamins" have been amusing themselves throwing stones at the statues of defunct kings of Naples, whose marble effigies were ranged on pedestals along the Marina. The statues are all maimed in consequence; and that of Francisco Primo having been not only pulled down but decapitated, its head was borne in triumph through the streets by a rabble of shouting boys. Yesterday an event succeeded, *longo intervallo*, a much more imposing procession, that accompanying the seven "detenuti" who had been liberated from the Castellamare, and whose progress through the streets was a signal for a general outburst of rejoicing; bands, cheering, and all the other usual features of joyful demonstration, were present in abundance; and as the carriages passed through the streets garlands and bouquets were showered down upon them from the windows and balconies. The principal war news is that the force, variously stated at from 2000 to 4000 men, under Medici, has safely landed, and that a force consisting of about 2400, under Colonel (now General) Turr, has marched from Palermo into the interior. Report says the vessel laden with arms, lately taken by the Neapolitans, will be restored, as she was captured in Sardinian waters. The official gazette of yesterday, amongst other decrees and announcements, publishes the appointments of Il Signor Principe di Belmonte and di S. Giuseppe as Incaricato (Chargé d'Affaires) of the Provisional Government of Sicily to the Government of Her Majesty Queen Victoria. A decree abolishing the title of Excellency and the custom of kissing anyone's hand as a sign of respect, which are declared to be customs derived from past slavery, are the most remarkable of the announcements in the *parte officiale* of the government journal of yesterday. General Garibaldi paid a series of visits during the forenoon of this day, beginwith the Sardinian flag-ship, on leaving which he was saluted with nineteen guns, which was a public recognition of his position as viceroy or dictator. He next repaired to the Hannibal, to call on the English admiral, the Sardinian admiral's barge bearing the flag in the bow and ensign abaft conveying him and his staff on board the British flag-ship; he was there received with the guard and other honours due to his rank as major-general, but no salute fired or any public recognition of his position as dictator. The American ship next received the honour of a visit from Garibaldi, the cruise ending with a call on the French admiral.

Palermo, 29th June.—Although still in the dark as to whether all or any of my letters sent from this place have reached I still continue the series, in hopes that when the government of Naples will have satisfied themselves with their perusal they may possibly be sent on. My first letter from Sicily was sent on or about the 25th ult.; 2nd, on or about the 30th ult.; 3rd, on the 3rd inst.; 4th, on the 11th inst.; 5th, on the 22nd; so that this, with an immediate one, the date of which I do not remember, makes the seventh. The city of Palermo is fast regaining its former beautiful look; the barricades are being removed, and the *débris* of the fallen houses cleared away, so that the streets are becoming more passable. The general illumination continues, and its effect is very imposing, as well as of considerable service to the public in general. The government of Sicily seems to be holding its course evenly and progressing steadily. The *Giornale Officiale* appears regularly every day, and contains its regular quota of decreta, notizie, and novelle straniere. The extracts from the French and English newspapers occupy a prominent position in this publication, and leading articles from the *Times*, *Post*, and *Herald* are duly rendered into Italian for the benefit of the Sicilian reader. It is amusing to observe the importance with which a leader from the *Times* is regarded. Several Sicilians have gravely informed me that the editorial articles of that thunderer are written by Lord Palmerston; an opinion firmly held by almost all Sicilians, since they have as yet no notion of the existence of a high-toned journal expressing its opinions altogether independent of the existing government.

My last advices informed you of the nomination of an ambassador appointed by the Provisional Government to represent their interests at the court of Her Majesty Queen Victoria; Prince S. Cataldo has since been appointed to a similar post at the court of His Imperial Majesty the Emperor of the French. The district of Palermo boasts of the honour of being governed by the Duke di Cesaro, who will have perhaps the most difficult *rôle* to sustain of all the governors lately appointed. A complimentary address from the Secretary of State directed to the clergy appeared in the *Giornale* of the 21st inst., but was eclipsed in importance by the speech of the Duca della Verdura published in the same paper and delivered at the meeting of the Civic Council convened by the Senate on the 15th inst. After a becoming preface he contrasted the position of the present Senate with that of the former one; joy and triumph irradiating the faces of all after a season of bombardment, house-burning, and plundering by the soldiery. Then followed a eulogium on the Liberator, and the heroes who accompanied him. "There are names," said the noble speaker, "which comprise in themselves an entire epoch of glory and virtue. Such is the name of Garibaldi, and therefore the Senate, to remind posterity of the gratitude of the present generation towards the highest Italian hero, has determined that the gate through which he entered on the 27th of May will take from that day, in which for the first time civic representation united (*si riunisce*), the glorious name of Porta Garibaldi, and that the Piazza della Fieravecchia (old market), the cradle of our redemption, will have the name of the magnanimous Kingof Italy, Victor Emmanuel; and the same Senate trusts to you that a noble monument will in that gate be set up to testify our gratitude not only to Garibaldi, but to all those who came from the provinces of Italy to fight here for our common mother Italy, and that their names be inscribed upon a plate (*sul bronzo*). The senate in the meanwhile prepares to facilitate in all the parishes a popular subscription in order to present a sword to the highest leader of Italy, and proposes to you that you will deign to approve of a medal being struck for all those who have followed him into Sicily and fought there; and that one of the sides of that medal will record the glory and the triumph of the bold expedition into Sicily; the other side should bear engraved upon it the name of him who will be therewith decorated." Then followed an address of congratulation, at the close of which the duke, who holds the office of "Pretore," was saluted with the applause of the entire council. The council afterwards decreed "that an address be presented to the Generale Dittatore, in which, in the name of the city of Palermo, they expressed a lively wish to be united to the Italian kingdom of Victor Emmanuel." A regular commission is now instituted for the valuation of injuries sustained to houses and other property during the recent bombardment, and a classification of losses determined upon. Meantime the enrolment of national guards progresses, as well as the formation of regiments of regular troops. The plan, as far as I can learn, in carrying out the latter process, is to distribute the original band of those who came with Garibaldi over so many regiments as to make them form the nuclei of the corps to be raised. It is expected that forty or fifty thousand men will be thus embodied. The colonel and a major of each regiment are to be officers chosen from the original band of those that landed at Marsala. A corps of guides has been also formed, whose chief duties are reconnoitering and skirmishing. Menotti Garibaldi, son of the general, who, like his father is a general favourite, is appointed to a lieutenancy in this corps.

The force under Major-General Turr, which left Palermo for the interior, has been succeeded by the regiments composing the second expeditionary force under Medici; the advance guard of the latter on its arrival was received with cheering, bands, &c., and as they passed through the streets a perfect shower of flowers, bouquets, and garlands, fell upon them from the windows and balconies. The arrival of the second division was hailed with even greater enthusiasm, and as a vast crowd of the townspeople had gone out to meet them, their entry into the town was most imposing. Many of the men who belong to the second Piedmontese arrival have been campaigning before in the Austrian war of last year, for which they wear medals, and some few wear the Crimean medal. Altogether they are a fine-looking set of fellows, and are well provided with arms, many having Enfield rifles. The arms and uniforms—the latter of a serviceable, home-woven drugget of a bluish-grey colour—were all found on board the steamers that brought them to Sicily. The *enfant terrible*, Captain Peard, came with this force, and of course attracts a good deal of attention, owing to the reputation he has acquired. He is a fine looking man of some fifty years of age, and evidently very fond of excitement and a life of adventure. As the different regiments are being formed, a great variety of uniforms is beginning to diversify the appearance of the streets, and some of our heads of departments might take a useful lesson from the cheapness and usefulness of some of them. What would a fashionable English tailor think of a full uniform similar to that of a captain in the Sardinian army made of strong serviceable cloth, and costing no more than 4*l.* sterling! Even in the matter of scarlet tunics Garibaldi's men have made a great advance upon the tight-waisted one with padded breast that is worn by the British soldier. Although made of cloth, and sporting the proper amount of green facings, it is in shape a near resemblance to a blouse, as which it is worn when off duty; a moment's notice, however, suffices to buckle on a sword-belt, and then the easy, loose blouse becomes a smart military tunic, still loose about the chest, and leaving full play to the arms. An outside pocket in the left breast of these tunics is recognised as uniform, and is certainly very useful. The destruction of the Castellamare is proceeding, *con amore*, and priests and laymen, soldiers and civilians, crowd upon the parapet from morning till night, and vie with each other in performing the work of levelling its hated walls. An organised system of supplying labourers has been devised by the appointment of one day for the craftsmen of each particular trade; so that on one day the shoemakers march to the fortress in procession, each carrying a spade, shovel, crowbar, or pickaxe on his shoulder, the whole procession being preceded by a banner and music, and on arriving at their destination, work till sunset. The following day carpenters take turn, and so on, not excusing even the boatmen and cabmen, who give up their daily avocations to contribute their quota to the national labour. The Castellamare having been used as a prison as well as fortress, is almost as hateful as the Bastile was of old; and however laborious the work of its destruction may prove — and such it is proving — yet it will be, without doubt, persevered in to the end. I was much amused a day or two since, by seeing a procession, headed by the domestics of the Archbishop, and preceded by the usual banners and bands. That the priests would work is attested by the zeal they have exhibited from the first day; but that the portly servants, —clothed as they were in cocked hats, gorgeous liveries, and spotless white stockings, covering calves that a London footman might be proud of,—that they ever for a moment entertained the idea of actually working was something too ridiculous; and, notwithstanding the effect produced by their carrying each a crowbar, hammer, or shovel, yet these were in such contrast with their dress and appearance, as well as with the unmistakeable do-no-active-work look that characterises the true representative of the Jeames fraternity, that one could not help feeling that not only was their presence merely ornamental, but that they themselves considered it very imposing as well,—perhaps the most anti Bourbon class, if appearances be to be relied upon in the body of Sicilian clergy. The shovel hat is to be seen on all occasions, and in the midst of all gatherings of a demonstrative tendency. The Sicilians, however, are by no means a people who could either have liberated themselves, or governed themselves when liberated. If there is a people which, more than any other, require a wise head to direct, and a strong will to control, the Sicilians are that people, and they may thank their stars that they have got both in Garibaldi, without whose presence all would be tumult and confusion, which, when at length it had become intolerable, would lead to the restoration of the Bourbon dynasty.

Folkestone Volunteer Artillery Corps.—This corps assembled on Saturday evening the 7th inst., and having been formed into gun detachments, marched to the Martello Towers to the eastward of Folkestone, being Nos. 1, 2, and 3. They were then practised in firing with round shot, under the supervision of Captain Sweeney of the Coast Brigade. The practice made at 1360 yards was considered very excellent, and the whole of the guns being loaded, laid, and fired exclusively by Volunteers, made the precision obtained more creditable. It may be added that not one Volunteer engaged had ever previously assisted in loading or firing shotted guns. Five rounds in all. The company are also progressing very satisfactorily in carbine drill.

NATIONAL RIFLE ASSOCIATION.

In our last impression we brought the proceedings at Wimbledon down to Friday evening. Saturday however was the great day of the meeting, and we now append the results.

The arrangements on the ground were the same as on the preceding days. The Duchess of Cambridge and the Princess Mary were present during the afternoon.

The competition for the Queen's prize of 250*l.* and the gold medal of the Association was restricted to Volunteers; the 20 winners of the Whitworth rifles given by the Association, and the 20 second best shots of that contest, now contended between themselves for the higher distinction. The distances were 800, 900, and 1000 yards, each competitor firing five shots at each. No artificial rest for the weapon was allowed. Of the 40 qualified four withdrew; the remaining 36 were placed as follows:—

The firing commenced at 9 a.m., and had finished for the two first ranges before the greater number of London visitors, in the afternoon, arrived. It was the firing at the longest, and most trying, range of 1000 yards, of which most of them were witnesses. Mr. Ross, the winner of the grand prize of the whole contest, is a very young man; his style of firing was remarkably quiet and steady.

The second match of the day was for the Duke of Wellington's prize of 50*l.*; the conditions five rounds at the 1000 yards' range. This contest was also decided early in the day. The winner was Lieutenant Archibald, 58th Regiment, an instructor of musketry. But he was very closely pressed by M. Knecht, one of the Swiss; they each made three points, and on the deciding shot of the tie Lieutenant Archibald won. M. Knecht was awarded as a second prize a watch given by Mr. Bennett, value 30 guineas.

In return for the prize Whitworth rifle, offered by Mr. Fairbairn for the competition of the Swiss only, they had given a Swiss rifle, to be fired for only by Volunteers, but excluding those who were entitled to compete for the Queen's prize. This match completed the list of Saturday. It was gained by Mr. Dear, 9th Middlesex, who in five rounds at 500 yards made seven points.

Monday brought the contest of rifle shooting at Wimbledon to a close. The prizes were distributed at the Crystal Palace to the successful competitors by Lord De Grey, amidst a large and enthusiastic crowd of spectators and sympathisers, who numbered upwards of 20,000. After the ceremony athletic sports were practised, which closed the proceedings of the day.

The Council of the Association entertained at dinner in the evening at the Crystal Palace the Swiss riflemen who had competed for the prizes at Wimbledon, and those gentlemen composing the School of Musketry at Hythe who had assisted in carrying out the arrangements during the past week. Lord Elcho presided. Amongst the company were Earl Spencer, Colonels Kennedy and Bewes, M. de la Rive, the Swiss Minister, the Swiss officers who accompanied the riflemen to England, Lieut. Archibald, 58th Regiment, and Lieutenant Lacy, 12th Regiment. All the speeches were delivered in the French language.

RAILWAY TRANSPORT OF TROOPS.

(*From the Times.*)

The conveyance of a military force by railway is not a novel operation, but it is generally confined to infantry, and the number of rank and file conveyed at once rarely equals that of the passengers by many an excursion train, while the troops have the advantage of being under perfect discipline at the beginning and end of the journey. The conveyance of infantry is comparatively an easy task, and the time required may soon be calculated; but artillery, which includes so much besides men, heavy guns, ammunition waggons, and horses, that must all be kept together, separation from either making the rest useless, is more difficult to deal with. If the movement is complicated by a force of cavalry the difficulty is increased still further by the large number of horses, without which the men are *hors de combat*; the original dragoon, who served both on horse and foot, being extinct. He has not been able to hold his own, and the military working of the "theory of selection" has extinguished him. In a campaign, supposing the existence of good roads and abundant forage, artillery and cavalry are not the most difficult parts of an army to move. But if they can be carried to the actual field by railroad, the saving in time—the most important item—is immense. This is evident enough—a mere truism. But the practical mode of doing it, the amount of railway plant required, and the efficiency of the railway staff for the operation, have by no means been fully tested. An experiment, however, was made this week on rather a large scale, the results of which gave some idea of the time required to convey a combined force of artillery and cavalry from point to point by railroad. The London and North-Western Railway Company having received 20 hours' notice to prepare a point on one of their branch lines for "debarking," to use a foreign term, a certain number of troops, a piece of waste ground on the Willesden Junction line was selected for the purpose. A by-way, leading from the great Harrow Road, crosses the rails, or rather the rails cross it on the level. On each side of this roadway a temporary platform had been raised, exactly resembling those of cattle stations. One ran for some distance parallel with the rails with a sloping descent from it. The other was narrow, and at right angles to the railway. The difference of size was made purposely, and horses and guns were debarked at both to test the relative merits of this broad and narrow gauge. The smaller was merely a strong wooden framework, resting on sleepers, planked, and covered with ballast. The point from which the combined force departed was the Caledonian Road station; it consisted of the Grey battery of the Royal Artillery, which had arrived from Woolwich on the previous night, and between 400 and 500 cavalry, composed of the 2nd Life Guards and the 10th Hussars. This is not a large force, the number of a full regiment of cavalry and one complete battery of field guns do not reckon for much in a great war; but it required six immense trains, each of more than 30 carriages, to bring them down from the Islington station. The last train started thence at a quarter past 11, and had not disposed of its martial freight till nearly 4 o'clock. The first train down arrived within sight of the platform at 10 o'clock, but, for some reason not at once perceptible, was halted there, and the men kept locked up in the carriages till 1 o'clock. It was a very close day; the Artillery uniform is not the coolest summer wear, and most people know how stifling a closely-packed carriage is when motionless. When released the men rushed and leaped out, half-stewed, and exceedingly fagged, much more so than they would have been by any march of the same distance. But as this detention may have been part of the test, we will not say it was unnecessary for the main object; only it seemed so. The horses being in open carriages did not suffer so much; but appeared very glad to feel the earth under their feet, and the guns behind them again. They stood, seven in each carriage, ready harnessed. The guns and ammunition-carts were on railway trucks. The nicest part of the operation was adjusting the train to the platforms, so that each carriage should have its roadway exactly leading from it. That arranged, the rest was easy. The men rushed out, the horses pranced down the platform, and the guns and carts descended the slope by their own weight. Nevertheless, each train occupied from 30 to 40 minutes before it was clear. As soon as the cavalry mounted it left the ground, and proceeded by the by-road to London; the Artillery drew up in the lane leading to the Harrow Road, the first guns halting till all had been got out. The whole battery then returned by the high road to Islington. The Earl of Cardigan was on the ground watching the proceedings.

Obituary.

We very much regret to record the death of Colonel Walter Unett, C.B., late of the 3rd Light Dragoons, who died on the 6th July at his residence, the Oaks, Leamington, in the 45th year of his age. Colonel Unett belonged to the regiment 27 years and 4 months, and died 3 weeks after leaving it. He served in the campaign in Affghanistan in 1842, and was present at the forcing of the Khyber Pass, storming the heights of Jugdulluk, actions of Tezeen and Huftkotul, occupation of Cabool, and at the storm and capture of Istaliff, under the command of Sir G. Pollock. With the army of the Punjab in 1848-9, he was present at the affair at Ramnugger, the passage of the Chenab, and the action of Sadoolapore, under Sir Joseph Thackwell; at the battles of Chillianwallah and Goojerat, under the command of Lord Gough. Colonel Unett greatly distinguished himself on several occasions in India. As lieutenant he commanded the advanced squadron of the 3rd Light Dragoons, on 5th April, 1842, at the forcing of the Khyber Pass (noticed in General Orders). As captain, he commanded a squadron on rear-guard in the Tezeen valley, which charged a body of Affghan horse, for which he was noticed in General Orders by Major-General Pollock. At Chillianwallah, on the 13th January, 1849, he was in command of the 4th (or Grey) squadron of the 3rd Light Dragoons, which charged through the enemy's position unsupported; in this charge the squadron lost upwards of one-third of its numbers in killed and wounded (noticed in General Orders by Lord Gough), also noticed in General Orders for the battle of Goojerat, on the 21st February, 1849. Wounded severely at the battle of Chillianwallah, 13th Jan., 1849, for which he received a distinguished service pension of 100*l.* per annum. Medals.—Silver medal for the campaign in Affghanistan in 1842. Silver medal and two clasps for the Punjaub campaign in 1848-9, and promoted to Major in the Army for services in the Punjab campaign of 1848-9. Commissions dated, 3rd Light Dragoons:—Cornet, 23rd August, 1833; Lieutenant, 31st March, 1837; Captain, 1st Nov., 1842; Brevet-Major (Army) 7th June, 1849; Major, 3rd Feb., 1854; Lieut.-Col., 20th June, 1854; Colonel, 20th June, 1857; he retired from the 3rd Light Dragoons on the 12th June, 1860.

We have to record the death of Major-General Godfrey Charles Mundy, Lieutenant-Governor of Jersey, and eldest son of the late General and the Hon. Sarah Mundy, which event occurred on Tuesday last, after a few days' illness. The deceased officer entered the army in November, 1821, became lieutenant in August, 1823, and served at the siege and storming of Bhurtpore in 1825 and 1826, as aide-de-camp to Lord Combermere. He became captain, 13th May, 1826; major, 31st December, 1830; lieutenant-colonel, 28th November, 1845; and colonel, 20th June, 1854.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CARMICHAEL—July 12, at Ash Grange, near Farnborough, the wife of Lieut.-Colonel Carmichael, C.B., 32nd Light Infantry, of a son.

CASSIDY—July 9, at Upper Norwood, the wife of Arthur Cassidy, Esq., Captain 2nd Dragoon Guards, of a daughter.

CHAMBERLAIN—July 7, at 137, Westbourne Terrace, Hyde Park, the wife of Sir Henry Orlando R. Chamberlain, Bart., of a daughter.

CRAIG—July 10, the wife of Captain Craig, Governor of H.M.'s Model Convict Prison, of a son.

GIBSON—July 9, at 6, Upper Park Place, Richmond, Surrey, the wife of the Rev. J. D. Gibson, M.A., Chaplain in H.M.'s Indian Service, of a son.

LUCE—July 7, at Crocker Hill, near Chichester, the wife of Captain Luce, R.N., of a daughter.

MURRAY—May 19, at Dum Dum, near Calcutta, the wife of Captain Alexander H. Murray, Royal Artillery, of a son.

MYLIUS—May 8, at Pamplemousses, Mauritius, the wife of Captain F. J. Mylius, 2nd Battalion 5th Fusiliers, of a daughter, stillborn.

NORTHEY—July 4, in Dublin, the wife of Captain Northey, 26th Cameronians, of a son.

SCOTT—July 9, at 9, Portland Villas, Plymouth, the wife of R. T. C. Scott, Esq., of Melby, Zetland, Staff-Surgeon, Royal Navy, H.M.S. Impregnable, of a daughter.

SINCLAIR—July 7, at 6, Moray Place, Edinburgh, the wife of Captain George Sinclair, of a son.

SWABY—July 7, at the Maisonette, Broadstairs, Kent, the wife of Captain George Swaby, of a daughter.

TIMMS—April 28, at Toorak, Victoria, the wife of Captain O. F. Timms, of a son.

VALLANCEY—July 5, at "The Plantation," near York, the wife of Major G. P. Vallancey, H.M.'s Indian Army, of a son.

WAHAB—May 17, at Ahmedabad, the wife of Captain C. W. Wahab, 14th Bombay N.I., of a son, stillborn.

JAMES FAHEY, Secretary.

EDWIN KESTERTON, COACHBUILDER,
93 AND 94, LONG ACRE, LONDON, W.C.

THE STANDARD LIFE ASSURANCE COMPANY. SPECIAL NOTICE.

BONUS YEAR.—SIXTH DIVISION OF PROFITS.

All policies now effected will participate in the division to be made as at 15th November next.

The Standard was established in 1825.

The first division of profits took place in 1835; and subsequent divisions have been made in 1840, 1845, 1850, and 1855.

The profits to be divided in 1860 will be those which have arisen since 1855.

Accumulated fund £1,684,598 2 10
Annual revenue 289,231 13 5

Annual average of new assurances effected during the last ten years, upwards of half a million sterling.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

The Company's Medical Officer attends at the office daily, at half-past one.

LONDON, 82, King William Street, E.C.
EDINBURGH, 3, George Street (Head Office).
DUBLIN, 66, Upper Sackville Street.

UNDER THE ESPECIAL PATRONAGE OF
HER MOST GRACIOUS MAJESTY THE QUEEN,
AND
FIELD-MARSHAL
HIS ROYAL HIGHNESS THE PRINCE CONSORT,
K.G., K.T., K.P., G.C.B., & G.C.M.G.

THE ROYAL NAVAL, MILITARY, AND EAST INDIA LIFE ASSURANCE SOCIETY,

Established A.D. 1837, for General Assurance on Lives,

13, WATERLOO PLACE, LONDON, S.W.

DIRECTORS.

Lieut.-General Sir Frederic Smith, K.H., M.P., F.R.S., Chairman.

James Frederick Nugent Daniell, Esq., Deputy-Chairman.

Gen. Edw. Wynyard, C.B.
Archibald Hair, Esq., M.D., late Royal Horse Guards.
Wm. Chard, Esq., Navy Agent.
Maj. William Lancey, R.E.
Gen. H. G. A. Taylor, C.B.
Wilbraham Taylor, Esq.
Lt.-Col. F. S. Sotheby, C.B
Gen. Sir George Pollock G.C.B.
Rear-Adm. Michael Quin.
Vice-Adm. Sir G. R. Lambert, K.C.B.

ASSURANCES are granted upon the lives of persons in every profession and station in life, and are extended to Tropical and other Climates, on conditions more favourable (especially to the NAVY and ARMY) than heretofore have been deemed practicable.

WILLIAM M. JAMES, Secretary.

13, Waterloo Place, London, S.W.

OFFICERS PROCEEDING ABROAD can effect Assurances with THE COLONIAL LIFE ASSURANCE COMPANY on favourable terms.

LOANS GRANTED.

LONDON { 81, Lombard Street, E.C.; and at Messrs. Paris & Co., 10, St. James' Street, S.W.
EDINBURGH, 5, George Street.
DUBLIN, 65, Upper Sackville Street.

INDIA.—OFFICERS IN THE ARMY AND CIVILIANS PROCEEDING TO INDIA, may insure their lives on most favourable terms in the MEDICAL, INVALID, AND GENERAL LIFE ASSURANCE SOCIETY. The rates of this Company, which transacts the business of the Indian Banks, are lower than those of any other Office, while the Agencies at Calcutta, Madras, Bombay, Ceylon, and about 50 up-country stations in India, afford every possible facility for the transaction of business.

Prospectuses, Forms of Proposals, and every other information, may be obtained of the Secretary, at the Chief Office, 25, Pall Mall, S.W.

C. DOUGLAS SINGER, Secretary.

THE MUTUAL LIFE ASSURANCE SOCIETY, 39, King Street, Cheapside, E.C.—A.D. 1834.—The TWENTY-SIXTH ANNUAL REPORT, Cash Account, Balance Sheet, &c., are now ready, and may be had on written or personal application. CHARLES INGALL, Actuary.

THE PECULIAR ARRANGEMENTS of the LIFE ASSOCIATION OF SCOTLAND confer facilities and privileges on the Policy-holders which, it is believed, CANNOT be obtained from any other Assurance Office.

FREEDOM FROM RESTRICTIONS.—The Policies now being issued are unusually free from Restrictions (as commonly imposed by other Companies), and confer important privileges. These relate to Non-payment of Premiums—Indisputability—Limits of Residence and Occupation—Military and Naval Service, &c.; and afford, in most cases, almost complete protection against forfeiture.

SAFETY AND PERMANENCE.—The Association, now of Twenty-One Years' standing, is one of the most extensive and successful Life Offices, and thus possesses an element of safety and permanence not contained in smaller institutions. The Annual Income is now 160,000*l.*

RISKS OF PARTNERSHIP.—The Policy-holders are wholly exempt from the Liabilities of Partnership, and the Sums Assured are guaranteed.

PROFIT SCHEME.—A Share of Profits is allocated yearly to every Policy-holder of five years' standing at the preceding annual balance, and is applied so as to reduce the present outlay for his Policy.

HALF-CREDIT SYSTEM.—Policies of 500*l.* and upwards may be effected and kept up by payment of only one-half the Premiums for the first six years, with Interest on the other half. THOS. FRASER, Res. Sec.

The objects of the Company are the manufacture of pig iron, and the raising and sale of coal and surplus iron ore.

The property proposed to be worked, and the proposed site of the furnaces, are situate 6½ miles from the port of Cardiff, and contain an extensive deposit of Hæmatite ore.

Applications for shares must be accompanied by the deposit of £1 per share. Should the amount so paid exceed the required amount of deposit on the number of shares allotted, the surplus, or should no allotment be made, the entire deposit will be returned without deduction or delay.

Prospectuses and forms of application can be obtained at the Offices of the Company, Cannon House, Queen Street, Cheapside, E.C., or at the Solicitors' or Brokers'.

For the convenience of parties residing in the country, forms will be forwarded on application to the Secretary, at the Offices of the Company, where further information can be obtained and plans of the property, sections of the mines, specimens and analyses of the ironstone, coal, and clay, together with estimates of the cost of production, &c., can be seen.

SECRETARY—CHARLES CARTER, Esq.

REGISTERED OFFICES—3, Cannon Street, London, E.C.

This Company is formed for the purpose of purchasing the lease and resuming the works of the Great Cappagh Copper Mine, which were suspended under peculiar circumstances, after about 40,000*l.* had been judiciously expended in testing the permanent rich capabilities of the mine, which were successfully proved.

Upwards of 30,000*l.* of rich ore has been raised from mere trial workings, which will save to the Company now resuming the works of this mine several years of time, and the large outlay of capital already expended; so that large and immediate returns can now be made at an inconsiderable expense.

As evidence of the richness of the copper, it may be mentioned that the adjoining copper mine at Ballycummisk is sending ore to market, which, at the ticketings at Swansea, December 6th, 1859, realised 163*l.* 11*s.* on 105 tons, being an average of nearly 16*l.* per ton, 15 tons of which give 24⅜ per cent. of pure copper.

The nominal capital of the Company is 60,000*l.*, in 60,000 shares of 1*l.* each, of which 20,000 shares will be reserved, to be disposed of hereafter as the shareholders may determine, which, when the workings of the mine are established, may therefore be cancelled, and thus increase the value of the existing shares by upwards of 30 per cent.

The consideration to be paid for the purchase of the lease and previous outlay is 5000*l.* in money, and 15,000 paid up shares. The lease is for 21 years from 29th September, 1858, renewable without fine, for a further period of 21 years. Royalty, 1-16th. Rent, 50*l.* per annum.

Prospectuses, with sections and plans, as well as forms of application for shares, may be obtained at the offices of the Company, or from the Brokers. The evidence adduced before the House of Lords, on appeal, referred to in the prospectus, may be seen at the offices of the Company.

SKAIFE'S PATENT PISTOLGRAPH (Price Ten Guineas), "The greatest photographic discovery of the age," with hundreds of its chromo-crystal productions, including Hyde Park equestrians, and jewellery guinea portraits of babies, "the most beautiful instantaneous pictures which photography has yet produced."—*Brighton Gazette.* Now on view at SKAIFE'S Pistolgraph Depôt, 47, Baker Street, Portman Square, London, W. Articled pupils received at a moderate premium.

GUSH & FERGUSON, Artists and Photographers, beg respectfully to invite the Nobility and Gentry to view their First-Class PORTRAITS, in Oil and Water-Colours.

RUPTURES.—HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 10*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

THE RIFLE VOLUNTEER'S COMPANION, specially adapted to the probable Requirements (Medical and Surgical) of Her Majesty's Volunteer Forces, on the Field, the Practice Ground, or the March. Designed and arranged by SAVORY & MOORE, Chemists to H.M. Army, &c., No. 143, New Bond Street, London, W.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Glove and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout Empire.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

SEQUELIN'S OIL.—This Vegetable Preparation is an infallible restorative of the Human Hair, producing its growth, checking its falling off almost instantly, and imparting to it unequalled softness and brilliancy. Testimonials and references on application. One bottle is sufficient. Price 1 guinea. Sold by S. SEQUELIN, 40, Wharton Street, Lloyd Square, W.C. London Agents: G. JOZEAU, 40, Haymarket, S.W.; and METCALFE, BINGLEY, & Co., 130*B*, Oxford Street, W.

MR. EDWARD *DAVIESON'S* EVER-LASTING TEETH.—Of such EXQUISITE BEAUTY and such ADMIRABLE Fit that Nature appears to have made good the ravages of Time, Disease, or Accident. At TEN SHILLINGS per TOOTH, which price can only be exceeded by expensive mountings.

DAVIESON'S LIQUID ENAMEL, for Stopping Decayed Teeth without pain, is ENAMEL WHITE, and lasts for ever. Attendance from Ten till Six. Consultation Free.

418, WEST STRAND, LONDON, W.C., over the Electric Telegraph Office. Descriptive Pamphlets free by post, two stamps.

YOUTH AND BEAUTY.—The FLEUR DE L'AGE, or Bloom of Youth, a vegetable preparation, so innocent that it may be applied to an infant, but yet imparts the most dazzling brilliancy to any complexion, and renders the skin beautifully soft; prevents and cures all eruptions. Sold in cases at 5*s.* and 11*s.*—To be had only at ED. DAVIESON'S, 418, West Strand, London, W.C. (over the Electric Telegraph Office). Descriptive Pamphlet free for two stamps.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Bugs, Beetles, and every other insect, by this Powder, which is perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in Packets, 1*s.*, 2*s.* 6*d.*, and 4*s.* 6*d.* each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the above name and address. Sold by all druggists.

THE LONDON REVIEW

AND WEEKLY JOURNAL.

CONDUCTED BY CHARLES MACKAY, LL.D.

Published every Saturday Morning, Price Threepence.

A THOROUGHLY ORIGINAL JOURNAL, and Complete Record of the Events and Opinions of the Day, with First-class Literature adapted for the Homes of the Empire. No topic, allusion, or advertisement, that can render it an improper guest in the family circle, is allowed to appear. THE LONDON REVIEW will not be a compilation from, or a reprint of, other newspapers, but a thoroughly original Journal. It will be printed on good paper, in a clear, bold type; and in quantity of matter will greatly exceed most of the more costly weekly newspapers; whilst its price will be such as must secure for it world-wide circulation. TERMS OF SUBSCRIPTION:—Stamped, 4s. 4d. Quarterly; 8s. 8d. Half-Year; 17s. 4d. the Year. Unstamped, 3s. 3d. Quarterly; 6s. 6d. Half-Year; 13s. the Year; or, Threepence per Copy for any period, with One Penny additional if sent by post. Orders received by all Booksellers and News Agents; or at the Office, 11, Southampton Street, Strand, W.C. Post-office Orders to be made payable at the Charing Cross Office, to W. LITTLE, Manager. A single Specimen Copy sent free by Post on receipt of Four Postage Stamps.

EDWIN KESTERTON, COACHBUILDER, 93 and 94, LONG ACRE, LONDON, W.C.
Inventor and Builder of the AMEMPTON, and the AMEMPTON SOCIABLE, each forming a complete open and close carriage, well adapted for the colonies, being roomy, light, and airy. Sociable Drawing Phaeton, forming the light driving Phaeton and the useful Waggonette. Patent two-wheeled Dog Cart, light, strong, and giving entire freedom from the action of the horse. E. K. invites inspection of the above, also to his light Sociable Landaus, Broughams in various sizes, Cabriolet and Park Phaetons, &c., &c.

WANTED a MESSMAN for the Officers' Mess, 1st Battalion 8th ("The King's") Regiment, about to arrive in England shortly from India. Apply to President Mess Committee, 1st Battalion 8th ("The King's") Regiment, Sir CH AND W. M'GRIGOR, 17, Charles Street, St. James's, London, S.W., inclosing terms, testimonials, certificates, &c.

WANTED. A BANDMASTER for the 36TH REGIMENT. Applications for the same, with testimonials as to qualification, and statement of terms, to be addressed to the President of the Band Committee, 36th Regiment, Devonport.

ROYAL TYRONE MILITIA ARTILLERY. —To Non-Commissioned Officers of Royal Artillery.—WANTED, for the Permanent Staff, TWO SERGEANTS. Applications to be sent to the Adjutant, at Charlemont, Moy, Ireland.

PARTNER.—A CLERGYMAN, late HEAD MASTER of a PUBLIC SCHOOL, wishes to meet with a GENTLEMAN who has filled the post of Naval Instructor, to join him in establishing a First-Class School for Naval and Marine Cadets. The Advertiser has already a few pupils.—Address, the Rev. X. Y., ARMY AND NAVY GAZETTE OFFICE, 16, Wellington Street North, Strand, W.C.

TO GENTLEMEN.—A LADY of Superior Education and high respectability wishes to engage as USEFUL COMPANION and HOUSEKEEPER. She would be invaluable to an invalid, as she is an excellent reader and amanuensis, and converses fluently in foreign languages. She would not object to take the charge and education of a widower's family.—Address, M. C., Tatler's Dairy, 27, George Street, Edgeware Road, W.

ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.
(LATE MR. THOMAS EASTMAN'S, R.N.)
CONDUCTED BY MRS. EASTMAN.

The studies of the Pupils are under the direction of Mr. GEORGE E. SPICKERNELL and Mr. WILLIAM H. COLBORNE, both for many years with the late Mr. EASTMAN.

The following gentlemen have recently passed from this Establishment as Naval Cadets—Messrs. Hough, Dugdale Coddington, Gissing, Lindeman, Bancroft, Campbell, Herbert, Kingscote, Wells, Baring, the Count F. Metaxa, Messrs. Massy, Watkins, and Joyce.

354 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, &c. &c.

The highest references can be given. Applications to be addressed to Mr. SPICKERNELL.

NAVAL CADETS, MARINE CADETS, MASTERS' ASSISTANTS, INDIAN NAVY, &c. MR. CHARLES F. COOPER, R.N., Albion House, Beresford Place, Southsea, receives and prepares a limited number of young gentlemen. MR. COOPER has lately prepared 21 gentlemen for the above without a failure, and 8 have taken 1st, 2nd, and 3rd places at R.N. College. Terms moderate.

NAVAL CADETS.
OF THE 43 SUCCESSFUL CANDIDATES at R. N. College, 12th June, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Stewart, Gabbett, V. Orlebar, Henderson, Master, Fellowes, Sidney Smith, Blackett, Millett, Knollys. Mr. Mounsteven, who passed first at the Competitive Examination for Marine Cadetships, was also prepared at North Grove House.
W. BELL, Chaplain, R.N.;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

NAVAL AND MARINE CADETS, ETC.
THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

ARMY EXAMINATIONS.—MR. JAMES RAM, No. 5, Inverness Place, Bayswater, after eight years' experience in preparing exclusively for direct and competitive Military and Civil Service Examinations, continues to RECEIVE resident and daily PUPILS. Terms and list of successful pupils on application.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

CIVIL AND MILITARY SERVICES (Home and Indian).—CANDIDATES PREPARED for these Services by the Editor of "Hall's Guide to the Three Services," assisted by experienced teachers. Hours of study from 10 to 1. Terms:—For the Home Civil Service, three guineas per month; for the Army, four guineas. Residence, five guineas per month additional. Address J. Paxton Hall, Oxford House, Chelsea, S.W.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vauban's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotheran, York.

A MARRIED CLERGYMAN, late Fellow of his College, and now Government Chaplain in one of the pleasantest cities on the Continent, has VACANCIES for ARMY PUPILS. He can offer great experience in tuition, good society, and a cheerful residence. Address for particulars to the Curate of Roade, near Northampton.

HANWELL COLLEGE, Middlesex, W., is still retaining its high character; it has long been known as one of the most successful Institutions in the kingdom. A Prospectus will be forwarded on application to the Rev. Dr. EMBLTON, Principal.

MILITARY EDUCATION. An Officer, who has passed numerous gentlemen for the Guards, Line, and Artillery, attends at the Residences of Candidates, in or out of Town, and prepares them quickly and efficiently for the SANDHURST EXAMINATIONS. References to Officers and others. —Address, H. A., Military Library, 39, Charing Cross, S.W.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of
GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.
Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.
Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.
This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—
1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.
2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.
3rd. It is easy to manufacture, and can be made entirely by machinery.
4th. It is so constructed that accident from careless loading, or otherwise, is impossible.
5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.
6th. The action is always in good order, requiring no adjustment in use.
7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.
8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.
Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.
A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

COLT'S REVOLVER RIFLES AND PISTOLS, AND NEW MODEL SHOT AND BALL GUN, for Naval, Military, and Sporting purposes, Travellers, and House protection. Rifles, 36-44-, 56-, 100th calibre; 18, 21, 24, 27, 30-inch barrel.
REVOLVERS, large, medium, small bore; 4, 5, 6, 7½-inch barrel; 5 and 6 shots. Descriptive price list free.—For SALE, Wholesale and Retail, by the Patentee and Manufacturer, SAM. COLT, 14, Pall Mall, S.W.
Avoid counterfeits and base imitations.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60s. per 1000; blank, 33s. per 1000.
Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

ELEY'S AMMUNITION, comprising WIRE CARTRIDGES for killing game at long distances, WATERPROOF PERCUSSION CAPS, GUN-WADDINGS, BREECH-LOADING CARTRIDGES, and every description of Sporting and Military Ammunition.—ELEY BROTHERS, Sole Contractors to the War Department for Jacob's Rifle Shell Tubes, Cartridges and Caps for Colt's, Adams', and other Revolvers; Enfield Ammunition, &c.; Gray's Inn Road, London, W.C. Wholesale only.

ICE, and REFRIGERATORS for preserving Ice and cooling Wine, Butter, Cream, Water, Jellies, and provisions of all kinds, manufactured by the WENHAM LAKE ICE COMPANY, now removed to 140, Strand, W.C., of the best make and at the lowest cash prices. No agents are appointed in London for the sale of the Company's Ice or Refrigerators. Pure spring-water Ice, in blocks, delivered to most parts of town daily, and packages of 2s. 6d., 5s., 9s., and upwards, forwarded any distance into the country by "goods" train, without perceptible waste. Wine-coolers, Ice-cream Machines, Ice Planes for sherry-cobblers, freezers, moulds, &c. Detailed printed particulars may be had, by post, on application to the WENHAM LAKE ICE COMPANY, 140, Strand; London, W.C.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the Lancet in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND
Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.
Black or Green Tea, 2s. 8d., 2s. 10d., 3s., 3s. 4d., to 4s.
A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.
Sugars are supplied at Market Prices.

TEA.—The Newspapers and Price Currents daily report that COMMON Teas are dearer, and FINE are cheaper. What is the reason of this? Because common (and not fine) is sold to the Public. STRACHAN & Co. guarantee that their Black Teas, from 3s. 8d. to 4s. 2d., consist only of the FINEST descriptions.

IN the Port and Arsenal of Cherbourg our powerful ally may possess "an eye to watch," but assuredly has not yet "an arm to strike" at England, were he disposed to do it. Undoubtedly the appliances for building, launching, and arming ships of war, as well as the means of protecting them when launched, are most formidable. They are altogether unrivalled in their facile combination and completeness. But at present, as far as we can judge, Cherbourg occupies a position of defence rather than of aggression. There is indeed very little appearance of active preparation in the Arsenal; nothing to indicate an intention of immediate action in war. At this moment Cherbourg is strong enough to bid defiance to the fleets of the world, though the batteries are not completed on the Breakwater. No attempt on the place by sea can be successful; and the only operations which could be carried on must be effected by a force from the land side powerful enough to gain and maintain a position on the heights over the town, to carry on a regular siege, as well as to meet all the efforts of France to drive the investing force into the sea. An effective bombardment from sea is out of the question: a *coup-de-main* would be absurd. But the heights over Cherbourg command the fleet and Arsenal more completely than Portsdown commands Portsmouth. It is true that a strong fortified work occupies the heights over the French Arsenal, but it is isolated and could not be supported by the fire of the works below, nor does it offer any very powerful resistance on the land side. On the low shores south of Cherbourg a landing could be effected under favourable circumstances with comparative ease, but the ridge of heights over the beach parallel to the sea-coast offers many magnificent positions for an obstructive force, and no light issue would be accepted by the power which ventured to throw an army on the French coast, with the object of reaching Cherbourg by land. On several of the bays, or patches of beach, south of Querqueville, small earthworks are visible. The ground to the eastward of the port does not offer similar facilities for landing, but the country towards the interior is more favourable to military attack, although there would be but little use in gaining possession of this portion of Cherbourg, as the Arsenal lies at the western side of the bay. On the heights to the south-west are the Forts Du Roule and Octeville, the Redoubts Des Russes and Du Tot, the Fort Des Couplets and the Fort at Bricourt, which must be reduced and occupied ere batteries could be established to command the Arsenal below. The general notion of the defences of Cherbourg has been gained with tolerable correctness by constant visits of our countrymen, and by the accounts which were published at the time of the Queen's visit; and, as far as recent experience goes, the authorities do not make the smallest difficulty in permitting strangers to visit every portion of the works they desire to see. We all know that the breakwater is undoubtedly the greatest work of the kind in the world, although its permanence must always depend on constant care and reparation; but it is generally understood that the works are by no means completed, nor does it seem that any present intention exists of furnishing the casemated batteries at the extremities of the Digue. We shall relate the result of a personal visit to Cherbourg on a recent occasion. Our yacht passed sufficiently close by the western passage to see the Digue very distinctly. The circular casemated battery at the end of the western pier resembles Fort Constantine on a small scale. It at present shows two tiers of batteries; but the courses of masonry are unfinished and rugged, and it is impossible to say whether it is intended to have a third tier of guns or not. There is no sign of any roof or bomb-proofs on the building. The embrasures are provided with wooden or iron shutters, which were kept closed, consequently one could not ascertain if guns were mounted in the finished parts of the battery. One thing, however, could not be concealed—that a very serious crack has taken place in the wall of the fort, running from the upper tier in a slanting direction through the masonry to the sea level, and displacing the stones of one embrasure in the course of the dislodgment.

One solitary mason was visible near the crane, and a small sloop was lying alongside the little quay of the fort, but no other sign of life could be seen. The Digue stretching away towards the right, with its long line of barbette guns, seemed equally lifeless. Between the western fort and the large central work at the angle in the middle is a smaller fort, with a single tier of casements.

The central fort is finished, all the casemates closed, but the fort on the eastern extremity of the wall is as incomplete as that on the western extremity. There are ninety-six guns, in twelve batteries of eight guns each along the wall en barbette, with their muzzles just clear of the stone parapet in front; probably the whole of this work, when finished, will have the fire of 150 pieces of artillery to protect it. But if the Digue were not protected in the flanks by the powerful batteries on shore, its peculiar means of defence would be worth very little, as the forts upon the extremities are not sufficient to secure it from an enfilading fire, to which no adequate reply could be given. The western passage is secured by the extremely formidable works of Fort Querqueville and the fort de la Roche Chavagnac. Leaving those forts on the starboard, yachts which come in by the western passage enter the roads, and rounding the Fort Homet, which is the eastern bastion of the fortifications around the Arsenal, anchor in the little roads off the Port Militaire, and outside the pier of the commercial port. The passage to the east, which is much narrower, is completely commanded by the powerful fire of Forts Impériale, La Pelee, Des Flamande, on the south, and the Digue bastion on the left. The Arsenal is enclosed by a continuous line of bastion and curtain of a very elevated profile, defended by outworks, wet and dry ditches, and by profuse batteries of the heaviest guns, either in casement or en barbette. From the deck of your vessel, glass in hand, you can survey the whole panorama of earthworks and stoneworks, of redoubts, bastions, casemated curtains. Wherever you look, you fancy that on the spot you occupy are specially pointed dozens of the dull black eyes from their rigid lids of stone. All this work is intended to guard the cradle in which the French navy is being nursed to a size and strength not the less formidable because they are artificial.

Outwardly there appears just now no fleet to watch. The only pennant in harbour was that of a small dispatch or surveying vessel, and a little revenue cutter. The few vessels in the commercial port were coasting sloops or schooners, and the commercial importance of the place is insignificant as its political and naval significance is enormous.

If the day ever come when France, securely holding Toulon and Brest, can assemble in Cherbourg a hostile fleet superior to our own, English influence will become seriously imperilled at home and abroad. Our reputation and our power, to say nothing of our liberties, can be assailed whenever the wielder of this newly created strength may be pleased to direct it against us. That day, however, must yet be far distant. The aspect of Cherbourg proves the fact. Even if a wish exists for the advent of that time, its realisation is silently accepted as a present impossibility. Those who doubt should go to Cherbourg. There is but one indication of maritime strength and preparation to be found there which should cause us any uneasiness. Unfortunately, it is all important, and it gives strength to France in the very point wherein we are weakest.

Land at the commercial quay, stroll through the streets, walk into the country, you will meet everywhere groups of fine muscular young men, in irreproachable uniform, and to all appearance as thorough sailors as ever trod a deck. They are so numerous that you meet at least four of these men for one male attired in civil costume. They are allowed plenty of liberty, and a fair share, if appearances and results are to be trusted, of intoxicating wines or spirits. But it must be confessed that one feature in the population of English seaport towns, which is only too large wherever sailors and soldiers congregate, is not visible to the naked eye in Cherbourg.

At nightfall, the men march to their barracks singing patriotic songs, which of course are as little complimentary to their neighbours as our own "Arethusa," or "Hearts of Oak." Wherever sailors are to be found, there are also grouped numbers of the infantry of the marine, nor are artillerymen wanting; but there are few infantry and no cavalry at Cherbourg. All these sailors are divided into equipages, or complete crews, regularly officered, and capable of subdivision, so as to be adaptable to line-of-battle ships or smaller vessels. They are all ready in their barracks, with traps stowed away and labelled, to march on board a ship when desired. An officer of one of these crews, to whom we spoke, assuredus that in three hours from the receipt of the order the whole of a ship's complement would be safely stowed on board and ready for sailing. Making some allowance for a little exaggeration, the arrangements are unquestionably of a nature to permit of sudden action in emergencies; and however unsuited to the British sailor the marine barracks may be, they give an admirable method for maintaining the personnel of the fleet in constant readiness. In Cherbourg there is a disposition very natural to make the most of the successes, such as they were, gained by the French navy in former wars. Thus we have the sinking of the Vengeur, and the battle of Algesiras, in every shop window, with many unknown episodes of their naval history. All sorts of marine engravings and coloured prints are displayed in the streets, and the sentiment of the place certainly means war to England. But it is not so much aggressive as recuperative. It seems to say, "Look what we have done already with our imperfect means. Survey our present preparations and appliances, and judge what our future deeds must be!" There is an unquestionable importance in such a place existing within a few hours' sail of our shores. But perhaps a Frenchman might more reasonably feel indignant at the fortifications of Alderney, and at the position of the Channel Islands within a few miles of his own coast, watching Cherbourg, and, as it were, completely out-flanking it on its western access to the Channel.

The facility with which Cherbourg is thrown open to foreigners is astonishing to those who are acquainted with the vigilance and suspicious jealousy of our own Government, in reference to the inspection of our dockyards and arsenals by strangers. Any gentleman with his passport in form, who waits on the Port-Admiral, and can give a good reason for his desire to inspect the establishment, is admitted without hesitation into Cherbourg. The members of yacht clubs who visit the port are furnished with recommendatory letters by the agent of the clubs, and, on presenting them at the office, are furnished with printed orders for admission and free examination. Thus it was that we marched along the interminable piles of buildings and over the massive pavement of the Arsenal, duly accompanied by an honest gendarme, who seemed only too happy to give us every information in his power, and to show with alacrity all that was to be seen. On all the long ranges of slips there was only one ship, a two-decker, and she was undergoing the process of lengthening. The formes are, for the most part, empty—or are only occupied by very small steamers undergoing repair, intended for the service of the port. In the large basin, at the opening of which Her Majesty was present, there lay two old liners—one about to be broken up, two unmasted frigates, and one screw corvette; but in the

Digitized by Google

wet and dry docks, at the extremity of the basin, the Bayard, the Napoleon, the Arcole, and the Austerlitz, were under repair, and a large new screw two-decker, just launched, was being completed. One of the most curious matters we saw here was the propeller of one of the men-of-war which lay on the wharf; the peculiarity being that the blades were double,—that is, were fixed in parallel pairs on the axis. In the western basin a number of artificers were engaged in fitting out the steam yacht in which Prince Louis Napoleon intended to take a pleasure excursion, the period of which has been deferred owing to the death of Prince Jerome. In an adjoining basin lay a sharp, narrow, wall-sided craft, about the size of a heavy steam-sloop, and certainly not 200 feet long; her masts were not stepped, and not a man appeared to be working upon her. We were attracted to look at her by the heavy scantling of the hull, as well as by a projecting ledge of an external sheathing of plank which appeared all round her just above the water line —her port-sills were certainly not seven feet clear of the water, and her bows and stern were, on examination, as narrow and sharp as those of a Thames boat. "And what is the name of that vessel?" said we to our gendarme. "That is La Normandie," said he, "she is to be covered with a cuirass of steel plates which will resist cannon-shot." "Is this one of the frigates blindées of which we have heard so much?" "Ah, yes, it is." "But she is not ready." "No, but La Gloire is very nearly completed at Brest or Toulon." "And where are the steel plates for this vessel?" "They are being made in the Government founderies," said the gendarme. And this, then, was the terrible steel-coated ship, armed with a trenchant blade, which was to cut up line-of-battle ships into chips, and which, according to the excited imaginations of French journalists and American travellers, was quite ready for sea, and prepared for service at a moment's notice! It seemed to us very doubtful whether she can ever float on the seas with open ports at all, when her iron mail is put on. Assuredly a more serious responsibility never devolved on officer or seaman than the charge of such a craft in the smallest breeze of wind. The assurances of peaceful intentions, which were afforded by the aspect of the place, are more than confirmed by the sight of the famous Normandie. This was the most interesting portion of the sights of Cherbourg. The Armoury of course is worthy of notice. The piles of rifled guns and heaps of conical shot are not without their significance. But, after seeing La Normandie, and the condition which she was in, we were better satisfied as to the peaceful intentions of the French government than if we had read a dozen articles from the pen of M. Grandguillot, or a score of official remonstrances in the pages of our respected contemporary the *Moniteur*. Any second-rate dockyard in England exhibits more sign of bustle and preparation; but it must be admitted, in their magnificent reserve of 8500 men at Cherbourg, the French find themselves in the possession of the results of a great deal of care and elaborate effort, which we might envy. It did not appear to us, notwithstanding that such an immense number of sailors were stationed in the place; but one of the officers affirmed that they amounted to that number. It is probable that we shall, on another occasion, continue our remarks on such things as struck us as being most noticeable in Cherbourg. At present we merely indicate the aspect of affairs as we found it.

HOSTILITIES IN NEW ZEALAND.—Mr. Adderley asked the Under-Secretary of State for the Colonies, last Monday, whether any accounts had been received of the people of the provinces of New Zealand, not immediately threatened by Maori hostilities, volunteering for the assistance of their fellow-colonists at Taranaki; whether any intimation had been received from the colonial government of its intention to propose to the colonial parliament any vote for the purpose of contributing to the expense of the civil war; or whether it was the intention of Her Majesty's government that the whole expense should be defrayed from the Imperial Treasury.—Mr. Childers wished to know whether the Volunteer force of the Australian colonies had, to any great extent, offered themselves for active service in the suppression of this revolt.—Mr. C. Fortescue said that, with regard to the last question, there were a number of offers made by the inhabitants of the Australian colonies, especially at Melbourne, to proceed to New Zealand, and to assist, if necessary, their fellow-countrymen there. He was not aware that those offers had been accepted, or that any body of volunteers had actually proceeded to New Zealand. He knew, however, that the inhabitants of Auckland had been active in organising bodies of volunteers. With regard to the second part of the hon. gentleman's question, they had not received any communication of the proposal to the colonial parliament for any vote, but the colonial parliament had not yet met; still he had no reason to believe that it was the intention of the colonial government to call upon the Imperial government to defray the expenses of the volunteers engaged in the suppression of the revolt. As to the last part of the hon. gentleman's question, it would be premature to state what was the intention of Her Majesty's Government as to the mode of the disbursement of the expense incurred by these hostilities.

THE ARMY.

1st Life Guards. His Royal Highness the Duke of Cambridge attended an inspection of the 1st and 2nd Regiments of Life Guards, on Monday morning, at Wormwood Scrubs. The Duke was attended by a staff of officers, and Major-General J. Lawrenson, Inspector-General of Cavalry, was present during the manœuvring of the regiments, which were commanded by Colonel Parker and Colonel M. Martyn. The martial bearing and efficiency of both regiments gave general satisfaction.

1st (King's) Dragoon Guards. Part of the detachment belonging to the China expedition has arrived at its destination.

2nd Dragoon Guards. Captain Cassidy, who has just exchanged into this regiment from the Military Train, has left for India with a draft from the depôt at Canterbury.

3rd Dragoon Guards. Captain J. C. Boucher has obtained leave home on medical certificate. Cornet R. G. Smith has passed an examination in Hindostance.

4th Dragoon Guards. Paymaster Biggs is on leave to the 26th instant.

6th Dragoons. Major Cowell is on leave to Mahableshwur. Lieutenant the Hon. W. Annesley is on his way home from India on leave. Lieutenant Hardy is detached for service in China, where he goes in charge of horses from Bombay.

7th Hussars. Lieutenant and Adjutant Mould has Horse Guards' leave to the 15th of March, 1861, at the recommendation of a medical board.

8th Hussars. Paymaster Duberley has been granted an extension of leave to Mount Aboo to the 15th of August.

10th Hussars. The regiment has arrived at Aldershot, and is encamped at Cove Common.

17th Lancers. Cornet Bruce is on leave to Bombay on medical certificate.

18th Hussars. Lieutenant Dane is on sick leave to January 11, 1861.

ROYAL ARTILLERY.—The entire disposable force of Royal Artillery in garrison at Woolwich was on Tuesday paraded on foot in front of the official quarters, in a body of 2500 men for the purpose of witnessing the annual distribution of good conduct medals by Sir Richard Dacres. The list of non-commissioned officers and men (28 in number) who were about to be decorated with the medals was called over, when General Dacres, having addressed an appropriate remark to each one consecutively, handed singly to Major Reilly the remainder of the medals, which he conferred in the usual manner.—Lieutenant J. Nicholas has embarked for Calcutta on board the Surrey at Gravesend. Captain Law is ordered to China to join Captain Desborough's battery.

ROYAL ENGINEERS.—Orders have been received at the head-quarters of the Royal Engineer establishment, directing a large detachment of non-commissioned officers and men of the Royal Engineers to be selected and held in readiness to proceed to Kensington.—On Monday the whole of the officers of the Royal and Indian Engineers were assembled in the officers' mess-room at Brompton Barracks, having been summoned by Major-General Eyre, to hear read the finding of the general court-martial, which assembled a few weeks back for the trial of Captain Henry George Savage, commanding the 33rd company of Royal Engineers. The charges on which Captain Savage was tried were for having sent in the morning states of his company and also some passes for the men falsely signed in his name by Lieutenant Edward Harvey; for having failed to attend the issue of bread and meat, according to his duty; and for having falsely stated to Colonel Ross, when questioned by him, that he did not know it was his duty to have attended parade. Lieutenant Harvey, who had been placed under arrest with Captain Savage, was also sent for by General Eyre, that officer having been nearly two months under arrest without having been brought to trial. As soon as the officers had been assembled, Major-General Eyre announced to Captain Savage and Lieutenant Harvey that they were released from custody, at the same time handing both those officers their swords. Captain Savage, who has been under arrest since the 22nd May, then returned to his duty, and took the command of his company. The finding of the court-martial has given very great satisfaction among the officers generally.

Grenadier Guards. This distinguished regiment will celebrate the 200th anniversary of its formation by a great dinner to the men of the regiment in the Crystal Palace, on Wednesday next, the 25th instant. Sixteen tables will be arranged along the great transept. Special trains will convey the regiment from the Battersea station at 12 o'clock in the day. On arriving at the Palace a series of sports and games and athletic exercises will be provided for the amusement of the men until half-past 4, when they will parade on the lower terrace, afterwards marching to the dinner, which is to take place at 5 o'clock precisely. Immediately after dinner the fountains will be played, and a balloon ascent will take place, the men returning by special trains to Battersea at 8 o'clock.

Coldstream Guards. The 1st battalion returned to London on Tuesday from Aldershot, where it had been encamped for a month, and took up its quarters in the Wellington Barracks.

Scots Fusilier Guards. The 1st battalion moved from Wellington Barracks on Tuesday to Aldershot for a month's field exercise. It is encamped at Cove Common. Colonel Ridley is acting as brigadier at the camp in command of the Reserve Brigade.

4th (King's Own) Regiment. "Intelligence was brought to our office last evening," says the *West Sussex Gazette*, "of a sad affair having occurred yesterday at Littlehampton, but as nothing precisely authentic has reached us, we cannot vouch for the correctness of what we now publish. Our informant states that the men of the 4th (King's Own), stationed at Littlehampton Fort, were at target-practice yesterday, and were waiting—some standing and others sitting on the ground —for the next order to fire, when one of them, whom we are given to understand, was unaware that his gun was loaded with ball, casually put his piece to his shoulder, and pointed it at a comrade, who was close by. The gun, it seems, contained a ball cartridge, and, shocking to relate, went off, the bullet going completely through the head of the unfortunate man, at whom it had been accidentally pointed, and into or through the head of another man standing behind him. Another account is that the gun had been laid aside by the man to whom it belonged in consequence of his inability, from some cause or other, to discharge it, and that it was subsequently taken up by another man, who put a cap on it, and without a thought as to the direction of the muzzle, pulled the trigger, the ball going through the heads of the two men as above stated. These are all the particulars we are at present able to collect. When our informant left Littlehampton the men were alive; but it was thought that the poor fellow through whose head the bullet first passed could not exist much longer. We may mention that there was then some doubt as to whether the bullet had passed through or had lodged in the head of the second soldier."

7th Fusiliers. Captain A. Bennett is on leave to Cashmere, from May 1st to October 13th.

16th Regiment. The 1st battalion will move on Tuesday from the South Camp, Aldershot, to Cove Common, to be encamped.

18th Regiment. The 2nd battalion has moved to Cove Common, where it is now encamped, forming part of the Reserve Brigade under Colonel Ridley.

19th Regiment. Brevet-Major Jerome of the 2nd battalion, is on leave from Aldershot to the 16th of August, on medical certificate.

20th Regiment. Lieutenant G. R. Gibbs is on leave to November 1st, 1860, to study at Thomason College, and Ensign G. D. Wahab, to July 5th.

23rd Fusiliers. Ensign A. Hutchinson, Ensign W. H. Adams, and 63 men of the 1st battalion, have embarked for Calcutta on board the Surrey at Gravesend.

24th Regiment. Paymaster F. F. White has leave to Kangra, from April 15th to August 15th.

27th Regiment. At a general court-martial assembled at Umballa, April 30, Ensign G. P. Cobbe, H.M.'s 27th foot, was arraigned on the following charges:—1st.—With conduct unbecoming the character of an officer and a gentleman, and to the prejudice of good order and military discipline, in having at Umballa on the afternoon of April 4 proceeded to the sergeant's mess, 27th regiment, and there remained for about an hour drinking and playing at billiards with several non-commissioned officers of that regiment and of the 7th Hussars; and in having on the evening of the same day entered the quarters of Sergeant H. Smith, 27th Regiment, and there remained for about two hours drinking with him and with other non-commissioned officers of the corps. 2nd.—With having been drunk on duty under arms at Umballa on the night of April 4, when regimental orderly officer of the day. 3rd.—With neglect of duty as regimental orderly officer of the day at Umballa on April 4, in having failed to visit the quarter, rear, hospital, and mess guards of the regiment in the course of that night. 4th.—With conduct unbecoming the character of an officer, and to the prejudice of good order and military discipline, in having at Umballa on April 5, in his report as relieved regimental orderly officer of the day, falsely stated that he had visited the regimental guards at 10 and 11 o'clock the preceding night. Finding: Guilty of all the charges. Sentence: To be cashiered. Approved and confirmed—Clyde, General, Commander-in-Chief.

28th Regiment. Captain J. Williams is about to proceed from Bombay in charge of horses for China.

33rd Regiment. A board assembled at Aldershot, yesterday, for the examination of Lieutenant G. A. Vaughan for promotion to the rank of captain. Captain T. B. Fanshawe is on leave to England for 18 months.

38th Regiment. Major B. Walton, Ensign B. P. Bromhead, and 81 men, have embarked for Calcutta on board the Surrey at Gravesend.

42nd Highlanders. Lieutenant J. W. Mitchell, Ensign A. F. Kidston, and 100 men, have embarked for Calcutta on board the Surrey at Gravesend.

43rd Light Infantry. Lieutenant H. J. Berners is on leave to England for 18 months.

45th Regiment. Marched from the Cove Common camp on Tuesday to the South Camp, Aldershot. It is attached to the 2nd brigade under Brigadier Brook Taylor.

ROYAL MARINES (PLYMOUTH DIVISION).—The Lords Commissioners of the Admiralty having taken into consideration the long and faithful services of the following officers, viz.:—Colonel Second Commandant Hunt, Lieut.-Colonels Browne and Fosbroke, have extended the boon of full-pay retirement of their respective ranks under the provision of Her Majesty's Order in Council of 13th November, 1858. Brevet-Major T. V. Cooke, has been appointed musketry instructor at Portsmouth. Captain Adair has been ordered to proceed forthwith to Portsmouth head-quarters for embarkation on board Her Majesty's ship Excellent, to enable him to receive instruction in naval gunnery. A detachment consisting of First Lieutenant Bunce, two sergeants (one as rifle instructor) two corporals, one drummer and bugler, and 25 privates, embarked on Tuesday at 10 a.m., from the Royal William Victualling-yard, on board H. M.'s ship Royal Adelaide.

51st Light Infantry. Captain Mason and Lieutenant Hamilton have sick leave home. Lieutenant Thompson is on his way home from Bombay in charge of detachments.

52nd Light Infantry. A letter from Sealkote, under date the 23rd May, says:—"At this moment the chief topic of interest is a desperate murder committed on Saturday evening. The unfortunate victim is a private named Palmer of H.M. 52nd, who was shot dead about 8 p.m., while we were sitting at mess. Many heard the report of a pistol, and exclaimed, 'Is it murder or suicide?' while some soldiers passing near the spot, close in front of the Rev. Phelps' house, remarked, 'That sounds like a bullet.' The deceased leaves four children and a wife in service at Murree, of whom I say nothing at present, nor of the party on whom suspicion rests. Sundry bruises on the head prove that it was not suicide. The hot season has set in, and the season not very healthy." Captain C. K. Crosse has leave to Simla, from May 1st to October 14th.

54th Regiment. Captain T. S. Robin, Ensign C. S. Chap-

Digitized by Google

man, and 88 men, have embarked for Calcutta on board the Surrey at Gravesend.

55th Regiment. Lieutenants Morgan and Justice have appeared before a Board this week for examination as to their fitness for promotion to the rank of captain. The regiment moves on Tuesday from Cove Common to the South Camp, Aldershot.

61st Regiment. Ensign Dashwood has received an extension of leave to the 31st of August.

70th Regiment. Major T. E. Mulock has leave to England for 18 months.

73rd Regiment. We regret to have to announce the death at Dinapore, on the 25th ultimo, of Dr. Edward Booth, Surgeon of H.M.'s 73rd Foot, from cholera, after an illness of only nine hours.

75th Regiment. Lieutenant F. F. Daniel, Ensign J. J. Buckle, Ensign A. F. Leatham, and 93 men, have embarked for Calcutta on board the Surrey at Gravesend. With regret we record the death of Assistant-Surgeon Reid, which event took place on the 26th of May. Since the departure, last cold season, of Dr. Domenichetti to England on leave, the deceased took the medical charge of the regiment, and continued to hold it up to a few days previous to his death. When the cholera set in amongst the men, the duties of Dr. Reid became arduous in the extreme, and day and night he was to be seen constantly in his hospital. His unremitting attention, combined with his anxiety on the occasion, brought on an intermittent low fever, which, from his persisting in his attending the sick, graduated into typhus, which rapidly ended his life.

77th Regiment. Lieutenant J. L. Davids has leave to England under new rules.

86th Regiment. Lieutenant Saunders is about to exchange into another regiment.

88th Regiment. Quartermaster M. Evans, with the sanction of Government, has leave to Cashmere, from May 1st to August 31st.

93rd Highlanders. Captain W. D. Macdonald has leave to England for 18 months, and Lieutenant G. F. Robertson to Cashmere, from May 2nd to August 2nd.

97th Regiment. Lieutenants J. Morgan and J. W. Shaw are on leave to England under new rules.

Rifle Brigade (3rd battalion). Lieutenant E. Fortescue is on leave to the Punjab, from May 1st to July 15th. —We are sorry to record the death of Lieutenant Myers, of the 2nd battalion, who, while out shooting in the Simla Hills, missed his footing, was precipitated down a "khud" some three hundred feet deep, and died from the effects. By his death Ensign Lord Edward Cavendish, of the 1st battalion, obtains his lieutenancy without purchase. Brevet-Major Nixon, 1st battalion, is on leave from Aldershot, from the 18th inst. to the 31st of August.

4th Depôt Battalion, Canterbury. The annual sports and games of the 4th Depôt Battalion, which are always held immediately before the departure of the drafts for India, took place on Tuesday, the 10th, under the patronage of Colonel Armstrong, C.B., and the officers of the battalion. The day was fine, and the large gathering of soldiers and visitors gave increased beauty to the far-famed cricket-ground of St. Lawrence. The games commenced punctually at half-past 1, and continued with great spirit until evening set in.

The Army Gazette.

WAR OFFICE, PALL MALL, JULY 17.

4th Regiment of Light Dragoons—Captain Fiennes Cornwallis to be Major, by purchase, vice the Hon. Charles James Keith-Falconer, who retires; Lieutenant Warden Sergison to be Captain, by purchase, vice Cornwallis; Cornet Theophilus Gist to be Lieutenant, by purchase, vice Sergison.

7th Light Dragoons—Lieutenant William Edward Shaw, from the 18th Light Dragoons, to be Lieutenant, vice Giles, whose transfer from the 14th Light Dragoons has been cancelled.

Royal Artillery—Assistant-Surgeon George Evans, from the Staff, to be Assistant-Surgeon, vice Cumming, deceased.

Royal Engineers—Brevet-Colonel Richard John Nelson to be Colonel, vice Wright, removed as a General officer; Brevet-Major Paul Bernard Whittingham to be Lieut.-Colonel, vice Nelson; Second Captain Richard Hugh Stotherd to be Captain, vice Whittingham; Lieutenant Constantine Phipps Carey to be Second Captain, vice Stotherd.

Grenadier Regiment of Foot Guards—Major and Brevet-Colonel Frederick William Hamilton, C.B., to be Lieut.-Colonel, without purchase, vice Brevet-Colonel Charles Algernon Lewis, promoted to the rank of Major-General; Captain and Lieut.-Colonel and Brevet-Colonel the Hon. Henry Hugh Manvers Percy to be Major, without purchase, vice Brevet-Colonel Hamilton; Lieutenant and Captain and Brevet-Major William Andrew M. Barnard to be Captain and Lieut.-Colonel, without purchase, vice Brevet-Colonel the Hon. H. H. M. Percy; Ensign and Lieutenant and Adjutant the Hon. William Edward Sackville West to have the rank of Lieutenant and Captain; Ensign and Lieutenant Henry Osborne Goold to be Lieutenant and Captain, without purchase, vice Brevet-Major Barnard; Richard Byam Martin, Gentleman, to be Ensign and Lieutenant, by purchase, vice Goold.

Coldstream Regiment of Foot Guards—Captain FitzRoy William Fremantle, from the Rifle Brigade, to be Lieutenant and Captain, vice Frederick Horace Arthur Seymour, who exchanges.

11th Foot—Ensign Henry Ralph Lewis to be Lieutenant, by purchase, vice Dixon, who retires.

13th Foot—Assistant-Surgeon John Clarke, M.D., from the Staff, to be Assistant-Surgeon, vice O'Brien, appointed to the Staff.

15th Foot—Lieutenant William Starke to be Captain, by purchase, vice William Henry Eliot, who retires; Ensign John Joseph Forsyth Grant to be Lieutenant, by purchase, vice Starke.

32nd Foot—Lieutenant Henry Elkins Bennett to be Captain, by purchase, vice Brevet-Major Magenis, who retires; Ensign Arthur Bishop to be Lieutenant, by purchase, vice Bennett.

33rd Foot—Ensign James Maurice Shipton to be Lieutenant, by purchase, vice Willis, promoted.

59th Foot—Lieutenant William Russell Russell to be Captain, by purchase, vice Andrew H. Russell, who retires; Ensign Frederick Florence Murray, to be Lieutenant, by purchase, vice Russell Russell.

65th Foot—Charles Yarburgh Gold, Gent., to be Ensign, without purchase, vice Talbot, promoted.

72nd Foot—The transfer of Ensign Walter Douglas Somerset Campbell from the 79th Foot, as stated in the *Gazette* of the 3rd of July, 1860, has been cancelled.

74th Foot—Lieutenant Norman Scalpa McCrummen, to be Captain, by purchase, vice Venables, who retires.

Rifle Brigade—Lieutenant and Captain Frederick Horace Arthur Seymour, from the Coldstream Guards, to be Captain, vice Fremantle, who exchanges.

DEPÔT BATTALION.

Lieut.-Colonel Fowler Burton, from the 97th Foot, to be Lieut.-Col., vice Brevet-Colonel R. C. H. Taylor, retired upon half-pay.

UNATTACHED.

Lieutenant Frederick Richard Solly Flood, from the 53rd Foot, to be Captain, without purchase.

COMMISSARIAT DEPARTMENT.

Commissariat Clerk Joseph Frederick Wallett Des Barres, to be Deputy Assistant-Commissary General; Commissariat Clerk William Fryer to be Deputy Assistant-Commissary-General.

HOSPITAL STAFF.

Assistant-Surgeon Thomas Michael O'Brien, from the 13th Foot, to be Assistant-Surgeon to the Forces, vice Clarke, appointed to the 13th Foot; John Richard Thomas, Gent., to be Assistant-Surgeon to the Forces, vice Evans, appointed to the Royal Artillery.

CHAPLAIN'S DEPARTMENT.

The Rev. Thomas Carter Stanley, to be Chaplain of the Fourth Class.

BREVET.

Colonel Charles Wright, of the Royal Engineers, to be Major-General, vice Colton, deceased.

Captain William Peddie, on half-pay unattached, Staff Officer of Pensioners, retired on full-pay, to be Major in the Army, the rank being honorary only.

The commission as Brevet-Major of Brevet-Major William Malcolm Leckie, 13 Regiment Bombay Native Infantry, to be antedated to the 20th of July, 1858.

The undermentioned promotions to take place consequent on the promotion of Colonel W. B. Ingilby, Royal Artillery, to be Major-General, in succession to Lieut.-General Dyneley, C.B., Royal Artillery, who died on the 21st of June, 1860:—

Lieut.-Colonel Henry Edward McGee, 3rd West India Regiment, to be Colonel.

Major Henry J. Savage, 91st Foot, to be Lieut.-Colonel.

Captain Charles Edward Astell, half-pay 45th Foot, Staff Officer of Pensioners, to be Major.

SHORNCLIFFE CAMP.

On Monday last Nos. 8 and 9 Batteries of the 4th Brigade Royal Artillery, marched from Shorncliffe to the neighbourhood of New Romney, where a range for shot and shell practice has been laid out. The batteries were in complete field-service, with tents and every requisite for a stay of a month. The weather was very wet and the whole of the men got drenched before they arrived on the ground and pitched their tents. The batteries were under the command of Lieut.-Colonel Mountain, and comprised the following: 10 officers, 40 non-commissioned officers, 239 gunners and drivers, 120 horses, 12 guns, and 12 ammunition waggons.

No. 5 Battery of the 4th Brigade march on Monday next for Gravesend, for the purpose of taking over 6 12-pounder Armstrong guns, in exchange for the field battery of 9-pounders they have now. This will increase the Armstrong guns now at Shorncliffe to twelve, No. 7 Battery being already armed with these guns. The whole of the gunners of the other batteries, Nos. 8 and 9, have been put through a course of Armstrong gun drill.

BARRACK-MASTERS AND STORE-KEEPERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Being a subscriber to your paper, I have read a letter, signed by a "Civil Officer," on the question of salutes as affected by a recent Government Order. I am a barrack-master, and I need not inform you that all the officers of that department are retired military officers. Some of us are still on the half-pay list, and many are distinguished and decorated. I do not of course take into the account store-keepers acting in the capacity of barrack-master. I am sure I am speaking the sentiments of my brother officers in the department, when I assure you that we would infinitively prefer to resign uniform and salute together than be classed with store-clerks and the glorified carpenters who have of late been put into uniform, and by whom the Order has no doubt been caused. It is difficult to arrive at the necessity of a uniform for individuals whose duties do not bring them into contact with the troops;* and what earthly occasion there can be for a clerk of works to rush into gold-striped trousers, and clank about with a steel scabbard, cannot well be imagined. It is these prostitutions of uniform which bring the service into contempt with both military and civilians; and it is very painful to old officers to be considered in the same category, or to wear anything approaching to the dress of *Messieurs les gratte-papiers*.—I am, &c., AN EX-LINESMAN.

CLERKS IN MILITARY STAFF OFFICES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—On the 21st September, 1858, a Circular was issued by the War Department, announcing that clerkships in military staff offices were in future to be filled from the ranks of the Army, an arrangement which was intended to confer equal advantages to all concerned. But judge, sir, of the acute disappointment and mortification subsequently experienced by many deserving non-commissioned officers who have successfully passed the required examination, and obtained 2nd and 3rd class clerkships under the provisions of that Circular, on its being now notified to them that they are not even recognised as staff sergeants; and, consequent thereon, some of these men have been unable to procure barrack accommodation for their families; and others have been compelled to live as well as mess in the barrack-room! Now, sir, can this be just? Is it really possible that the authorities intend the rank of any staff clerk to be actually inferior to that of their comrades the regimental orderly-room clerks, who rank as staff sergeants of the 2nd class. If so, the objects of the War Office Circular above referred to would in many instances be entirely defeated; as, instead of a staff clerk's extra pay being a further inducement for men to qualify themselves for situations of this description, or an additional reward for the onerous and responsible duties which devolve upon clerks employed in military staff offices, it would be more than absorbed at those stations where there are no sergeants' quarters in meeting the extra expense entailed upon their families by a residence in lodgings.

I merely wish to draw attention to the subject in order to show that a change is now much needed in the regulations which relate to military clerks. And is it not fair and reasonable that all staff clerks should expect to be recognised as staff sergeants? More especially after giving up the certainty of ultimately benefiting themselves by promotion to the higher staff ranks, or in other ways, had they remained in their former regiments, all of which advantages a non-commissioned officer necessarily relinquishes on succeeding to a staff clerkship under the provisions of the War Office Circular, 321.

I humbly and earnestly hope, sir, the day is not far distant when the position of all military clerks will be ameliorated by giving them an occasional increase of rank up to a certain maximum, which might be regulated according to their length of service and the relative importance of their duties.—I am, &c., X.Y.Z.

* If our correspondent refers in these remarks to military store-keepers, we can assure him from our own knowledge that in war-time their duties bring them into close contact with troops, and that they are anything but *gratte-papiers* in the field.—[ED.]

MR. FERGUSSON AND CAPTAIN TYLER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—If you or some of the correspondents of your valuable journal would explain the real state of the controversy between Mr. Fergusson and Captain Tyler, it would be a great benefit not only to professional men but to the public in general, particularly at a moment when a sound system of fortification is a matter of national interest. Which is the true principle, the angular bastion or the circular fort?

As far as I understand the question, Mr. Fergusson claims a superiority chiefly on three points: cheapness, an overwhelming fire, inaccessibility to enfilade. As to cheapness, the cost of a hexagon with a front of 400 yards, according to the systems of Vauban, Cormontaigne, Carnot, Choumara, and Montalembert, would seem to be, roughly estimated, 500,000*l.* for the two first, and 600,000*l.*, 550,000*l.*, 1,800,000*l.*, respectively, for the others, the armament not included. Mr. Fergusson's earthen fort, 2000 yards in diameter, of four tiers, and a fausse braye making another tier, with a wet ditch and an armament of 1000 guns (not Armstrong) would appear to cost about 120,000*l.*, or, with masonry casemates, for garrison and guns, 210,000*l.* This calculation was, I imagine, made many years ago, when labour was cheaper than it now is; besides this difference of cost, Mr. Fergusson's system is said to possess the additional superiority of being independent of all outworks.

I am anxious to learn whether the claim of exemption from enfilade, put forth by Mr. Fergusson, has been refuted or not; and lastly whether the immense superiority of fire which that gentleman maintains he can bring to bear on any point from which the assailants could direct an attack, continues to be a fact, or whether it has been refuted. Sir Charles Napier (the general) makes the following remark on this portion of the question: "And he (Mr. Fergusson) says, rightly in my opinion, that no works can be thrown up under such a fire."

I have heard it urged that Armstrong's guns would destroy any advantages which Mr. Fergusson's circular system might be supposed to possess, and would tear his earthen fort to pieces. I beg leave to inquire if these guns will not equally destroy a fortification of masonry, and especially whether Armstrong's guns fired from Fergusson's fort will not overwhelm the works and batteries which the besiegers might attempt to construct.

I hope some of your correspondents will be so kind as to throw a little light on these points.—I am, &c., J.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I am rejoiced to find that there is a fair chance of this somewhat ridiculous correspondence coming to a close, inasmuch as in his last letter Captain Tyler tacitly admits all I have been contending for, and now wishes to change the subject and to drag me into a controversy on the general merits of my system as compared with others. This I decline to enter upon at present; and on leaving the subject, merely beg leave to remark that so far from indulging in vague generalities, I have adhered throughout this correspondence to a simple but emphatic denial of Captain Tyler's assertion, that I had changed my views on the subject of fortification.

In what I have said I have not touched on the scientific question at all, and have not the smallest possible intention of doing so in a newspaper controversy. If any one wishes to know what my views on the subject are, they will find them in the various works I have published during the last ten years, where they are stated as clearly and as forcibly as I can find words to express them in. From these I have never seen any reason to depart in the slightest possible degree.

The altered forms which must be employed to meet the altered circumstances of the artillery question, cannot be shown without diagrams and drawings, and as these are inadmissible in a weekly journal, I could not if I would bring them forward in this place. These, however, are comparatively unimportant; and if Captain Tyler likes to amuse himself and his friends by criticising them, there must be little harm or good done, and he can please himself in this respect.

As I said in my last, at my own convenience, and at my own good time, I will publish what I conceive these altered forms should be. I will not do it at Captain Tyler's bidding or invitation, but when I think good can be done by such publication. In the meanwhile all I now care to do is to reiterate that the assertion that I have changed my views on this subject is a pure invention of Captain Tyler and his associates, without any foundation in fact, so far as I know; and I do think it ought to be allowed that I may know something on this particular subject, whatever it may be thought I know on others.

One word in conclusion addressed to the Council of the United Service Institution. They have refused distinctly and in writing to allow me to insert a few words in the proofs of the lecture I delivered last year, though I solemnly assert that the words were uttered by me, but omitted by the short-hand writer. The result is—as Captain Tyler's lecture shows—that an important portion of their report is capable of a construction diametrically opposed to my meaning. They are also—I am informed—going to publish their own short-hand writer's report of what I said on the 21st May last, though they have my written protest against its correctness, and, I again reiterate, misrepresent my views entirely. They know from their correspondence, if from no other source, that I have not changed my views, yet they are going to lay themselves open to the reproach of publishing what is incorrect, knowing it to be incorrect, and this merely to gain for their associate a little temporary triumph over a civilian rival. Yet they know that the truth must and shall eventually come out, and when it does will they not then be in a position which, as officers and gentlemen, they would do well to avoid?—I am, &c.,

J. FERGUSSON.

[The controversy may be considered at an end, so far as the columns of this journal are concerned.—ED.]

The Commander-in-Chief has ordered that musketry instruction shall be suspended throughout the Aldershot division until the 1st of October. The newly-formed 2nd battalion of the 25th Regiment will, however, practise on days when there are no divisional or brigade field-days.

THE NAVY.

ADMIRALTY, JULY 16.

PROMOTIONS AND APPOINTMENTS.

Lieutenants—Bernard J. Cooper to the Hannibal; Thomas C. Bruce and W. H. Wright to the Royal Adelaide; G. D. Bushe to the Orion; J. D'Arcy Irvine to the Britannia.

Surgeon—Dr. Daniel Finucane to the Hornet.

Assistant-Surgeons—George H. Maunsell (acting) to the Hornet; W. H. Carter to the Cumberland; Andrew C. Johnston to the Monarch; James N. Anderson (additional) to the Fisgard.

Paymasters—J. Colwell promoted to the rank of paymaster-in-chief; Henry J. Kelly to the Castor; William Drury to the Royal Adelaide; Wm. H. Hills (additional) to the Impregnable; James Lewis (additional) to the Britannia; Hugh H. Burmistan (additional) to the Cambridge; E. Thorne to the St. Vincent.

Assistant-Paymaster—Francis St. J. O'Neill to the Royal Adelaide.

Mate—A. B. Wodehouse to the Marlborough.

Assistant-Surgeon—W. J. Eames to the Bloodhound.

Assistant-Engineers—John Marsh (1st class) to the Fisgard, as supernumerary; F. C. Ford (2nd class) in Skipjack; J. W. Nott (2nd class) in Urgent; W. C. Moreton (2nd class) in Hecate; E. Dooley (2nd class) in Furious; M. Litt (acting, 2nd class) in Cumberland for Myrtle; H. W. White (acting, 2nd class) in Niger; John Taylor (acting, 3rd class) to the Indus, for service in the Confiance.

Clerk—Alfred P. Freeman to the Sanspareil.

Assistant-Clerk—William Flower to the Emerald.

JULY 19.

Masters—Denton H. Speer, to the Cossack; E. T. Jameson, to the Mersey.

Paymasters—William Weaver, advanced to the First Class; George J. Starr, advanced to the Second Class; E. W. M. Millman, advanced to the Third Class; E. B. Walker, to the Porcupine.

Acorn, 12, sailing-sloop, Commander R. B. Pearse, was at Amoy when the last mail left.

Actæon, 26, surveying-vessel, Commander J. Ward, was on the north coast of China by the latest accounts.

Adventure, 2, screw troop-ship, Commander E. Lacy, was in the Canton river on the 22nd of May.

Algerine, 1, screw gun-vessel, Lieutenant-Commander W. Arthur, was on the north coast of China by the latest advices.

Ariadne, 26, screw-frigate, Captain E. W. Vansittart, in company with H.M.S. Hero, was spoken on the 12th inst., in latitude 49° north, and longitude 11° west.

Assistance, 2, screw troop-ship, Commander C. J. Balfour, was lost in Deep Bay in June.

Atlas, 91, is to be launched this day at Chatham, just before the top of high water; and it is expected that some of the Lords of the Admiralty will be present on the occasion.

Avon, paddlewheel steam-tender, G. Day, second master commanding, got up steam on Monday in Hamoaze and proceeded to Devonport dockyard, where she took on board Commander Paul, assistant-master-attendant, and a party of riggers and men from the ordinary, 47 in all, and left for Pembroke to jury-rig and navigate the screw steam-sloop Pelican, 17, to Plymouth.

Banterer, 1, gun-boat, Lieut.-Commander H. P. Knevitt, was at Hong Kong on the 23rd of May.

Barracouta, 6, paddle-steamer, Commander William Wood, is ordered to the West Indies.

Beagle, 4, screw gun-vessel, Commander E. Hay, was at Hong Kong on the 23rd of May.

Blenheim, 60, screw, Captain E. Tatham, sailed from Yarmouth (Isle of Wight) on Sunday morning last, and arrived at Portland on the evening of the same day. This ship, it will be remembered, has just been turned out of Portsmouth dockyard, after having undergone what was said to be a thorough repair. Great complaints, however, are made of the slovenly manner in which her ports, pumps, and pipes have been fitted by the dockyard artificers. The Blenheim was required to be repaired with all dispatch, and "task and job" work was resorted to for the sake of expedition, which has proved to be, in this instance as well as in many others, a failure. We recommend any of the members of the Royal Commission appointed to inquire into the causes of the great expenditure of our dockyards to visit the Blenheim in Portland Harbour and see what has been done for the money spent upon her at Portsmouth. A personal inspection will add a considerable stock of useful information to that already possessed by the Committee, and materially assist them in their labours. It is to be hoped that Admiral Pelham and Commodore Yelverton, who inspected the Blenheim, and mustered ship's company at half-past 1 on Tuesday last, had their attention directed to the defective workmanship alluded to. These gallant officers complimented the R. N. C. volunteers on board for their good behaviour, and likewise Lieutenant Stratton for the cleanliness and good order of the ship, considering the short time it had been under his care after leaving the dockyard. We have not heard their opinion of the workmanship put into the Blenheim at Portsmouth, but as the Lords of the Admiralty are expected at Portland this day (Saturday), it is hoped that the defective workmanship may not escape their Lordships' scrutiny. After the inspection by Admiral Pelham and Commodore Yelverton on Tuesday the Blenheim coaled alongside the Pitt coal depôt. The ship is going round to Pembroke, where she is stationed, the married men having been allowed free passage for their wives by Captain Tatham.

Bouncer, 2, gun-boat, Lieut.-Commander A. R. Arthur, was at Hong Kong on the 23rd of May.

Bustard, 2, gun-boat, Lieut.-Commander F. W. Hallowes, was at Ningpo when the last mail left.

Camilla, 16, sloop, Commander G. T. Colville, was at Shanghai by the last advices.

Caradoc, 2, paddle steam-vessel, Lieutenant-Commander C. M. Buckle, left Malta on the 8th inst., with dispatches and mails for the fleet at Navarino.

Centaur, 6, paddle-steamer, Commander E. D. D. Aplin, was on the north coast of China when the last mail left.

Chesapeake, 51, screw-frigate, Captain G. O. Willes, flagship of Vice-Admiral Hope, was at Hong Kong on the 23rd of May.

Clown, 1, gun-boat, Lieut.-Commander W. F. Lee, was at Hong Kong on the 23rd of May.

Cockchafer, 1, gun-boat, Lieut.-Commander H. L. Holder, was at Hong Kong on the 23rd of May.

Constance, 50, sailing-frigate. The operation of cutting this vessel in two parts for the purpose of lengthening her, prior to her being converted into a screw steamer, has been successfully performed at Devonport.

Coquette, 4, screw. This vessel has been further opened forward, and her fore-knee has been taken out, which, however, is in a perfectly sound condition. Her inside knee is in a bad state, and will require renewal. Mouldings are being made for new timbers, apparently with the intention of having her thoroughly repaired. She may be made a serviceable vessel, but at a great cost.

Coromandel, 5, steam-vessel, tender to Chesapeake, was at Hong Kong on the 23rd of May.

Cruiser, 17, screw steam-sloop, Commander J. Bythesea, was on the north coast of China when the last mail left.

Cygnet, screw gun-vessel, in the steam-basin, Portsmouth, built by Wigram, of Northam, is expected to go into dock shortly for examination. She is built upon similar lines, and under a similar contract, as that under which the Pelican was constructed by White of Cowes: both vessels receiving their copper from Government, an arrangement which allows of an easy examination.

Dauntless, 31, screw, Captain Leopold G. Heath, C.B., arrived at Spithead from Portland on Tuesday last. She weighed anchor on Wednesday, and left for the westward.

Dee, paddle, Master-Commander Pullen, has returned from Portsmouth to Woolwich, after landing boilers, machinery, &c., at the first-named yard.

Doris, 32, screw-frigate, Captain Heathcote, left Malta on the 7th inst., to join the admiral in Navarino Bay.

Dove, 2, gun-boat, tender to the Actæon, Lieutenant C. J. Bullock, was on the north coast of China by the last accounts.

Drake, 1, gun-boat, Lieutenant-Commander, A. R. Blane, was on the north coast of China by the latest advices.

Emerald, 50, screw steam frigate, Captain A. Cuming, is now in dock at Keyham steam-yard. She grounded at Bermuda, and recently at Barn Pool; but the only apparent damage sustained is the loss of some 60 feet of copper off her false keel.

Encounter, 14, screw steam-ship, Captain Roderick Dew, was on the north coast of China when the last mail left.

Fearless, tender to the steam-ordinary, sailed from Sheerness on Monday for Greenhithe, with men to navigate the Castor training-ship of Coast Volunteers to the river Tyne.

Fire Queen, paddle, Master-Commander Paul, steamed out of Portsmouth harbour on Monday, and proceeded down the Western Channel to test boilers and machinery on the completion of her repairs.

Firm, 1, gun-boat, Lieutenant-Commander W. R. Boulton, was at Shanghai when the last mail left.

Flamer, 2, gun-boat, Lieutenant-Commander H. M. Bingham, arrived at Hong Kong from Portsmouth on the 11th of May.

Forester, 2, gun-boat, Lieutenant-Commander, H. J. Innes, was at Foochow when the last mail from China left.

Frederick William, 91, screw, is now under the sheers in the steam-basin, Portsmouth, hoisting in her funnels, &c.

Furious, 16, paddle steam-frigate, Captain O. J. Jones, was at Shanghai when the last mail left.

Fury, 6, paddle-steamer, Acting-Commander J. C. Wilson, was on the north coast of China according to the latest accounts.

Gorgon, 6, paddle, Commander Bedford C. T. Pim, arrived at Spithead on Saturday evening last from the West India station. She has made a long passage, owing to her boilers being in a very defective state. Twelve naval invalids from ships on the station have come home as supernumeraries in her. She has also brought home three convicts from Bermuda, one on a charge of murder. The Gorgon's defects will be made good at Portsmouth.

Grasshopper, 2, gun-boat, Lieutenant-Commander J. C. Tucker, arrived at Hong Kong from Portsmouth on the 14th of May.

Greyhound, 17, screw steam-sloop, Commander T. F. Sullivan, at Devonport, is rapidly refitting for further service. Her crew will be paid wages before she proceeds to sea.

Growler, gun-boat, Lieutenant and Commander H. E. Crozier, left Malta to resume her station at the mouths of the Danube on the 25th of June.

Hannibal, 91, screw-liner, Captain Farquhar, bearing the flag of Rear Admiral Mundy, C.B., was in the Bay of Naples on the 14th inst.

Hardy, 2, gun-boat, Lieut.-Commander A. G. Bogle, arrived at Hong Kong on the 21st of May, from Portsmouth.

Harrier, 2, steam-vessel, is in No. 2 dock, Portsmouth, being coppered, and undergoing a thorough repair, caulking, &c.

Haughty, 2, gun-boat, Lieut.-Commander G. D. Broad, was at Hong Kong on the 23rd of May.

Havock, 2, gun-boat, Lieut.-Commander C. Fairholme, was at Hong Kong on the 23rd of May.

Hero, 91, screw-liner, Captain G. H. Seymour, C.B., with His Royal Highness the Prince of Wales on board, was spoken in 49° north and 11° west on the 12th inst.

Hesper, 2, store-ship, Master-Commander H. H. Harris, was at Hong Kong on the 23rd of May.

Highflyer, screw-frigate, Acting-Captain W. A. J. Heath, was in the Canton river on the 22nd of May.

Immortalité, 51, screw, is expected to take up a berth alongside the Pitch-house jetty, Portsmouth, previous to being brought forward.

Impérieuse, 51, screw-frigate, Captain R. Maguire, Flagship of Rear-Admiral Jones, C.B., was on the north coast of China according to the last advices.

Indus, 78, has been commissioned by Captain Astley Cooper Key as the ordinary of the steam-reserve at Devonport.

Inflexible, 6, paddle-sloop, Commander G. A. C. Brooker, was at Hong Kong on the 23rd of May.

Insolent, 2, screw gun-boat, was at Hong Kong on the 23rd of May.

Intrepid, 6, screw-sloop, Commander Marryat, came into Malta harbour from Palermo and Syracuse on the 22nd June, left for the same ports on the 24th, returned from Palermo and Marsala on the 30th, and left again for Palermo on the 4th July.

Irresistible, 80, screw-liner, 400 horse-power, has been towed from the basin to harbour moorings, where she is placed in the second-class steam-reserve at Sheerness.

Janus, 1, gun-boat, Lieut.-Commander D. G. Davidson, was at Hong-Kong on the 23rd of May.

Kestrel, 1, gun-boat, Lieut.-Commander C. D. Robinson, was on the north coast of China when the last mail left.

Leven, 1, gun-vessel, Lieut.-Commander, J. S. Hudson, was at Hong Kong on the 23rd of May.

Liffey, 51, screw-frigate, Captain Preedy, C.B., which reached Malta from the Piræus of Athens on the 28th June, left again on the 6th July for Navarino, to join the admiral.

Lucifer, paddle-steamer, sailed from Portsmouth for Portland on Saturday last, with Capt. G. T. Gordon and a portion of the staff of the steam reserve.

Magicienne, 16, paddle steam-frigate, Captain J. E. Commerell, V.C., was at Hong Kong on the 23rd of May.

Megæra, screw troop-ship, Commander Henderson, refitting at Portsmouth, has berthed alongside the Malabar depôt to fill up her coal.

Neptune, 90, screw-liner, Captain F. A. Campbell, left Malta on the 7th instant to join the Admiral in Navarino Bay.

Nimrod, 6, screw-sloop, Commander R. J. Wynniatt, was at Hong Kong on the 23rd of May. This sloop has been ordered home.

Opossum, 2, gun-boat, Lieutenant-Commander G. D. Bevan, was at Shanghai when the last mail left.

Orion, 91, screw-liner, Captain Frere, having had defects made good, steamed from Hamoaze, on Friday week, into the Sound, and proceeded to sea to try her machinery. On passing Milbay she saluted the flag of Rear-Admiral Sir T. S. Pasley (who is doing duty as Commander-in-Chief), which was acknowledged by the Impregnable, 104, Captain Lord F. Kerr, in Hamoaze.

Pearl, 21, screw-corvette, Captain John Borlase, C.B., was on the north coast of China when the last mail was dispatched.

Perseverance, screw troop-ship, Commander E. R. Power, at Portsmouth, has tested her new boilers and her machinery. When ready for sea she will proceed to the West Indies and Sierra Leone, to relieve troops at the different garrisons there.

Philomel, screw gun-vessel, in No. 8 dock, Portsmouth, has been officially examined, and reported upon very satisfactorily. She is now being coppered.

Pioneer, 6, screw-sloop, Commander H. A. Reilly, was on the north coast of China when the last mail left.

Racehorse, 4, screw steam-sloop, 200-horse power, has arrived in Sheerness Harbour from Chatham, where, after coaling, she will have a trial of her engines, and return to Chatham to be fitted for the first-class steam ordinary.

Renard, 4, screw-sloop, Commander J. G. Goodenough, was at Hong Kong on the 23rd of May.

Ringdove, 4, screw-sloop, Commander R. G. Craigie, was at Hong Kong on the 23rd of May.

Roebuck, 6, screw-sloop, Acting-Commander E. C. Symons, was at Shanghai when the last mail left.

Royal Adelaide, 104, Devonport, has been commissioned by Captain W. King Hall, C.B., as a training-ship for novices and boys.

Sampson, 6, paddle-steamer, Captain G. S. Hand, C.B., was on the north coast of China when the last mail left.

Sanspareil, 70, screw-liner, Captain A. P. E. Wilmot, C.B. This vessel arrived at the Tail of the Bank, Greenock, shortly before nine o'clock on Saturday morning last, and her unexpected appearance caused great excitement among the thousands congregated at the time on the steam-boat Quay. She is a splendid ship; her officers and crew, the latter numbering 800 men, are the late crew of the Nile, so that many here will fall in with old acquaintances made during the short but pleasant stay of the Nile at the Tail of the Bank last year. The Sanspareil has been stationed at Cork for the last four months, which port she left for the Clyde on Thursday week.

Scout, 24, screw-corvette, Captain J. Corbett, was on the north coast of China, according to the last advices.

Simoom, 8, troop-ship, Commander J. M. Cooke, was at Hong-Kong on the 23rd of May.

Sirius, target-ship, hauled out of No. 1 dock, Portsmouth, on Wednesday last, and berthed alongside the Sheer jetty, to be fitted with Jones' angular plate armour, which, we have heard, is intended to protect the sides and deck of "rams," floating-batteries, &c.

Slaney, 1, screw gun-vessel, Lieut.-Commander Leet, was on the north coast of China by the latest accounts.

Snake, 4, screw gun-vessel, Commander H. Harvey, was at Hong Kong on the 23rd of May.

Snap, 2, gun-boat, Lieut.-Commander W. O. Butler, was at Hong Kong on the 23rd of May.

Snipe, screw gun-vessel, built at a private yard, and forwarded to Woolwich for completion, has been docked to undergo a complete examination.

Sprightly, steam-vessel, Master-Commander Allen, came into No. 1 dock, Portsmouth, on Wednesday last, to have her bottom cleansed and her copper rose.

Starling, 2, gun-boat, Lieut.-Commander J. H. Whitshed, was at Hong Kong on the 23rd of May.

Staunch, 2, gun-boat, Lieut.-Commander E. J. Pollard, was in the Canton River on the 23rd of May.

St. George, 90, screw-liner, Captain the Hon. F. Egerton, left Plymouth on Friday week for Liverpool, and has arrived in the Mersey.

Thunder, 14, floating-battery, 150 horse-power, has undergone at Chatham a careful examination, in order that the Admiralty may be made acquainted with her condition. With the exception of some portions of her interior the battery is in a very sound condition, with scarcely any signs of decay. The bottom, which was found to be in an exceedingly foul state, is now being cleaned and made ready for being coated with Peacock's patent composition for preserving the hull and destroying the marine worm.

Urgent, 6, screw store-ship, Commander Hire, arrived at Hong Kong from Portsmouth on the 12th of May, after a long passage of exactly four months.

Victor Emmanuel, 91, screw-liner, Captain Clifford, C.B., which arrived at Malta from Corfu on the 26th of June, left on the 2nd of July to join Rear-Admiral Mundy at Palermo, and proceed thence to Naples.

Victoria and Albert, 2, Her Majesty's paddle-yacht, Capt.

Digitized by Google

Hon. J. Denman, steamed out of Portsmouth harbour on Monday, and proceeded to her moorings in Cowes Roads, in order to be at the disposal of Her Majesty.

Viper, 4, screw-gun-vessel, Commander Hewett, was paid off on Saturday last, and has been placed in the steam ordinary.

Volcano, floating factory, is in No. 4 dock, undergoing extensive repairs. Her factory has been landed.

Vulcan, 6, screw store-ship, Commander A. C. Strode, was at Hong Kong on the 23rd of May.

Watchful, 1, gun-boat, Lieut.-Commander F. W. Inglefield, was in Canton river on the 22nd of May.

Weazel, 1, gun-boat, Lieut.-Commander W. Howorth, arrived at Hong Kong on the 17th of May from Portsmouth.

Wellington, 72, has been commissioned by Commander F. Cannon at Devonport for the sailing ordinary guardship.

Woodcock, 1, gun-boat, Lieut.-Commander G. S. Bosanquet, was on the north coast of China when the last mail was dispatched.

DEATH OF LIEUTENANT JAMES PRATT, R.N.—An inquest was held on Wednesday, before F. H. Gell, Esq., on the body of Lieutenant James Pratt. The medical evidence went to prove that the pistol was fired direct into the mouth, or at least very close to it, the ball passing through the carotid artery and coming out behind the ear, causing instant death. The coast-guard men stated that it was the duty of deceased to examine the fire-arms, and, as he was very careless in handling them, that the pistol might have gone off while he was looking into the barrel. With this evidence, and with no assignable motive to account for the commission of the act, an open verdict was returned to the following effect: "That James Pratt had died from the effect of a pistol shot; but whether discharged by the deceased intentionally, or whether it exploded accidentally, there was not sufficient evidence to show."

The Lords of the Admiralty have selected Captain W. K. Hall for the command of the Royal Adelaide, training-ship, at Devonport. Captain Hall is one of the few officers who, in a comparatively short space of time has, without a particle of political interest, raised himself to the rank which he at present enjoys. He served in the Benbow during all the operations on the coast of Syria; he was employed throughout the Russian war, and was the officer who received the sword of the Governor of Bomarsund, and was subsequently flag-captain to Sir Michael Seymour on the coast of China. It is stated that the Royal Adelaide is to be fitted for the purpose of training boys and novices; and from what we know of Captain Hall, we undertake to say that those who pass through his hands to join sea-going ships will lose all claim to the latter appellation.

The authorities at Whitehall are using every possible exertion to increase the supply of good sound timber at our various dockyards; and by late advices which we have received from the Mediterranean, we find that the Kertch, gun-boat, had returned to Malta from Tunis on the 4th of July, with Mr. Ladd, the master-shipwright of Malta dockyard, who has visited Barca and other places in the regency of Tunis, to report upon the forests thereabouts, and whether timber for shipbuilding is to be found. We hear that what was found is some 30 miles inland, with very bad roads to the sea-shore. Our consul at Tunis could not be better employed than in exercising his influence with the Bey to induce him to employ the superabundant population in roadmaking, and thus keep them from following the mischievous example set them by their more eastern friends in the districts of the Lebanon.

The squadron under the command of Vice-Admiral Martin, consisting of the Marlborough, Queen, Cressy, James Watt, St. Jean d'Acre, and Boxer, were on the 5th inst. at Navarino, exercising their crews, for which that anchorage offers so many facilities. A bold and barefaced robbery had been committed by a Greek of the place on one of the youngsters, to whom he had hired a horse. The delinquent followed on foot, and after getting well out into the open country, demanded the midshipman's watch and chain, to which some gold charms stood attached, and the possessor stoutly resisted until a huge knife and a brace of pistols were produced, when of course further resistance with such a desperate adversary would have been madness. The miscreant had not been detected.

Lieutenant William Frederick Johnson (1855), late First Lieutenant of H.M.S. Pioneer on the China station, has been selected by General Sir Hope Grant, G.C.B., Commander-in-Chief of the expeditionary army, to act as his naval aide-de-camp.

Lieutenant G. W. Gregorie (1857), lately serving on board H.M.S. Hannibal, flag-ship of Rear-Admiral Mundy, in the Mediterranean, has been invalided to England.

Mr. W. P. Hains, master of the screw steam-sloop Lapwing, on the Mediterranean station, has met with a serious accident, having fractured his leg. Mr. Hains has been temporarily superseded by Mr. E. W. Creak, second-master of the Liffey.

Mr. William Darley, superintending measurer at Sheerness Dockyard, has been appointed acting foreman of that yard, to superintend the hired men, vice Tucker, established foreman at Woolwich.

Several gun-boats, built at the yards of Messrs. Wigram, Russell, or Green, at Blackwall, and forwarded to Deptford, have been examined by competent officers, and are stated to be in every respect satisfactory as regards materials and workmanship; but we have reason to believe that this circumstance will not in any way interfere with the proceedings which the Lords of the Admiralty have thought fit to institute against those shipbuilders who broke their terms of contract in the construction of the gun-boats for the Russian war.

Workmen are employed at Woolwich in preparing the keel of a new 91-gun screw man-of-war, to be named the Caledonia, which is ordered to be laid down on the slip from which the Anson, steam-vessel, will be launched during the month of August.

In reply to an application forwarded by the clerks employed in Her Majesty's naval yards, soliciting the indulgence of 28 days' leave of absence as an annual relaxation from duty, a Circular Memorandum was lately forwarded to the several establishments from the Board of Admiralty, announcing that their Lordships were pleased to accede to the request.

The arrival of the Channel fleet, consisting of eleven sail-of-the-line, in Bantry Bay, on Saturday, has created a considerable stir in that locality, and a demand for fresh provisions has given a great impetus to the beef trade. One dealer slaughters daily twenty head of cattle for the supply of the fleet.

Sir William Snow Harris, F.R.S., a member of the Royal Western Yacht Club, was on the 14th instant elected an honorary member of the Royal Yacht Squadron. The noblemen and gentlemen of the squadron consider that Sir William has by his scientific exertions rendered important services to the naval interests of the country.

PROGRESS OF THE PRINCE OF WALES.—Captain Wilson, commander of the Great Britain, arrived in London from Montreal, reports having exchanged signals with Her Majesty's ship Hero, having on board His Royal Highness the Prince of Wales and suite, on Wednesday the 11th inst., at noon, in lat. 49° 45′ N., long., 9° 15′ W., accompanied by the Ariadne steam-frigate.

THE COAST-GUARD FLEET.—The fleet of blockships now at anchor in the harbour of Portland consists of the following vessels:—The Colossus, 80, Captain Francis Scott, C.B., bearing the flag of Commodore Yelverton; the Majestic, 80, Captain William R. Mends, C.B.; the Cornwallis, 60, Captain George G. Randolph; the Ajax, 60, Captain John M. N. Boyd; the Edinburgh, 60, Captain Edwin C. T. D'Eyncourt; the Hogue, 60, Captain Reginald J. J. G. Macdonald; the Pembroke, 60, Captain Edward P. Charlewood; the Hawke, 60, Captain W. Crispin; the Blenheim, 60, Captain E. Tatham; the Russel, 60, Captain G. Wodehouse; the Dauntless, 31, Captain Leopold G. Heath. The screw steam-tender Argus, Commander G. T. S. Winthorp, and the paddle-wheel steam-vessel Lucifer are also at anchor. It was, we understand, with difficulty some of these ships made up their crews from the revenue cutters and other sources.

NAVAL COURTS-MARTIAL.—On Monday last courts-martial were held on board the flag-ship Impregnable, 104, in Hamoaze, on John Roberts and Enos Dyer, able seamen, and Henry Schilling and Henry Cocking, ordinary seamen, belonging to the screw steam-ship Orion, 91, Captain John B. Frere, for insubordination. Captain A. C. Key, C. B., presided. John Roberts was charged with having, on the 4th inst., refused to scrub a hammock, and, when brought before Commander Baker, of continuing to refuse, and of saying "that he and others agreed to do no more work;" and, when brought before Captain Frere, of still persisting and saying, "He din't care a —— for all the captains and admirals in the service." The prisoner denied having used this language, but pleaded "Guilty" in other respects, and was sentenced to receive 50 lashes, to be imprisoned and kept to hard labour for two years, and then dismissed the service. Henry Cocking, charged with the same offence, with the exception of the bad language, pleaded "Guilty," and was sentenced to receive 50 lashes and be imprisoned 18 months. The other two pleaded "Guilty," and were sentenced to receive 50 lashes and be imprisoned 12 months.

ROYAL NAVAL COLLEGE, PORTSMOUTH.—The following officers passed at the last examination, on the 11th instant, for lieutenants:—Acting Lieutenants W. T. Stevenson, C. D. Broughton, C. B. Powell, H. R. Holmes, Henry Fox, H. I. Cair, A. F. Powlett, G. K. Trefusis, E. Pilkington, R. H. D. King, C. J. Vidal, P. R. Dick, S. Macdougall, A. R. Wodehouse, Hon. V. A. Montague, J. S. Way, R. B. Lambert, and R. H. Boyle.

THE ROYAL NAVAL BENEVOLENT SOCIETY.—On Monday afternoon the quarterly meeting of the Royal Naval Benevolent Society was held at the Thatched House Tavern, St. James's Street. Lord Colchester presided. From the report read it appeared that the receipts for the quarter, including the sum of 755*l.* 5*s.* 7*d.* in hand on the 31st of March, had been 992*l.* 7*s.* 1*d.* The expenditure had been 536*l.* 9*s.* 5*d.*, and there was a balance in hand of 455*l.* 17*s.* 8*d.* The society possessed stock in the Three per Cent. Consols amounting to 36,916*l.* 14*s.* 8*d.* The annual receipts had exceeded those of 1858 by the sum of 100*l.*, and during the year assistance had been rendered as follows:—6 widows and orphans of admirals, 48*l.*; 20 widows and orphans of captains, 120*l.*; 51 widows and orphans of commanders, 334*l.*; 81 widows and orphans of lieutenants, 517*l.*; 39 widows and orphans of masters, 227*l.*; 14 widows and orphans of surgeons, 86*l.*; 36 widows and orphans of paymasters, 246*l.*; 6 widows and orphans of engineers, 33*l.*; and 5 officers in distressed circumstances, 39*l.*; making the total sum expended 1650*l.*, distributed among 258 applicants and their families, of whom 41 were first applicants after the death of their relatives. Renewed exertions from the friends of the society were necessary to meet the applications which were being made. The report was adopted, and, after the transaction of some routine business, a vote of thanks was tendered to the chairman, and the meeting separated.

LOSS OF TWO FRENCH SHIPS IN CHINA.—H.I.M. transport Isere, with nearly 1000 men on board, 400 barrels of gunpowder, and other stores, in steaming into the harbour of Amoy on May 17th, struck on a rock, broke her back, and became a total wreck; and early in June the Reine des Clippers was entirely burnt in Macoa Roads.

THE MARINE SOCIETY.—The third annual visitation of the Marine Society's Benevolent Institution, the Earl of Romney president, took place on Wednesday on board the society's ship Venus, moored off Woolwich dockyard, Lieut.-Commander T. Digby Sulivan, R.N., superintendent. A large assembly of ladies and gentlemen, accompanied his lordship and the committee on board, and a number of visitors interested in the institution attended the examination, and were extremely gratified with the proficiency and aptitude of the boys, 140 in number, about 50 of whom were called upon to give proof of the progress which they had made since the last visitation. They were put through a course of exercise in the rigging, working the great guns, small-arms exercise, rowing in the boats, &c., and acquitted themselves with perfect satisfaction. Five of the lads, after having passed through the necessary course of instruction, are transferred weekly to the flagship Fisgard, and are enrolled in the service of the Royal Navy; others are apprenticed to the Mercantile Marine, and are thus rendered capable of becoming useful members of society, and are removed from the scenes of vice and penury in which they were found.

LOSS OF H.M.S. ASSISTANCE.—We are sorry to learn by telegram viâ Marseilles of the loss of H.M.'s screw steam store-ship Assistance, Commander C. J. Balfour. The event took place in the early part of June at a spot described as Deep Bay. We presume that the occurrence was the result of the ship striking on a rock, as at the period of the year mentioned the weather is almost invariably of a settled character on the coast of China, and entirely free from those terrible tempests, typhoons. It is to be hoped that no lives were lost, as no mention is made of any casualty.

The Navy Gazette.

ADMIRALTY, JULY 13.

NOTICE OF INTENDED DISTRIBUTION OF NAVAL PRIZE-MONEY.—Department of the Accountant-General of the Navy, Admiralty, Somerset House, July 13.—Notice is hereby given to the officers, seamen, and marines, and to all persons interested therein, that the distribution of an award for the destruction of pirates in the China Seas, by Her Majesty's ship Sampson, on the 4th and 6th of December, 1856, 22nd of April, and 8th of June, 1857, will commence on Monday, the 23rd of July, 1860, in the prize branch of the department of the Accountant-General of the Navy, Admiralty, Somerset House.

The following are the shares due to an individual in the several classes:—

Captain	£165	6	10	Sixth class	£8	7	6
Second class	32	11	3	Seventh class	5	11	7
Third class	26	1	0	Eighth class	2	15	10
Fourth class	16	15	0	Ninth class	1	17	2
Fifth class	9	6	1	Tenth class	0	18	7

CORPS OF ROYAL MARINES.

Lieut.-Colonel and Brevet-Colonel Thomas Charles Cotton Moore to be Colonel Second Commandant, vice Hunt, retired on full pay.

Captain and Brevet-Major Hayes Marriott to be Lieut.-Colonel, vice Moore, promoted.

Captain and Brevet-Major Samuel Notterville Lowder to be Lieut.-Colonel, vice Browne, retired on full pay.

Captain and Brevet-Major Edward Thornbrough Parker Shewen to be Lieut.-Colonel, vice Fosbroke, retired on full pay.

First-Lieutenant Thomas George Shelton Meheux to be Captain, vice Marriott, promoted.

First-Lieutenant William Tauzia Savary to be Captain, vice Lowder, promoted.

First-Lieutenant George Brydges to be Captain, vice Shewen, promoted.

Second-Lieutenant William Henry Vallack Tom to be First-Lieutenant, vice Meheux, promoted.

Second-Lieutenant Robert Charles Harvey to be First-Lieutenant, vice Savary, promoted.

Second-Lieutenant Charles Frederick La Coste to be First-Lieutenant, vice Brydges, promoted.

ADMIRALTY, JULY, 20.

NOTICE OF INTENDED DISTRIBUTION OF NAVAL PRIZE MONEY.—Department of the Accountant-General of the Navy, Admiralty, Somerset House, July, 18, 1860.—Notice is hereby given, to the Officers, Seamen, and Marines, and to all persons interested therein, that the distribution of the proceeds received and tonnage bounty awarded for the Name Unknown or Marianne, captured on the 22nd March, 1858, by Her Majesty's ships Styx and Jasper, will commence on Monday the 30th July, 1860, in the Prize Branch of the Department of the "Accountant-General of the Navy, Admiralty, Somerset-House."

Agents and other persons holding powers of attorney, prize orders, assignments, or other instruments, by virtue of which they may be legally entitled to claim the share of any captor, serving in the above-named ships, are requested to present the same at this office.

Any Officer, Seaman, Marine, or other person, who may desire to receive his share from the Collector of Customs or of Inland Revenue within the United Kingdom, is required to intimate the same by letter to be addressed "On Prize Business, to the Secretary of the Admiralty, London,"—in which letter his own place of residence is to be precisely stated, as well as the place of the nearest Collector of Customs, or of Inland Revenue, from whom it would be convenient to receive such share of prize money.

The following are the shares due to an individual in the several classes:—

Flag share	£551	11	8	Fifth class	£79	3	10
Commander	786	0	2	Sixth class	71	5	4
Lieutenant Commanding	524	0	2	Seventh class	47	10	4
Third class	221	14	7	Eighth class	23	15	2
Fourth class	142	10	9	Ninth class	15	16	9
				Tenth class	7	18	4

THE MEDITERRANEAN.

MALTA, 14th July, 1860.—H.M. gun-boat Lapwing arrived on the 7th inst. from Navarino. The line-of-battle ship Neptune sailed off on the 7th inst. The screw steam-frigate Liffey left on the same day. H. M. corvette Racoon arrived on the 12th from Catania. H. M. steamer Caradoc left on the 8th for Navarino, and returned yesterday. The screw steam shore-ship Supply left our port yesterday. The Lapwing has received orders to proceed to Constantinople, to relieve the gun-boat Banshee at present on that station.

Three months' leave of absence was granted to Major-General Horn, C.B., commanding 2nd brigade, to proceed to the United Kingdom on private affairs. During the absence of General Horn, the command of the 2nd brigade will devolve on Colonel F. P. Harding, C.B., 1st battalion, 22nd Regiment.

Lord Clyde, the late Commander-in-Chief of H.M.'s forces in India, landed here on Monday last, on his way to England, in the P. and O. steamer Vectis. The noble general was received by the authorities with all due honours and respect.

NAPLES, 8th July.—Arrived, the Hannibal, from Palermo. Cæsar, Renown, Agamemnon, London, also here with the Intrepid. French ships: Bretagne, Algesira, St. Louis, and Eylau. The Iroquois, American, has left for Spezzia.

THE MILITIA.

The Militia Gazette.

WAR OFFICE, PALL MALL, JULY 17.

Inverness, Banff, Elgin, and Nairn Light Highland Infantry Militia—Lieutenant George Graham Ramsay, to be Captain, vice Tytler, resigned.

Norfolk Artillery Regiment of Militia—Second Lieutenant Henry Harrington Molyneux Seel, to be First Lieutenant, vice Longe, promoted; Second Lieutenant Frederick Henry Brice, to be First Lieutenant, vice Brereton, promoted; Second Lieutenant William Bedingfeld, to be First Lieutenant, vice Harbord, promoted; Second Lieutenant Edward Henry Gervase Stracey, to be First Lieutenant, by augmentation.

West Kent Light Infantry Regiment of Militia—Ensign James Gordon Vinter to be Lieutenant, vice Monypenny, promoted.

Memorandum—Royal Ayrshire Rifles Militia—Her Majesty has been graciously pleased to accept the resignation of the following commissions in this regiment:—

Lieutenant Arthur Graham Hay. | Lieutenant William Robinson Lodge.
Ensign John White Henston.

Isle of Wight Artillery Militia—James Coverdale Patten, Esq., to be Second Lieutenant.

WAR OFFICE, PALL MALL, JULY, 19.

Royal Perthshire Rifle Militia—Thomas Watson Greig, Gent., to be Lieutenant.

VOLUNTEERS.

METROPOLITAN.

CIVIL SERVICE.—On Wednesday evening an excellent amateur performance was given by the members of this corps at the Lyceum Theatre. It was in aid of the band *fund of the regiment*, and was supported by the officers and privates, assisted by several professional actresses. To give additional *éclat* to the occasion, a new and original comedy, by "Captain Tom Taylor, C.S.R.V.," as the bills styled him, was produced, under the title of "A Lesson for Life," which had never before been represented upon the stage. The Lyceum was in consequence very well attended by the members of the Civil Cervice and their friends, and as Volunteers were invited to appear in uniform, a goodly number of our riflemen thus clad were to be seen in various parts of the house. The comedy passed off most successfully, and at its conclusion Mrs. Stirling delivered a very appropriate address, written for the occasion by Ensign Yates. At the termination of the address, the curtain drew up and disclosed a number of the Civil Service Rifle Volunteers drawn up in full uniform across the stage, upon which the whole audience rose with enthusiasm, which was heightened when the band struck up the National Anthem. The entertainments concluded with the farce of "The Irish Lion."

The VOLUNTEE GUARDS (32nd Middlesex), under the command of Lieutenant Thomson, proceeded on Wednesday to Windsor, and marched to Oakly Court, the beautiful seat of Captain Saye, about four miles distant from the town, where they were joined by one company of the Windsor Rifle Corps, and met with a most cordial welcome from their host and his family. A sumptuous dinner was served in the billiard-room, after which both corps went through various manœuvres, terminating with several rounds of true British cheers for the captain's hospitality. The return march was enlivened by some excellent singing by the Windsors.

VICTORIA RIFLES.—On Monday the 16th inst. the corps paraded at Kilburn, and proceeded by train to Windsor, where they were joined by the Honourable Artillery Company, and after a short rest commenced a series of brigade *movements*, which were executed to the satisfaction of the colonels in command and to Captain Anstruther, of the Coldstream Guards, who acted as brigade-major. On Wednesday, the 18th inst., the final contest for an elegant silver cup, presented to the corps by H. F. Smith, Esq., of the 1st company, took place. The prize was open to military members of the corps only, who were required to fire 10 rounds at 200 yards. From the 70 who thus contested, the best 10 were selected, and they fired 10 rounds at 300 yards and 10 at 400 yards, at a target 6 feet by 3 feet with an 8-inch bull's eye. The practice was excellent, the highest score at the 300 and 400 yards in 20 rounds being 35. From the best 10 men at 200 yards the best 6 were selected for the final competition, which took place in the presence of Colonel M'Murdo, Inspector-General of Volunteers, and a very numerous and fashionable assembly. The winner was declared to be Mr. Martin Ridley Smith, of the 2nd company. At the conclusion of the contest the corps fell in to the number of 400, and were inspected by Colonel M'Murdo, who expressed himself much pleased with all he had seen, and congratulated the colonel, His Grace the Duke of Wellington, upon the command of so fine a body of men, praising the men also for their steadiness under arms. The winner of the cup was then called to the front, and presented with it by the colonel, who in a short speech complimented him upon his steady firing throughout the practice. The ground presented a most animated appearance, being thronged with ladies and gentlemen, and officers and members of different corps, both regulars and Volunteers. The day was enlivened by the excellent band of the corps, who played selections from various operas, waltzes, &c., and kept the company there until 10 o'clock listening and dancing to their music. On the same day there was a grand inspection in the Home Park, Windsor, by His Grace the Duke of Wellington, of this Corps, under the command of Major Whichelo, and the Hon. Artillery Corps, under the command of Colonel Lord Colville, with a 6-pounder, commanded by Captain Jay; altogether there were ten companies, numbering about 600. The ground was kept by the Windsor Rifles, under the command of Captain the Hon. Leslie Hore Ruthven. The Duke arrived on the ground at 4 o'clock, accompanied by Colonel S. Perceval and the acting Adjutant of the Coldstream Guards, and was received with the usual salute. Afterwards the Volunteers marched past in quick time, and performed a variety of evolutions, to the entire satisfaction of His Grace and the marked approval of a large concourse of spectators who surrounded the park. Among the military present were Major-General Seymour, Colonel the Hon. A. N. Hood, Captain Bulkeley, Captain Seymour, Captain Farran, Captain Edwards, Captain Siddall, and most of the officers of the Coldstream Guards, also many of the nobility and gentry of the neighbourhood. The Rifles came to Windsor and returned to town by special train on the South-Western Railway.

CORNWALL.

THE CORNWALL ARTILLERY.—On Tuesday last, the Cornwall Artillery Volunteers at Looe, who had been appointed to form a guard of honour to His Royal Highness the Prince of Wales, as Duke of Cornwall, if he had landed at Plymouth, on being informed that it was not the Prince's intention to visit the shore, obtained permission to salute him from a field-battery of six 6-pounders, which, with the noble owner's sanction, were placed in position on an elevated spot in Mount Edgcumbe Park, by the kindness of Colonel Pester, of the Royal Artillery. The force from Padstow comprised three sergeants, two corporals, two bombardiers, and 36 gunners, under the command of Lieutenants Tredwen and Pearse; Captain Brune being unavoidably absent, much to his own regret and that of the company. Through the great liberality and zeal of the officers, so large a number of the corps were enabled to proceed to Plymouth with only three hours' notice of the time of departure. Although deprived of sleep from Monday until the small hours of Wednesday morning, when they returned, all were delighted with their first taste of campaigning.

DURHAM.

THE VOLUNTEER MOVEMENT AT DARLINGTON.—Darlington has at last decided to take part in the Rifle Volunteer movement. Some of the inhabitants, fired with military enthusiasm, and resenting the calm and peaceful influence of the Society of Friends, whose metropolis Darlington may be considered to be, have been agitating the question for some time, but could never muster sufficient courage to call a public meeting, or openly to express their admiration of the movement and their wish to join it. Besides, where were the Volunteers to come from, when perhaps more than half the townspeople are Quakers, or in the employment of Quakers, with thoughts engrossed in the peaceful pursuits of commerce and the social and moral advancement of their race? But the matter was "talked about" until the sympathisers with amateur soldierism thought they could count on a sufficient number of supporters, and then they called a public meeting, and decided that something should be done to introduce rifles and the trappings of riflemen into the very midst of this religious and peaceable community. Accordingly on Tuesday evening some 1500 persons met, under the presidency of Mr. G. J. Scurfield, a magistrate resident in the neighbourhood, and decided that Darlington should no longer remain under the "stigma" of being almost the last place in the kingdom to arm "in defence of our nation, religion, and laws." Mr. Joseph Pease attempted to restrain the ardour of the promoters of the movement, but in vain; only 50 or 60 hands were held up for an amendment which he submitted; and at the end of the meeting 40 gentlemen entered their names, and 67*l.* was subscribed towards the expenses of the Darlington Volunteer Rifle Corps.

HAMPSHIRE.

7TH HANTS RIFLE VOLUNTEERS.—A silver bugle has recently been presented to this corps, at Farcham, by Mrs. Eady, on behalf of her brother, Charles Borlase, Esq. A marquee was erected for the accommodation of the officers of the various local corps and their personal friends. Shortly after the Volunteers had taken up their position, Mrs. Eady was escorted by Mr. Borlase to the drum upon which the presentation bugle was placed. A large assemblage of people had met to witness the ceremony, amongst whom were contingents from the different Volunteer corps of the surrounding districts. On receiving the command "Forward," the Farcham Volunteers marched up to the drum, on which was placed the bugle, bearing the following inscription: "Presented by Charles Borlase, Esq., to the 7th Company of the Hants Rifle Corps." Mrs. Eady then addressed them in a very spirited manner, after which the band of the corps struck up "God Save the Queen," and the lady handed the bugle to the bugler. The Volunteers assembled, gave three hearty cheers, which were responded to again and again by the spectators in the field. As the enthusiasm abated the band struck up, and the Volunteers marched past in good order, after which they left the ground, and deposited their arms, returning at 6 o'clock, at which hour the bugle sounded for a banquet prepared in a spacious booth and the evening passed off in a very agreeable manner, enlivened by patriotic toasts and speeches.

PORTSMOUTH ARTILLERY VOLUNTEERS.—The officers and non-commissioned officers for the 1st and 2nd companies of this corps having been elected, the 3rd company is now forming. A brass band is also in course of formation, and a fund will shortly be opened for the purchase of instruments and the necessary music. The Portsmouth Artillery Volunteer Companies are fast approaching a serviceable shape, and as an inducement for new members to join, an adjutant will be appointed by Government on the formation of the 4th company, which officer will be permanently attached to the corps. A very numerous and highly influential committee has been selected from the main body of the members, and they have appealed to the employers of the borough in favour of an early closing movement on Wednesday afternoons; there being scarcely a doubt that, with the opportunity thus afforded for drill, the Volunteer movement will advance rapidly in Portsmouth, and increase the number of effective members of the Artillery and Rifle Volunteers to at least double the present number.

KENT.

FOLKESTONE ARTILLERY VOLUNTEERS.—This company, the 1st Cinque Ports, continue their weekly practice with solid shot, the practice made is considered by competent judges to be very satisfactory. A supply of shells for practice is expected daily, and preliminary drill in filling shells and fixing fuses is to take place during the next week; the Government supply of shot and shells, however, is rather limited, being but eighty of the former and twenty of the latter per annum to the company.

LANCASHIRE.

The greatest Volunteer demonstration yet witnessed in Lancashire took place on Saturday last at the Aintree racecourse, near Liverpool, when Colonel M'Murdo held an official inspection of the various Volunteer corps of Liverpool and the adjacent towns and districts. Altogether there were assembled on the ground 4700 Volunteers, of whom 1730 belonged to the artillery. A detachment of the various artillery corps manœuvred and fired salutes from six 9-pounder field pieces, both before and at the termination of the proceedings. The attendance of the spectators was the most numerous ever witnessed on the racecourse, and the grand and adjacent stands were crowded by the *élite* of Liverpool and the neighbourhood; and to crown the proceedings the weather was most propitious. The inspection lasted about two hours, the Volunteers marching in columns, quick and double quick. Colonel M'Murdo was attended by the Earl of Sefton, the Hon. C. Molyneux, Colonel Marriott, Majors Harman and Archdale, &c. Colonel M'Murdo expressed his entire satisfaction at the display he had witnessed. In the course of the afternoon a silver bugle was presented to the 1st company of the 1st brigade of the Lancashire Artillery Volunteers by Miss Louisa Brown.

3RD MANCHESTER RIFLES.—On Saturday, an interesting presentation took place at Old Trafford, during the afternoon drill of the 3rd Manchester Rifle Volunteers. This regiment is under the direction of Adjutant Heaton, who made such excellent shooting at the late rifle contest on Wimbledon Common, where he ranked 5th on the list of competitors for Her Majesty's prize. Since his connection with the regiment Mr. Heaton has won for himself the respect of all, and it was resolved that on his return from London one of Whitworth's best rifles should be presented to him, in token of the estimation in which he is held by the regiment. Accordingly, one of those proved at Wimbledon was obtained, at a cost of 25*l.*, and the following inscription was placed upon the butt: "Presented to Henry Heaton, Esq., by the officers, non-commissioned officers, and privates of the 3rd Regiment of Manchester Rifle Volunteers, as an acknowledgment of the high position he held at the Wimbledon rifle contest, 7th July, 1860." After drilling for some time at Old Trafford, a battalion square was formed, when the rifle, enclosed in an oak case, was presented to Adjutant Heaton by Major Henry, who complimented Mr. Heaton on his successful shooting, and expressed to him the high opinion in which he was held by the regiment. Adjutant Heaton acknowledged the gift in a suitable speech.

MIDDLESEX.

2ND (SOUTH) MIDDLESEX RIFLES.—Mr. Dobson, of Piccadilly, has offered a handsome silver cup as a prize to be shot for by the members of the above corps.

NORTHAMPTONSHIRE.

NORTHAMPTON.—On Tuesday last, the 4th and 5th companies, commanded by Captain Barr, of the 4th and preceded by their band, marched out to Chapel Brampton, the residence of H. Markham, Esq., where, after going through a series of evolutions and some skirmishing, the proceedings (so far as the military part was concerned) terminated by an advance in line. The steadiness and precision with which every movement was conducted reflects great credit upon Sergeant-Majors Francis and Page, of the respective companies, by whom they have been drilled. After the day's operations, the whole of the companies, *consisting of some* 150 men, were liberally entertained by Mr. Markham; and, considerably refreshed by his considerate provision of creature comforts, reached town at about 11·30 p.m. The ground presented a lively appearance, being favoured by the presence of some of the Northampton ladies, who have evinced an invariable interest in the Rifle Volunteer movement.

SURREY.

1ST SURREY RIFLES. — This battalion, under the command of Lieut.-Colonel Macdonald (late Lieut.-Colonel Bengal Artillery, Hon. East India Company's Service), marched out in great strength on Saturday afternoon, assembling at the Sessions House, Newington Causeway, and proceeding along the Kent Road, through New Cross, to the private grounds of Mr. Alderman Wire (late Lord Mayor), whose son commands the 8th or New Cross Company, where they went through a variety of evolutions in a highly creditable manner, and which could only be accomplished by intelligent and excellently drilled men.

6TH SURREY RIFLE VOLUNTEERS.—The junction of athletic sports with rifle-shooting is a sure way of rendering the Volunteer movement an enduring institution. On Saturday last the 6th Surrey Rifle Volunteers had a gathering in Ashbey Park, Walton-on-Thames, the seat of Sir Henry Fletcher, the captain of the corps, and a very choice assemblage of fair ladies and cavaliers attended to witness their performances. The sports comprised hurdle-races, flat races, leaping, throwing the ball, putting the shot, single-stick, &c. Considering the short time the members of the corps have had to train in, they deserve great credit, and if their endurance is only equal to their agility they promise to be a serviceable body. Mr. S. Bircham especially distinguished himself, winning no less than four prizes. The broad leap was well headed by Mr. G. Bennett; and a capital contest between the gallant captain and his jovial lieutenant, Mr. J. M. Higinbotham, neither of whom required weighing to convince the public that they were over the prescribed thirteen stone, gave the palm to the subordinate officer; then followed the Tradesmen's Cup and the Workmen's Prize, both given by Sir H. Fletcher to the tradesmen and labourers employed in Walton, Hersham, and Esher parishes. The proceedings terminated very satisfactorily, and we understand that the affair is to be annual. We hope it is so resolved; and we would suggest at the same time that members who put down their names to compete should do so to win, and therefore take to themselves about a month beforehand some experienced professional trainer. Very little training would make them respectable antagonists. The efforts of one gentleman were so distinguished, that, should he not slacken his ardour between this and next year, we leave Mr. S. Bircham to look to his laurels.

20TH SURREY (NORWOOD WORKING-MEN'S VOLUNTEER RIFLE CORPS). On Wednesday evening, the 18th July, the members of this corps were invited to the grounds of Arthur Anderson, Esq., Norwood Grove, to receive a presentation of bugles from the ladies of Norwood and its vicinity. The corps marched from head-quarters at half-past 5, and reached the grounds at 6 o'clock. After forming in line in front of the lawn, where the ladies were waiting to receive them, an address was read, and Mrs. Anderson handed to the officers two very handsome silver bugles with appropriate inscriptions; also to each member of the corps a copy of the "Field Exercise and Drill Book," with his name inserted. Captain Ouchterlony, Royal Madras Engineers, commanding-officer of the corps, returned thanks in a very suitable and feeling manner to this graceful tribute of appreciation. After hearty cheers had been given for the ladies, the men broke off to enjoy the refreshments kindly provided for them. The remainder of the evening was spent in athletic sports in the beautiful grounds, prizes being given for the best running, jumping, &c. The corps marched off the ground at dusk, after singing the National Anthem, giving hearty cheers for Mr. and Mrs. Anderson, highly delighted with the evening's proceedings, and affording a convincing proof of the social good that may be effected by this noble national movement.

WILTSHIRE.

1ST WILTSHIRE RIFLES.—Sir Alexander Malet, Bart., Her Majesty's Envoy at Frankfort-on-the-Maine, has presented a handsome and highly ornamented silver goblet of exquisite design, with chased cover and gold inside, to the Salisbury or 1st Wiltshire Volunteer Rifles, as a challenge cup, to be shot for by the members of the corps. The contest for it is to take place on Wednesday, the 25th inst., at 300, 500, and 600 yards.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, JULY 17.

Inns of Court Rifle Volunteer Corps—*Captain* John Andover Wood, late Madras Army, to be Adjutant, from 16th of May, 1860.

Digitized by Google

2nd Tower Hamlets Rifle Volunteers—Armar Lowry, Esq., late Captain 30th Regiment, to be Adjutant.

7th Monmouthshire Rifle Volunteer Corps—Her Majesty has been graciously pleased to approve the promotion of Honorary Assistant-Surgeon William Williams Morgan to be Assistant-Surgeon.

8th Monmouthshire Rifle Volunteer Corps—Alexander John Shepard, Gent., to be Honorary Assistant-Surgeon.

Wilts Volunteer Rifle Corps—9th Company—The Rev. William Henry Jones, clerk, to be Honorary Chaplain. 16th Company—Frederick Henry Morris, Esq., M.D., to be Honorary Assistant-Surgeon.

8th Essex Rifle Volunteers—Captain Horatio Love to be Major.

10th Essex Rifle Volunteers—Ensign Charles Wood to be Lieutenant, vice Luard, resigned.

10th Lancashire Artillery Volunteers—Thomas Shaw, Gent., to be Honorary Assistant-Surgeon; the Rev. William Law Hussey, M.A., to be Honorary Chaplain.

38th Lancashire Rifle Volunteers—Henry Westley, Gent., to be Ensign.

47th Lancashire Rifle Volunteers—Major David Gamble to be Lieut.-Colonel; John Fenwick Allen, Esq., to be Captain; Peers Naylor, Gent., to be Lieutenant; John Fidler, Gent., to be Ensign; Robert M'Nicoll, Esq., to be Surgeon.

49th Lancashire Rifle Volunteers—Joseph Welsby, Gent., to be Lieutenant; John Twist, Gent., to be Ensign.

63rd Lancashire Rifle Volunteers—William Lorimer Bathgate, Gent., to be Ensign.

Memorandum.—Her Majesty has been graciously pleased to accept the resignation of the commission held by Lieutenant Edward Hughes Satterthwaite in the 10th Lancashire Rifle Volunteers.

1st Battalion of the Isle of Wight Rifle Volunteers—4th Company—Sir Henry Oglander, Bart., to be Captain; Augustus Frederick Leeds, Esq., to be Lieutenant, vice Oglander, promoted: Francis White Popham, Esq., to be Ensign, vice Leeds, promoted; John Vining Porter, M.R.C.S., to be Honorary Assistant-Surgeon.

3rd Carmarthenshire Rifle Volunteers—David Thomas, Gent., to be Honorary Assistant-Surgeon.

4th Carmarthenshire Rifle Volunteers—The Rev. Henry Jones Davies, clerk, to be Honorary Chaplain.

2nd Carmarthenshire Rifle Volunteers—The Rev. Frank Garrett, clerk, to be Honorary Chaplain.

1st Suffolk Volunteer Artillery Corps—Robert Cook Fowler, Esq., to be Captain; Frederic Morse, Gent., to be First Lieutenant; Richard Henry Reeve, Gent., to be Second Lieutenant.

West Middlesex Rifle Volunteer Corps—Alexander Brodie, Gent., to be Lieutenant; John Barber, Gent., to be Ensign.

36th Middlesex Rifle Volunteers—The Rev. Archibald Boyd to be Honorary Chaplain.

37th Middlesex Rifle Volunteers—Martin Ware, jun., Gent., to be Lieutenant, vice Corrie, promoted.

1st Corps of Northumberland Artillery Volunteers—William Twizell, Gent., to be Second Lieutenant.

Worcestershire Rifle Volunteers—15th Company—Charles Edward Busigny, Esq., to be Honorary Assistant-Surgeon.

31st West Riding of Yorkshire Rifle Volunteers (Tadcaster)—Charles Shann, Gent., to be Lieutenant; John Addinell Bromet, Gent., to be Ensign; Thomas Sissons Upton, Gent., to be Honorary Assistant-Surgeon.

Memorandum—The 9th (Wakefield), 10th (Huddersfield), and 11th (Leeds), Corps of West Riding of Yorkshire Rifle Volunteers, will in future hold the 5th, 6th, and 7th places respectively in the Volunteer force of the said West Riding, and will be designated accordingly.

6th Company of Leicestershire Rifle Volunteers—Edward Warner, Esq., to be Captain.

3rd Kirkcudbrightshire Rifle Volunteers—James Carruthers, Esq., to be Lieutenant; Peter Dalziel, Gent., to be Ensign.

16th Sussex Rifle Volunteer Corps—Julian Arthur Worge, to be Ensign, vice Laurence, resigned.

Memorandum—15th Sussex Rifle Volunteer Corps—The correct names of Hon. Assistant-Surgeon Thompson are William Wittman Thompson, and not William Thompson, as gazetted on the 13th inst.

Kent Artillery Volunteers—10th Corps (Battalion)—First Lieutenant George Matthew Tapp to be Captain, vice Urquhart, resigned.

Kent Rifle Volunteers—14th Corps (Subdivision)—Ensign Henry Dorrien Streatfeild to be Lieutenant, vice the Viscount Hardinge, promoted; Henry Talbot Moore, Esq., to be Ensign, vice Streatfeild, promoted.

10th Dorsetshire Rifle Volunteers—Montague Williams, Esq., to be Lieutenant; Henry Charles Dashwood, Esq., to be Ensign; James Tarzewell, Esq., to be Hon. Assistant-Surgeon.

12th Dorsetshire Rifle Volunteers—Edwin Stephens Collins, Esq., to be Hon. Assistant-Surgeon.

1st Orkney Artillery Volunteer Corps—Edward Mitchell, Esq., to be Hon. Assistant-Surgeon.

1st Lanarkshire Rifle Volunteers—Captain William John Macquorn Rankine to be Major; Captain James Robertson to be Major.

3rd Administrative Battalion of Lanarkshire Rifle Volunteers, consisting of the 16th, 42nd, 44th, 56th, and 57th Companies—Captain Samuel Simpson to be Major.

5th Administrative Battalion of Lanarkshire Rifle Volunteers, consisting of the 51st, 67th, 74th, 80th, 81st, and 83rd Companies—Thomas Johnstone, Esq., to be Surgeon; James Macpherson, Esq., M.D., to be Assistant-Surgeon; the Rev. John Caird, M.A. and D.D., to be Hon. Chaplain.

62nd Lanarkshire Rifle Volunteers (Biggar)—Her Majesty has been pleased to accept the resignations of Captain Alexander Dundas Ross Wishart Baillie Cochrane, Lieutenant Robert Paterson, and Ensign William Handyside, of the above corps.

Fifeshire Mounted Rifle Volunteers—1st Battalion—The Right Hon. Lieut.-General James Alexander St. Clair, Earl of Rosslyn, to be Major.

1st Fifeshire Mounted Rifle Volunteers—John Anstruther Thomson, Esq., to be Captain; Robert Cathcart, Esq., to be Lieutenant; Henry Montgomery, Esq., to be Ensign.

2nd Fifeshire Mounted Rifle Volunteers—John Whyte Melville, Esq., to be Captain; Robert Bethune, Esq., to be Lieutenant.

3rd Fifeshire Mounted Rifle Volunteers—James Townshend Oswald, Esq., to be Captain; the Hon. Francis Robert Lord Loughborough to be Lieutenant.

4th Fifeshire Mounted Rifle Volunteers—Sir Peter Arthur Halkett, Bart., to be Captain; William Hobson Mowbray, Esq., to be Lieutenant.

15th Hampshire Rifle Volunteers—Frederick George Stapleton, Esq., to be Ensign; John Frederick Foster, Esq., to be Hon. Assistant-Surgeon.

The following appointment is substituted for that which appeared in the *Gazette* of the 10th of July inst.:—

14th Hampshire Rifle Volunteers—Alexander Hugh Leyborne Popham, Esq., to be Lieutenant.

Staffordshire Rifle Volunteer Corps—2nd Battalion—Lieut.-Colonel Francis William Newdigate to be Lieutenant-Colonel.

30th Company—4th Battalion—Lieutenant Edward Phillips Stubbs to be Captain.

The following appointment is substituted for that which appeared in the *Gazette* of the 10th inst.:—

3rd Battalion Staffordshire Rifle Volunteer Corps—Brevet-Colonel the Hon. Arthur Charles Legge, to be Lieut.-Colonel.

WAR OFFICE, PALL MALL, JULY 20.

1st Battalion of Stirlingshire Rifle Volunteers—Captain James Young (Unattached) to be Adjutant.

1st Brigade of Cumberland Artillery Volunteers—Thomas Salkeld, Esq., to be Major.

Memorandum—The 1st (Whitehaven), 2nd (Carlisle), 3rd (Maryport), 4th (Workington), and 5th (Harrington), Corps of Cumberland Artillery Volunteers, have been united in a Brigade for administrative purposes, with a Staff consisting of 1 Major and 1 Adjutant. The Brigade has been numbered as the 1st administrative Brigade in the county of Cumberland, and the several Corps composing it will retain their present numbers and designations in the County Force.

Kent Rifle Volunteers—18th Corps—Lieutenant Clement Satterthwaite to be Captain, vice Bowden, resigned. To be Lieutenants: Ensign Frederick Henry Norman, vice Satterthwaite, promoted; Arthur Willis, Gent.; Thomas Charrington, Gent. To be Ensigns: Bertie Peter Cator, Gent., vice Norman, promoted; William Evans Denny, Gent.; John James Jackson, Gent.

5th Buckinghamshire Rifle Volunteers—Lewis Albert Way, Gent., to be Lieutenant.

16th Surrey Rifle Volunteers (Egham Subdivision)—Ensign Lionel Booth to be Lieutenant, vice Edgell, resigned; William Wykes Ladell, Esq., to be Ensign, vice Booth, promoted.

1st Surrey or South London Rifle Volunteers Battalion—Major William Prince Jones, late 5th Royal Fusiliers, to be Major, vice Macdonald, promoted.

The following appointment is substituted for that of William Riddell "Brandon," which appeared in the *Gazette* of 2nd March last:

William Riddell Brunton, Gent., to be Assistant-Surgeon.

Memorandum—The Queen has been graciously pleased to accept the resignation by Captain Marcus Sharpe of the Commission held by him in the 10th Surrey Rifle Volunteers.

2nd Battalion Lincolnshire Rifle Volunteers — The Reverend Frederick Jesson to be Honorary Chaplain.

3rd Battalion Lincolnshire Rifle Volunteers—Captain Frederick Lyon Hopkins to be Major; The Reverend Edward Moore to be Honorary Chaplain; Edward Morris, Esq., M.D., to be Surgeon.

5th Lincolnshire Rifle Volunteers—The Reverend Frederick Edward Gretton, B.D., to be Honorary Chaplain.

19th Lincolnshire Rifle Volunteers—John Edward Sandars, Esq., to be Captain; Francis Gamble, junr., Gent., to be Lieutenant; Thomas Hugh Oldman, Gent., to be Ensign; The Reverend Jacob Clements to be Honorary Chaplain; Albinus Fairchild, Gent., to be Honorary Assistant-Surgeon.

15th Cornwall Rifle Volunteer Corps—Thomas Wallis Robinson to be Ensign, vice Trewithick, resigned. Resignation: Ensign Charles Trewithick has received permission to resign his Commission.

39th Middlesex Rifle Volunteer Corps—Captain Thomas Harpur Colvill to be Major; James Spreat Virtue, Esq., to be Captain; William Ridgway, Gent., to be Ensign.

3rd Durham Rifle Volunteers—Lord Adolphus Vane Tempest to be Major; Lieutenant Foster Charlton Huntley to be Captain, vice Harrison, deceased; Ensign Thomas Reed to be Lieutenant, vice Huntley, promoted.

12th Durham Rifle Volunteers—Robert Walton Bainbridge, Esq., to be Captain; John Elliott, Gent., to be Lieutenant; John Sherlock, Gent., to be Ensign.

Ayrshire Artillery Volunteers, 2nd Company—The Reverend William Shaw to be Honorary Chaplain.

5th Company—David Rankin, Gent., to be Captain; James Meiklo, Gent., to be First Lieutenant; George Morrison, Gent., to be Second Lieutenant.

Ayrshire Rifle Volunteers, 2nd Company—The Reverend George Corson to be Honorary Chaplain; William King to be Honorary Assistant-Surgeon.

5th Company of Inverness-shire Rifle Volunteers—John Mackenzie, Esq., to be Captain; Fountaine Walker, Esq., to be Lieutenant; Malcolm MacLennan, Esq., to be Ensign.

1st Perthshire Rifle Volunteer Corps—James Paterson, Gent., to be Ensign, vice Greig, resigned.

Avon Vale, and Warleigh Manor, or 14th Somerset Company of Volunteer Rifle Corps—The Rev. William Hale, Clerk, to be Honorary Chaplain.

2nd Gloucestershire Rifle Volunteers—John Pitt Bontein, Gent., to be Lieutenant, vice Jones, resigned.

SOME REMARKS ON THE VOLUNTEERS.

Since the recent Review in Hyde Park the Volunteers have entered a new phase in their existence. They have passed the period of the jibes and sneers of the vulgar; and the little dirty boy who should venture to call after them "Who shot the dog?" would probably, instead of a cheering shout of approbation, now receive a kick from his neighbour. The timid glance which the single Volunteer in uniform turned on the passer-by in the street, in anticipation of a smile of derision, is changed for the bolder bearing of confident merit that defies criticism. The great review has done all this for them.

Let them continue in the right direction, and give themselves the sterling qualities of good soldiers, as fit to meet the foes of their country as they are now to meet its sovereign! But let them remember that there is a great deal to be done yet; and if we venture to point out some few of the particulars, let it be ascribed to the counsel of a friend for their improvement, and not to the bitterness of a critic whose only object is to find fault.

The present dress and equipments, so far as they go, do not call for much remark; they are generally plain, neat, and inexpensive. The material of the clothing, if not perhaps very substantial in all cases, can for prolonged or real service be improved in that respect.

As real utility and comfort ought to be the primary consideration, the form of cap, assimilating to the foraging cap, as adopted by some corps, will, it is conceived, be found preferable to the stiff shako form; it may be equally neat, less expensive, more portable for packing, admit more readily an oilskin cover, and be more comfortable.

During the first winter in the Crimea, when the soldiers, from severe exposure to cold and weather, were allowed to take great liberties with their dress, it was remarked that the shako and stiff stock were almost universally cast aside in favour of the foraging cap and any kind of necktie; a circumstance that might well be taken as a lesson.

The rest of the appurtenances are but few; the arms and accoutrements will necessarily be of the Government pattern, or at all events adapted to the same ammunition.

The bands of music speak for themselves. They are a luxury, somewhat costly, perhaps, particularly when attached to very small corps; but if the bodies choose to pay for them, they will act favourably rather than otherwise, by the stimulating impression which they create.

There are, however, still some articles of equipment and practice that are very essential, and that have not yet been attended to. Among them:

1. A knapsack of the most perfect form and fastening to the shoulders, in which every man should learn to stow away the greatest amount of necessaries and comforts possible, and in as compact a manner with the means possessed by most Volunteers. This may be done to much advantage, by the adaptation of superior articles to those used by an ordinary soldier; and considering the smallness of the collection, and that it may be retained for this especial use at no very great cost; thus the shirts may be of a much finer material, whereby double the number might be carried not weighing more nor occupying more space. The brushes may be more compact, &c.

At the same time it may be remarked that there is nothing a soldier, habituated to campaigning, grudges less than carrying a large kit. The French soldiers in particular are famous for it; and it was remarked in the Peninsula that our best and oldest campaigners always carried the most, finding that the comforts of the extra load amply repaid them during the periods of the halt for the extra labour in carrying them during the march. As instances, one man, a shoemaker, carried throughout a campaign or two a favourite lap-stone; and it is not unusual to find bill-hooks, and other useful articles of considerable weight, voluntarily carried by old soldiers; and, in some cases, pet animals, such as dogs, monkeys, and cats.

The haversack, and tin cooking-pans, and canteen can be readily added, not requiring any very particular adjustment as the knapsack does, but still will be understood to be necessary parts of the equipment.

2. Another item to be prepared should be a well-devised great coat, and means of carrying it, when not worn, during a march.

3. And above all, well-studded marching shoes and stockings and good practice in marching; a perfection and endurance in which depend more upon keeping the feet in order than on any other consideration, and is a matter of much difficulty under the contingencies of soil, weather, &c.

It was remarked at the great review how light the tread of Volunteers seemed to be as compared with that of the ordinary soldiers; but it may be accounted for by the comparative lightness of their equipment.

It may be feared that it has been more difficult to give the Volunteers the primary qualification on which the whole system was founded, namely, that of skill in rifle shooting, than had been apprehended.

Good rifle ranges for practice are certainly very difficult to be obtained, and particularly where the population is greatest, and consequently where the Volunteers are most numerous. Now, while we are not of those who would condemn the Volunteers, trained as they may be as a force of little value, without a very great perfection in this acquirement, still it is a great deal too important not to cause the most strenuous exertions to be made for its accomplishment.

Many contrivances may be adopted to lessen this difficulty.

Ranges of 600, or even 400 yards, may afford most valuable practice-ground, as an excellent foundation for longer distances, and as comprehending the most influential and important ranges for actual service. The fire may be directed against the sides of hills too steep for a ricochet, or to long reaches in rivers; security may be obtained by firing through openings in screen walls, or butts may be raised of very considerable dimensions without any very great expense. Every expedient must be tried to provide for this requirement within easy reach of each corps.

The essence of the Volunteer movement was entirely based on the idea of innumerable bands of thorough good riflemen, who, in dispersed order, were to hover round and cut any invading army to pieces. The fallacy of such a proposition was combated by many an old soldier without much effect; but here we may anticipate a failure in the very first ingredient of their supposed perfection, and the Volunteers may find themselves beaten in the first requisite of superior shooting by the enemy's regulars, who may have had more opportunities for practice. All these considerations, however, show the importance of the Volunteers making themselves as perfect as possible as soldiers for every mode of fighting.

Nothing could be more deceptive than attempting to attach a value to a force, because it was one of irregulars. The very term Irregulars implies an imperfection; and yet a sort of vague idea of advantage was attached to it, so far as to argue that to endeavour to make the Volunteers tolerable soldiers, was to spoil good irregulars to make bad regulars; that is, to spoil disorder by endeavouring to put it into order.

The fact is, that the precise system of working in loose or dispersed order against an enemy, is precisely that which requires the greatest perfection in military exercises.

Among the matters that require consideration in the Volunteer movement is the real effective force to be depended upon in contradistinction to that on paper.

It has been a subject of pride to point out in a corps an individual marching in the ranks who had himself commanded a similar corps in 1805. Not feeling himself equal to the charge now, in nearly his eightieth year, he gallantly joined the ranks and marched by the Queen in 1860 as a private, as he had marched by George III. in 1805 as a colonel.

We think it would be better that those who have any doubt about their capability or firm determination to follow the call at all times, should withdraw, and show their zeal by liberal contributions as honorary members.

Objections have been raised to the organisation being such as to exclude the labouring and poorer classes of the community. Such is the case. The proceeding has been quite voluntary and very liberally extended; and we do not see how the system is to be changed, even if it were desirable. It is possible that bodies might be raised for distinct localities on a less self-supporting system than the present, and at a very moderate cost, that might render essential service in case of an attack on the country.

The Volunteers have certainly accomplished a great deal since they have suddenly risen from the earth like Cadmus's armed men of old. They have shown a determination to get the better of the slight with which the demonstration was partially received at first; they may well now proceed with slower, but with equal or even surer steps.

What they have acquired, and may still gradually continue to acquire, will remain fixed in them; and they may at any future period be perfected quickly by a greater pressure, should emergencies arise that would seem to require it; in the meantime, it would be a pity to lessen in any degree the high spirit that stimulates them, by too much and by too harassing work.

We have one more, and it is rather a dangerous topic to start, and a very difficult one to deal with, namely, the quality of the officers,—not as high-spirited gentlemen, who have entered the Service with quite as much ardour as the rest, but as officers.

The fact is, the Army is more of a profession, requiring a little theoretical, but more practical instruction than civilians are generally inclined to believe. A certain limited and moderate amount of practice may make very tolerable soldiers of our countrymen. Two or three years may make them excellent; but it requires a long apprenticeship, and to have adopted and lived in the Army as a profession, in camp and barracks, and, better than all, in the field, to make a good officer. The soldiers are impressed with the same convictions, and would have confidence in them accordingly.

We hear of very young regiments behaving admirably before an enemy; but though the men have been recruits, most of the officers and non-commissioned officers have been old hands, and it is well known how entirely the young soldiers look to their officers for the cue for their conduct and all their proceedings in action.

The officers of the Volunteers are man for man as gallant a set as any officers of the regulars; but of two regiments of Volunteers, similarly composed in other respects, but one officered from the Line and the other by themselves, there would be a very enormous difference in their value in the field; and therefore we greatly rejoice to see such names as those of the two Lindsays, the Duke of Wellington, and of many other officers who have served in the regulars, joining this new force, and we only wish there could be plenty of captains and subalterns of the same training among them.

THE KILBURN SHOOTING MATCH.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your journal of the 14th inst. I observe my name mentioned as a competitor in the shooting match at the Victoria Grounds, at Kilburn, on Thursday week. You will oblige me by correcting this error. I was present, it is true, at the beginning and end of the match, but took no part in it, not having by me any rifle on which I could rely; and believing, as I did, that it was obligatory to fire from the shoulder—a position which my health does not permit me to adopt with any hope of success, and which prevented me from competing for the Volunteer prizes, either at Hythe or Wimbledon.

But though not a competitor on the occasion referred to, I was an admiring though a regretful spectator—admiring the skill and good temper of most of the shooters; but regretful that with such fine materials to work with, we had not in the country a better organisation, more accurate weapons, and more encouragement to render them thoroughly available.—I am, &c. VERNON.

THE VOLUNTEER REVIEW AT EDINBURGH.—It is now authoritatively announced that the review will be held in Edinburgh, on Tuesday, the 7th of August, the Court being then at Holyrood *en route* for Balmoral. Edinburgh is so obviously the place most convenient for Her Majesty, and, all things considered, otherwise also the most suitable, that provincial corps will, no doubt, cheerfully acknowledge the propriety of the capital being the scene of the first grand national Volunteer gathering in Scotland. They will, of course, best display their acquiescence by immediate application, through their Lord-Lieutenants, for permission to attend the review in their corporate and military capacity. On the order of application will depend, we presume, their chances of forming part of the army to be reviewed, as it is stated that corps will, on such application, "be admitted as far as space and numbers will permit." The difficulty is as to space for manœuvres; for spectators there is the great natural gallery and grand stand of Arthur's Seat, the northern slopes of which look right down on the field. And when the latter is kept thoroughly clear of spectators, it will probably be found capable of accommodating many thousands of Volunteers—possibly nearly as many as Hyde Park itself. In the probability, then, of their appearing before the Queen in the short space of three weeks hence, let every Volunteer corps within range make earnest application, not to their Lord-Lieutenants only, but to drill. Many are well advanced, but others are yet far from perfect, even in ordinary company and battalion movements; it will take hard work, late and early, on the part alike of officers and men, to secure such general efficiency as will enable our Scottish Volunteers to stand comparison with their English brethren in arms. At the London review the Scottish corps were particularly admired; surely we shall be able to show not less successfully at home.

The whole of the available force of Chatham Garrison, consisting of the East India depôts of the Line, the Royal and Indian Engineers, the battalion of Royal Marine Light Infantry, the embodied Pensioners, and the 9th (Chatham) and 19th (City of Rochester) companies of Rifle Volunteers, assembled on Chatham Lines at 4 p.m. on Wednesday, under the command of Major-General Eyre, Commandant of the Garrison, for the purpose of going through a rehearsal of the grand siege operations and sham fight which will shortly take place at Chatham. This being the first instance of any body of Volunteers being under arms with, and taking part in any movements in connection with the regular forces, considerable interest was manifested. The manner in which both troops and Volunteers acquitted themselves on this the preliminary rehearsal, was exceedingly satisfactory.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance; and the postage—uniformly 1d. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to ARCHIBALD GRAHAM. Advertisements received up to Thursday Evening. The Paper is published every Saturday in time for the Morning Mails.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*

Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C. Established 1749.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, Elstob, of 12, Avery Row, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

DAY'S PATENT CHAIR-BED, a perfect combination of Easy Chair, Couch, and Bedstead, adaptable to either purpose by one simple motion, without screw, nut, rack, or complication of any description. An illustrated and descriptive circular for one stamp. W. DAY & SON, Portmanteau Manufacturers and Military Outfitters, 353 and 378, Strand, London, W.C.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, TWO GUINEAS.
SILVER BUGLES, for Presentation, from TWENTY GUINEAS.
ELECTRO-PLATED BUGLES, in Case, FOUR GUINEAS.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3*s.* each, giving instructions, and all the regulation sounds.
DRUM MAJOR DUTY-BOOK, 4*s.* FIFE-MAJOR DUTY-BOOK, 3*s.*
PERCIVAL HUNTING-HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, JULY 21, 1860.

As the Naval Discipline Bill is professedly imperfect, and the Earl of Hardwicke and Lord Colchester, as well as the Duke of Somerset himself, have several amendments to propose in committee, it would be an invidious and useless task to criticise it in its present state. The Duke of Somerset deserves all credit for dealing with the subject; and from the tenor of his remarks in the House of Lords, it is evident he has every desire to do all that is necessary to improve the discipline of the Navy.

We trust that the Bill may pass this session, and that, when modified in committee, the Naval Discipline Act of 1860 will not turn out in the end to be a mere formal law reform that will not really touch the grave evils on board ship, which call for immediate remedy. Of course it is very proper to strike out of our naval code the continual enactment of death in the old Acts of Parliament, and assimilate our laws afloat to those on shore. But this in itself will do nothing to affect the discipline of the Navy; both because, in the first place, the capital penalty has for long been practically in desuetude, and moreover, in these old Acts of Parliament it is really not enacted without alternative—the words running, "Shall suffer death, or such other punishment as may be awarded."

While, as a rule, we admit the propriety of a lenient code, and that it is unwise and impolitic to enact any penalty not likely to be enforced, we think an exception must be made—if, indeed, it can be regarded as exceptional—with regard to one class of offences, to which, we regret, a strange error in the Naval Discipline Bill compels us to allude. It is the third offence stated in section 38 of the bill, and one for the commission of which the ordinary law of England, and we think rightly, still awards the penalty of death. Such a sentence was recently recorded against a miscreant in the Central Criminal Court; and, considering all the circumstances, we should have very grave doubt of the wisdom that would hesitate to execute the sentence. At any rate, as to such a crime, there should be no difference in the law at sea and on shore; and as section 38 of the Naval Discipline Bill is headed "Offences punishable by Ordinary Law," it is clear the discrepancy between the bill and the ordinary laws of England, as regards this one abominable offence, is a blunder, and must be amended in committee. We observe several other apparently careless enactments, and we therefore trust the bill will pass through the hands of the Attorney-General, or some other eminent law officer of the Crown, before it assumes the form of an Act. This is the more necessary, as it will be seen that it repeals chiefly old Acts of Parliament, passed in the reigns of George II. and George III., and, if the present is a wise measure, it ought to last as long itself as these have done.

But if only one tithe is true of what is alleged respecting the want of discipline in the Navy, a great deal more will be wanted to set matters right than an Act of Parliament. In Lieutenant Stewart's pamphlet, to which we alluded last week, we read that the habit of prompt obedience to orders is rapidly and surely leaving the Service. This is attributed to "the want of proper organisation," when the Admiralty "black list" was published, substituting a "limited for despotic authority on board ship" (p. 6).

Formerly captains did what they liked, drew up arbitrarily their own penal codes, and kept their ships in a state of discipline by a reign of terror. When this was brought to an end, and the Admiralty "black list" was issued, assigning certain punishments to certain offences, the immediate effect was, according to Mr. Stewart, a very serious deterioration in discipline; not so much because the new punishments were very light, but because, being light, no other means were adopted to secure good behaviour when "terror" ceased to influence the men. Public opinion, as expressed in the newspapers, he says, has also had a detrimental influence upon discipline, especially as it has had the effect of deterring some officers from their duty, inducing them to wink at insubordination, and not give proper support to their juniors. This is called "the popularity dodge" in the Service. Now the ships' companies "have arrived at the system of getting up demonstrations against their officers—throwing about mess-traps and shot on the lower deck, &c. This has now become a fixed, settled, established system in the Service, unknown only in a few ships, where men-of-war's men are very few, and mostly pensioners" (p. 9).

It is perfectly evident that if this be a true picture of the state of things on board Her Majesty's ships, it is entirely our own fault. It is not so, as far as we can learn, in other navies. It is not so in the merchant service; it is not so in the Army; it is not so, and would not for a moment be tolerated, even in our common workshops and factories. Lieutenant Stewart also alleges, and it would be a most important fact if he were correct, that this disgraceful state of things does not apply to the Royal Marines in the same ships. In verification of this opinion he refers to the case of the Princess Royal, in which "the Marines, who in all respects but discipline were placed in precisely the same circumstances as the seamen, did not only not join in the 'outbreak,' but were prepared to put it down by force." This fact is good as far as it goes; but as Lieutenant Stewart's pamphlet was not published till May, he ought not to have overlooked another fact, unfortunately equally notorious, that the men belonging to the Edgar, who were tried in April for similar insubordination, or "mutiny," were chiefly if not all Marines. This destroys, therefore, a great deal of his argument, that the mere system of Marine discipline, if applied to the seamen, would prevent such outbreaks. At the same time we are bound to admit that some change of the kind proposed would have a beneficial effect. On the whole the Marine behaves better than the seaman.

If petty officers have "no power or command whatever over the men under their charge"; if they are not regarded indeed as "officers" at all, according to the interpretation clause of the Naval Discipline Act; if they are promoted without reference to character, may be blackguards (p. 30), and "frequently set a bad example—breaking their leave, and comingoff drunk"; their influence for any good on board ship must be "petty" indeed! If, further, we *find that only the* captain and commander, or first lieutenant, in a ship can award the slightest punishment for open offences, how can discipline be maintained? Certainly not by a master-at-arms and one or two ship's corporals. Lieutenant Stewart's suggestions for "ship, squadron, station, or fleet courts-martial," and for raising the status of "petty officers," are well worthy of consideration. He strongly advocates flogging, like most naval men; but we confess that when we find he assigns that punishment for "determined skulking," we cannot agree with him. Idle fellows should be dismissed the Service; and we say so notwithstanding his observation as to men taking bounty, and then acting so to get dismissed. The remedy for that is very simple; we have dwelt upon the point before—abolish all bounty—that is, throw the bounty money into wages, and then men will wish to remain in the Service in order fairly to earn it. We may mention that flogging was abolished in the United States navy in September, 1850,—Will the Statistical Congress, we wonder, afford us the means of judging with what effect upon discipline?

We may also mention that in the American navy seamen enter only for three years, after which they can go ashore. If within three months thereafter they again present themselves, to re-enlist for another three years, they are paid from their last discharge, without intermission. We need not say they are also paid a liberal rate of wages, without any bounty, and without our complicated and expensive system of short-service pensions. In order to get men, we give them bounty now and pay shabby wages, but promise them pensions hereafter, upon engagements of ten years' duration; and we wonder why we fail. The Americans pursue an opposite course—they shorten the term of service, give nothing as a bribe to enter, and promise nothing except to those growing old or disabled in the service; but they pay very liberal wages while men are serving, and the service is the most attractive in the world, and its discipline perfect—without flogging. The Naval Discipline Bill may do something—an improved organisation on board would accomplish more—towards improving the discipline of the Royal Navy; but we shall never get rid of the petty disturbances on board till we clear out the blackguards from the Service, and till dismissal from a Queen's ship is viewed by the British seaman as his greatest misfortune, and a punishment he dreads.

The career of Lord Clyde is at once an example and encouragement to all true soldiers. We trust that the honours won by Colin Campbell may be worn for many a year of glorious retirement from the trying duties of active military command; but we are satisfied there is no general in the service on whose readiness, skill, and foresight the country could more confidently rely in the hour of danger, than the war-worn veteran who has just returned among us from the revolted empire which his conduct in the field, and his wisdom in council, mainly contributed to subjugate and pacify. It will be a matter for history to deal with—and not a very edifying passage in her pages—that, whilst our Army was battling in the Crimea, borne down by the weight of French preponderance, and just recovering from the effects of long mismanagement, the most capable of our generals was affronted and driven from the field by the promotion of a junior officer, on some inscrutable grounds, over his head. We all know how Sir Colin Campbell yielded at once to the expressed wishes of the Queen, and returned to the Crimea to a subordinate position in the Army, wherein the fortune of war, or rather of peace, prevented his winning greater distinction, though it was hoped that, if the struggle had continued, the man who had such a singular felicity in gaining the attachment of his soldiers would in an independent command of a *corps d'armée* have added to the reputation already gained in India, China, and on the Alma. It was believed by many that Sir Colin Campbell could not have co-operated with the French in consequence of an alleged hastiness of temper; and it was urged in camp, and at home by people interested in spreading the idea, that if he were appointed to the command of the English army the *entente cordiale* would be in jeopardy. The fact was, however, that Sir Colin was one of the officers of the Napier school, who learned in the Peninsula that the French were good soldiers, whom to defeat was the greatest credit to be gained by the English Army, and that his familiarity with the language of the allies and his appreciation of their characteristics would have given him decided advantages in council with their chiefs. In truth, Lord Clyde was one of the few officers who was on terms of intimacy with the French generals, and his name is better known in their army than that of any English officer, except perhaps that of Sir John Burgoyne, who served in the Crimea. But for the advent of the Indian Mutiny, Sir Colin Campbell might have remained at home, in the enjoyment of a reputation which would have been moderate, except to those who knew his qualities.

Our popular impulses are not always conveyed with rapidity to Head-Quarters; but the instinct of self-preservation sharpens the official faculty as much as the desire to get rid of responsibility in time of danger. The country knows how readily Sir Colin Campbell, with the readiness of the old Peninsular schoolmen, answered to the demand for his services; nor have we forgotten the firmness and solidity of the steps which he took in carrying the banner of England over the provinces which were deluged by the lava of that fiery insurrection. Wherever he set his foo , .here was at once affixed a sure abiding place for the civil power. With force he combined clemency and justice. The skill of his military combinations was scarcely less admirable than the completeness of his political arrangements, and that is all we can say of either. In every variety of circumstance he was equal to every occasion; and never perhaps was his sagacity better vindicated than when, after the rebellion was crushed, he vainly sought to impress on the Indian government the dangers they were about to incur from the blind disregard of the feelings of English soldiers, which has cost us half an army, and more than its equivalent in expenditure and reputation. The world which does not read Blue Books knows little of these things; but it would be hard if Englishmen were ignorant of or indifferent to the services of the gallant and merciful soldier who has returned to end his days among them, after a fighting career of more than half a century, with harness on his back.

Lord Clyde has received the most well-deserved marks of respect on his way from India. Whilst in Paris he had an interview with the Emperor, and with some of his old companions-in-arms; and, we regret to add, that the state of his health, after such fatigues and anxieties as he has undergone, is such as to render it desirable for him to be indulged with a short period of repose. No one can be more sensible of the marks of esteem of his countrymen than Lord Clyde; but he has done so much in their service that he may now claim a respite from the excitement of public manifestations till he has re-established his health. What his services really were are only known to those who are acquainted with the state of India when he landed there, and the condition, militarily speaking, in which he left it.

The great majorities obtained by the Ministry in passing the Bill for Amalgamating the Indian and Imperial Armies abundantly justify them in taking steps at once to carry out the details of the scheme. In fact, the consent of Parliament, though morally desirable, is not necessary to enable them to do so; for the Bill simply takes away from the Secretary of State for India the power he now possesses of enlisting Europeans for local service in India. There is nothing in the existing law to oblige him to exercise the power; and, as the House of Commons has virtually settled the principle by majorities of 5 to 1, the Amalgamation may be said to have practically received the sanction of Parliament. The details of the fusion will accordingly be at once placed in the hands of a military commission, consisting of officers of experience representing all branches of the Service interested; and from the names of those likely to be selected, the question will no doubt be promptly and satisfactorily arranged.

The Report of the Select Committee on Military Organisation was presented to Parliament on Tuesday week, but (although it is settled that the report itself is to appear in the first instance without the evidence) the House of Commons' printer persists in keeping it for his own private reading, and up to the present steadily declines to let it be seen by the public, by whom it is regarded with so much interest.

We announced in the ARMY AND NAVY GAZETTE of the 30th ult., that Her Majesty would hold a grand review of the Scottish Volunteers at Edinburgh this autumn. It has been appointed to take place on the 7th of August; and we doubt not that a splendid exhibition of the national force will be made. The district is perhaps the most thickly inhabited by Volunteers in the United Kingdom, and we are quite prepared to find a body of Volunteers assemble at Edinburgh not very much inferior in point of numbers to those who marched past the Queen in Hyde Park, and certainly not very much inferior to them in that appearance and discipline, of which their own corps in the metropolis gave so creditable an example on that occasion.

The Colonelcy of the Scots Greys is placed at the disposal of the Duke of Cambridge by the death of Lieut.-General Lord Sandys, who, as Lord William Hill, long commanded that distinguished corps. As the vacancy is hardly yet officially reported, of course no step has been taken to fill it up. But there are not very many cavalry generals on the list to choose from. Lord Rosslyn is the senior without a regiment, but his active service is *nil*. He has been very properly passed over some half-dozen times by officers with good service in the field to recommend them, and is likely to have his claims again postponed. Lord de Ros is the next on the list, but he is in the same category as Lord Rosslyn, and, besides, holds the appointment of Deputy-Lieutenant of the Tower, which, if we mistake not, is substantially (with unattached pay) not much inferior to a colonelcy. Major-General Beckwith comes next, and his claims, although not so good as regards active service as those of Major-General Maclean, who is below him, are yet good enough to render his succession to the present vacancy most probable. He was for two years with the l th Lancers in the Peninsula, for which he has two clasps, and he shared in the glories of Waterloo.

By the death of Lieut.-General Lord Sandys, and the death of Major-General Mundy reported in our last, the following Army promotions will take place, viz., Major-General E. F. Morris, Colonel of the 97th Regiment, to be Lieut.-General; Colonels Richard French, Unattached, and W. Parlby, Commanding the Cavalry Brigade in Ireland, to be Major-Generals; Lieut.-Colonels Harvest, Unattached, and Preston, 45th Regiment, to be Colonels; and Majors W. L. Stewart, 2nd Depôt Battalion, and A. Pigott, Staff-Officer of Pensioners, to be Lieut.-Colonels in the Army.

We learn by the Bombay mail just received, that Sir William Mansfield has inaugurated his military rule in that presidency by an order strongly objecting to the extensive use of plain clothes by officers. The Commander-in-Chief desires that "the officers of all branches of the Bombay army may be discouraged as much as possible from the use of "plain" clothes. They are to follow Her Majesty's Regulations in this matter, and, according to the Orders applicable to the season, are to appear dressed in uniform in all places of public resort. In short, whenever an officer leaves his own lines after 10 A.M. he is to be dressed in uniform. This rule is not to interfere with the dress of officers when they may be engaged in sport, or during their morning rides when off duty. Officers commanding regiments must be well aware what a great additional expense it is to the young subaltern to keep up two wardrobes, viz., one of "uniform" and another of "plain" clothes. Many young officers are led into extravagance and debt upon this account, because they cannot resist the example set by their richer comrades; that which is a convenient fashion in England is really productive of nothing but a foolish and unnecessary expense in India. It will be understood that officers dining out, whether at the Presidency or at military stations, are to appear in their regimental or staff uniform—either in "Full" or "Undress," as occasion may demand. This order does not apply to officers in civil employment under the Government." This order, it is needless to say, has caused quite a sensation among those to whom it applies.

It may, we believe, be considered as certain that two or three more assistants will be appointed to Colonel M'Murdo, in the inspection and organisation of the Volunteer Corps. None of the additional appointments, however, are yet actually decided on. Lieut.-Colonel Ibbetson has been appointed to the vacancy caused by the resignation of Major Stewart.

The office of Lieut.-Governor of Jersey is rendered vacant by the death of Major-General Mundy.

We hear that at the last examination of candidates for direct commissions at Chelsea, out of 143 candidates, only about 60 were found to fulfil the requirements of the examiners. We cannot pretend to say what the cause was; but the fact is one of many coming to our knowledge, which would make us anxious to see a searching inquiry instituted as regards the whole question of military examinations.

The Proceedings of the International Statistical Congress which has been sitting during the week are not without considerable interest as regards Military Administration; and several important steps have been taken to ensure a perfect result in the collection of naval and military statistics. At present we can do little more than enumerate the papers read in this section, among which are a comprehensive and interesting essay on the Statistics of the Army, by Mr. Barwick Hodge; a paper on the Vital Statistics of the Army, by Dr. Graham Balfour, containing suggestions likely to be highly valuable, as bearing upon sanitary arrangements and the elucidation of diseases to which soldiers are peculiarly subject, and of acclimatisation; one by Dr. Sutherland on the same subject; and a very clear and excellent essay upon Naval Statistics, by Sir Richard Bromley, K.C.B., Accountant-General to the Navy.

It has been long an object with the Lords of the Admiralty to see the list of Active Captains reduced below 350, so that some deserving Commanders might receive at their hands the reward of zealous services. We can now remind their Lordships that there are three vacancies on this particular list, as the death of Captain Eyres reduces the number to 347.

HOUSE OF COMMONS.—FRIDAY.

RIFLES.

Mr. Hussey Vivian asked the Secretary of State for War what number of rifled muskets had been manufactured at the Government establishment at Enfield during the twelve months ending the 30th of June last, and at what rate the manufacture was now proceeding; also what number of rifled muskets had been received from contractors during the same period, and what number the Government were still liable to receive under contract.

Mr. Sidney Herbert said that the number of rifles made at Enfield during the year was 90,707, being an average of 1744 a week. At present the number made weekly was 1900, and it would rise to 2000 when the machinery would be completed. The number of rifles received from contractors during the same period was 30,410, and the number to be received was 97,626

SYRIA.

Lord J. Russell, in answer to Sir James Ferguson, stated that the Government had received no intelligence that French troops had been sent to Syria. France had asked the great powers of Europe to join her in an intervention to prevent the atrocities which were at present being perpetrated in Syria. The British Government had sent a naval force to Syria, and marines would, if necessary, be landed, but their operations would be confined to the coast.

VISIT OF HER MAJESTY TO THE ARCTIC YACHT FOX.—The yacht Fox, fitting out for an Arctic cruise to determine the best route for a North Atlantic telegraph, was honoured on Thursday morning with a visit from Her Majesty. During her progress over the ship she minutely questioned Captain Young respecting the previous voyage of the Fox in search of the Franklin remains. Dr. Rae was then presented to Her Majesty, who expressed herself much interested in his travels. Colonel Schaffner had the honour of an introduction to Her Majesty, and explained to her the route proposed to be surveyed and the various apparatus for conducting the deep-sea soundings, in which both the Queen and the Prince Consort appeared much interested. The Prince Consort then proceeded below and examined the various arrangements which had been made for the comfort of the officers during the expedition, with which he expressed himself highly satisfied. The remaining officers of the expedition having been presented, the royal party again walked round the ship, and after a stay of about half an hour was again conveyed in the barge to the Fairy. On leaving the Fox both the Queen and the Prince stated they were much pleased with their visit, and expressed an interest in the objects of the expedition, and wished both Captain Young and his officers every success. On the departure of the illustrious visitors the crew of the Fox manned the rigging, and gave them three hearty cheers.

THE VOLUNTEER SHAM FIGHT.

The Volunteer sham fight at Chiselhurst, this day week, was one of the prettiest sights imaginable. The weather was favourable, and the charms of the well-wooded and quietly picturesque park in which the eddies of the battle were condensed, amid sloping grassy hillocks and knots of trees, lent their influence to the unusual spectacle. The demonstration was so far successful, but in the very point where we anticipated failure, the Volunteers, or rather their generals, certainly failed — they were late on the ground. They kept the public waiting for two hours beyond the time. The commissariat broke down, and their arrangements were interfered with by many unforeseen circumstances, which in actual service are rendered appreciable by experience. We most cheerfully admit that there was none of the confusion and disorder which we apprehended in the sham fight; but it must also be remembered that the movements were taken very slowly, and were of an exceedingly simple and elementary character. When the Volunteers warmed to their work the independent file-firing became very good, and well sustained; and the advance in line, particularly that of the London Brigade, was very well executed.

The authorities have, it is understood, evinced a feeling in reference to these displays which would tend to make them take the management more into their own hands, and to prevent such voluntary or unauthorised assemblages of drilled and armed men; and in some quarters certainly a disposition was shown to refrain from any act which could contribute to the happy result of the sham fight last week. That result was, under the circumstances, very creditable; we repeat it with satisfaction—it was an astonishing proof of the real spirit, intelligence, and love of their work on the part of the Volunteers. Whatever General Eyre may have to report as to the general design of the attack and defence, and as to the extraordinary crab-like movements in parallel lines, and in echelon of the two bodies, he must speak favourably of the order of the little armies, of their desire to obey, and of their ability to sustain a very heavy fire without confusion in the ranks.

We can add nothing to the reports which appeared a week ago in the papers, as far as the sham fight is concerned; but we may remark, that scant justice has been done to Mr. Strode, who supplied a Homeric luncheon from Gunter's for many hundreds of visitors, and who gave up his grounds to the public; and still less credit has been rendered to Mr. Tod Heatley, whose "champagne" and "cup" welled out fountain-like in the refreshment tents. All the world could not be admitted, but the admissions were as liberal and large as could be expected by even unreasonable people. Had the Volunteers known what was still left in the tents when they reached the foodless camp-fires, we think the heights would have been carried at the point of the the sword bayonets. Before we go to details, may we ask how many times the ramrods stuck in loading?—for we hear that even with blank cartridge the difficulty in loading the Enfield has not been overcome. The bugle calls to "cease firing" should be a little better understood and attended. It was appalling to see Lord Ranelagh and Alderman Rose in the midst of what is called a "withering fire," riding between two lines of blazing rifles with uplifted hand, and shouting till they were hoarse to abate the storm of musketry.

The scene of the operations, Camden Park, is situated between Chiselhurst Common and Bromley Road, a mile and a half from the Southborough station on the Mid-Kent Railway, and about three miles to the left of the Crystal Palace, which, rising above high embowering trees in the distance, forms a beautiful object in the pleasant panorama that greets the eye of the spectator standing on the hilly slope which formed the key to the position, the principal aim of the ideal attack and defence on Saturday.

The park was gratuitously thrown open to the public, the seats only being reserved for the friends of the liberal proprietor, Mr. Strode. Nor were the public slow to avail themselves of the opportunity, as from first to last not less than 25,000 persons must have been present. The scene before the arrival of the troops was consequently one of brilliant effect. The arrival of the Volunteers was unduly delayed by want of train accommodation. At last it became known that they were in the vicinity, and, in fact, one army, under Lieut.-Colonel Hicks, was advancing from behind the wood at the farther end of the valley, having it on its left flank; and the other (the enemy, as the public chose to call it), under Lord Ranelagh, was actually in the wood awaiting its closer approach to fall upon it. But the valiant chief of the Londoners was not to be so caught. The party in the wood, advancing through the rough ground, consisting of the 1st battalion of the 1st Brigade, constituted the West Middlesex Rifles, under the command of Major Compton, and contained five companies 200 strong.

Their grey dresses scarcely perceptible, they lay among the trees *perdu*, but were discovered by Lieut.-Colonel Hicks, who had arrived thus far on his way upon a line supposed to lead from the Crystal Palace along Chiselhurst Common to the Bromley Road. The 3rd battalion formed his advance guard, headed by the Middlesex Civil Engineers under Captain M'Leod, the Volunteer Guards, under Captain the Hon. T. C. Bruce; the 1st Kent Rifles, under Major Scott; and the 33rd Kent Rifles, under Lord Warde. The Volunteer Guards and the Middlesex Civil Engineers, conspicuous from their scarlet coats, being thrown out to the right as skirmishers, made their way through a hedge to the skirt of the wood, and kept up a brisk fire into it, which was answered by occasional spirts of smoke coming out from amidst the trees—marking the locality of the skirmishers, also in advance of the attacking party. This was an interesting sight, and the quick firing and reloading of the Engineers and Volunteer Guards attracted much attention and remark. They were, of course, beaten back, though ably supported by the 1st and 2nd Kent, who lined the hedges, and blazed away as their comrades fell back. The 2nd battalion, formed of the London Brigade, in dark imposing masses, followed by the 1st battalion, also of the London Rifles, now deployed. But the enemy pushed out of the wood, in spite of the repeated volleys (admirably delivered) of the 2nd battalion, and their battle was strengthened by the advance from an opening between the woods of the other two battalions of the 2nd attacking brigade under Colonel Thorold, the 1st comprising the South Middlesex Rifles, commanded by Major M'Pherson; and the 8th Kent Rifles, by Lieutenant Crossman. The 2nd, commanded by Major Farnell, were the 13th and 18th Kent, led by Captain Harris; the 21st, by Captain Parker; the 25th, by Lieutenant Rogers; the 34th, by Captain Montgomerie; the 4th, by Lieutenant Carter; the 16th, by Captain Dyke; and the 3rd, of the same county, by Captain Drury. At the same time the other division came entirely out of the wood, and delivered several volleys with great apparent precision and in a most efficient manner. The scene here became highly animated, and it was evident that the firing was so steady and decisive as to establish the character of the riflemen as excellent light infantry. In the advance and rapid firing of the men there was every characteristic of a rifle corps; but in their closeness and compactness of movement when massed together there was all the solidity looked for in effective infantry. This same peculiarity made itself more markedly conspicuous in a later portion of the proceedings.

A stand was made by Lieut.-Colonel Hicks; but he was gradually driven back upon the limekilns, a position which was stoutly maintained with much sharp firing—the attacking party creeping forward, and the defenders firing at them from behind every hedge and tree. At last, the enemy getting very angry at the delay (for the London Riflemen would not go), and, as it was announced, actually sending word that they would put an end to the battle unless Captain and Alderman Rose withdrew his men, the defenders retired from their ambush, but not without springing a mine as the enemy entered. The battle now rolled up the hill. The British public, who sturdily maintained an unflinching front to the very last possible moment, retired behind the red-coats, who advanced by an echelon movement, followed by the London Brigade, headed by the bold Captain and Alderman Rose on his white charger. The brigade was here well handled by Lieut.-Colonel Hicks. The whole defending body now crowned the hill and drew up in two lines on the crest, the whole lying down under the (imaginary) heavy fire of (suppositious) artillery from the opposite heights, which covered the march of the main body of the enemy, headed by Lord Ranelagh, down to and across the brook and up the hill to force their position. The first attacking brigade, Lord Radstock's, now came into action, consisting of the West Middlesex Rifles, under Major Compton; the 3rd, under Captain M'Innes; the 17th, under Captain Wilkinson; the 19th, under Captain Hughes; and the 20th of the same county, under Captain Houghton; Truman's Brewery Rifles, under Captain Sir E. Buxton; the 7th Surrey Rifles, under Major Beresford; the 4th, under Captain Evans; the 9th under Captain Yeatman; and the 13th of the same county, under Captain Hastie.

The enemy's force was now apparently overpowering. Colonel Hicks allowed them to approach close up to his men on the brow of the hill; then at a word up rose the Volunteer Guards, the Civil Engineers, and the whole line of the London Brigade. The order was given to fix bayonets, and the volley poured in by them was something terrific (ideally), and went spattering in the front of the advancing column of the foe, who fell into momentary confusion, broke, turned, and ran down the hill amidst the hurrahs of the delighted British public, who roared—as if they had done it themselves—and the laughter of the runaways, who covered their (supposed) disgrace by seeming to enjoy their warm reception and repulse.

The advance of the line of defenders down the hill upon the retreating party was something to look at and admire.

The victory was attained and the enemy driven down into a river in his rear—a position which certainly would have been fatal in a real field. Lieut.-Colonel Hicks, who had checked his advance (the artillery being again presumed as very busy against him), now drew off his men, falling back upon the base line of his original march. The enemy then rallied, and under fire of the artillery took possession of the disputed hill. But the Londoners again turned at bay, halted, and delivered several volleys; then took to file firing, and then retreated again, closely followed by the now inspirited enemy. The firing became sharper and quicker, until at last it echoed and rattled from wood to wood with unintermitted roar. Captain Magnus now advanced between the lines with a flag of truce, and Lord Ranelagh, with some difficulty, and not a little danger to himself from the quickness of the loading and reloading, succeeded in stopping the fire. The bugle sounded truce, and the battle was over.

Among those present were observed Lord Llanover, Lord Cardigan, Lord Ingestre, Colonel Knox, M.P., Colonel Meyrick, Mr. E. Ball, M.P., Mr. Wyld, M.P., and the members of many distinguished families resident in that district of the county of Kent.

ENLISTMENT OF APPRENTICES.

[Lieutenant Lowrie, an indefatigable officer, whose knowledge of the recruiting department is as great as his services in it have been valuable to the state, has sent us the following.]

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Will you permit me, in reply to a letter from Mr. John Bishop, published in the ARMY AND NAVY GAZETTE of July 14, to state that he has incorrectly quoted the clause of the Mutiny Act relative to the "claims of masters to apprentices." The 61st (not the 62nd) clause of the Act for 1859 distinctly states that "no master shall be entitled to claim an apprentice . . who shall enlist . . unless such apprentice shall have been bound, if in England for the full term of seven years, not having been above the age of fourteen when so bound." The stipulation that "the apprentice when claimed shall be under twenty-one years of age" refers only to Scotland; indeed, it would have been a manifest absurdity to have added such a proviso with regard to apprentices in England, since, if not over fourteen when apprenticed and bound for seven years, they must of necessity be under twenty-one at any period of their apprenticeship. Now, the apprentice in question having, according to his master's own admission, been bound only for five years, it is quite clear that he could not be claimed under the provisions of the Mutiny Act.

While, however, Mr. Bishop erroneously maintains that his claim was good and ought to have been allowed, he, singularly enough, concedes that it would have been vitiated, if his son "had flatly told the sergeant that he was not an apprentice," as "under those *circumstances, the 62nd (61st)* clause certainly excludes the master's claim"! I need scarcely observe that there is not one word in the Mutiny Act which warrants the assertion that a master's claim to his apprentice could be so unjustly evaded.

It has, however, been long felt that the law on this subject has hitherto pressed rather hardly on the master, in requiring that apprentices should be bound for seven years, there being so many trades in which it is usual to bind them for a shorter period, and therefore the Mutiny Act for the present year has been altered in this respect, and a master can now claim an apprentice who may enlist, "if bound (in England) for the full term of five years, not being above the age of fourteen when so bound."—I am, &c.

W. F. LOWRIE, District Adjutant.

THE PURCHASE SYSTEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—There is no subject connected with the Army of greater importance than that considered in your leading article last week. Except a few intending retirers, the officers of the Army generally must be greatly obliged to you for the information and ability with which you have written on the subject. In the absence of a penal conviction, which scarcely seems practicable, there is no doubt an all but insuperable difficulty exists to a prevention of the "extra money" system. But there is one plan, speedy and effectual, for its abolition; and it is on the expediency of this plan that I wish to say a few words.

That a purchase step in a regiment could not possibly be given to the senior purchasing officer in the regiment, would at once neutralise any "arrangements" made, and therefore a captain wishing to sell would simply have to send in his papers, quite unable to arrange with his successor from the very fact that he would be unknown. I believe it to be quite a delusion to say this would prevent retirement from the Service. No man, wishing to remain in the Army, would give up his profession for 500*l.* or for 800*l.* If he retires, it is for some predetermined purpose, and not for the sake of a few hundred pounds. A step in a regiment does not go by one rank saying to another, "I will give you 600*l.* to leave the Army"; but the senior comes to the junior, and says, "I am going to sell—what will you give me?" Thereupon, the lieutenant says he will give 300*l.*, and the captain wants 600*l.*, and probably in the end takes 400*l.* or 500*l.*, or as much as he can get. This sum would not keep him in the Army, any more than it would make him leave it; but he wishes to make a little money on the plan of "How much is enough?" "A little more than you have got." With respect to the ill effect on the *esprit de corps* of a regiment, it is only necessary to say that the British Army is a corps, and it would be an extraordinary thing if an officer from one battalion were to find himself so utterly unable to fall in with the system of another, or so influential in upsetting it; moreover, it is done every day in numberless instances, and the British Army is as united as ever.

One purchase step given (as it is technically called) in another regiment would strike a very effectual blow at the system, and half-a-dozen such cases would annihilate it.

Digitized by Google

No injury would be done, because the extra money saved, which would be at least 400*l.*, would represent four or five years extra pay as captain, and seniority would be the basis for promotion. After an official notification that no regimental arrangements would be recognised, a senior asking for extra money would be looked upon as a joke. It is not to be expected that one article or one letter will be sufficient to remove such a deeply rooted evil, but I believe a thorough "ventilation" of the subject would soon end in the abolition of a system more injurious in its ramifications than is generally known.—I am, &c., DRACO.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I can tell you why cavalry officers continue recklessly to give such large prices for promotion. The threat of an exchange to India, with 1500*l.* given, generally produces the sum, or the exchange takes place; and the commotion among high and low at the loss of promotion gains the object desired when the next step comes on.—I am, &c., W.

ROYAL MILITARY COLLEGE, SANDHURST.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your exposure of the wrong intended to be done to many cadets who had qualified for commissions without purchase at the late examination, having been copied into the leading journals, has, in some degree averted the threatened injustice. But it is in reference to the rule intended to be acted on at future examinations that I would, with your permission, offer a few remarks to parents who may look forward to the Army as a profession for their sons.

All, it is presumed, know that there are two modes of obtaining commissions in the Army, one by purchase, and direct through a competitive examination, involving no previous military training, and which any ordinarily-educated gentleman's son may face, without fear of the result; if, however, he should fail, or, having succeeded, should change his mind, as to a profession, he may do so without loss of either time or money: the world is open to him to choose.

The other course is through Sandhurst, leading to commissions without or by purchase, as the case may be; in this, as in the first instance, the education of the candidate is tested by a competitive examination, at which the questions have more of the military element than in the former, and therefore render a more technical training necessary. This ordeal passed, the youth enters the R.M. College as a cadet, subject to strict military discipline under the Articles of War, and an exclusively military education, for a period of two years, and at a cost of about 200*l.* a year, liable at any moment, from idleness or breach of discipline, to be sent back to his friends, with the loss of time, money, and prospects, to do the best they can for him. As the inducement held out to parents to encounter these adverse chances is the hope of obtaining a commission without purchase, it clearly becomes the duty of the authorities to declare explicitly what the conditions of success are to be. If a certain number of marks, let it be so declared; if by competition for a limited number of commissions, let the public know it, that parents may have some data to go on, before committing the future prospects of their sons to a mere capricious chance. This could be easily done, as the authorities of the War Department must be well aware of the average number of commissions placed annually at their disposal by the casualties of the Service. If these are insufficient to give commissions to all these cadets who have been found qualified to receive them, it proves that the number of cadets taken into the establishment at Sandhurst is too great; it is a costly institution, though an invaluable one to the country, as furnishing accomplished and well-trained officers to the Army; but it is unjust and unreasonable to raise the funds required for its support by a partial tax, levied upon those who, through false hopes, are led to place their sons in it. It is certainly no boon to a cadet, who has qualified himself for a commission without purchase, to transfer him to a list of young men who by a short cut have obtained the privilege, with small labour, to purchase their commissions, and tell him that he is at liberty to do the same; yet this is precisely what the authorities have proposed to do.

I disclaim any intention to attribute blame in this matter to the Commander-in-Chief; on the contrary, I am sensible that had the case been wholly under the control of His Royal Highness, no ground of dissatisfaction would have existed.—I am, &c. AN OBSERVER.

The army of the Pope consists of 4 battalions of natives, 4 of Swiss, 2 battalions of native riflemen, 2 of Swiss, 3 of Austrians, 1 of French and Belgians, and the gendarmerie 3500 strong. Total, 20,500 foot. The cavalry consists of 2 squadrons of Roman dragoons and 3 of foreigners.

SEAT OF WAR IN SICILY.

[FROM OUR OWN CORRESPONDENT.]

PALERMO, July 7.—The aspect of affairs is brightening daily, and this city is fast assuming its former beautiful appearance. The barricades, the last of which has disappeared, [no longer disfigure the streets nor obstruct the thoroughfares; the promenade is resumed on the Marina, and the band plays there nightly to gay crowds of all classes. The soldiers of Garibaldi—whose uniforms now present considerable variety as the various new corps are established—although engaged in drilling all the day, find time to enjoy the marine promenade in the evening. A large body of men, well-armed and looking remarkably soldier-like, considering the short time that has elapsed since their enrolment, has already marched to join the patriotic force that has preceded them into the interior; their departure was *fêted* with every demonstration of joy on the part of their friends, on whose part nothing was wanting to stimulate the ardour and increase the enthusiasm of the new levies.

The district of Palermo is for the future to have two commandants of mounted force, with thirty men under the command of each, whose duties will be the preservation of public security, the one to have charge of the eastern part of the district and the other of the western. It was high time to appoint a police force of some sort, as the number of convicts who were liberated on the 28th of May in the general gaol delivery by the mob, and who have since been roving about sbirri-killing, required some check, as may easily be imagined when it is known that no less than twenty-eight men of the sbirri and spioni were killed in one night, some in their houses and others in the streets. The last victim to popular fury was a police officer, who was put to death by Lynch law in the open street; since which event Garibaldi has issued a decree, to the effect that any individual exciting the people by words or writings to persecute any one, either under pretext of his having been engaged in any blameable operation of the late Government, or that he belonged to the abhorred police, will be for that only punished as if guilty of manslaughter, and will be punished with death in case of the person so set on being killed, or grievously injured in body, or wounded.

The second article of the same decree declares that any one who will under such pretext arrest or cause to be arrested any citizen without the express orders of the authorities will be punished by perpetual exile from the state. Such public condemnation of the excesses which have from time to time disgraced the popular cause was much needed, as one shudders at the thoughts of wretches, however guilty, being put to death without judge or jury, or even benefit of the clergy. If the popular fury that has exhibited itself against the sbirri be indeed a reaction, and the consequence of the great cruelties practised by the police during their days of power, such excess was to be expected, and still more when such elements of disturbance as liberated convicts are were present to act as ring-leaders and emulous to distinguish themselves as impromptu executioners. If the streets had not been lighted by the constant nightly illumination continued by order of the Provisional Government, the state of affairs would have been much worse. It is devoutly to be hoped that the decree of the dictator will put an end to acts of violence, the only excuses for which that I have heard any one urge being, that as the faces of the sbirri were well known, none but sbirri and spioni were put to death, and that they richly deserved it, on account of the tortures and cruelties they had inflicted on the people.

Reinforcements to the army of Garibaldi have arrived in great numbers from Italy, and are by no means raw levies, but fine soldier-like fellows. Many of the officers wear the Sardinian military uniforms; and the breasts of many are decorated with several medals for the Italian campaign. Meanwhile every effort to raise a national force composed of Sicilians is made, and in addition to the formation of National Guards, Cacciatori dell' Etna, and regiments of the line, Battaglione degli Adolescenti, is also instituted, and will be founded on the same base as the National Army. The commandant and other officers will be chosen from those retired from active service, intelligence and high moral character being the qualities determining the selection. The sous-officiers will be chosen from the youth themselves; but this grade will be honorary in the army; the administrative duties however will be executed by veterans in the grade of "sotto officiale." The arms, clothing, &c., will be the same as those for the infantry of the national army. A certain portion of the pay due to each youth will be reserved and stored for his use, and set at his disposal when old enough to enter the regular army. The age of admission into the battalion is from ten years till seventeen. On reaching seventeen years, the now well-drilled young soldier, whose education has been looked after, and for whom all useful athletic exercises, &c., have been provided, will it is hoped be a valuable prop to the national cause, and form one of an army of high *morale*.

PALERMO, July 9.—The affairs of Sicily do not present much difference of aspect from that existing at the date of my last letter. Palermo is still the seat of government, and whatever further operations may occupy the powerful mind of the dictator, he at present confines his attention to the administration of public affairs. The enrolment of national guards and regiments of the line proceeds with great spirit, the new levies make already no mean appearance. Public confidence is quite restored, and order established in the city and districts adjoining Palermo, and the appearance of the former is so little like what it lately was that, but for the presence of the ruined houses, one could not easily realise the fact that it was lately the scene of street fighting and bombardment. No turn of a kaleidoscope could exhibit a greater change than that now presented by the long drive through the Via Macqueda and Favorita, thronged as it is every afternoon with brilliant equipages and gay cavaliers, where barricades and armed "squadri" were so lately the sole occupants. The city seems to have regularly resumed its former tone, and the people their round of occupations and pleasures. Accounts of the most favourable nature continually arrive from the interior, and La Masa meets with a favourable and enthusiastic reception everywhere. Conjecture is busy as to what expedition will come next in the Garibaldian programme; that an attack will be made upon Messina, or a descent in Calabria seem to be the most probable alternatives; and no doubt, before long it will cease to be matter of conjecture.

PALERMO. — Extract from a private letter of a naval officer at Palermo. "Dear Sir,—On the 28th June, the day after the bombardment, which had continued without intermission for three days, I went ashore under the protection of the armistice. After passing over the barricade erected at the Porto Felici, I entered the Strada Toledo. This street bore evidence of severe fighting. The houses were pitted with balls, and the entire ground filled with stones, &c. As I proceeded, barricades stopped the way at every hundred yards; and the corners of houses broken, and windows smashed in, balconies torn off, gave very mournful evidences of the horrors of war. As I approached the cathedral at the upper end of the street, the scenes became worse and worse,—whole houses completely torn to pieces, their remains piled up against the shop-doors, which looked as if they would burst open every moment, and cause the burning shell above to tumble into the street. After passing this dangerous spot we were obliged to go round by the back of the cathedral, and then the first sight of the dead appeared; it was a horrible spectacle; two bodies, a man and woman, apparently killed by the bursting of a shell, as their clothes were then burning, and their persons black and seared; a poor little boy was here also. He was leaning on the bar of the church door, to all appearance asleep; however, it was the sleep of death; he had received his summons by the same messenger which had called away his two poor companions, the man and woman. Leaving this hideous spectacle, I crossed the Palace Square, and came to a part of the town, the desolation and ruin of which it is impossible to describe. Whole streets gutted, the mangled remains of human bodies, broken furniture, desolation of desolation reigned here. It appeared as if the very demon of destruction had held his revels; and, indeed, it was so, for it was all done by the Neapolitan beasts who were quartered in the adjoining royal palace, and who swarmed about its walls and windows and roof, as thick as bees. These were the heroes who were to slink out like filthy rats four days after, as they did, to the number of 20,000, and that before young Garibaldi and a small guard of his brave companions. There is no parallel to this in history. Before, I may say, assembled Europe (for there were ships of all nations in the harbour), did these miscreant slaves of a miscreant king move down the Marina, regiment after regiment, in number more than ten to one to Garibaldi's troops. The greatest part of them have since sailed away. One of the transports had the impertinence to go close to the Admiral's ship, the Hannibal, and give three cheers. They were treated with the contempt they deserved, and steamed away under the loathing disgust of every brave man on that noble ship. To resume my description of this part of the town. In an adjoining street are the blackened remains of the convent of "Santa Catherina," the door had been blown open, and I entered. On the first landing-place at the head of a noble flight of marble stairs, were the remains of a human body, burnt to a cinder, and in an adjoining apartment the remains of 13 who had been shut up—then murdered—then burnt. The refectory, where the monks used to dine, has its roof fallen in, and in passing over the remains I was horrified by the sights I had to witness. One poor monk was completely buried, with the exception of his hands, which were stretched out as if imploring mercy. Rushing away from this I came upon a shell of a house, on the floor of which were the blackened remains of an entire family—father, mother, and four daughters. This awful spectacle finished me up, and I hastened away, lest I should faint or grow mad under the accumulation of horrors I had that morning witnessed."

GREENWICH HOSPITAL, AND NAVAL RETIREMENT.

On Thursday night in the House of Commons, Cir Charles Napier moved the following resolution: "That it is the opinion of this House that the Report of the Commission on Greenwich Hospital should be carried into effect."

The gallant admiral read copious extracts from the Reports lately made by the Commissioners appointed to inquire into the management of the Royal Hospital, and made out a strong case against every Board of Admiralty that has been in power for the last 80 years. He showed that matters had been growing from bad to worse since 1848, at which period there were only eleven vacancies for seamen, and when it was really a matter of difficulty, and indeed of political interest, for a man to procure a nomination, whereas now there were 1124 vacancies. We entirely agree with the gallant admiral when he asserts that there must be *something wrong in the administration* of the ample funds of the hospital for such a state of things to exist. Sir Charles proved that no difference was made at Greenwich in the treatment of men who had earned good conduct badges and of those who were not so distinguished. He also showed that a degree of harshness was exhibited towards the pensioners which neither the country nor the House would indorse. He referred to the state of the schools, and said that "such a state of things was most discreditable, and ought to be instantly remedied." The Commissioners agreed with him, and in their Report had stated that unless their suggestions were attended to, it would be better to turn the place into an infirmary for sick seamen. Sir Charles concluded by attributing the failure of the reserve scheme and the lack of seamen wherewith to man our fleet to the conduct of those who had abused the funds belonging to Greenwich Hospital.

Admiral Walcott briefly seconded the motion; and Lord Clarence Paget, after defending the Board of Admiralty, of which he is a member, against the attacks made upon it by Sir Charles Napier, pressed the latter to frame his resolution in such a manner as not to commit the Admiralty to the full adoption of the Report, and promised, in the event of his doing so, that during the recess means should be adopted by which any future complaints against the management of the Hospital should be rendered unnecessary.—Sir Michael Seymour supported the motion, and showed that in 1805 the expenses of the establishment were 21,800*l.*; the number of inmates 2400, and the cost of maintaining the men 69,000*l.* In 1859 the pensioners were 1600, the salaries had increased to 53,000*l.*, whilst the sum expended on the sailors was 44,000*l.* —After a tedious debate, Lord Palmerston stated in a few words that the Government fully intended to take the Commissioners' Report into consideration, and to actupon it.—Sir Charles then withdrew his motion and substituted the following: "That in the opinion of this House the Report of the Commission on Greenwich Hospital should be taken into consideration by Her Majesty's Government, with a view of considering the recommendations contained in that Report in the manner most conducive to the public interests." This motion, however, was also, at the suggestion of Lord Palmerston, negatived without a division. We shall therefore have to wait patiently till next session for the fulfilment of Lord Clarence Paget's promise.

The House then went into a Committee of Supply. On the vote for the new plan of naval retirements, Sir C. Napier objected to the vote on the ground of the unfair manner in which the Government proposed to deal with naval officers in reference to the retired list.—Sir J. Elphinstone opposed the vote on three grounds—first, on account of the mode in which it dealt with the mates' time; secondly, of the mode in which it dealt with coast-guard time; and thirdly, of the mode in which it was proposed to deal with the captains on the reserved list. He thought the whole question of retirement ought to be referred to a commission. The mode in which the Admiralty have disposed of the mates' time is unfair and cruel to these officers, who for want of political influence were compelled to remain six, seven, eight, and

Digitized by Google

even ten years without that promotion which Lord C. Paget received the moment he contrived to pass his examination. It is unworthy of the members of the present Board of Admiralty to throw the onus of their being prevented from carrying out a simple and graceful act of justice on the Chancellor of the Exchequer. Let their Lordships at all events try Mr. Gladstone first before they hold him up to the country as a niggard towards a set of meritorious men, whose only fault is that they continued too long in a thankless service, instead of trying their fortunes elsewhere. Does Lord Clarence Paget want to see a combination of lieutenants and commanders similar to that formed by the medical officers, who, in spite of all opposition of this and former boards, have gained a large increase to their pay, and a uniform similar to that worn by rear-admirals and commodores? We hope there will be no occasion for anything of the kind. Sir John Pakington, to his honour, supported mates' time, and condemned the scheme of retirement, which he affirmed was not supported by a single naval officer; but notwithstanding the support of even the Radical members, no promise could be exacted from Lord Clarence that he would comply with the advice tendered, and the vote was carried.

On the proposal to vote 33,000*l.* on account of the officers, seamen, and marines who had served in the war with China, Mr. Cochrane moved that the Chairman report progress. As the sum demanded was inadequate to the claims which it proposed to satisfy, Sir Charles Napier supported Mr. Cochrane; but as the forms of the House had not been complied with the vote was taken. Sir Charles, however, threatened to oppose it when the Report was brought up.

NAVAL RETIREMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I shall feel obliged if you will notice in your valuable and independent journal the proceedings of the late meeting of the Naval Benevolent Society, when petitions from the widows and orphans of admirals, captains, commanders, lieutenants, &c., were taken into consideration, and sums voted for their relief.

The necessitous condition in which the families of old officers are frequently placed, will, we hope, not be overlooked by the authorities, who are now preparing a revised plan of naval retirement, and induce them to hesitate in proposing measures which will tend to inflict on many officers on the active and reserved lists of captains and commanders great and undeserved pecuniary loss both in half-pay and widows' pensions. They should remember that a plan of retirement which would be just in 1880, will be cruel and harsh if brought into operation in 1860.—I am, &c.,

ONE WHO HAS SERVED UNDER NELSON AND ST. VINCENT.

INJUSTICE TO NAVAL PAYMASTERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—While every officer in the Navy must have been fully alive to the necessity for the late improvements which have been at length, though most reluctantly, made, in the pay and position of medical officers, they cannot but be aware that the Admiralty have rather bowed to pressure from without than granted in a free and liberal spirit that which common justice demanded, and which, in the case of civilian officers in the Army, was bestowed in a manner that could not fail to be duly appreciated.

This view of the matter is strengthened by the fact, that a like measure of reform has not been accorded to other equally deserving classes in the Service, who have hitherto kept pace with their medical messmates, and whose duties, equally important as their services are as indispensable, have similar claims to consideration; but who find that while improvements have been made in the one instance, and also as regards those officers in the sister Service whose duties and responsibilities are analogous, the paymasters of the Navy, more particularly seem to have been singled out by our naval administrators, as a mark on which to vent the feelings and prejudices which cause disgust in the Service.

It will be hardly necessary for me to remind your naval readers that the paymasters, as a body, are the most hard-worked, as the Admiralty are determined to show that they are to be the worse-treated body of public servants in Her Majesty's Navy. For years have these officers been memorialising successive Boards of Admiralty for some slight improvement in their position; their efforts, however, have hitherto been unavailing; and justice is systematically denied to their most earnest appeals; and so it will continue, while they rest their hopes on the Board of Admiralty.

Hitherto the paymasters have been a disunited class, each and every one fighting for some imaginary good, and few willing to sacrifice their personal interests for the welfare of the whole. This selfishness, however, has been completely dispelled by the late Admiralty Circular, No. 411, and the regulations as regards uniform; and, now united, they are fully determined to bring their claims under the consideration of higher authority than that vested in the Board of Admiralty; and doubtless we shall soon find that the business habits and intelligence of such a large and influential body, exerted for a particular object, will not fail of success, aided, as I feel assured they will be, by the press, and especially by the naval portion of it, foremost of which is your valuable GAZETTE.

Already has the Navy much to thank the ARMY AND NAVY GAZETTE for in calling attention to the shortcomings and exposing the jobbery and abuses of the Board of Admiralty. May that unfortunate class in the Navy, the paymasters, hope for the valuable assistance which you are ever ready to accord to the weak in urging forward their fair claims to consideration; and so supported by you, while they are urged forward by those very natural feelings of indignation at the unfair treatment they have experienced, they will, by persevering in the measures already so well commenced, attain at no very distant period to that position which is demanded by JUSTICE.

NEW NAVAL UNIFORM AND "WITH BUT AFTER."

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—If the "with but after" paradox were as effectually nullified in the Masters' and Paymasters' departments, as it has been in that of the Surgeons, I feel pretty certain the great annoyance those officers feel at the improved position of the medical officers, lately fulfilled in the "New Uniform Circular," would be entirely removed; for then the assistant-surgeon of six years' standing could not rank above the paymaster and master of more than that seniority. And certainly they could not reasonably object to being placed in the same position to the surgeons and assistant-surgeons as the lieutenants are at the present time. This concession would be a very just one to those officers, and also to the chief-engineers, as there would be no longer ground for complaint against the doctors. For it must be fully borne in mind that the Medical Warrant was for the special purpose of promoting medical officers. Whereas, if every other class of officer is raised in an equal ratio, the intention of the Royal Commission and Medical Warrant is nullified. If the country and the Government think the public service will be benefited by raising the position of any other class of officers, as they have done that of the surgeons, no doubt another Royal Commission will be appointed for that special object.

Apologising for trespassing on your valuable columns, I am, &c. IOTA.

INDIA.

[FROM OUR OWN CORRESPONDENT.]

CALCUTTA, June 11.—The Commission upon indigo planting is now sitting daily, and hearing evidence. It is fairly constituted, consisting of two civilians, one missionary, a representative of the Indigo Planters Association, and one of the British Indian Association. They expect to finish their labours in three months, and furnish a report, upon which a better state of things may be based for the future between the planter and the ryot. The gaols in the indigo districts, particularly at Keshanghur, are full of ryots, and they have refused to take their free pardon and liberation, upon condition that they should sow indigo. Their answer is, "that they would sooner die a thousand deaths than do so." As the planting season is now over, and the resistance of the peasantry has been all along dogged and passive, the main body of the police battalions are to be immediately withdrawn, and only a few of the Lahore Light Horse will remain at Keshnaghur. The income-tax of Mr. Wilson will soon be an accomplished fact, the report of the Select Committee having been presented to the Council. It is announced that no officer in the receipt of less than a captain's pay and Indian allowances will come within its scope; and this has given great and general satisfaction.

Lord Clyde took his departure from the shores of India in the steamer of the 4th instant, his farewell *levée* was succeeded by a ball, which was given to him by subscription. A *canard*, relating to an alleged expression of opinion by him in a minute to Government, to the effect that no Indian officer was fit to command a Queen's regiment, caused many of the late Company's officers to absent themselves from both. It is a pity any misconception or misconstruction should have arisen, as no doubt it has upon this subject; time will set it right, though tardily.

Sir Hugh Rose has worthily succeeded the gallant Campbell, and his address to the Army upon the occasion (which I enclose) has given great satisfaction, as did his farewell to that of the Bombay Presidency. He is a somewhat rare instance of the pen and the sword being combined in one, both of which he wields powerfully and well. A singular instance of foresight has just occurred in the return of the whole of the Indian Commissariat from China: upon their arrival there they were found not required, and so were packed off back by the Fire Queen;—why have sent them, if it was not ascertained that their services would be requisite?

Lord Canning looks well after his more than regal progress. Lady Canning, with a small suite, is still travelling in the colder regions, but is expected in about three months. The chivalrous Sir James Outram, by last accounts, had proceeded to Balavia; his health had not improved, and it was feared that he would have to go to England for its restoration. Mr. Le Geyt, the member of Council for Bombay, has also been put on board a steamer, as the only means of saving his life; and on Saturday last (the 9th inst.) the Legislative Council was adjourned in consequence of the Right Hon. James Wilson's illness, and the impossibility of forming a quorum.

We have had two or three courts-martial lately in the presidency, but none of any general interest. I shall give you the stations of the troops in India, in my next.

Sir Mordaunt Wells, the 2nd Puisne Judge, has been sworn in as a member of council, vice Mr. Le Geyt.

From China we hear that the French, though enjoying a very fair sanitary condition, are for once much behindhand in their preparations for the field. Their embarrassments on this score will be further increased by the loss of the steam transport Isere, near Amoy. They are almost destitute of horses, and we learn that the steamer contained their artillery equipments and a quantity of saddlery. The best understanding exists between Sir Hope Grant and General De Montauban, and the former had gone so far as to offer the French general a number of horses purchased for the use of the English Government, which had been declined, however, because they were too dear. We regret to observe that difficulties have already occurred in the working of the Indian and the Royal armies in the commissariat department, but we hope that there will be no further misunderstanding between the officers of the commissariat.

Having the successful example of the Civil Service Corps before them, the 2nd (South) Middlesex are about to give an entertainment on Monday next, the 23rd, at the Lyceum Theatre. Although they do not unluckily possess a dramatic author of Captain Tom Taylor's excellence among them, they have secured the services of a gentleman formerly well known on the amateur stage, but now an established favourite at Manchester, Mr. J. Robins, who will play in "A Rough Diamond" and "Twice Killed," most of the Volunteers appearing in the "Corsican Brothers." Miss Florence Haydon, Mrs. C. Selby, and a promising pupil of hers, Miss Charlotte Willard, have been engaged, the last-named young lady playing *Margery* in "A Rough Diamond," and *Fanny Pepper* in "Twice Killed."

Obituary.

The colonelcy of the 2nd (or Royal North British) Dragoons has become at the disposal of the General Commanding-in-Chief by the death of Lieut.-General Lord Sandys, who died on Tuesday last, at Ombersley Court, Worcestershire; making the sixth Waterloo officer whose demise we have had to record within little more than a month. The lamented deceased was the second son of Arthur, second Marquis of Downshire, by Mary, Baroness Sandys, only daughter of the Hon. Martin Sandys, and niece and heir of Edwyn, second Lord Sandys. On the death of his mother in August, 1836, he succeeded to the barony of Sandys, as the eldest of her four youngest sons. The late lord entered the army as cornet in the 10th Hussars in July, 1809; and in 1812, then a lieutenant, he accompanied that gallant regiment to the Peninsula, and saw much active service, and was present at the action of Morales, and the battles of Vittoria and Pampeluna. While on half-pay he was on the staff of the Duke of Wellington, during the campaign of 1815, as extra aide-de-camp to the great duke, and was present at the battle of Waterloo. Subsequently he removed into the 2nd Dragoons, which he commanded as lieut.-colonel from the spring of 1832 to December, 1837. The late general's commissions bore date as follows:—Cornet, 27th July, 1809; lieutenant, 19th July, 1810; captain, 25th August, 1813; major, 27th July, 1815; lieut.-colonel, 21st January, 1819; colonel, 10th January, 1837; major-general, 9th November, 1846; and lieut.-general, 20th June, 1854. The late Lord Sandys was appointed colonel of the 7th (the Princess Royal's) Regiment of Dragoon Guards in March, 1853; and was, in August, 1858, removed to his old regiment, the 2nd Dragoons. The deceased peer, who was in his 69th year, having been born 10th January, 1792, was unmarried, and the title and entailed estates devolve on Lord Marcus E. Hill, his younger brother.

Our naval readers will hear with regret the death of that popular officer, Captain Harry Eyres, C.B. (1841), which took place in London on the 17th inst. Captain Eyres served in the first China war, where he obtained the rank of captain, and commanded the St. George in the Baltic during the Russian war: his last command was in the St. Vincent at Portsmouth. By the death of Captain Eyres, Captain Sir Frederick Nicholson, Bart., C.B. (1846) is advanced to the half-pay list, entitling officers to receive 14*s.* 6*d.* per diem, and Captain Michae lDe Courcy (1852), now in command of the Pylades screw-corvette, will on paying off be placed on the list of 12*s.* 6*d.* per diem.

COMFORT FOR SIR CHARLES NAPIER.—In a discussion on the Budget of the Marine, or the Navy Estimates (in the Corps Legislatif), the Vicomte de Kervéguen made a speech which seems to show that the French navy board is not less liable to mistakes than our own. After exposing many abuses and hardships in the system of pay and pensions and the personnel of the service, he attacked the materiel itself. He asserted that all the French ships of the line were too low in the water, and could not fight their lower tier of guns, even in a slight breeze. The American and English navies had now adopted an infinitely superior mode of construction. The Bretagne, so superb a ship to look at, had one tier almost under water—it was so, in fact, when first launched, until artificially raised; and even now the lower ports were almost always obliged to be kept shut. The vessel had cost 240,000*l.*, and had an engine of 1200-horse power. But she burnt 120 tons of coal per day, and had only stowage for 400, which rendered her steam power next to useless. Five or six other ships of the line, which he named, were fitted with engines of such unequal powers that it was impossible they could ever combine their movements with any effect. An engine of 500-horse power could never keep pace with one of 1200. Six first-rate frigates had been constructed, which the speaker also named. The engines were too heavy, the vessels sunk too deep, were slow when they steamed, and incapable of sailing. Each had cost 120,000*l.* The Souveraine was especially bad. When tried at Cherbourg for Admiral Larrieu, who was going to the South Seas, it was found she could only sail, and the admiral was obliged to take the Duguay-Trouin, ship of the line, instead. The Souveraine was declared unfit for navigation. The Impératrice Eugénie was obliged to have her screw changed, and when a commission was sent to try her, the concussion was found to be so great that in three days she would be shaken to pieces. The old screw was then replaced with no better result. "All this was deplorable." The duty of constructing vessels was given to engineers who had never been to sea. Ten frigates are all begun at once on the same model, and if one prove a failure all the rest are so. The *frégates blindés* M. de Kervéguen also pronounced to be "failures." They were made to carry 570 men, 36 guns, four months' water, and 15 days' coal; but they would only carry 12 guns and four days' coal; and a naval commission had decided that they should only take 100 charges per gun instead of 400, so that after a combat of three hours' duration they would be short of ammunition. The gun-boats were equally bad and unsafe. He had seen four nearly lost at Cadiz because they were such bad sea-boats. The new double-decked transports for China coasts much as ships of the line, and yet carried only four guns, and must be laid up in time of war as incapable of defending themselves. The speaker saw no inconvenience in mentioning these things openly, because every English consul knew them, and kept his government *au courant* with what was going on. The government commissioner, General Allard, made a very indifferent defence to this attack, complaining of its "unexpectedness," and able, seemingly, to deny only one fact—viz., that of the Bretagne having been artificially floated. The government was evidently very much discomposed by the exposure, as all governments are apt to be on such occasions.

The competitive experiments to test the relative merits of the Armstrong and Whitworth guns will shortly take place at the Government practice-range, Shoeburyness, in the presence of the Ordnance Select Committee. Three guns are now being completed for the purpose at the Royal Arsenal, under the superintendence of Mr. Anderson; and Mr. Whitworth is also engaged in preparing the ordnance and ammunition necessary for the trial, which is looked forward to with much interest.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ALLAN—May 3, the wife of George L. Allan, Esq., late of H.M.'s Ordnance, now of Melbourne, Australia, of a son.

ASTLEY—July 14, in Cavendish Square, the wife of Lieut.-Colonel Francis L'Estrange Astley, of a son.

BARNARD—July 12, at Hitcham Rectory, Suffolk, the wife of Major R. Cary Barnard, of a daughter.

CANNON—July 17, at Rockville, Cheltenham, the wife of Dr. Henry Mills Cannon, surgeon, H.M.'s Bengal Army, of a daughter.

CERJAT—July 15, at Southsea, the wife of Lieutenant Cerjat, R.N., H.M.S. Asia, of a son.

COOPER—July 18, at 36, Hertford Street, Mayfair, the wife of Lieut.-Colonel Cooper, Grenadier Guards, of a son.

GRAIN—April 20, at Fremantle, Western Australia, the wife of Captain E. M. Grain, Royal Engineers, of a son.

HARWARD—May 30, at Saugor, Central India, the wife of Captain T. N. Harward, H.M.'s Bengal Artillery, of a son.

HENRY—July 13, at No. 6, Montpellier Terrace, Torquay, the wife of J. R. Henry, Esq., late Captain 4th Dragoon Guards, of a son.

HOSTE—July 16, at Sandgate, the wife of Major Hoste, C.B., Royal Artillery, of a son.

HUME—July 12, at the residence of her father, Charles Vernon, Esq., Lower Mount Street, Dublin, the wife of Major Gustavus Hume, of a son.

LANE—July 10, the wife of Major Powlett Lane, of a son and heir.

LAYARD—July 16, at Hurn Cottage, Beverley, the wife of Lieut.-Colonel B. Granville Layard, of a daughter.

LOVELL—July 15, at 12, Chester Square, the Lady Rose Lovell, of a daughter.

MARRIOTT—June 3, at Poona, the wife of Captain W. F. Marriott, of a daughter.

MEIN—July 6, at Cheltenham, the wife of Lieut.-Colonel Mein, Madras Horse Artillery, of a son.

ROGERS—July 14, at 23, Wickham Terrace, New Cross, the wife of Longdon M. Rogers, Esq., Bombay Army, of a daughter.

STURT—July 17, at 57, Margaret Street, Cavendish Square, the wife of Dr. Sturt, of a son.

WALDRON—July 14, at Herne Hill, Surrey, the wife of Hubert J. K. Waldron, Esq., 31st Regiment, of a son.

WILLIAMS—July 13, the wife of Major B. Remington Williams, of a son.

MARRIAGES.

ANDERSON—DOUGLAS—July 3, at Edinburgh, by the Rev. F. Gillis, Robert E. Anderson, Esq., H.M.'s 3rd Bengal European Regiment, third son of Major-General Anderson, Royal Artillery, to Emma, third daughter of James Douglas, Esq., of Cavers.

BARTLETT—PHILIPS—July 18, at St. Andrew's, Plymouth, by the Rev. H. Townend, rector of Lifton, the Rev. M. Bartlett, chaplain of St. Michael's Mount, and of Ludbrook, South Devon, to Charlotte, only daughter of Major-General Philips, H.M.L.I., late Commandant of Chatham Division.

CAMPBELL—GOCRAMMA—July 17, at St. George's Church, Hanover Square, the Princess Victoria Gocramma, daughter of the late Ex-Rajah of Coorg, to Lieut.-Colonel John Campbell, of H.M.'s Indian Army.

CHOLMONDELEY—SPENCER—July 17, at St. George's Church, Hanover Square, by the Right Rev. Lord Bishop Spencer, assisted by the Hon. and Rev. Charles F. O. Spencer, uncle of the bride, Henry Vere Cholmondeley, Esq., second son of Lord Henry Cholmondeley, to Frances Isabella Catherine, second daughter of Lieut.-Colonel the Hon. George A. Spencer.

COX—ANDREWS—July 12, at Temple Harry Church, by the Rev. J. W. Bowles, Domestic Chaplain to the Lord Bishop of Killaloe, John Hamilton Cox, Lieut.-Colonel 75th Regiment, only son of the late Major-General Cox, to Mary Hall, second daughter of John Andrews, Esq., J.P., of Silver Hills, King's County, Ireland.

EGSTRÖM—REVELL—May 26, at the Cathedral, Madras, by the Rev. R. Gibson, M.A., George Lloyd Engström, Lieutenant Royal Artillery, to Louisa Maria, eldest daughter of Colonel Reade Revell, of Round Oak, Englefield Green, Surrey.

FORBES—SPENCER—July 17, at St. George's Church, Hanover Square, by the Right Rev. Lord Bishop Spencer, assisted by the Hon. and Rev. Charles F. O. Spencer, uncle of the bride, by special licence, the Hon. Charles Murray Hay Forbes, of Brux, Aberdeenshire, second son of Lord Forbes, to Caroline Louisa Elizabeth, third daughter of Lieut.-Colonel the Hon. George A. Spencer.

HASSELL—CARPENTER—May 28, at Secunderabad, by the Rev. T. D. Ostrehan, James W. Hassell, Lieutenant H.M.'s 1st Foot (the Royal Regiment), to Grace Isabella, second daughter of Major-General T. D. Carpenter.

LYONS—AVONMORE—July 7, at St. Peter's Church, Dublin, Colonel Humphrey Lyons, H.M.'s Indian Army, to the Hon. Adelaide Matilda Yelverton, second daughter of Viscount Avonmore.

MACANDREW—COCKERELL—July 13, at St. Mary's, Twickenham, by the Rev. Chas. Maurice Davies, assisted by the Rev. G. Master, the vicar, William Henry MacAndrew, Esq., M.D., of Her Majesty's 57th Regiment, Bombay, to Julia Margaret Cockrell, Woodlands, Twickenham Park.

MARSHALL—JARY—July 18, at Blofield Church, by the Rev. Henry Temple Frere, and the Rev. Thomas Smith Turnbull, Harry Marshall, Captain 9th Queen's Royal Lancers, youngest son of the late George Marshall, Esq., of Broadwater, in the county of Surrey, to Alice Heath, daughter of the late William Heath Jary, Esq., of Blofield Lodge, in the county of Norfolk.

DEATHS.

BEDWELL—May 19, at Bangalore, aged 21, Percival Francis Bedwell, Lieutenant 14th M.N.I., third son of the late Francis Robert Bedwell, Esq., formerly of Walthamstow, Essex.

BLUNDELL—July 5, at Cheltenham, Major-General Frederic Blundell, C.B., Madras Artillery, aged 62.

BOWEN—July 13, suddenly, at No. 5, Park Villas, Ilford, Essex, aged 26, Jane, the beloved wife of Dr. F. Bowen, late surgeon to the Royal Hibernian Military School, Dublin.

CRAWFORD—May 23, at Secunderabad, Clara Frances, wife of Thomas Crawford, Esq., M.D., 18th (Royal Irish) Regiment, and daughter of the late Richard Morrison, Esq., of Dublin.

DALTON—July 15, after a protracted illness, Mrs. Dalton, relict of Lieutenant H. A. Dalton, of Her Majesty's 3rd Regiment (Buffs).

ELPHINSTONE—July 19, at 29, King Street, St. James's, the Right Hon. Lord Elphinstone, G.C.B. and G.C.H., aged 53.

EYRES—July 17, at 13, Dorset Square, Captain Harry Eyres, C.B., of Knockwood Park, Tenterden, Kent.

GAYNOR—July 7, at Killiney House, County of Dublin, the residence of his father, Henry Droz Gaynor, Esq., Captain Durham Regiment of Militia, aged 35, sincerely and deservedly regretted by his family and friends.

HAMMERSLEY—July 17, at 4, St. Alban's Place, Major Frederick Hammersley, late of the King's Dragoon Guards.

JONES—July 15, at his son-in-law's house, Bedford, after a short illness, Captain William Jones, late of the 8th Hussars, aged 76.

KNOLLYS—July 9, at Wells, in the 81st year of her age, Charlotte, youngest daughter of the late Colonel the Hon. Samuel Knollys.

Advertisements.

ROYAL ITALIAN OPERA, COVENT GARDEN.

LAST WEEK BUT ONE OF THE SEASON.

EXTRA NIGHT.—MONDAY, JULY 23, will be performed (for the Fourth Time these Five Years) Meyerbeer's Grand Opera, LE PROPHETE. Fides, Mdlle. Csillag; Jean of Leyden, Signor Tamberlik.

On TUESDAY NEXT, JULY 24. For the Last Time this Season, LUCREZIA BORGIA. Gennaro, Signor Mario; Maffio Orsini, Madame Didiée; Don Alfonso, Signor Ronconi; and Lucrezia Borgia, Madame Grisi (her Last Appearance in that Character). After which LES AMOURS DE DIANE.

MILITARY BAND INSTRUMENTS.

J. KOHLER begs respectfully to call the attention of Commanding Officers and Presidents of Band Committees to his IMPROVED MODELS OF BAND INSTRUMENTS, possessing a most powerful and sonorous tone, and combining elegance with durability in their workmanship.

J. KOHLER also takes this opportunity to state that his newly-invented PATENT HARMONIC CORNOPEAN is universally approved of by the musical world, and he can with confidence strongly recommend it to the notice of all amateurs of the Cornopean.

Drawings and Price Lists sent on application to J. KOHLER, Military Musical Instrument Maker to H.M. Army and Navy and the Indian Army, 35 Henrietta Street, Covent Garden, London, W.C.

MEMORIAL to the late General Sir WILLIAM NAPIER, K.C.B.

At a MEETING held at the United Service Institution on the 8th May, 1860,

His Royal Highness the Duke of CAMBRIDGE, K.G., G.C.B., in the chair,

It was proposed by His Grace the Duke of Richmond, K.G., and seconded by the Earl of Ellenborough, G.C.B.,

That the late General Sir William Napier, as a Soldier and a Military Historian, merited the admiration and gratitude of his country.

Proposed by General Sir John Burgoyne, Bart., G.C.B., and seconded by General Sir Thomas Brotherton, K.C.B.,

That he immortalised the glorious deeds of our Army in Spain, Portugal, and France, by his History of the War in those countries—a history that no true Soldier can read without instruction and advantage and without being inspired by the heroic sentiments and spirit-stirring language of the author.

Proposed by General Sir Robert Gardiner, G.C.B., and seconded by Lieut.-General Sir Harry Smith, Bart., G.C.B.,

That a subscription be immediately opened for the erection of a statue to the memory of the chivalrous Soldier and unsurpassed Military Historian.

London, July 4, 1860. A. LAWRIE, Hon. Sec.

FIFTY POUNDS REWARD.—The Committee of the Shipwrecked Mariner's Society are aware that many LIVES have been LOST for WANT of MEANS of COMMUNICATION from a WRECKED SHIP to the SHORE; they, therefore, offer the above reward for any INVENTION that shall be found to secure so desirable an object. Cheapness and simplicity indispensable. Described plans or models to be sent to the undersigned on or before the 20th October. The Committee will not be bound to accept even the best plan submitted for approval.

FRANCIS LEAN, Secretary.

Hibernia Chambers, London Bridge, S.E.

THE STANDARD LIFE ASSURANCE COMPANY. SPECIAL NOTICE.

BONUS YEAR.—SIXTH DIVISION OF PROFITS.

All policies now effected will participate in the division to be made as at 15th November next.

The Standard was established in 1825.

The first division of profits took place in 1835; and subsequent divisions have been made in 1840, 1845, 1850, and 1855.

The profits to be divided in 1860 will be those which have arisen since 1855.

Accumulated fund £1,684,598 2 10
Annual revenue 289,231 13 5

Annual average of new assurances effected during the last ten years, upwards of half a million sterling.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

The Company's Medical Officer attends at the office daily, at half-past one.

LONDON, 82, King William Street, E.C.
EDINBURGH, 3, George Street (Head Office).
DUBLIN, 66, Upper Sackville Street.

PERSONS DESIROUS TO EFFECT LIFE ASSURANCES at the smallest outlay, are requested to examine the System of the LIFE ASSOCIATION OF SCOTLAND, whose arrangements have been specially adopted with that view.

The Association was founded in 1838, and is one of the most extensive Life Offices in the Kingdom.

PROFIT SCHEME.—A Share of Profits is allocated YEARLY to every Policy-holder of five years' standing at the preceding annual balance, and is applied so as to reduce the present outlay for his policy. The allocations to Policy-holders of the First Series (namely those as yet entitled to Profits), have this year been so much as 37½ per cent. (namely 7*s.* 6*d.* per £1) of the Annual Premiums.

POLICIES OF £1000.	Age 60.	Age 50.	Age 40.	Age 30.
STIPULATED Premiums	£65 10 0	£44 5 0	£32 11 8	£25 0 0
SHARE of Profit for Year	24 11 3	16 11 10	12 4 4	9 7 6
PREMIUMS THUS REDUCED TO	40 18 9	27 13 2	20 7 4	15 12 6

HALF-CREDIT SYSTEM.—Policies of 500*l.* and upwards may be effected and kept up by payment of only One-half the Premiums for the first Six Years, with interest on the other half.

THOMAS FRASER, Res. Sec.

London, 20, King William Street, City, E.C.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 10*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

THE RIFLE VOLUNTEER'S COMPANION, specially adapted to the probable Requirements (Medical and Surgical) of Her Majesty's Volunteer Forces, on the Field, the Practice Ground, or the March. Designed and arranged by SAVORY & MOORE, Chemists to H.M. Army, &c., No. 143, New Bond Street, London, W.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

VOLUNTEER RIFLE CORPS.—NOTICE. In consequence of the heat and fatigue experienced by gentlemen after exercising and review, many have been induced to try OLDRIDGE'S BALM OF COLOMBIA, which invariably has produced such a peculiar refreshing coolness to the head, that it has become a most valuable toilette requisite. It also nourishes and strengthens the roots and body of the hair, prevents it falling off or turning grey, and causes a beautiful appearance, with wave or curl, at the same time cleansing it and removing the scurf. 30 years' celebrity has proved there is no wash equal to it for improving and producing new hair, whiskers, and moustache. Price 3*s.* 6*d.*, 6*s.*, and 11*s.* per bottle. Wholesale at C. & A. OLDRIDGE'S, 22, Wellington Street, Strand, W.C.

SEQUELIN'S OIL.—This Vegetable Preparation is an infallible restorative of the Human Hair, producing its growth, checking its falling off almost instantly, and imparting to it unequalled softness and brilliancy. Testimonials and references on application. One bottle is sufficient. Price 1 guinea. Sold by S. SEQUELIN, 40, Wharton Street, Lloyd Square, W.C. London Agents: G. JOZEAU, 49, Haymarket, S.W.; and METCALFE, BINGLEY, & Co., 130B, Oxford Street, W.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Bugs, Beetles, and every other insect, by this Powder, which is perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in Packets, 1*s.*, 2*s.* 6*d.*, and 4*s.* 6*d.* each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the above name and address. Sold by all druggists.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle, Cottage Gardener*, and *Field*. In boxes, 1*s.*, 3*s.*, 10*s.* 6*d.*, retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

MR. EDWARD DAVIESON'S EVER-LASTING TEETH.—Of such EXQUISITE BEAUTY and such ADMIRABLE Fit that Nature appears to have made good the ravages of Time, Disease, or Accident. At TEN SHILLINGS per TOOTH, which price can only be exceeded by expensive mountings.

DAVIESON'S LIQUID ENAMEL, for Stopping Decayed Teeth without pain, is ENAMEL WHITE, and lasts for ever. Attendance from Ten till Six. Consultation Free.

448, WEST STRAND, LONDON, W.C., over the Electric Telegraph Office. Descriptive Pamphlets free by post, two stamps.

YOUTH AND BEAUTY.—The FLEUR DE L'AGE, or Bloom of Youth, a vegetable preparation, so innocent that it may be applied to an infant, but yet imparts the most dazzling brilliancy to any complexion, and renders the skin beautifully soft; prevents and cures all eruptions. Sold in cases at 5*s.* and 11*s.*—To be had only at ED. DAVIESON'S, 448, West Strand, London, W.C. (over the Electric Telegraph Office). Descriptive Pamphlet free for two stamps.

BY HER MAJESTY'S ROYAL LETTERS PATENT. (GRANTED 1860.)

MR. A. ESKELL, Surgeon-Dentist, 8, Lower Grosvenor Street, Sole Inventor and Patentee of an Invention which has for its object the Perfect and Painless Adaptation of ARTIFICIAL TEETH upon a novel principle, whereby one set of teeth lasts a lifetime, and a second, or reserve set, is unnecessary. Changes take place in the mouth from absorption of gums, removal of stumps, teeth, &c., and ordinary sets would, under these circumstances, be comparatively useless, or only rendered available at some cost, but upon Mr. Eskell's patented process they are not impaired in the slightest degree. Residents abroad or in the country have it in their power to adjust their artificial teeth at all times without the aid of a dentist. Mr. Eskell does not grant licences to use his patent, which can only be obtained at his residence, 8, Lower Grosvenor Street, where the medical profession, the nobility, gentry, and the public may see specimens, and obtain every information. Teeth stopped, &c. All consultations free.—8, Lower Grosvenor Street, S.W.; and Bennett's Hill, Birmingham.

CAFE RESTAURANT DU QUADRANT (AND HOTEL), 62, REGENT STREET, W. Private Rooms for Parties. Wedding Dinners, Soirées, and Hampers for the Races provided.

HILFREICH & GAFFINO, Proprietors.

MR. MARKWELL, Wine Merchant to Her Majesty, Nos. 35 to 40, & 45, Albemarle Street, and 4, Stafford Street, Piccadilly, London, W. Naval and Military Messes supplied.

KINAHAN'S L. L. WHISKY *v.* COGNAC BRANDY, advanced only 1*s.* per gallon at present.—This celebrated OLD IRISH WHISKY rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3*s.* 8*d.* each, at most of the respectable retail houses in London, or wholesale, at 8, GREAT WINDMILL STREET, HAYMARKET, W.—Observe the red seal, pink label, and cork branded, "Kinahan's L. L. Whisky."

ALLSOPP'S PALE ALE, in Bottle, recommended by Baron Liebig and all the Faculty, may now be had in the Finest Condition of Messrs. HARRINGTON PARKER, & CO., who have REDUCED the Price of this highly esteemed beverage to
4*s.* 6*d.* per dozen Imperial Pints.
2*s.* 9*d.* ditto Imperial Half-pints.
Address, HARRINGTON PARKER, & Co., 5½, Pall Mall, London, S.W.

TO PRESIDENTS OF MILITARY MESSES.

BAVARIAN TONIC BEER.—This highly popular Tonic Beer is now in its highest perfection; it is pure and refreshing, and is patronised by most of the leading members of the medical profession. Price, for cash, 4*s.* per dozen quarts, delivered to all parts of London free. Best Devonshire Cider, quarts 7*d.*, pints 4*d.* Hereford Rough, quarts 8*s.*, pints 4*s.* 6*d.*
C. SPIKINS & Co., Sole Agents for London, 9, Duke Street, Portland Place, W.

CYDER AND PERRY IN THE GREATEST PERFECTION. — Devonshire Cyder, 8*s.* qrts., 4*s.* 6*d.* pts.; Cockagee Somerset Cyder, 14*s.* qrts.; Old Field Perry, 18*s.* qrts., 10*s.* pts.; the real Taynton Squash Perry, 25*s.* qrts., 15*s.* pts. Hampers and bottles, 3*s.* per dozen extra, or can be returned at 2*s.* per dozen extra, or can be returned at Benjamin Vickers's Stores, Hay's Lane, Tooley Street, S.E., and 8, Spring Terrace, Wandsworth Road, S.—Post Office Orders, 196, Tooley Street, S.E.

IMPORTANT TO OFFICERS.—Have all your BOTTLED ALES, WINES, &c., PACKED IN SEYMER'S REFRIGERANT STRAW ENVELOPES, which entirely prevent Heating, Fermentation, and Breakage, will use repeatedly as Wine Coolers, prevent all litter on board ship or in quarters, and save 20 per cent. in space and freight. Supplied by all Wine Merchants at 9*d.* per dozen, and wholesale by THOMAS WHITEHEAD, 37, Eastcheap, London, E.C.

COVENT-GARDEN MARKET.—To Clubs, Hotels, and large Establishments.—PULLEN & SON are confident the above would effect a great saving by having their supply of FRUIT and VEGETABLES fresh every morning from their Wholesale and Retail Warehouse, Centre Avenue, Covent Garden and Farringdon Markets. Wedding Bouquets provided. Country orders punctually attended to. A list of prices forwarded on application. Carriage free to any part of town.

"DOINGS IN LONDON" AT THE PRESENT TIME, a smart and instructive sketch, illustrated, 60 stamps.

NEW BOOKS.

This day is published in 1 vol., price 10s. 6d.

THE TIN BOX. A Story of the Last Century.

"This is a story written in a course of old-fashioned letters, in which the style of the period is extremely well imitated; the contemporary events are touched on just as they would naturally be in the course of a real correspondence. The story is interesting; and there is a tone of good feeling and gentle piety which has a charm that grows on the reader as he proceeds." —*Athenæum.*

Just published, price 6s.

THE AUTOBIOGRAPHY OF AN ITALIAN REBEL. By G. RICCIARDI. Translated from the Italian.

"The autobiography before us is possessed of a charming reality."—*Literary Gazette.*

A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

CIVIL AND MILITARY SERVICES (Home and Indian).—CANDIDATES PREPARED for these Services by the Editor of "Hall's Guide to the Three Services," assisted by experienced teachers. Hours of study from 10 to 1. Terms:—For the Home Civil Service, three guineas per month; for the Army, four guineas. Residence, five guineas per month additional. Address J. Paxton Hall, Oxford House, Chelsea, S.W.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vauban's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotheran, York.

A MARRIED CLERGYMAN, late Fellow of his College, and now Government Chaplain in one of the pleasantest cities on the Continent, has VACANCIES for ARMY PUPILS. He can offer great experience in tuition, good society, and a cheerful residence. Address for particulars to the Curate of Roade, near Northampton.

SANDHURST EXAMINATIONS. — AN OFFICER, the Author of "Army Reform," "Our Military System," "The Sandhurst Course," "Radetzki's Campaign in 1848," &c., &c., who has passed numerous gentlemen for the Guards, Line, and Artillery, and who has now the sons of a Duke, a Marquis, and of a General Officer amongst his pupils, ATTENDS AT THE RESIDENCES OF CANDIDATES any distance in or out of Town. Reference to Officers and others. Address, H. A., ARMY AND NAVY GAZETTE Office, 16, Wellington Street North, W.C.

EDUCATION IN FRANCE.—TWO GENTLEMEN, one an English and the other a French Protestant, with the assistance of five highly-qualified Masters, PREPARE 14 YOUNG GENTLEMEN for the Competitive Examinations for Woolwich, Sandhurst, Addiscombe, the Indian Civil Service, and direct appointments in the Army. Terms, 50 to 60 guineas. Address, B.A., Post-Office, St. Pierre, Lés Calais.

SPECIAL MILITARY TUITION, including Geometrical and Military Drawing, Hindustani, Fortification, Military Surveying and Reconnoitering. By Lieut.-Colonel MORLAND, who also continues the preparation of candidates for Addiscombe and the Military Competitive Examinations.—At 20, Norland Square, Notting Hill.

TO VOLUNTEER CORPS AND MILITIA REGIMENTS.—19 TURKISH SCIMITARS for Bandsmen are TO BE SOLD much below their value, in consequence of a change in the uniform of the Regiment to which they belong. They are handsomely mounted in German Silver, and have Sling Waistbelts to match.—Apply to The Adjutant of the Ross &c. Rifle Militia, Dingwall.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

COLT'S REVOLVER RIFLES AND PISTOLS, AND NEW MODEL SHOT AND BALL GUN, for Naval, Military, and Sporting purposes, Travellers, and House protection. Rifles, 36-44-, 56-, 100th calibre; 18, 21, 24, 27, 30-inch barrel.

REVOLVERS, large, medium, small bore; 4, 5, 6, 7½-inch barrel; 5 and 6 shots. Descriptive price list free.—For SALE, Wholesale and Retail, by the Patentee and Manufacturer, SAM. COLT, 14, Pall Mall, S.W.

Avoid counterfeits and base imitations.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60s. per 1000; blank, 33s. per 1000.

Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

ELEY'S AMMUNITION, comprising WIRE CARTRIDGES for killing game at long distances, WATERPROOF PERCUSSION CAPS, GUN-WADDINGS, BREECH-LOADING CARTRIDGES, and every description of Sporting and Military Ammunition.—ELEY BROTHERS, Sole Contractors to the War Department for Jacob's Rifle Shell Tubes, Cartridges and Caps for Colt's, Adams', and other Revolvers; Enfield Ammunition, &c.; Gray's Inn Road, London, W.C. Wholesale only.

TO VOLUNTEER CORPS.

WOOD'S GOVERNMENT PATTERN TARGETS, as used at Wimbledon National Shooting Match, and by the majority of Corps which have commenced their Ball practice. Price Three Guineas each, delivered free (at short notice) at any Station within one hundred miles of London. Also, MANTLETS.

To be had only of the appointed Agents, RICHARDS & Co., Nos. 117 & 118, Bishopsgate Street Within, E.C.

Drawings, &c., per post.

TO SPORTSMEN.—The following articles of the best quality, manufactured by FREDERICK JOYCE, of London, may be had of most Gunmakers and Dealers in Gunpowder throughout the United Kingdom:

PATENT PYROXYLINE PERCUSSION CAPS.
ORIGINAL (1824) ANTI-CORROSIVE DITTO.
TREBLE WATERPROOF CENTRAL FIRE DITTO.

THE able and elaborate Report which has emanated from the Select Committee on Military Organisation, may be said to bristle with topics of the highest importance to those interested in the administration of the Army. Although we are not yet put in possession of the evidence, it is not difficult to see that the inquiry has been most comprehensive in its scope. The constitutional principle upon which the Military establishments are governed under the Sovereign, the actual relations existing under the old and the present system between the chief civil and chief military officer of the department, the whole central administration, the recruiting of the Army, the regulations respecting appointments and promotions, the Commissariat department, the control over supplies and warlike stores—each of these subjects has apparently received a searching investigation at the hands of the Committee. All the topics referred to are more or less closely connected with that of organisation. For the present we shall avoid comment on those which are in themselves less prominent, or which bear more distantly upon the main question submitted to the Committee—that was, how best to establish complete authority, responsibility, and efficiency, and harmonious action between the many parts which combine to make up this the greatest of our public departments.

The point which appears to have created the largest amount of public interest and discussion, was the constitutional consideration involved in the relations between the Minister for War and the Commander-in-Chief. When Captain Vivian first brought forward his motion for the appointment of this Committee in 1859, and carried it by a majority of two only, it was upon this particular ground that the necessity of inquiry and reconstitution was, on the one hand, most forcibly urged, and, on the other, most jealously opposed. There were two—we may almost say violent—contending parties. One complained that Parliament through its officer, the Secretary of State, had no real control over the Army, that the Horse Guards remained irresponsible and all-powerful, practically the only institution in the country irreconcilable with the principles of Parliamentary government. The other stood out boldly against any curtailment of the functions of the Commander-in-Chief, and what they considered the unconstitutional interference of Parliament with the prerogative of the Crown to rule and control the Army through its own Commander-in-Chief. We imagine that those who fought the battle strongly on the one side and the other, will rise from a perusal of the Report alike impressed with the conviction that, after all, there was not so much to fight about. Those who waged war with the Horse Guards will have found that the Horse Guards and its head have not power enough to make them very formidable, while the party who were jealously conservative of the Commander-in-Chief's position, and regarded with anxiety anything calculated to interfere with his privileges as an officer independent in certain respects of the Secretary of State, will certainly be convinced by this Report that there was but little to conserve, and not much to be anxious about, in a constitutional point of view. The investigation of the Committee shows indubitably that the Commander-in-Chief is, and has been, in every way the subordinate of the Secretary of State, and so far as deteriorating his position goes, the utmost that change can do is to make that subordination formal which was before practically operative though theoretically incomplete.

Both the constitutional and actual relations of these two high functionaries to each other, and to the Crown, appear to be upon this footing. In former times, when the Secretary of State for War and the Colonies was the chief minister of the department, his power was unfettered and his rights unlimited, as regards the government of the Army. Habitually, however, neither were exercised, except as regards certain commands, and his supremacy was more formal than apparent. At the same time it was exercised sufficiently to make its existence unquestioned. When Lord Grey was the responsible minister, he not only regulated the financial and civil administration of the Army, but he interfered in matters intimately connected with that which is held to be the particular province of the Commander-in-Chief. Although it was the Duke of Wellington who held that office, Lord Grey suggested, and carried into effect, against the views of the Horse Guards, regulations respecting the infliction of corporal punishment which have since prevailed. He also laid down rules as regards the wearing of side-arms by the Guards. The good-conduct warrant, regulations respecting regimental schools, and other matters of internal discipline were carried out by the Secretary at War of the time. Lord Panmure pronounces the War Minister to have been paramount. Lord Grey and Mr. Herbert prove him to be so. The Duke of Wellington acknowledged that he was so, constantly asking for the orders of Government, and wishing to be informed as to what he was to carry out as the military head of the Army. This was the old state of things. It continued even beyond the period of the creation of a distinct Secretary of State for War, and was not even in theory changed until the transfer of the Ordnance Corps to the War Office, and the amalgamation of the office of Secretary at War with that of Secretary of State for War, when a new patent was issued to Lord Panmure who then presided over the department.

In that patent Her Majesty entrusts to the Minister complete control over the Army, with two reservations. First, as regards the military command and discipline of the forces. Second, with respect to appointments to or promotions in the Army. These are vested in the Commander-in-Chief. This patent, though since accidentally varied on one occasion, is identical with that by which Mr. Sidney Herbert now holds office. Now, if we examine into the actual state of things since they were first introduced, we find these reservations practically inoperative. As regards commands, the giving away of regiments, promotions, and the movement and distribution of the forces, the consent of the Secretary of State is invariably obtained before Her Majesty's pleasure is taken. Even first appointments to the Cavalry and Infantry of the Line, though in the hands of the Commander-in-Chief, are yet submitted in a list to the Secretary of State before they go to Her Majesty for confirmation and are gazetted. As a matter of fact, no interference regarding these appointments has taken place, but the War Office officials say that if they had been made aware of certain improper circumstances respecting a commission given some time since, and which afterwards were brought before the public, they would have objected to it, believing that, even as regards first commissions, the power of the Secretary of State is supreme. No conflict, however, has yet taken place between the Secretary of State and the Commander-in-Chief. Mr. Sidney Herbert, though holding that the reservation in the patent is effective as regards discipline, and believing that discipline should be controlled by a military man, has yet given proofs how practically inoperative it is when the peculiar duties of the Commander-in-Chief deviate from the ordinary routine, and become intermixed with questions of public import. When the Duke of Cambridge drafted certain suggestions respecting the classification of soldiers as regards liability to corporal punishment, Mr. Herbert objected to some of the regulations, and they were withdrawn and remodelled in accordance with his views. Again, the Duke of Cambridge, when examined before the Purchase Commission, declared strongly against the proposal for appointing commanding officers of regiments by selection. But when that plan was afterwards adopted by the Cabinet, and the Secretary of State announced his intention of carrying it out, the Duke of Cambridge, in the House of Lords, expressed his readiness to do so, notwithstanding that it was clear he had not changed his former views upon the subject, and was merely yielding to a higher authority.

Clearly then, however difficult it may be to reconcile the reservations in the patent with control over discipline and patronage, in practice, to all intents and purposes, the Commander-in-Chief is in every respect subordinate to the Minister. The Committee holds that it is constitutionally wholesome that it should be so. Upon this point they are powerfully sustained by the evidence of Earl Grey, as well as by a letter produced by him addressed to his father by Lord Grenville in 1812. In that letter Lord Grenville objects to "keeping the military administration distinct and independent of the civil government," and says "It is a bad principle even under an absolute monarchy: it is totally incompatible with the principles of a constitutional crown." Following this theory, Lord Grey and Mr. Herbert both hold that the supreme Minister must be a parliamentary officer responsible to the public, and the former points out that, so far from being unconstitutional, this is an absolutely essential element of the constitution. If the Queen ruled the Army otherwise than through a parliamentary officer, we might some day find that there had been a practical infringement on one of our soundest constitutional doctrines—namely, "The Queen can do no wrong." The Army is Her Majesty s, just as much and no more than the Navy or the Civil Service. The Army is paid by Parliament in the same way as the other servants of the State, and it is idle to speak of parliamentary interference being more unconstitutional in the case of the Army than in that of other bodies which it rules without question or dispute. These considerations appear to have weighed with the committee, and in practice the Secretary of State and the Commander-in-Chief remain "as they were."

We have left ourselves little more space than suffices to enumerate the other leading points of the report, which we the less regret because we publish the document itself in another part of our impression of to-day. We shall have again to recur to many of the subjects with which it deals, and we can do so with more advantage when we have the evidence before us. In war time one of the most valuable of the recommendations is that by which an officer is to be appointed who will have the control of the Commissariat and Land Transport departments combined, who will hold both the Commissary-General and the head of the Military Train responsible for the execution of their respective trusts, and who will himself be responsible to the public that no break down like that in the Crimea again occurs. The suggestion that the War Office and the Horse Guards shall be under one roof cannot fail to facilitate business, while the delicate hints as to the excess of Minute writing, and of inter-departmental correspondence will be none the less forcible because they come from Sir James Graham who is himself acknowledged to be about the best administrative officer this country has seen for many years. The Civil Department of the War Office must indeed be in an unsatisfactory condition when Mr. Godley, who is perhaps more intimately acquainted with it than any one else, avows that it would break down under the extraordinary pressure of a war; and as the War Office is now supreme, military men will be gratified at the opinion expressed that the military element ought to prevail more largely than it does in the *personnel* of the department.

ARMY & NAVY GAZETTE PENNY NEWSPAPER DIEU ET MON DROIT

THE ARMY.

Royal Horse Guards. Will move next week from Aldershot to Windsor.

3rd Dragoon Guards. Lieutenant Costobadie and Lieutenant Hockin have embarked for Bombay with a draft from the depôt.

6th Dragoon Guards. Captain Holder has embarked for Calcutta with a detachment from the depôt at Maidstone.

Royal Artillery.—Captain Carey, Lieutenants Cruttwell and Barnard, Veterinary Surgeons Dunsford and Noden, have embarked for Calcutta. Lieutenants Nicholas, Stevenson, Yule, and Veterinary Surgeons Tatam, Baldock, Dorrofield, and Cheeseman, have embarked for India. Major H. L. Talbot, Lieutenants Walker and Lockhart have embarked for Bombay with a draft from the depôt.

Royal Engineers.—The following officers of the Royal and Indian Engineers, who have just been gazetted to commissions as lieutenants in those corps, are ordered to join the head-quarters of the Royal Engineer establishment, Chatham, on the 1st of August: Royal Engineers—W. C. O'Connor, H. Fowler, J. H. Urquhart, H. H. Baker, J. D. Bowly, C. Cunningham, and W. A. W. Orange. Indian Engineers—A. J. C. Cunningham, H. W. Clarke, W. P. Tomkins, G. Dundas, H. Trotter, H. C. Smith, A. F. Hamilton, A. M. A. Alves, C. Strahan, J. H. Western, G. M. Cruickshank, J. C. Ross, F. F. Cotton, W. G. Cumming, W. Broadfoot, and G. F. L. Marshall. During the past week 40 recruits of the Indian Engineers have joined head-quarters, Chatham, from the depôt at Warley, to go through a course of instruction with the Royal Engineers in sapping and mining, fortification, &c. The number of Indian Engineers now at Brompton is 220 men. The non-commissioned officers and men of the 33rd company, together with the detachments, and a portion of the Indian Engineers, are going through a course of pontooning instruction at St. Mary's Creek, the 15th and 27th companies having just completed their course.

We have reason to believe that Lieut.-Colonel J. G. M'Kerlie, R.E., will succeed Lieut.-Colonel A. P. G. Ross at the Royal Engineer establishment, Chatham, on the expiration of the period of service of that officer.

Colonel H. D. Harness, C.B., who has been appointed successor to Colonel H. Sandham as director of the Royal Engineer establishment, Chatham, is expected shortly to take over the duties of that appointment.

Captain H. G. Savage, commanding the 33rd company, has received orders to proceed from head-quarters to the West Indies, for service.

For some time past a plan has been under consideration for employing the most experienced and intelligent of the non-commissioned officers of the Royal Engineers in superintending the erection of the various public works now in progress, and superseding the civil foremen of works in the Royal Engineer Department. The first selection of non-commissioned officers who are to be employed on this particular duty was made at the Royal Engineer establishment, Chatham, this week, when Sergeant Thomas, Sergeant Coffey, and Sergeant Ross were selected to be sent to Pembroke to superintend the Government works in progress in that neighbourhood, Sergeant Dyer and Corporal Donovan to be sent to Edinburgh, and Sergeant Dukes to Sandhurst.

Military Train.—On Tuesday next, Lieut.-Gen. Sir J. Pennefather, commanding at Aldershot, has notified his intention of inspecting the whole of the Military Train at that camp.

Grenadier Guards. His Royal Highness the General Commanding-in-Chief, inspected the 1st and 2nd battalions of the Grenadier Guards on Monday morning at 10 a.m. Owing to the adverse weather the usual evolutions of a field-day were dispensed with. The battalions marched past in slow and quick time, also in quarter-distance column. At the conclusion of the movements the Duke of Cambridge called the officers to the front, and His Royal Highness expressed himself highly pleased with the steadiness and appearance of both battalions. The General Commanding-in-Chief was accompanied by Major-General Lord Rokeby, commanding the division of Guards; the Adjutant-General, the Hon. Sir James Yorke Scarlett; the Quartermaster-General, Colonel the Hon. James Macdonald, and staff; Lord A. Hay, Quartermaster-General of the Brigade of Guards, &c. Lieut.-Colonel W. A. M. Barnard, who had for some time been Major of Brigade to the 1st Infantry Brigade, under Major-General J. R. Crawford, at Shorncliffe, has relinquished that appointment, on his promotion, and joined the regiment.

Scots Fusilier Guards. Lieut.-Colonel H. C. Fletcher, 1st battalion Scots Fusilier Guards, has joined the head-quarters of the Royal Engineer establishment at Chatham garrison, in order to acquire a knowledge of military engineering, fortification, and sapping and mining.

5th Regiment. The draft of 250 men from the 1st battalion, whose embarkation was suspended under the expectation that the regiment was about to return home, has received orders to embark immediately a ship having been chartered for that purpose.

6th Regiment. Lieut.-Colonel Stratton and Ensign Collis have embarked for Calcutta with a draft from the depôt.

7th Regiment. Lieutenant Frampton has arrived home with detachments from India, in the Stuart Wortley troopship.

10th Regiment. The 1st battalion will move from Plymouth to Aldershot on being relieved by the 53rd, from India.

12th Regiment. The 2nd battalion moves from Aldershot to Devonport. Lieutenant Moorhead is about to retire from the service. Lieutenant Lacy is on leave to September 30.

16th Lancers. Cornets Salter and Corbet are about to retire from the Service.

18th Regiment, 2nd battalion. Captain Vicars is on leave to September 30.

19th Regiment, 1st battalion. Captain Forbes has joined the depôt at Chatham from India. Lieutenant Backas, Ensign Stokes, and Ensign Tribe have embarked for Calcutta with a draft from the depôt.

The following is an extract from Regimental Orders 1st battalion. "Benares, 25th May, 1860. — It is with deep regret that the Commanding Officer announces to the Regiment the death of Lieutenant and Adjutant Thompson, on the 18th of March last, at the Cape of Good Hope, while on his passage to England. The career of this lamented officer must be too well known to every individual in the regiment, in which his whole life was spent, to need comment; but the Commanding Officer cannot help bearing testimony to the exemplary manner in which he performed the duties of the responsible position which he held in the Regiment, as also to the sterling worth of his character, which made him beloved and respected by all who knew him. The officers are requested to wear crape on their left arm for a fortnight, as a token of respect to the memory of their late brother officer. By Order. (Signed) E. W. Evans, Lieutenant and Acting Adjutant, 1st Battalion." The 2nd battalion moved on Wednesday from under canvas to huts at Aldershot.

23rd Regiment. Major Granville, of the 2nd battalion, is acting as Brigade-Major at Malta, in the room of Major Colville, on leave. Ensigns Adams and Hutchinson have embarked for India.

24th Regiment, 1st battalion. Ensigns Brander and Wright have embarked for Bombay with a draft from the depôt.

25th Regiment, 2nd battalion. Lieutenant Annesley is on leave to Nov. 18.

34th Regiment. Lieutenants Wyse and Greaves, and Ensigns Sharpe and Gage have embarked for Calcutta with a draft from the depôt.

35th Regiment. Ensigns Poste and Tolson have embarked for India, with a detachment. Ensign Laws has joined the depôt at Chatham.

36th Regiment. Moves to the Curragh from Devonport.

38th Regiment. Major Walton and Ensign Bromhead have embarked at Gravesend for Calcutta to join the regiment.

42nd Highlanders. Lieutenant Mitchell and Ensign Kidston have embarked for India with a detachment.

46th Regiment. Captain Sandwith has arrived home in command of detachments on board the Stuart Wortley troop ship, from Kurrachee.

53rd Regiment. Daily expected from India; will be quartered at Plymouth.

54th Regiment. Captain Robin and Ensign Chapman have embarked for Calcutta to join head-quarters from the depôt.

55th Regiment. Will in future be attached to the 1st brigade at Aldershot.

57th Regiment. Lieutenant Waller embarks in charge of a draft for Bombay from Cork.

58th Regiment moved on Wednesday from huts under canvas at Aldershot.

71st Regiment. Major Loftus, and Ensigns Brownlow, Murray, Fraser, and Dods, have embarked for Calcutta.

75th Regiment. Lieutenant Daniell and Ensign Buckle have embarked for India. We have to record the death of Lieutenant G. H. Row at sea, on his passage home. He had been over four years in the Service, and served in the Indian Mutiny at the siege of Delhi. Ensign Mansergh succeeds to the lieutenancy.

77th Regiment. Captain W. J. Carden, Lieutenant Butts, and Ensigns Blount, Mosley, and Henderson, have embarked on board the Kate for Calcutta, to join the regiment.

83rd Regiment. Ensign Gibb has embarked for Bombay with a draft from the depôt.

87th Regiment. The depôt is ordered from Youghal to Cork to join the depôt battalion.

88th Regiment. Ensign Cuthbertson has embarked for Calcutta with a draft from the depôt.

91st Regiment. Lieutenant R. P. Jones has joined the depôt at Chatham.

92nd Highlanders. Ensigns Crichton and Carmichael have embarked for India.

97th Regiment. Lieutenant Thompson has embarked for Calcutta with a draft from the depôt.

Rifle Brigade. Ensign Arbuthnot, 1st battalion, is on leave to August 10. Major the Hon. W. Colville, 4th battalion (Brigade-Major at Malta), is on three mouths' leave of absence.

2nd West India Regiment. Lieutenant Davis died at Honduras on the 1st of June. Ensign Studdert succeeds to the lieutenancy.

Major Mackintosh, the barrack-master of Limerick, retires from the service this week, much to the regret of a numerous circle of friends, after the faithful discharge of his onerous duties. At the age of 16 years Major Mackintosh joined the 4th (or King's Own) Regiment, from the Royal Military College, in March, 1809, and immediately afterwards accompanied the regiment on the expedition to Walcheren; in 1810 joined the army in Portugal, when in the lines of Torres Vedras, pursuit of Massena from Santarem, battle of Fuentes d'Onor, action at Barbaadel Puerco, 11th May, 1811, with the garrison of Almeida—severely wounded in the left hip joint; in March, 1812, joined Sir Denis Pack's brigade as Captain in the first Portuguese Infantry, in which his brother had been killed at the battle of Busaco; was present at the capture of Badajos, battle of Salamanca, capture of Madrid, siege of Burgos, and in most of the affairs during the retreat to Salamanca and Portugal; in 1813, battle of Vittoria, actions at Villa Franca and Tolosa, siege and capture of San Sebastian, passage of the Bidassoa, and carrying the enemy's fortified entrenchments; battle of the Nevelle; passage of the Adour, and investment and blockade of Bayonne. For the above services he has received the war medal with six clasps, and also the Portuguese war medal and Spanish cross for the battle of Vittoria.

The Government has submitted a scheme for the defence of the Mersey by the erection of forts at the north end of the town, near the Bootle landmarks at the Salisbury Dock Quay, and on the Cheshire side, near the Seacombe Ferry.

The select committee nominated on the motion of Colonel Lindsay, met on Thursday to inquire into and report upon the claims of seven major-generals to the pay of general officers, who are now receiving only the half-pay of brevet-majors, and who accepted substantive rank upon half-pay upon the terms and engagements contained in the Horse Guards' memorandum of the 25th of April, 1826, and the general order of the 25th of April, 1826. The committee consists of Colonel Lindsay (chairman), Mr. S. Herbert, Mr. E. Egerton, Sir W. Russell, Mr. Dawson, Mr. Headlam, Colonel North, Mr. Peel, Mr. Cave, Sir J. Ramsden, Mr. Mowbray, Captain Esmonde, Sir J. Fergusson, Sir F. Goldsmid, and Lord W. Graham. After hearing several witnesses the committee adjourned.

On Thursday it was officially intimated at the Guildhall that the ceremony of the presentation of the freedom of the City, with a sword, of the value of one hundred guineas, to Lord Clyde, upon his return home from the East, and which it was expected would take place in the present month, had been unavoidably postponed until the autumn. The Lord Mayor, as soon as Lord Clyde arrived in England, at once communicated to his lordship the resolution of the Court of Common Council, granting the freedom, and asking his lordship to fix a day for the presentation. Her Majesty the Queen having commanded the presence of the gallant nobleman at Osborne, and other engagements pressing heavily upon him, the ceremony cannot take place for some weeks, the Common Council having adjourned for the summer holidays.

Brave Exertions of Three Soldiers in Saving Life. —General Forster, K.H., military secretary to His Royal Highness the Commander in Chief, has forwarded the following letter to the secretary of the Royal National Lifeboat Institution:—"Horse Guards, 16th July, 1860.—Sir, I have laid before the General Commanding-in-Chief your letter of the 12th inst., stating that the Royal National Lifeboat Institution had decided on presenting its silver medal, 1*l.*, and a copy of its vote inscribed on vellum, to Gunner Leese, for his gallant services in assisting to save the crews of the brig Annie of Shoreham, and schooner Woodside of Shields, which were wrecked during a heavy gale of wind on the 2nd June last between Blatchington and Newhaven, and in rescuing at the risk of his own life a boy from a watery grave; and also 1*l.* each to Corporals Bannister and Kay, for their very laudable exertions in aiding to save the crews of the two wrecks above-mentioned; and enclosing the decoration in question, the vote on vellum, a cheque for 3*l.*, and other papers. In reply, I am directed to request that you will express to His Grace the Duke of Northumberland, president, and the several members of the committee of management, the satisfaction with which His Royal Highness has caused the award in question to be presented to the soldiers above named. (Signed) W. F. Forster. To Richard Lewis, Esq., Secretary."

A parliamentary return gives the average annual cost of every effective thousand rank and file of the embodied militia artillery, including in the calculations the pay of officers and non-commissioned officers, clothing, commissariat charges and allowances, but excluding the cost of providing arms and quarters, at 46,488*l.* The average annual cost of one thousand rank and file of regular garrison artillery is 44,907*l.*

The Commander-in-Chief in India.—Sir Hugh Rose, on assming the Command-in-Chief in India, issued the following order:—"Head-Quarters, Calcutta, 4th June, 1860. With reference to General Orders by his Excellency the Viceroy in Council, No. 594, on the 4th of June, 1860, General Sir Hugh Rose, G.C.B., announces to the armies of *India his* having assumed the command this day, on the departure from India of the Right Honourable Lord Clyde, G.C.B. Sir Hugh Rose appreciates in its highest degree the honour of commanding the armies who guard Her Majesty's Indian empire. He will never forget that his most gracious Sovereign expects that he will promote the welfare, uphold the discipline, and maintain the renown of armies who have for a century fought and conquered. The reports and returns, and ordinary correspondence of the army, will be sent as heretofore to the several departments at Simla; and all documents requiring immediate reference to his Excellency the Commander-in-Chief will be forwarded to the officers in charge at army head-quarters at the Presidency. The Commander-in-Chief will receive officers in charge of departments on public business on the days fixed for each; and His Excellency will be glad to receive on Wednesdays all officers who may wish to see him on business from 11 till 1 p.m. The undermentioned officers are appointed to His Excellency's personal staff from this date: Colonel H. J. Warre, C.B., H.M.'s 57th Regiment, acting military secretary; Lieutenant H. Moore, 6th Bombay N.I., Commandant Aden Horse, interpreter; Captain G. E. Rose, H.M.'s 3rd Battalion Rifle Brigade, aide-de-camp; Lieutenant C. H. Strutt, Bombay Artillery, aide-de-camp; Surgeon J. Vaughan, F.R.C.S., Bombay army, medical officer.—By order of His Excellency the Commander-in-Chief. W. Mayhew, Lieut.-Colonel, Adjutant-General of the Army."

Since the recent strike which occurred in the Armstrong gun factories at Woolwich, a large number of hands have left the establishment, and the vacancies have been filled up as far as possible by the employment of men from Sir W. Armstrong's factory at Elswick, and from Scotland. About 20 experienced workmen, who have given the usual notice to leave, are about to proceed to Rouen, having, it is said, entered into an engagement with an agent of the French Government for a certain term of employment in the manufacture of rifled ordnance.

The following persons having successfully passed the requisite examinations, &c., at the Normal College, Royal Military Asylum, Chelsea, have been appointed Army Schoolmasters, viz.: Mr. A. Cameron, late of the Royal Artillery, Mr. W. Webster, of the Royal Marines, Messrs. R. Brown, R. Rutherford, W. Bell, G. Holland, F. Lowry, L. Mathews, H. Robinson, R. McCormick, W. M. Arthur, J. Moore, T. W. Smith, J. Miller, E. W. Myles, and J. Burnes, appointed 3rd class; and Messrs. J. Wright, W. Rix, W. Hanley, J. Pollard, and W. Mockett, to the 4th class.

Dr. Humfrey, Inspector-General of Hospitals, has arrived at Aldershot, and assumed the duties of principal medical officer, in succession to Dr. Gammie, returned to Devonport.

In chronicling the recent honour conferred on Colonel Freestun, we omitted to mention the long and gallant services of that officer, which we find thus concisely summed up:—Twenty-two years in the British Army, eighteen of which a subaltern in different parts of the world; seven years

Digitized by Google

in the West Indies; three years in Canada, &c. On the Staff of Sir de Lacy Evans, auxiliary; France, Spain in 1835, -36 and -37, where he was three times wounded, once severely, had two horses shot under him, and saved a prisoner's life; receiving from Her Majesty of Spain, and with permission of his own Queen to wear them, the following decorations for services in the field: Knight Commander with the Star of Charles III; Knight of the Royal Military Orders of San Fernando and Isabella the Catholic, together with the Medals for 5th of May, 1836. Served his last campaign in Syria, in 1840, -41, and -42, on the Staff, receiving the gold medal from the Sultan, with permission to accept and wear it from Her Majesty. Elected Member of Parliament for Weymouth and Melcombe Regis in July, 1847, which place he represented until April, 1859, receiving the honour of knighthood from Her Majesty, 20th of June, 1860. In the House of Commons a consistant liberal, and a staunch friend of his profession; advocating most strenuously the claims of the subalterns, and getting the honorary rank for old officers, &c.

The members of the United Service Club intend to give a dinner to Lord Clyde, on the occasion of his return from India, on Tuesday, the 31st inst. His Royal Highness the Duke of Cambridge will preside on the occasion.

On Saturday last the troops stationed at Chatham Garrison went through a series of siege operations, under command of Major-General Eyre. The Gillingham (Kent) Volunteer Artillery, the Chatham Volunteer Rifles, and the Rochester Corps of Volunteers took part in the defence, the Artillery manning the guns in excellent style.

PORTSMOUTH.—The troops in this garrison, consisting of the 10th and 15th Brigades Royal Artillery, under the respective commands of Colonels Dunlop and Franklyn, C.B.; the Royal Engineers, Major-General Foster; the 1st and 2nd battalions of the 11th regiments of the Line, under the respective commands of Lieut.-Cols. Moore and Jenner; the Royal Marine Light Infantry, commanded by Colonel Anderson and the Royal Marine Artillery, Col. Fraser; together with the 1st Stafford Militia, Lieut.-Col. the Hon. W. P. M. Talbot; the Durham Artillery, Lieut.-Col. Hall; the Dublin City Artillery, Lieut.-Col. the Hon. R. F. Handcock; the Suffolk Artillery, Colonel Shafto Adair; and the Bedford Artillery, Lieut.-Col. Wilkinson, will be brigaded every Thursday if practicable on Southsea Common during the remainder of the summer. The camp at Browndown (Gosport), established for rifle practice has been broken up, and the troops have returned to Portsmouth.

SHORNCLIFFE CAMP.

An inspection of the head-quarters squadron of the 4th battalion of the Military Train took place on Monday and Tuesday, July 23rd and 24th, by the Colonel-Commandant Clark Kennedy. The inspection in review order on Monday afternoon, owing to the inclemency of the weather, took place in the huts of the E range. The inspection in complete marching order was made on Tuesday morning, the battalion parading at half-past 6, a.m., for that purpose. At the conclusion of the inspection, the colonel expressed to the officer in command, Lieut.-Colonel O'Brien, the great pleasure he had experienced in witnessing the soldierlike appearance of the men, and the neatness and cleanliess of the barrack-rooms, and congratulated that officer on the high state of efficiency to which the corps had attained. Colonel Kennedy dined at the mess on Monday night; and on Thursday morning breakfasted with the officers at the conclusion of the inspection, after which he left the camp for Woolwich. Colonel Kennedy was accompanied during his inspection by his Brigade-Major, Sherrington.

It is rumoured that this battalion, including the squadrons at Aldershot and Shorncliffe, are expected shortly to leave for Woolwich.

The place chosen for the camp of practice for the Royal Artillery, two batteries of which are detached from Shorncliffe, as stated in this journal last week, is a piece of land called the Warren, situated about a mile to the north-east of the town of New Romney, on land recently hired by the War Department, but on which some barracks for cavalry was in being some 40 years back. The site is peculiarly calculated for a camp, being a beautiful piece of turf on a sandy subsoil, which is perfectly dry, for after the great quantity of rain which has fallen during the past week the camp is not at all muddy, as no water rests on the surface. The camp will well repay a visit from its picturesque appearance; the snow-white tents and dark blue of the carriages and guns contrasting well with the deep green of the ground; in one part is found a farrier at work at the portable forge, whilst at another part the soldier-cooks are engaged in preparing the morning, mid-day, or evening meal, beside a camp fire placed in a trench cut in the turf. On the right and left flank of the rows of tents stand the guns; whilst from limber to limber are attached strong ropes for the purpose of picketing the horses. The range for practice is on the sands stretching towards Dungeness light-house, a range of from five to seven miles being thus obtained. Shot and shell practice has been carried on during the past week, and some good firing has been made. A visit to this camp would well repay those who in the vicinity may not have had an opportunity of witnessing life under canvas, or practice with shotted guns.

The 7th and 5th Batteries with Armstrong guns relieve the 8th and 9th on the 7th proximo, the latter returning to Shorncliffe.

During the past week working parties of the 2nd Royal Cheshire and the 90th Stirlingshire regiments of Militia have been engaged in repairing the gaps or openings in the rampart of the redoubt at the south-west angle of the camp, as well as repairing and levelling the road leading up to the ramparts.

COLCHESTER CAMP.

The present week has been one of unusual activity in this camp, consequent upon the departure of several drafts for service in the East. The most numerous of these was to have left on Saturday, but some delay having been occasioned by the victualling of the vessel, they did not embark till Wednesday. On Tuesday morning the 56th Regiment sent out a draft of 146 men, under Ensign Grimes, who embarked in the ship Star Queen at Gravesend. On Wednesday the following embarked in the Tyburnia: Lieutenant Wyse, Lieutenant Greaves, Ensign Sharp, and Ensign Gage, of the 34th Regiment, with 65 rank and file, together with 41 men of the 38th. At the same time there proceeded on board the ship Canning, Ensign Collis, 1st battalion, 6th Regiment, and 55 men; Major Gore and Ensign Cuthbertson, with 156 rank and file of the 88th, and Lieutenant Thompson and 132 rank and file of the 9th Regiment. On Thursday two officers and 87 men of the 54th and two officers and 81 men of the 38th proceeded to Tilbury, and embarked in the Surrey. This gives a total of 12 officers and 763 men, who during the week have left for foreign service.

Orders have been again received by the 5th Fusiliers to hold a draft of 250 men in readiness, whose embarkation had been suspended under the supposition that the regiment was about to return home. They will leave camp immediately a ship has been chartered.

Whilst the draft of the 56th was waiting at the Colchester Railway station, private Jones, of that regiment, created a disturbance, in which two of his comrades joined. The fellow, who was only released from prison that morning, smashed the window of the carriage; and in the affray a non-commissioned officer received a blow in the face. Jones also aimed a blow at the brigade-major, which was parried; and eventually he was sent off under escort. Soon after the train had started, and when travelling at a considerable rate, Jones threw himself half naked from the carriage and fell with his head upon the permanent way. His escape with his life was almost miraculous, but he was so stunned and his head so severely injured, that the engine-driver was enabled to stop the train before he recovered, and he was again secured. On the facts being communicated to General Eyre, commanding the Chatham division, he ordered the man to be sent back under a strong escort, to be tried by court-martial in the camp, the offence being of much too serious a nature to be dealt with by court-martial on board ship. The man's conduct led to the supposition that he was intoxicated, but it has since been ascertained that he was perfectly sober. It is expected he will be tried by general court-martial. The other men who took part in the insubordination were marched back to the camp, and will be tried by court-martial.

During the week some of the corps of Sappers and Miners have been engaged surveying the extensive plot of ground purchased for the new camp; but as the plans and specifications have not yet been determined upon, it is hardly probable that any very extensive works will be commenced during the present summer. The details of the drainage, however, have been agreed upon, and when perfected plans have been prepared, should the weather continue fine, the works, which are on a very enlarged scale, and involve the outlay of several thousand pounds, may be proceeded with.

Another impudent burglary has been committed by a private of the 34th Regiment, named Curley, who, a night or two since, entered a house in the outskirts of the town with naked feet, but his shoes were discovered under the window by a lamp-lighter, who secured the assistance of a policeman, and hunted him over the fields into the camp, the walls of which he scaled. In his bed on the following day was found a portion of the stolen property. It is scarcely a month since he was tried for felony and acquitted.

The Army Gazette.

WAR OFFICE, PALL MALL, JULY 24.

11th Regiment of Light Dragoons—Lieutenant John M'Loughlin has been permitted to resign the Adjutancy.

16th Light Dragoons—Lieutenant Richard Fielding Morrison to be Adjutant, vice Cowtan, who resigns the Adjutancy only.

The commission of James Mouat, C.B., as Deputy-Inspector-General of Hospitals, has been antedated to the 1st of October, 1858.

Surgeon-Major John Maitland, M.D., who retires on half-pay, to have the honorary rank of Deputy-Inspector-General of Hospitals, in accordance with the Royal Warrant of the 1st of October, 1858.

Surgeon William Mills Dowding, from the 54th Foot, to be Surgeon, vice Poole, appointed to the 54th Foot.

Assistant-Surgeon Thomas Joliffe Tuffnell to be Surgeon. This appointment to be Supernumerary to the Establishment.

Assistant-Surgeon Samuel Gibson, M.B., from the 13th Light Dragoons, to be Assistant-Surgeon, vice Scott, appointed to the 40th Foot

VETERINARY MEDICAL DEPARTMENT.

John Henry Burbage, Gent., to be Acting Veterinary Surgeon.

David Paley, Gent., to be Acting Veterinary Surgeon.

BREVET.

Colonel Robert Fitzgerald Crawford, Royal Artillery, to have the temporary rank of Brigadier-General, while in command of a brigade.

Major Henry Boyé, 22nd Bombay Native Infantry, to be Lieut.-Colonel in the Army.

Major Lincoln Stephen Hough, 31st Bombay Native Infantry, to be Lieut.-Colonel in the Army.

Second Captain Charles Edward Cumberland, Royal Engineers, to be Major in the Army.

Second Captain Andrew Hugh Bogle, Bengal Artillery, to be Major in the Army.

Captain William Francis Hunter, 2nd Bombay Light Cavalry, to be Major in the Army.

Captain John Augustus Wood, 20th Bombay Native Infantry, to be Major in the Army.

Lieutenant Sydney James Timbrell, Paymaster Invalid Depot, Cape of Good Hope, to have the honorary rank of Major, under the Royal Warrant of 27th of January, 1860.

The Commission as Brevet-Major of Brevet-Major Henry Knightley Burne, 2nd Bengal Native Infantry, has been antedated to the 21st of November, 1857.

WAR OFFICE, PALL MALL, JULY 27.

NOTICE.—The next Examination of Candidates for direct Commissions in the Army, will be held at the Royal Hospital, Chelsea, on Monday the 6th of August next, and following days.

THE SCOTS GREYS AND THEIR QUARTERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—May I draw your attention to a few of the grivances connected with playing at soldiers, as practised at present by the authorities?

I allude more particularly to the Scots Greys, who have been encamped on the Curragh for upwards of a fortnight. That period has afforded a very fair specimen of what the mud was in the Crimea, and I cannot help suggesting that it seems rather hard upon the men to pack them closely in tents, while so many fine barracks are unoccupied in this country.*

The outlay of a few pounds will make an officer's tent tolerably comfortable; but the comfort of eight or ten men in one tent may be better imagined than described. That comfort consists principally in seeing their boots and clothes, for which they have to pay, rotting in the mud and wet. There has been no field allowance granted to the officers, although the Queen's Regulations do not afford a shadow of an excuse for withholding it.

These officers have to live under canvas in all weathers; their valuable horses are exposed to every storm; and to crown all, the captain of each troop has to find ropes to tie up his troop horses, and timber for saddle racks, out of his own pocket, if he objects to seeing the horses continually loose, and the saddles buried in the mud.

It is not strange that there is an increase in the Army Estimates when there is such a useless wear and tear of army materials; but it would be passing strange if the class of recruits were improving, or the gentlemen of England coming freely forward for commissions in the cavalry, under a system so thoroughly opposed to their comfort in either personal or pecuniary circumstances.—I am, &c. OBSERVER.

THE CAPE AS A SANATORIUM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Seeing a letter signed "M. D." in your impression of the 14th inst., relative to Western Australia as a sanatorium for invalids from India and China, I can only remark that if the writer confined himself to a description of the advantages of the colony he wishes to recommend, without contrasting it so unfairly with the Cape, and adding fiction in support of his views, we might give him credit for good intention; but if a ten years' uninterrupted residence at the Cape might be compared with the experience of three flying visits, "M. D." will, I trust, excuse me differing from him in the following points.

In comparing the merits of the two places "M.D." shows his ignorance of the Cape Colony in stating that it is subject to every epidemic. So far from this being the case, smallpox, measles, scarlatina, and cholera are unknown at the Cape, unless when introduced by some unfortonate chance, to which every country must be subject; the strongest proof of this is, that among the Kaffir tribes and Malay population, the usual disfiguration where the former disease prevails is never seen; and I can assert that during my ten years' residence I never saw a pure case of intermittent fever; and as regards the health and longevity of its inhabitants, I conceive that the Cape can compete with any climate in the world.

"Meat and Flour."—The flour at the Cape is well known to merchants and others as second to none in the world, and the bread manufactured from it I have eaten, both at Cape Town and on the frontier, and found it not only as cheap, but as good and nutritious as in any country I have visited.

Vegetables and fruit are abundant and in the greatest variety, and as to price, I never heard of any part of the globe where they could be procured cheaper. Excellent beef, mutton, veal, fish, &c., are also to be had at very reasonable rates; and though from loss of stock, through the recent drought, the prices may have increased latterly, they will not long remain so, and are even still far (nearly half) cheaper than what they can be procured for in England.

As regards the danger from "reptiles and wild animals" at Cape Town, where the sanatorium is to be, I fear that "M.D." is given to hoax; but if not, I can assure him he is in error, and the only place where he could have seen either was in the cases of the South African Museum, where I am certain they are perfectly harmless; and as to Kaffirs, those who have faced Nana Sahib and his adherents need fear nothing from the poor outcast followers of Sandilla, a few of whom are now earning their bread about Cape Town. Besides, owing to the very judicious policy of Sir George Grey, even the weakest invalid—if he did travel about 800 miles to visit the frontier, the real locality of the Kaffirs—could now do so with perfect impunity.

Grapes and wine, either for the purposes of a sanatorium or as a luxury for general consumption. I conceive that none need be finer, nor indeed can be, than those produced at the Cape, and they are always obtainable at a very trifling rate while in season; and as to a very great requisite for convalescents—wine—"M. D." admits that the manufacture of it is only in its infancy in Australia; whereas very good is

* The complaint has been removed, and we understand compensation will be made to officers and men. [ED.]

Digitized by Google

made at the Cape at a very moderate price; and the imported kinds, if required, can be obtained cheap, free from all duty, and in any quantity.

"Immunity from Syphilis."—This appears to me to be perfect bosh; and I think if a sanatorium will ever be established in Western Australia, "M. D." cannot long afterwards claim this exemption.

As a military position, my humble belief is that Cape Town is far superior; but this is a point on which I do not enter, merely wishing to remark on the errors of "M. D." when referring to it as a sanatorium.

From my personal knowledge and extended acquaintance of the Cape, I think it right to offer these remarks on a point of such great importance to the British Army as is a sanatorium at Cape Town. And trusting this will not be too extended for your columns,—I am, &c.,

A SUBSCRIBER, AND ALSO AN M.D.

SUBALTERNS OF THE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Whatever decision may be come to as to the reorganisation of the Indian Army, may I beg that you will use your influence to obtain some recognition of the services of those subalterns who commanded regiments, filled responsible staff appointments, and otherwise distinguished themselves during the late campaign in India?

I need not enumerate the names of these officers or their services, for they are to be gathered from the published despatches, and you have already given some of them the benefit of your powerful advocacy.

You are aware that under the Company's government it was the custom to register such officers' names for brevet promotion on attaining their captaincies, and this custom continued up to the Sikh campaigns of 1848-49; but it is said that it is now to be discontinued.

In the English Army there were always means available for rewarding distinguished subalterns by giving them companies in their own or other regiments, or on the unattached list, but from the different constitution of the Indian army this was impossible, so that by the discontinuance of the custom alluded to, injustice is done to a number of officers who have done good service; and although almost every subaltern of the English Army who distinguished himself in the late campaigns has been promoted and rewarded, only one, Lieut.-Colonel Norman, of the Indian, has obtained any recognition of his services.

There were very few columns lately employed in India in which there were not some regiments commanded by subalterns, and yet they are forbidden to hope for a share of the rewards that have been granted to others with whom they shared the same dangers and responsibilities. When this question is brought up in the House of Commons it is generally said that the Victoria Cross is open to subalterns; but an officer commanding a thousand men in action has something else to do besides looking about for opportunities of gaining that distinction; so that it is hardly fair to deny him the reward that would be the natural consequence of his situation were he but one step higher in rank. Some of the subalterns I speak of are of ten, twelve, and fifteen years' service, and it is most galling to them to see men of three or four years' service, promoted in the English Army when their own claims are completely ignored.

It has been said that Lord Clyde was requested not to include the names of any subalterns in his recommendations for promotion and rewards. Whether this is true I know not; but this I do know, that many such names have been submitted by other commanders, and that up to this time the lists have been quietly burked.—I am, sir, &c.

A SUB.

THE PURCHASE SYSTEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Most of the cavalry captains now in England have paid from 5000*l.* to 6000*l.* for their troops, and they expect to get this sum on retirement. But the subaltern of the present day, not knowing but what the authorities may any day declare it illegal to receive a farthing over regulation, is unwilling to give this sum for promotion. So, what does the captain who wishes to retire do? Why, he exchanges into an Indian regiment, for which he gets some 1200*l.* or 1500*l.*, goes to India, and then sells out. The consequence of this is, that the home regiments are being filled up by men whose constitutions have broken down in India, and who are half the year on the sick list. Another evil effect is, that if a troop has been offered for sale in a regiment, and the senior subaltern for purchase has refused to give the sum asked, he may be looked upon as stopping promotion, and mess-house pressure brought to bear upon him. The whole of this might be stopped either by the authorities legalising the sale of commissions, that is, letting a man get what he could for it, or by their requiring an officer on promotion or exchanging to sign something like the following:

"I declare upon my honour as an officer and a gentleman that I have not given either directly or indirectly one shilling beyond regulation for my promotion."—I am, &c.,

EX-DRAGOON.

MR. FERGUSSON AND CAPTAIN TYLER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In reply to a letter which appeared in your journal of last week, the Council of this Institution desire me to inform you that after Mr. Fergusson's lecture of last year the proof sheets were, according to custom, forwarded to him, and returned corrected, and marked "Press." This year the same has been done towards Captain Tyler with reference to his lecture, and the short-hand writer's notes of the discussion which followed were forwarded to Mr. Fergusson, who declined to correct his own observations.

Although the Council always afford opportunity to an author to revise his lecture before publication, they object to the addition of matter after a reply has been given; but they intimated to Mr. Fergusson that, should he desire to reply to Captain Tyler, or to place his views in a clearer light before the public, they would be happy to place the theatre again at his service, after a copy of Captain Tyler's lecture had been forwarded to him.

The Council, as trustees for the members and the public, feel bound to publish matter brought forward in their theatre in the most correct form possible, and can have no other wish than to act impartially towards all parties.

I am, &c., B. BURGESS, Captain,
Royal United Service Institution. Secretary.

NATIONAL DEFENCE.

The following copy of a Minute by the Defence Committee relative to the report of the Royal Commissioners for National Defence has been published:—

"Horse Guards, April 9, 1860.

"The Defence Committee have at successive meetings had under consideration the very able and valuable report of the Royal Commissioners on National Defence, submitted to them by the Secretary of State for War. They have had the advantage of the presence at their deliberations of Major-General Sir Harry Jones, the President of the Royal Commission, who is also a member of this committee, and have further been assisted by their secretary, Major Jervois, who has acted as secretary to that commission. These officers, though taking no part in this Report, have been enabled to enter fully into details with reference to the Report under consideration, and their presence has given rise to valuable and interesting discussion and elucidation.

"The committee accept the arguments of the commissioners in favour of fortifications for the defence of the arsenals and dockyards of the kingdom, which arguments the committee consider to be most convincing and conclusive.

"Persuaded that it is for the true interests of this country to check the alarms caused by fear of invasion which from time to time take possession of the public mind, and that this can only be effected by placing the defences of the kingdom upon such a footing as to give security from attack, the committee have great satisfaction in giving a hearty support to the projects of the commissioners, and in bearing their unanimous testimony to the ability and scientific knowledge displayed in the consideration of the various measures suggested by them for the defence of the dockyards and arsenals, both by sea and land. Though possessing a general knowledge of most of the localities, the committee have not, like the commissioners, had the advantage of a minute reconnaissance of the ground in the neighbourhood of those places; they, therefore, do not enter into the reasons so clearly given by the commissioners for recommending each project in detail, but content themselves with an expression of their general approval of the proposed works of defence, which, on the whole, they do not consider to be more than sufficient for the objects to be attained.

"With respect to the garrison for the works, it appears to the committee that, when the extent of the defences already constructed and in progress, as well as of those now proposed, and the number of guns to be placed in batteries are taken into consideration, the number of men assigned by the commissioners as the full complement required for the fortifications is certainly not over-estimated.

"Thus, the committee concur with the Royal Commission to the full extent of the propositions, both as regards works and the number of men necessary to garrison them; but they are of opinion that, of the whole force required, a larger proportion of the well-trained troops of the regular army will be necessary than appears to be contemplated by the commissioners. Believing that the Report of the Royal Commission will tend to create an impression that the defence of the dockyards, when fortified, will be provided for to so great an extent by the irregular forces that the standing army will not be trenched upon to a degree worthy of mention, the committee consider it their duty to express their opinion that, in order to inspire that confidence which is necessary in the defence of such important works, the proportion of regular troops will be so considerable that it must be taken into account. Certainly a large proportion of well-trained artillerymen will be essential, more especially on those sea batteries which are intended to oppose ships, a service requiring that the guns should be worked with great rapidity and accuracy.

"It being, therefore, the opinion of the committee that a considerable proportion of regular troops should be allotted to the defence of the fortifications in the event of a war, it is their duty to state that this portion cannot be supplied from a regular army of the present strength; an increase to it would, therefore, then become necessary to afford the numbers requisite for the defence of the kingdom at large, including the defensive works. It is not, however, submitted that such an increase would be consequent upon the construction of the works now under consideration; on the contrary, it would be required to a very much greater extent if these works were not carried into execution, and it is essential in order to complete the defensive system of the country.

"Measures are being taken to increase the Channel Fleet, and the public mind is satisfied that this, the first line of defence, is being put into an efficient state; and, doubtless, it will be equally satisfied that the fortifications proposed by the commissioners will, if efficiently garrisoned, place the arsenals and dockyards beyond the reach of sudden destruction by a hostile force, either by land or sea. Further, if the regular force of the country were brought up to the required strength, a like confidence would be felt in our ability to meet an enemy who may have succeeded in effecting a landing in force upon our shores.

"Seeing the altered circumstances produced by the introduction of steam, which has necessitated a larger military organisation than has hitherto existed in this country, the committee consider that they would be shrinking from their duty if they did not bring forward on the present occasion their opinion as to the insufficiency of the present strength of the regular army, and they trust that it will be admitted to be wise and prudent to place it on a scale corresponding to that of the other branches of defence; for it can never be forgotten that, however essential and valuable the Militia and Volunteers may be, they can only be treated as reserves and auxiliaries to meet great emergencies which may arise.

"The committee cannot conclude these observations without drawing attention to a subject which was not included in the instructions of the commissioners. They advert to the possession of the Channel Islands and the seas surrounding them as a naval station, which they consider to be so material to the command of the British Channel as to form an important element in any general system of defence for the United Kingdom.

"They would further urge the absolute necessity for the establishment of one or more central depôts, as alluded to in paragraph 157, page 52, of the Report, which are in their opinion essential for the security of the vast amount of military stores and material now concentrated at Woolwich.

"GEORGE.
"R. S. DUNDAS, Vice-Admiral.
"RICHARD AIREY, Q.M.-General.
"J. BLOOMFIELD, Major-General.
"CHAS. BINGHAM, D.A.G., Royal Artillery.
"J. W. GORDON, Colonel, D.A.G., R.E."

"Having signed the Minute of the Defence Committee on the general acceptance of the Report of the Royal Commissioners on National Defences we feel it our duty, with the consent of His Royal Highness, the President, and the other members of the committee, to record our dissent from the opinion expressed in paragraph 38 of that Report, that previously untrained men can be taught the ordinary duties required for the service of heavy artillery in about a month.

"J. BLOOMFIELD, Major-General, Inspector-General of Artillery.
"C. BINGHAM, D.A.G., Royal Artillery."

BANQUET TO THE GRENADIER GUARDS AT THE CRYSTAL PALACE.

The 200th anniversary of the establishment of the Grenadier Guards was celebrated by a dinner given to the non-commissioned officers and men in the central transept of the Crystal Palace on Wednesday. The chair was occupied by Sergeant-Major Hockey. Nearly 1600 of the men sat down to dinner, which was served on sixteen tables—one to each company of about 100 men—and a cross table was provided for the sergeant-majors, sergeants, and schoolmaster of the regiment.

The transept was decorated with banners, bearing the names and dates of the most celebrated battles and sieges in which the regiment had taken part. There were among others—Namur, 1695; Dettingen, 1743; Corunna, 1809; Badajos, 1809; Nive, 1813; Bayonne, 1814; Copenhagen, 1807; Lincelles, 1793; Fontenoy, 1745; Fleuris, 1690; Vittoria, 1813; Waterloo, 1815; with Alma, Inkerman, and Sevastopol. There were nearly 15,000 persons present as spectators of the dinner; they filled the great orchestra, a large portion of the transept, and the galleries, and warmly cheered the gallant men on their arrival in and departure from the Palace. Previous to the dinner the men were engaged in various athletic sports in the grounds, hurdle races, running and standing jumps, sack racings, jingling, and others of a similar character, which must have had a very salutary effect in stimulating the appetites of the men. The dinner was of a most substantial character, consisting of roast and boiled beef, veal and ham pies, lobster and other salads, cabinet and other puddings, salad, cheese, a quart of porter to each man, and a bottle of sherry to every three men. The admirable manner in which this large body of men were supplied reflected the highest credit upon the arrangements of *Mr. Strange, the purveyor of the* Crystal Palace.

After the dinner the Chairman proposed "The Queen, the beloved of all her subjects;" "The Prince of Wales, the future Sovereign of the Country, and the Royal Family," which were received with an amount of cheering that made the Palace vibrate in every part.

In proposing "The Health of the Prince Consort, the Colonel of the Regiment,"

Sergeant-Major Hockey called the attention of his comrades to the fact of the regiment of Guards having been in existence for 200 of the most brilliant years of our history, that the Grenadiers had had the honour of being engaged at different times in almost every part of the world, that upon these occasions they had always proved true to their colours, and had maintained for the British Army that high honour for which it had ever been so famous, and which he was certain would never be tarnished. The regiment sprang from the small band of loyalists who clung to the fortunes of Charles II., and had under every change of circumstance been not less true to their Sovereign than faithful to their country.

The toast was drunk with the most enthusiastic cheering.

Sergeant-Major Gubbins proposed the next toast, that of "The Duke of Cambridge, the Commander-in-Chief." The name of His Royal Highness was one held dear to every British soldier. The gallant duke had, he said, shared upon the battle field the dangers and witnessed the honours which the Grenadier Guards had won, and well knew the material of which they were composed. If on future occasions they should be as gallantly led by their officers, they would be as gallantly followed, for officers and men had never yet been known to flinch in the hour of danger.

This toast, like those which preceded it, was drunk with repeated cheering.

Quartermaster-Sergeant Massingdale gave the "Division of the Guards," with which he associated the name of Lord Rokeby. The gallant general had, he said, been associated with the Guards for nearly fifty years, and his services were honourably recorded upon the brightest pages of his country's history. The services of the Division of the Guards were well known, and the immortal Wellington in his dispatch after the battle of Waterloo, said that they had set an example to all the rest of the Army. He could not refrain from saying, that in the last campaign with Russia the Guards had nobly maintained their reputation, and there were many around who had shared with him in the honours and dangers of those engagements.

Colonel Lindsay, in the absence of Lord Rokeby, responded to the toast, and stated that he had just received a letter from the gallant general, in which he expressed his deep regret at his unavoidable absence from a fête which he would have felt honoured by attending.

Quartermaster-Sergeant Fletcher, addressing his comrades, said that it had fallen to his lot to propose the health of the Lieut.-Colonel and the officers of the regiment, and every soldier in the regiment would drink that toast cordially.

The toast was drunk with great enthusiasm.

Colonel Lindsay replied, and regretted that the Lieut.-

Digitized by Google

Colonel was not able to attend; if he had he (Colonel Lindsay) would answer for it that he would have been as highly gratified as the other officers had been at witnessing the festivities which the Grenadiers were enjoying. Colonel Hamilton had been just appointed the Queen's representative to the Prussian army at Berlin, and as Grenadiers they should feel proud at having one of their officers selected for so honourable a post. The sergeant-major who so worthily filled the chair had informed his comrades of the origin of the regiment. It began with the exiled cavaliers who were faithful to their Sovereign, which said Sovereign was like them in exile. They were assembled by Charles when in Holland, and formed at that time his Royal guard. They fought under him with the Spaniards against the French, and the first action of any importance in which they were engaged was that which was called "the Battle of the Downs." There the regiment distinguished itself as it has done upon all occasions since. When deserted by their allies, and in the middle of a French force, they refused to surrender when surrounded by the enemy, and dictated their own terms, by which they obtained better conditions than they would otherwise have obtained. At a later period they were engaged at the Battle of Fontenoy, almost the only reverse which the British Army has met; but then, although the victory did not finally rest with us, it was fairly won by the valour of the Grenadier Guards, and the manner in which they conducted the retreat was as glorious as if they had obtained a victory. At a still later period the 1st battalion was engaged at Nivelle, and then covered itself with honour. Later again the 1st and 3rd battalions were engaged at Corunna, which ended after a retreat in a glorious victory. The 2nd battalion fought at Rossi, the 1st and 3rd were in the campaign of the Pyrenees, and the 2nd and 3rd were at Waterloo. Again, and within their own recollection, the 3rd battalion distinguished itself as much as any other portion of the British army at Alma and Inkerman. At Alma, under the late Colonel Hood, that battalion, after crossing vineyards, and then the river, coolly and quietly formed itself up, as has been duly described by an eye-witness, and marched up the hill held in force by the enemy, as regularly as if they were marching in line in Hyde Park. No expedition has left the shores of England on foreign service without having a brigade of Guards attached to it. When hostilities were anticipated in Portugal, at 24 hours' notice, a brigade of Guards was placed on board ship; when the rebellion broke out in Canada a brigade of Guards was ordered there; and they all knew that in the Russian war the brigade of Guards was again called upon, and on all those occasions when so called out they have done their duty like brave and noble soldiers. How had they earned the distinguished name which they bear? How, but by attention to their duties, obedience to the law, civil and military, and devotion to their country's service? He presumed to predict that in centuries yet to come the brigade of Guards would be found, as they had always been, loyal to their sovereign and devoted to the service of their country. (The gallant Colonel was loudly cheered on concluding his address.)

Colonel Lindsay then proposed the health of the Chairman, whom he stated had long served with honour to himself and with advantage to the battalion with which he was connected. He is now (said Colonel Lindsay) at the close of his career as a non-commissioned officer, and I can only wish him success in that career to which I expect in a short time he will be advanced.

The health of Sergeant-Major Hockey was drunk with repeated rounds of cheering.

The Chairman, in a few brief and earnest words, acknowledged the compliment paid to him, and proposed the health of the late officers of the regiment, which was responded to by General Lewis.

The dinner-tables were then deserted, and the men hastened to the grounds to witness the ascent of the Mars balloon, and renew the sports and games which were interrupted by the bugle-call for dinner.

Mr. Coxwell's balloon ascended later in the evening, and in it went up a representative of each of the regiments of Guards, namely, Sir C. Russell of the Grenadiers, Lord Dangan of the Coldstreams, and Captain White of the Scots Fusiliers. They descended in safety near Croydon.

THE ROYAL MILITARY ACADEMY.

The following is the official list of successful candidates for admission to the Royal Military Academy, Woolwich, at the recent examinations:—

		No. of Marks.
Order of Merit, 1.	Richardson, W. F. Age 17. Places of education, Windermere College, and Dublin University	5363
2.	Walker, A. G., 17. Privately, and King's College, London	4658
3.	English, T., 16. Rev. G. Frost's, Kensington Square	4453
4.	Lee, H. P., 17. Marlborough College, and privately	4331
5.	Bayly, G. C., 17. Mr. De Burgh's, and Trinity College, Dublin	4230
6.	Ramsay, J., 17. Cheltenham College	4202
7.	Price, W. E., 19. University Hall, London, and privately	4199
8.	Clarke, M. J., 18. Dublin University	4026
9.	Fraser, T., 19, Mr. De Burgh's, Dublin	3994
10.	Wynne, W. R. C., 17. Royal Naval School, New Cross	3877
11.	Halliday, S. C., 19. Mr. Taylor's, Woolwich, and Mr. Fleming's, Tonbridge	3820
12.	Heneage, F. W., 17. Cheltenham College	3794
13.	Hayes, H. M., 18. Privately and Mr. De Burgh's,	3779
14.	Anstey, T. H., 19. Abroad and Mr. Fleming's	3680
15.	Boughey, G. F. O., 16. King's College School, and Mr. Taylor's	3654
16.	Houstoun, J. F., 18. Mr. Sherrat's, Battersea, and Mr. Fleming's	3630
17.	Scott, R. G., 17. Mr. De Burgh's	3622
18.	Watkins, F. W., 18. Cheltenham College	3569
19.	Pell, M. S., 17. King's College, London	3522
20.	Archer, G. W., 18. King's School, Canterbury, and Mr. Fleming's	3303
21.	Taylor, W., 19. Mr. Hopkirk's, Eltham, and Mr. Fleming's	3264
22.	Larminie, E. M., 19. Kingstown School, near Dublin	3261
23.	Burke, W. St. G., 18. Abroad, and Mr. Taylor's	3249
24.	Langley, W. S., 17. Cheltenham College, and Mr. Taylor's	3207
25.	Bridges, J. S., 18. Cheltenham College	3065
26.	Knox, F. B., 18. Mr. De Burgh's	3052
27.	Buller, E. W., 18. Rugby, privately, and Mr. Heather's, Charlton	2997
	Hill J., 19. Dublin University	2997
29.	Macpherson, J. L., 18. Brighton College, and Mr. Fleming's	2981
30.	Soames, H., 17. Brighton College, and Mr. Taylor's	2980
31.	Plunkett, G. T., 17. Proprietary School, Blackheath	2903
32.	Murphy, C. W. E., 18. Trinity College, Dublin, and Mr. De Burgh's	2902
33.	Frere, R. T., 16. Marlborough College	2867
34.	Feilden, H. M. J., 18. Cheltenham College, and Trubey House, Woodford	2844
35.	Firebrace, G., 17. King's College, London	2843
36.	Dolphin, H. E., 17. Dr. Bridgman's, Woolwich	2832
37.	Rudge, W. R., 17. Privately, and Mr. Fleming's	2821
38.	Beadnell, C. E., 19. King's College, London, Trubey House, Woodford, and privately	2815
39.	Grey, C. F. B., 18. Privately, and Mr. De Burgh's	2765
40.	Roberts, H., 18. Cheltenham College, and Mr. Taylor's	2680
41.	Rathborne, W. H., 18. Mr. De Burgh's	2626
42.	Whateley, W., 17. Rev. W. H. Pritchett's, Charlton	2538
43.	Lousley, B., 19. King's School, Canterbury, and abroad	2511

THE WHITWORTH GUN.

Some further experiments with the view of testing the merits of Mr. Whitworth's rifle cannon took place on Wednesday on the beach at Southport. There were present among others General Sir J. F. Burgoyne, Bart., G.C.B., R.E., Inspector General of Fortifications; Colonel St. George, for the War-office; Colonel Bingham (a member of the Defence Committee), for His Royal Highness the Commander-in-Chief; Captain Moore, R.N., secretary to the Duke of Somerset, First Lord of the Admiralty; Captain Hewlett, of the gunnery ship Excellent, at Portsmouth; Captains Halstead and Egerton, of the St. George; Lieut.-Colonel T. B. F. Marriott, R.A., and Captain Wrottesley, R.A.; Lieut.-General Sir G. A. Wetherall, K.C.B., K.H., &c. The experiments therefore may be considered to have taken place under official inspection. The attendance of spectators was very numerous.

There were four guns upon the shore—an 80-pounder, a 12-pounder, a 3-pounder, and a 1-pounder, the last never having been seen in public previously. The fine day and the present crowded state of Southport attracted a large concourse of persons. Mr. Whitworth was present with his partner, Mr. Wall, and some of his chief assistants; but they rendered only such assistance as was asked, except that in the earlier parts of the day Mr. Whitworth's gunner occasionally supervised the sighting.

At half-past eleven o'clock the artillerymen took charge of the 12-pounder, from which they fired in succession 50 rounds. The results, as ascertained at a late hour, may be thus summarised:—

12-POUNDER: ELEVATION, 10 DEG.; CHARGE, 2lb.

	Yards Range	Yards Deviation from Line of fire.		Yards Range.	Yards Deviation from Line of Fire.	
1.	4153	.....	10⅓ Right	6. 4228	.....	10 Right.
2.	4102	.....	10 ,,	7. 4252	.....	14 ,,
3.	4117	.....	8⅔ ,,	8. 4276	.....	10 ,,
4.	4218	.....	9 ,,	9. 4131	.....	10⅓ ,,
5.	4236	.....	4⅓ ,,	10. 4205	.....	12 ,,

This was not good as regarded the line; but the ranges were considered excellent.

ELEVATION, 7 DEG.; CHARGE, 1¾LB.

1.	3160	.....	1⅓ Right.	6. 3119	.....	1⅓ Right.
2.	3039	.....	5⅓ ,,	7. 3122	.....	2 ,,
3.	3233	.....	2⅓ ,,	8. 3037	.....	⅓ ,,
4.	3043	.....	4 ,,	9. 3061	.....	3 ,,
5.	3100	.....	3 ,,	10. 3057	.....	⅓ Left.

ELEVATION, 5 DEG.; CHARGE, 1¾LB.

Ten shots were fired at this elevation, but by a mistake in the sighting the first five were really fired at 2½ deg.; so that we shall omit them altogether. The remainder were thus "posted up":—

1.	2540	.....	5 Left.	4.	2603	.....	1⅓ Left.
2.	2560	.....	6⅓ ,,	5.	2557	.....	2⅓ ,,
3.	2502	.....	7⅓ ,,				

The error mentioned evidently affected the correctness of the five shots fired at the intended elevation.

ELEVATION, 3 DEG.: CHARGE, 1¾ LB.

The Whitworth shell was not charged, and was therefore lighter than the shot.

	SHOT.				SHELL.		
1.	1739	...	2⅔ Left.	6.	1828	...	⅓ Right.
2.	1785	...	1 ,,	7.	1506	...	1⅓ ,,
3.	1810	...	⅔ ,,	8.	1826	...	3⅓ Left.
4.	1574	...	2⅔ ,,	9.	1733	...	⅔ Right.
5.	1717	...	⅔ ,,	10.	1824	...	⅓ ,,

ELEVATION, 1 DEG.; CHARGE, 1¾ LB.

This gun was not fired at less than 3 deg. in the previous experiments; but a nearly point blank range is considered by artillery officers a most important one for real work in the field; so that the firing was watched with great interest. These were the results:—

1.	787	...	⅓ Right.	6.	875	...	⅓ Left.
2.	843	...	⅓ Left.	7.	829	...	⅔ ,,
3.	771	...	⅓ Right.	8.	827	...	⅓ Right.
4.	794	...	⅓ Left.	9.	823	...	⅔ Left.
5.	757	...	2 ,,	10.	886	...	⅓ ,,

Both shot and shell touched and flew from the ground many times, never rising high.

The 12-pounder gun was now removed; and the officers and men from the Excellent took charge of the 80-pounder for which they had been specially sent to Southport. The low elevation of 1 deg. was adhered to. The returns as to the only ten rounds fired were:—

80-POUNDER: ELEVATION, 1 DEG.; CHARGE, 12 LB.

	Yards Range.	Yards Deviation.		Yards Range.	Yards Deviation.	
1.	799	.....	¼ Left.	6. 876	.....	2 Left.
2.	737	.....	1 ,,	7. 994	.....	On line.
3.	727	.....	⅔ ,,	8. 959	.....	2⅔ Right.
4.	769	.....	1⅔ ,,	9. 999	.....	2¼ ,,
5.	774	.....	⅔ ,,	10. 1008	.....	1⅓ Left.

The ricochetting was very fine. The grazes showed that the 80lb. shot did not tend to bury themselves any more than was unavoidable from their mere weight; for the grazes were well-defined, never deep, and always beautifully hollowed from the ends to the centre. Those who had good glasses said that they more than once saw and counted from ten to a dozen contacts: five or six could generally be seen with the unaided eye. The ranges, too, were said to be highly satisfactory, even for a gun that had already gained such a good reputation. The experiments were brought to a conclusion shortly before six o'clock. The experiments were to be continued.

THE FORTIFICATIONS.

The anxiously expected statement of the Government respecting the measures to be taken for the fortification of our principal depôts was laid before parliament on Monday evening by Lord Palmerston, who said his object was to carry into effect the recommendations of the Royal Commissioners on National Defences. These recommendations included the fortification of the dockyards of Dover and of Portland, and the construction in a central place of an arsenal in aid of Woolwich. He felt persuaded that the House and the country were not indifferent to this important subject. As long as the movement of ships depended upon wind and weather, the Channel fleet maintained by Great Britain was sufficient for her defence, but the introduction of steam had completely altered the character of naval warfare, and changed the nature of our insular position. Many years ago the Duke of Wellington called attention to the defenceless state of the country, and implored the Government of the day to provide artificial means against possible attack. But that appeal fell on dead ears, for nations are slow to alter their perception of the state of things. Subsequent Governments had, however, done something towards putting the Dockyards of the kingdom in a better condition of defence. The Commissioners on National Defences had recommended an expenditure of eleven millions. He held that it was absolutely necessary for the safety of the country that these recommendations should substantially be carried out, and completed at the earliest possible moment. The amount requisite for the works might be raised either by setting aside a portion of the annual income of the country each year, or it might be raised, as he proposed it should be, by terminable annuities, extended over a period of three or four years. If the works were necessary (and common sense would show they were), it would, he thought, be folly to postpone them. It was impossible for any one to cast his eyes over the face of Europe without being convinced that the future was not free from danger. In referring to this subject he would not attempt to disguise the fact that the danger was to be apprehended from our nearest neighbour across the Channel. That neighbour, however, would not be justified in taking offence at any measures which Great Britain might take for her defence. He was aware that he would be met by those opposed to the present scheme with the fact that we had recently completed a commercial treaty with France. He hoped much from that treaty, but the treaty alone would be a frail security to a nation possessing great wealth, whose shores were more open to attack than the land frontier of any other country. It would be folly therefore to rely upon a commercial treaty while there were many vulnerable points that required artificial defence. We saw France with an army of 600,000 men, of whom 400,000 were actually in arms, and 200,000 on furlough, but ready to join their regiments in a few days. That army was far greater than France could require for any purpose of defence. Nobody would think of attacking France, nor would anything be got by such a proceeding. He did not mean to say that the vast military force of France was raised and maintained for the deliberate purpose of aggression; but it should be remembered that the power to aggress frequently inspired an inclination for aggression. But the armaments of France were not limited to the land. The utmost exertions were making to create a navy as powerful as our own, which could not be required for the purpose of defence, and which Great Britain was therefore justified in looking upon as a possible antagonist. We had no right to rely for security upon the mere forbearance of another power. For the sake of peace, therefore, it was desirable that we should be able fully and effectually to defend ourselves against attack. There were three motives which might induce a foreign power to attack us. They were the hope of conquest; the gaining possession of the metropolis, levying a heavy contribution and dictating terms of peace in the capital, ignominious to the country though advantageous to the invader; and, lastly, a sudden attack by land and sea to take possession of our naval arsenals, and thus destroy at a blow our maritime supremacy. The last of these motives was that which, in his opinion, was most to be apprehended, for the idea of conquest was too absurd for a moment's contemplation. With regard to London, in his opinion it was far too vast to be fortified; it must be defended by an army in the field. If, on the other hand, the dockyards were destroyed, the Navy would be cut up at the root, and the trade of the country would be at the mercy of the invader. Let the House imagine what would be the result if Liverpool, Bristol, and the Thames were blockaded. The Government were of opinion that (exclusive of the charge for artillery, which would be met by the annual votes of Parliament), the sum of 9,000,000*l.* would be sufficient for the purposes required. Of this sum 1,835,000*l.* was for land, and

Digitized by Google

7,165,000*l.* for works. The works of defence which the other powers of Europe had raised might be quoted as a precedent for what the Royal Commissioners had recommended to be done in the United Kingdom. France had expended enormous sums in the fortification of Paris and the defence of Cherbourg, Toulon, and other places; while Germany, Italy, and Russia had also created fortifications for the purposes of self-defence, some of which had proved so efficient that in the late war against Russia we were unable to make any impression upon them. He was aware of the spirit which animated the country, as proved by the Volunteer movement, and he had entire confidence in the courage and endurance of the troops and the people to repel attack; but, looking to the condition of modern warfare, and to the state of Continental Europe, he thought the Government of the day would be guilty of a high crime and misdemeanour, which would deserve the penalty of impeachment, if they failed to take every necessary precaution against foreign invasion. Having stated that 2,000,000*l.* only would be required for the works to be undertaken in the course of the present year, the noble lord concluded, amid loud cheers, by moving a formal resolution that the sum of 2,000,000*l.* be charged upon the consolidated fund for the construction of the proposed works, and that the Commissioners of the Treasury be authorised to raise the amount by annuities for a term not exceeding 30 years.

Mr. Hubbard took exception to the manner in which it was proposed to raise the money, and Mr. Bright complained that a proposition involving the expenditure of so large a sum of money had been brought forward without notice. He believed that the expenditure, so far from being limited to 11,000,000*l.*, would amount to double that sum. Mr. Sidney Herbert stated in detail the steps which it was proposed to take to carry the recommendations of the Royal Commissioners into effect, and pledged himself that the estimates had been framed on a most liberal scale. The works which it was proposed to commence immediately were at Portsmouth, the Isle of Wight, Gosport, Pembroke, Dover, the Medway, and the Thames. General Peel expressed his approval of the scheme of the Government, but suggested that some competent person should be appointed, responsible to the House and the country, for the careful and economical expenditure of the money. Mr. Osborne thought that the speech of the Prime Minister opened up new and alarming considerations, and that after such a statement there could be little hope of maintaining friendly relations with France.

Lord Palmerston consented to the adjournment until Monday; and in reply to the observation of Mr. Osborne in condemnation of sudden action, remarked that the interval which had elapsed between the presentation of the report and the proposition now made by the Government was a sufficient vindication from the charge that they were acting on a sudden panic. Mr. Newdegate gave his cordial approval to the outline of the proposition. Mr. Disraeli said he entertained grave doubt as to the wisdom of the manner in which the money was to be raised; but with this reservation he was prepared to give his support to the Government. The debate was ultimately adjourned to next Monday.

The Coast-Guard Squadron.—Extract from a letter from an officer dated Torbay, Monday last:—"We sailed from Portland on Friday the 20th at noon, and arrived here on Monday at 11 a. m., having gained a little experience even during this very short cruise. You will recollect that we were ordered away from Portland rather suddenly, as we expected to be visited by the Lords of the Admiralty on Saturday last. I wish their Lordships had been with us during the few hours we were at sea. They would have gained some information about the efficiency of the Block-ship fleet. We were under easy sail the whole time we were in the Channel, except this morning (Monday), when two or three ships got up steam, but I am unable to say whether the engines were started or not. I wish you could see the ragged lot we have on board for a crew—they are a disgrace to the Service. They are a composition, and may be analysed as follows: you know we mount 60 guns, and to man them we have 94 men of our own ship's company and officers, 65 Royal Naval Coast Volunteers, a couple of dozen of Royal Charlottes, and about thirty Skylarks. I verily believe, from what I can see and hear, that every ship in the squadron is as badly manned, some worse, than ourselves. As for the Royal Naval Coast Volunteers, they are a perfect failure, and there never was a greater farce enacted than the compliments bestowed upon them at Portland by our Commodore. You may perhaps be surprised to hear that the bulk of this useless but expensive force is composed of labourers. I do not believe that a hundred seafaring men can be found among the whole batch of Coast Volunteers now incumbering our decks, and pestering the officers with their stupidity. Something not only ought but must be done to obtain better men for the Navy. The system of humbugging the country with the belief that the ships are manned with seamen cannot be too much exposed; nor can it be too widely known that the Royal Naval Coast Volunteers are a frightful expense to the country, and are perfectly useless. Our ship is in a bad state; we are leaky; we were repaired in too great a hurry, and our carpenters are worked to death repairing what is called 'their own defects,' and considering that we have only recently come out of dock, we have a pretty good crop of them."

Kew Gardens.—The tender of Messrs. Cubitt & Co., of Pimlico, for the erection of the great conservatory and winter garden in the pleasure-grounds and arboretum adjoining the Botanic Gardens, at Kew, has been accepted by the First Commissioner of Her Majesty's Office of Works, and the structure commenced. It will be a trifle short of 700 feet in length, covering somewhat about the same space as the Great Eastern steam-ship, and probably the grandest purely horticultural building in the world. It will occupy an extensive area on the right-hand side of the grand lawn avenue, leading from the Palm House to the Pagoda. The whole noble domain of 300 acres is now in all its floral beauty and splendour, and beautiful almost beyond description. The new lake of five acres, with beautifully wooded islands, is situated midway between the Palm House and the Thames, on the left of the Zion vista. The Gardens open daily at one o'clock; on Sundays at two; closing daily at sunset. All the Plant Houses and the Museums are strictly shut at six. Free admission for all classes.

THE NAVY.

ADMIRALTY, July 25.

PROMOTIONS.

Commanders to the rank of Captains—Joseph George Bickford, 1852, of the Victory, 101, flag-ship, at Portsmouth; William Everard Alphonso Gordon, 1854, recently commanding the Hermes, 6, at the Cape of Good Hope; Edward George Hore, 1854, recently commanding the Dasher; and Charles Vesey, 1854, of the Styx, 6, in the West Indies.

Lieutenants to be Commanders—James Simpson, 1845, commanding the Jackal, 4, at Scotland; Douglas Herbert, 1846, of the Hogue, 60, at Greenock; Henry West, 1846, of the Marlborough, 131, in the Mediterranean; Walter Strickland, 1847, of the Royal Albert, 121, in the Channel; John William Pike, 1848, recently commanding the Antelope, 3, on the west coast of Africa station; and Iltid Thomas Mansel Nicholl, 1850, of the Cambridge gunnery ship, at Devonport.

APPOINTMENTS.

Commander—Joseph Dayman (additional), to the Fisgard.

Lieutenants—Lord Walter Talbot Kerr, 1859, to the Emerald, 51, screw-frigate, at Devonport. Frederick Harvey, to the Gorgon.

Masters—John Jarvis to the Imaum; H. W. C. Wise, (1858), to Gorgon, steam-sloop, at Portsmouth.

Surgeon—James Vaughan, 1841, to the Royal Adelaide, 104, training-ship, at Devonport.

Master's-Assistant—William Taylor to the Geyser, 6, at Devonport.

Assistant-Engineers—James Hansford, (2nd-Class) to Russell, as supernumerary; Henry William Masterman, (acting 3rd-Class), to the Arrogant, for disposal; James Imrie, (acting 3rd-Class), George Purkis (acting 3rd-Class), and John Warner (acting 3rd-Class), to the Asia, as supernumeraries.

Clerks—William Barnes to the Formidable; James T. Price to the Donegal, 101, Channel Squadron; Adolph Hunter to the Trafalgar, 90, Channel Squadron.

Secretary's Clerk—William Nottidge to the Formidable, 84, guard-ship of ordinary, at Sheerness.

Midshipmen—W. F. Boughey to the Mersey, 40, Channel Squadron; Charles J. H. Bliss to the Orion, 91, in the Mediterranean; Harry V. Smith and Henry C. Walker to the Barracouta, 6, paddle-sloop.

COAST-GUARD OFFICE, July 26.

Inspecting-Lieutenant—Lieutenant William C. Geary, R.N., from Southampton to Eastbourne, vice Pratt, deceased.

Chief Officer—Lieutenant Auchmuty T. Freese, R.N., from Penzance to Burghead, as Inspecting-Lieutenant, vice Brunton, discharged on half-pay.

Atlas, 91. The launching of this fine line-of-battle screw steam-ship took place from No. 6 slip at Chatham on Saturday afternoon with the most complete success, making the fourth large vessel of war which has been launched from that dockyard in little more than 12 months. Mrs. Schomberg, the wife of Captain Schomberg, superintendent of the steam reserve ordinary in the Medway, performed the ceremony of christening the ship. The Atlas is one of the finest vessels ever constructed at Chatham dockyard, and is as noble a specimen of naval architecture as any ship in Her Majesty's navy. She was commenced in February, 1858, and was laid down from the designs and drawings of Admiral Sir Baldwin W. Walker, K.C.B., Comptroller of the Navy. She has been completed under the superintendence of Mr. O. W. Lang, the master-shipbuilder of the yard. As she lay on her cradle prior to the launch, her magnificent appearance excited universal admiration. The following figures will convey an idea of her great size:—Length between perpendiculars, 244ft. 9in.; length of keel for tonnage, 210ft. 9in.; breadth, extreme, 55ft. 4in.; breadth, moulded, 53ft. 8in.; breadth for tonnage, 54ft. 6in.; depth in hold, 24ft. 6in.; burthen, in tons, 3,317 78-94. The figure-head is a fine bust of the giant whose name she bears. She is to be fitted with engines of 800-horse power by Maudslay, Son, & Field. Her armament will be a very heavy one, and will be arranged as follows:—Lower deck—34 8-inch guns, each 65 cwt., and 9ft. long; main deck 34 32-pounders, each 58 cwt., and 9ft. 6in. long; upper deck—22 32-pounders, each 45 cwt., and 8ft. 6in. long; and one pivot 68-pounder, 10ft. long. The Atlas has been towed to Sheerness for the purpose of taking in her engines, she will then be fitted for the steam reserve at Chatham.

Bloodhound, 3, iron paddle steam-vessel, Lieutenant-Commander Bennett, arrived at Plymouth last week from Woolwich, and has been obliged to go into Hamoaze for the purpose of having leaks stopped and defects made good preparatory to her leaving for the coast of Africa. We are not aware of any heavy weather that the Bloodhound could have encountered in running down Channel, and it is therefore right to presume that she was not put out of hand in a workmanlike manner at Woolwich. We do not hear of the Peninsular and Oriental Steam Company's vessels from Southampton putting into Falmouth to stop leaks! Why should our men-of-war be compelled so frequently to bear up for a port of refuge?

Dee, Master-Commandng Pullen, has again left Woolwich with a cargo of machinery for vessels fitting out at the western yards. This vessel and the Rhadamanthus are constantly moving up and down Channel, and should be enabled annually to supply a certain number of stout servicable young fellows to the fleet.

Emerald, 51, screw, Captain Arthur Cumming, at Devonport, having had her defects made good, has been reported out of the hands of the dockyard.

Fire Queen, Master-Commander F. W. Paul, has returned into Portsmouth harbour.

Geyser, 6, paddlewheel steam-sloop, Commander George M. Jackson, at Devonport, is receiving her guns, and is ready to have sails bent; she is out of the hands of the dockyard authorities.

Gorgon, 6, paddle, Commander B. C. Pim, has been placed in the steam-basin at Portsmouth to refit and receive new boilers, &c.

Greyhound, 17, screw-sloop, Commander F. W. Sullivan, was paid wages at Devonport, and sailed on the evening of the 24th instant for the Mediterranean.

Griper. This old sailing ship is now being cut down to her main deck to receive Jones's angular target.

Immortalité, 51, screw, at Portsmouth, has commenced masting under the shears in the steam-basin. She is being coppered up to her load water-line.

Indus, 78, Captain Key, is fast being fitted at Devonport for service of the ordinary.

Industry, iron screw steam store-ship, Master-Commander George J. Hodges, has arrived at Woolwich from Rio de Janeiro; officers and crew all well.

Megæra, 6, screw, Commander S. H. Henderson, sailed soon after daylight on Thursday, with supernumeraries and stores for Gibraltar.

Melpomene, 51, screw, Captain Charles J. F. Ewart, will receive the special Moorish ambassador and suite on board, from London, and sail with them, on return, from Spithead, on Wednesday next, the 1st proximo.

Orion, 91, screw, Captain Frere, at Devonport, is to rejoin the Channel Fleet.

Pelican, 17, was launched from No. 8 shed of Her Majesty's yard at Pembroke dock on Thursday the 19th inst. The ceremony of naming the vessel was performed by Miss Adams, daughter of Mr. J. Adams, of Holyland. She is a very pretty model, built under the superintendence of Mr. Henry Cradock, master-shipwright, from designs by Rear-Admiral Sir Baldwin Walker, K.C.B., Comptroller of Her Majesty's Navy. She is sister vessel to the Greyhound. The following are her principal dimensions:—Length between perpendicular, 185ft.; length of keel for tonnage, 164ft. 0½in.; extreme breadth, 33ft. 2 in.; depth in hold, 17ft 5in.; burthen in tons, 950 8-94ths; horse-power 200. H.M.S. Avon arrived a few days previous to the launch, with Commander Paul and party, to rig and navigate the Pelican to Devonport.

Perseverance, 2, screw, Commander E. R. Power, sailed from Spithead on Wednesday evening with detachments, various, for the West Indies. She will be employed between the islands with exchanges, and be absent from England about eight months.

Princess Royal, 90, screw, fitting for the 1st class steam reserve at Portsmouth, has commenced taking in her engines and boilers.

Retribution, 28, paddle-steamer, Commodore H. E. Edgell, C.B., has been ordered home from the coast of China. She has been in commission since August, 1856.

Rhadamanthus, 4, paddlewheel steam store-ship, J. R. Sturdee Master-Commanding, from Woolwich and Portsmouth, arrived on Sunday last at Plymouth, with marine engine gear for Keyham steamyard.

Scout, 21, screw-corvette, Captain John Corbett, was at Chusan when the last mail left. The following is an extract of a letter written from this ship:—"We left Hong-Kong on the 28th of March and arrived here on the 18th of April. This is a large city, the name is Quesand, and is very strongly fortified, with a population of about 60,000; and when the cowardly rascals saw us coming they left the place for us to walk into it without firing a shot; so the 99th Regiment and some French troops landed to garrison the place, and we are waiting here for more troops to come up before we go up the Peiho. We have some of the 67th Regiment on board, and we expect the reinforcements here every day; and if we get other places as easy as we got this there will not be much fear of bloodshed in this war."

Shannon, 51, screw, in the 1st class reserve at Portsmouth, has re-shipped her propeller, which has had the leading corner of each of its blades cut off.

Spiteful, 6, paddle steam-vessel, having undergone complete reconstruction at Deptford Dockyard, has been towed to Woolwich, and is ordered to be completed and got ready for commission at that yard.

Torch, 5, screw dispatch gun-vessel, Commander F. Smith, returned to Chatham Dockyard from the Nore, after having made a trial of her engines, when the machinery was found to work very satisfactorily. She has since left for Sheerness, and will very shortly leave for her destination, the coast of Africa.

Pembroke Dock.—On Friday evening the 20th inst., there was a boat race between the officers of the 8th Depôt Battalion and some amateurs. It was warmly contested, but the officers were beaten by above 100 yards and one minute of time; they are, however, going to try it again at the Milford Regatta, which is about to take place. It causes great interest in this neighbourhood.

The New Naval Knight of Windsor.—Lieutenant Richard Weatherley (1816), who since 1834 has been discharging the duties of Director of the Police at Pembroke dockyard, has been appointed Naval Knight of Windsor, vice Lieutenant Okes, deceased. Lieutenant Weatherley entered the Navy as far back as 1793, and while serving as midshipman in the Minerve frigate, Captain Sir Jahleel Brenton, had the misfortune to be wrecked off Cherbourg in 1803. The ship while on the rocks was attacked by an overwhelming force. The crew of the Minerve made the most desperate efforts to get the ship off, and defended themselves from the enemy until resistance was useles. The survivors of the combat were made prisoners, and among them Lieutenant Weatherley, who remained in captivity till 1814. Lieutenant Weatherley, after the general peace in 1815, served on the east coast of Africa, and distinguished himself in assisting to suppress the slave trade; and on one occasion while in command of the tender of the Menai, 26, then commanded by the present Sir Fairfax Moresby, he succeeded in driving a notorious slave vessel into an intricate channel of the Isle of France, from which escape was hopeless; and on seeing which the captain of the slaver destroyed his ship by fire.

The Desertion of Petty Officers and Seamen.—In consequence of the frequency of desertion and absence without leave of petty officers, seamen, and marines, the Lords of the Admiralty have expressed their determination to enforce severe restrictions whenever there is an abuse of the indulgences now in existence. They have stated that orders have been given to all commanders-in-chief and senior officers to grant leave on the arrival of ships from foreign stations when the good of the Service will not be interfered with, but that care should be taken to keep officers and crews together until the work of dismantling a ship prior to her being paid off has been completed. Their Lordships further state that the regulations which have been adopted will afford every reasonable indulgence to

Digitized by Google

seamen on the question of leave; and all captains and commanding officers are therefore strictly enjoined, that every person absent without leave from the ship to which he belongs is to be checked on the ship's books for pay on the day immediately following that on which his leave may have expired, and all such pay is to be forfeited, agreeably to the Act of 16 & 17 Vict., cap. 69, sect. 13, and to Circular Order No. 121, unless satisfactory explanation is afforded to the senior officer present. All seamen proceeding on leave of absence are to be furnished with liberty passes, showing the date, and the hour of the day, on which their leave will have expired. All seamen, who may be absent without leave from ships under sailing orders are to be discharged —"Rq."—on the ship's books, and their pay is to be immediately stopped, as well as any allotment which may be in force; and lists of all men so absent are to be sent to the Accountant-General of the Navy immediately before sailing. And when the men rejoin or are captured, and are sent on board a flag ship, the ratings of petty officers, in such cases, will be suspended, and they are never to be entered on board such flag-ship, or other ship, with any higher rating than that of A.B. On reaching their proper ships they will be received as part complement in any rating that may be open at the discretion of the captain, but the "Rq." in such cases will never be removed, nor will arrears of pay be allowed, except upon such complete explanations from the captains of the ships to which they have belonged as may be entirely satisfactory to their Lordships. We sincerely hope that these regulations will be found to answer the purpose for which they have been framed.

ANOTHER ARRIVAL OF TIMBER AT CHATHAM.—The ship Lady Milton has arrived in the Medway from Quebec with a considerable cargo of spars, masts, and deals, for the use of the Royal dockyard at Chatham.

The following new vessels recently launched are now being rapidly completed at Woolwich dockyard:—Barossa and Cameleon, screw-corvettes; Landrail, screw gun-vessel, and Lee, Mullett, Cockatrice, and Snipe, screw gun-boats. These vessels will be armed with Armstrong guns especially adapted for the Naval Service.

Six new gun-boats are to be built at Haslar.

A correspondent, whose opinions have much weight at the Admiralty, has suggested to us the propriety of dispatching an experienced naval officer, accompanied by a medical man, into the agricultural counties, for the purpose of picking up strong, healthy, well-formed boys for the Naval Service, as our Correspondent contends that the lads entered at the naval ports are frequently, from hereditary causes, unfit to contend with the exposure inherent to a sea life, and not worth the expense lavished on their training. This idea is not a novel one, as it has been a favourite one with many distinguished officers who have turned their attention to the subject of "How our Navy is to be Manned," and appears therefore to be worthy of a trial.

In the Registrar-General's weekly report of metropolitan deaths the following is recorded:—a captain, R.N., aged 58 years, died from "coup-de-soleil (8 years), hemiplegia (1 year), hypertrophy of the heart."

THE MEDITERRANEAN.

MALTA, 21st July, 1860.—H.M.'s paddlewheel steam-frigate Terrible, arrived on the 15th inst. from Plymouth and Gibraltar. She left on the following day for Zante, to join Admiral Martin's fleet.

H.M.'s gun-boat Lapwing proceeded on the 16th inst. to Zante.

Three months' leave of absence has been granted to Brigade-Major Hon. W. J. Colville, Rifle Brigade; the duties of the brigade-major are being performed by Major Granville, 23rd Royal Welsh Fusiliers.

A letter from Corfu, dated 18th inst., says:—"H.M.S. Doris and Boxer (gun-boats), are now getting up their steam, 11 a.m. It is supposed they are about to join the fleet, cruising off the Southern Islands, which we have been daily expecting. Yesterday afternoon an English frigate passed up the north channel without anchoring. I have just heard that the above vessels are starting to join the fleet off Paxo, and the destination of the whole is Syria."

The old Palace of the Grand Masters at Citta Vecchia, commanding one of the finest views in the island, and exceedingly healthy, is being rapidly converted into an hospital of invalids for sick soldiers, with a separate establishment for invalid officers, thus tending to economise the large annual outlay heretofore expended in sending invalids home. The Inspector-General of Hospitals entertains the opinion that when completed, so well situated and appropriate is the site chosen, that this establishment will prove one of the most perfect in the Army. Independently of the advantage derivable from this work in a military point of view, the expenditure consequent upon its establishment will greatly benefit the island in a civil point of view, by infusing new life into Citta Vecchia, formerly the capital of Malta, but now in a state of stagnation as far as any transaction of ordinary business or commerce is concerned.

Forrest Hospital.—A new hospital at St. George's Bay, in close contiguity to the Pembroke Camp, called the Forrest Hospital, is to be established, by converting an old baronial dwelling, called Spinola House, to that purpose.

Pembroke Camp.—Mr. Sidney Herbert has further sanctioned the immediate construction of a stone encampment for musketry instruction, to be called the Pembroke Camp. All the latest principles of sanitary improvement will be brought to bear in this construction. It will be capable of holding 1000 men, and it is situated close to St. George's Bay, one of the healthiest spots in the island.

THE ADMIRALTY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I beg to call attention to the following facts:

Admiral Dundas entered the Navy 1817; was made a Lieutenant in 1821, just 4 years; Commander 1823, just 2 years; Captain in 1824; 7 years getting rank of Captain.

Admiral Pelham entered in 1823; Lieutenant, 1830 (7 years); Commander 1835 (5 years); Captain in 1840; 17 years getting rank of Captain.

Admiral Eden entered in 1821; Lieutenant, 1832, 11 years (Commander not known); Captain in 1841; 20 years getting rank of Captain.

Captain Frederick entered in 1810; Lieutenant, 1818 (8 years); Commander, 1829 (11 years); Captain, in 1842; 32 years getting rank of Captain.

Lord C. Paget entered in 1823; Lieutenant 1831 (8 years); Commander 1834 (3 years); Captain, 1839; 16 years getting Captain's rank.

And the above Board have made during the last six months:—1 Captain (Coast Guard promotion); 7 Lieutenants to Commanders (some of those flag promotions); 17 Mates to be Lieutenants; and 1 Second Master to the rank of Master, and will not even attempt to clear the heavy lists by a liberal retirement. Fancy in the Army only 1 Major getting his Lieut.-Colonelcy, and 7 Captains getting their majority in six months. Why, it never would be believed that such promotions have taken place in the largest navy in the world. The average of the present board gives 18 years to get post-rank; and yet we have 9 Lieutenants in 1842, now serving as First Lieutenants, 18 years as Lieutenant's besides Mate's time; Commanders of 1845, 15 years as Commanders, besides Lieutenant's and Mate's time. What does Admiral Dundas say to this with getting his rank in seven years; and what can he say to these officers on their return from foreign service? Will he promote them? No, they are too old, he will reply. And does the country require these men to fairly serve her, exposed to all dangers in every climate of the world, without a compensation? We look to you, sir, to advocate a liberal retirement in all ranks, and to lay our case honestly before the public.—I am, sir, &c.

A CAPTAIN, R.N.

NAVAL PROMOTION AND PAY.

On Tuesday night in the House of Commons Sir John Pakington brought forward the following resolution, "That an humble address be presented to Her Majesty praying that she would be graciously pleased to issue a Royal Commission to consider the present system of promotion and retirement in the Royal Navy, and the present pay and position of the several classes of naval officers, and to report what changes therein are desirable, with a view to the increased efficiency of Her Majesty's Naval Service." Sir John, in the course of his speech, disclaimed all intention of exhibiting any motives of a party character. He stated that he had only the good of the Service at heart, and was resolved to press the motion, from the fact that the scheme propounded by the present Board of Admiralty through Lord Clarence Paget was unsatisfactory, and was decidedly unpopular with the large body of naval officers. Sir John contended that to the want of an efficient plan of retirement there existed a dearth of promotion that was very depressing to the spirit of officers generally. Sir John, also, in support of that portion of his resolution referred to the very inadequate pay of officers in command of ships, and he illustrated his statement by reading extracts of letters from several admirals and captains who had sunk money in paying for their outfits and for entertainments when serving abroad to the representatives of foreign powers. The Right Hon. Baronet likewise stated that if he had not been suddenly turned out of office by Lord Clarence and his party, he had intended to have dealt with the case of the masters of the Navy, and asserted that his scheme was preferable to that brought forward by the noble lord, as he understood that great complaints still existed. Another branch of the profession which he proposed to deal with was the paymasters. It appeared to him that all classes were dissatisfied, and that it was most injurious to the Service this state of things should go on. Let the House remember the expression of the late Duke of Wellington, who spoke of officers being "contented, and therefore efficient," and that upon the contentment of officers frequently depended the contentment of their crews. He concluded his speech by asking in the name of the Navy and in the name of the country for the inquiry he advocated, which he was convinced was necessary for the Naval Service, and the result of which would, he believed, prove eminently satisfactory—Sir Michael Seymour seconded the motion. He remarked that much had recently been said about schemes for retirement; there was much obscurity about that of the Admiralty; he should be glad to hear it further explained. The principle of seniority ought to be acted on to some extent; he should be glad to know to what classes of officers it was to apply. The noble lord (C. Paget) had complained of the Admiralty being overworked; this would be a means of decreasing their labours. This was no party question. He should be sorry, as a naval officer, to mix himself up in any such question. If the Navy was the right arm of this nation's power, surely everything ought to be done to render it efficient. He had received letters of complaint similar to those read by Sir J. Pakington; and this had deeply impressed him with the necessity of the Commission.—Captain Talbot supported the motion, and contended that the feeling of the Service was entirely in favour of it, and that the Admiralty scheme was anything but popular.—Lord Clarence Paget taunted Sir John Pakington for not having when in office effected all the reforms and improvements which now while he was in opposition he was anxious to propound, and in the course of a speech which took some time in its delivery, the noble lord admitted that he had been born with a silver spoon in his mouth, and that the case of the old mates was very hard when compared to his and other officers equally fortunate. He however mentioned that the Admiralty had the claims of the mates now under their consideration, and would, if the expense was not too great, endeavour to satisfy them. He stated what the present board was doing as to captains of line-of-battle ships. It was too late to make any alteration of the present Estimates; but when the next Estimates were prepared there was a minute that this case should be dealt with by the board; and he should be prepared at the beginning of next session to ask for certain fair allowances; for he admitted that the matter was one of great importance to the Service. A comparison had been made between the pay of French officers and that of those of our own Navy; but the right hon. baronet had omitted to mention that our officers in command had allowances for linen, plate, and other matters which the French officers had not. The noble lord spoke of the present Board of Admiralty in reference to their efforts to improve the condition of all classes of officers, and finished by remarking that it was most injurious in his opinion that any one in the position of his right hon. friend should declare that every class of officers in the Royal Navy was discontented. It was a positive premium on discontent. But he begged leave to deny that there was any discontent. They had all as Englishmen the privilege of grumbling. That there were occasional grounds for grumbling he admitted, but he denied that there existed anything like general discontent; and as he had shown that the successive boards of Admiralty were ready to review the position of the officers, to improve their position, and increase their pay whenever it seemed to be requisite to do so, he hoped the House would not agree to the motion of his right hon. friend.—Sir J. Elphinstone said he was not convinced by the speech of the noble lord that the issuing of a Commission was not desirable and necessary. One case, which was only an illustration of many others, would show that it was necessary to make some alteration in the present system. It was the case of a gentleman who had served sixteen years as midshipman and mate, seventeen years as lieutenant in the coast-guard, seven years as inspector and commander of coast-guards—altogether forty years—and yet this gentleman had received seven years and nine months' consideration from the scheme of the noble lord. He was in six different encounters with smugglers, was three times left for dead, and had his arm broken. He had actually spent as a midshipman and mate as much time as it took those who were born with silver spoons in their mouths to arrive at post rank. He believed that this Commission was required, and he hoped it would be comprehensive in its character. He added his testimony to the fact of the existence of much discontent among the officers of the Navy.—Sir Charles Napier after dwelling upon the inadequacy of the pay of captains to support the dignity of the rank, advocated with regard to the question of promotion some such plan as existed in the French navy, by which a certain number of officers were promoted by seniority, and others by selection; he contended that the noble lord (Lord C. Paget) was very fond of making accusations, and accused the late First Lord of the Admiralty of breeding discontent amongst the officers of the Navy; but he (Sir C. Napier) thought when that right honourable gentleman was First Lord he did as much as he could do to ameliorate the condition of the officers, and left an example behind him to his successors which they had not followed, and he thought those accusations were very unjust and ungenerous. He (Sir C. Napier) trusted this Commission would be named, and that it would be a just Commission, composed of men who really did know the Service, who were independent men, and not afraid to speak their minds to the Admiralty. If a Commission of that sort was formed he thought a great deal of good might come out of it.—Sir F. Baring opposed the motion, and contended that if a Royal Commission were issued hopes would be created which it would be impossible to realise. He was of opinion that all the questions raised in the course of the debate would be better left in the hands of a responsible Government than in those of irresponsible Commissioners. He had heard with great pleasure that the condition of the mates—he meant the old mates in the time of the war—was before the Admiralty. He thought they had a case, and he should be glad if upon consideration the Admiralty found they could do anything to ameliorate their present position. He had no wish to prevent inquiry; on the contrary he was anxious that every case of grievance or supposed grievance should be investigated; but that the investigation should be made by the proper authorities.—Mr. Baillie Cochrane and Mr. W. S. Lindsay supported the motion in some practical observations.—Mr. Whitbread (a Lord of the Admiralty) opposed it; and, after a short reply from Sir John Pakington, on a division the motion was lost, there being for it 56 and against it 89—majority 33.

THE MILITIA.

The 2nd Royal Cheshire Regiment of Militia received on Wednesday morning last a letter from the Horse Guards to hold themselves in readiness to leave the Shorncliffe Camp, for Cheshire, for disembodiment on the 15th proximo. It is rumoured in the camp that the 41st and 49th Regiments, now at Aldershot, will relieve the Cheshire at Shorncliffe.

The following moves take place—Louth Militia, from Dublin to Dundalk, where the regiment will be disembodied; North Lincoln, from Dublin to Liverpool and Lincoln; and the 2nd Stafford, from Dublin to Birkenhead and Stafford, for the same purpose; Donegal, from Yarmouth for Birkenhead, to embark for Dublin.

The Militia Gazette.

WAR OFFICE, PALL MALL, JULY 24.

Stirlingshire, &c., or 90th Highland Borderers Regiment of Militia—Ensign Edgeworth Horrocks to be Lieutenant, vice David Murray Anderson, resigned.

3d or Royal Westminster Light Infantry Regiment of Middlesex Militia—The Hon. George Henry Cadogan to be Ensign, vice Willcocks, promoted.

2d Regiment of Royal Cheshire Militia—John Carmichael, Gent., to be Ensign, vice Hannagan, promoted.

Memorandum—Her Majesty has been pleased to accept the resignation of Captain Spence Derrington Turner.

WAR OFFICE, PALL MALL, JULY, 27.

Light Infantry Battalion of the Royal Sussex Militia—Lieutenant Thomas Faulconer Wisden to be Captain, vice Matthews, resigned.

Royal North Lincoln Militia—Captain Robert John Taylor to be Major, vice Golden, resigned.

1st Regiment of the Royal Surrey Militia—Lieutenant Henry Peters to be Captain, vice Hoste, resigned; Lieutenant Thomas Vivian Gurney to be Captain, vice Calvert, resigned; Lieutenant Percival Augustus Carleton to be Captain, vice Popys, resigned; Augustus Barrington Godbold, Gent., to be Lieutenant, vice Peters, promoted.

Huntingdonshire Militia—Herbert Riversdale Mansel Jones, Esq., to be Captain, vice Woulfe, resigned.

The total number of men belonging to the European troops in India who have taken their discharge since 1858, in consequence of being refused bounty, and who were sent to the United Kingdom, was 10,116. The total number of such men re-enlisted since their return to England is 2809, of whom 1180 were re-enlisted in London, 680 in York, and 399 in Liverpool.

VOLUNTEERS.

METROPOLITAN.

MIDDLESEX VOLUNTEER GUARDS.—A statement published in some of the papers, to the effect that this corps was about to be amalgamated with the Hon. Artillery Company, has been contradicted by Captain Bruce, the commandant. The corps marched on Thursday to the distillery of Mr. F. Hodges, one of the members, at Lambeth, where they were hospitably entertained to the number of 100.

QUEEN'S (WESTMINSTER) RIFLE VOLUNTEERS.—The St. James's division have presented to Sergeants Haylock and Groves, who have so assiduously and ably directed the drill of the members since their formation, a testimonial, as evidence of the good will and kindly feeling of the corps generally towards their very efficient instructors.

WESTMINSTER NATIONAL RIFLES.—Under this title a battalion of artisans of London is now in progress of formation by Mr. J. R. L. Walmisley, a gentleman who takes a deep interest in the question of our national defences, and has long been connected with Volunteer corps. The project is warmly patronised by Sir De Lacy Evans and Sir J. V. Shelley, and the zeal and energy displayed by Mr. Walmisley are a satisfactory guarantee that it will be effectively carried out. The low scale of annual subscriptions for effective members will facilitate the admission of a vast number who, on account of the outlay required, are virtually excluded from other corps; and the payment for uniforms by small weekly instalments is a valuable feature which merits the strongest approval, and cannot fail to contribute materially to the object in view.

LONDON SCOTTISH.—On Saturday last four companies of this regiment marched out at 4 p.m., from their head-quarters in Adelphi Terrace, under the command of Captain Macgregor, for light infantry drill. They proceeded by rail from London Bridge to the piece of ground allotted to them by the Crystal Palace Company, at the foot of their gardens at Sydenham. On this ground the gallant Scotchmen found a large growth of their native thistles, many nearly breast high, and in skirmishing among these inhospitable plants, the Highland company felt acutely the truth of the well-known motto of their country's badge, "Nemo me impune lacessit." After skirmishing vigorously for some hours, the regiment marched at nine o'clock into the Crystal Palace. On the upper terrace their band delighted the visitors who still remained with a variety of tunes, including reels and polkas, to which the Volunteers danced with an agility scarcely to be expected after their hard work among the thistles. After witnessing the brilliant illumination of the Palace and fountains, the regiment returned by train to London Bridge. The clocks of the city chimed midnight before the regiment reached its head-quarters.

WEST MIDDLESEX RIFLES.—This corps have been actively engaged during the past week in judging distance drill in the Regent's Park, and in position drill, and attending lectures by the musketry instructors at head-quarters. Classes are now formed for the instruction of musketry, as pursued at Hythe. The classes meet at various times to suit the convenience of members. At a meeting of the council, held on Wednesday; it was unanimously resolved, —"That in addition to the silver and bronze medals presented by the Rev. J. E. Cox, the council shall offer a prize of 20*l.*, and the silver medal to the best marksman of the corps; also, 10*l.* and the bronze medal to the 2nd best; and 6 prizes of 5*l.* to the best shot of each company, the winners of the medals to be excluded." Regulations will be issued for a grand prize meeting at Wormwood Scrubs, in October, as soon as the council have intimation from the donors of several other prizes promised—the above prizes will be competed for by those members of the corps who have passed through the course of musketry. The secretary presented the first annual statement of receipts and expenditure of the corps, certified by the auditors. Copies were ordered to be printed for circulation to the members. On the question of appointment of a quartermaster, it was resolved that the secretary, Mr. G. Marriner, be nominated to the appointment with the rank of ensign.

4TH MIDDLESEX RIFLES assembled on Wednesday evening at the parade-ground opposite Compton-Terrace, Islington, for the purpose of being presented with its colours. The attendance was very numerous, a large number of ladies being present. The band played during the early part of the evening. Lord Truro, Capt.-Commandant of the corps, formed the men in line, and addressed them and the visitors at some length, urging strongly the claims of the corps on the inhabitants. The colours were then presented by his lordship, the men saluted, and the company cheered and seemed highly delighted. The colours are the gift of a few young ladies in the district. This corps is rapidly progressing. On Saturday next they march to Tottenham to practice with other suburban corps.

THE CENTRAL LONDON (40TH MIDDLESEX).—The rules for the guidance and regulation of the corps have received both the approval of the lord-lieutenant and the sanction of the Queen. Arrangements have been concluded for renting the chambers, No. 12, Gray's Inn Place, for the permanent head-quarters of the corps. By special permission, the corps will be enabled to commence rifle and target practice at the Government butts, Plumstead Marshes, so that a longer period will be afforded for making the best arrangements to erect, purchase, or otherwise use a private butt in some more central and convenient neighbourhood. Arrangements are now being made to enable the corps to avail itself of the services of a Volunteer band of music upon favourable terms. Arrangements have been entered into with the 39th Middlesex to amalgamate with them for the purpose of brigade drilling, and the first result of this brigading will be the appointment of a military adjutant by the Government.

Arrangements have it appears been made for battalion drill to day, between the 20th and the 29th Middlesex and the Bloomsbury corps at Barnet, where they will unite with the local corps. The metropolitan volunteers are to start from the King's-Cross terminus at four o'clock.

BERKSHIRE.

WINDSOR AND ETON RIFLE CORPS.—The *Windsor Express* says:—"We briefly announced in our last that the members for the borough purposed presenting two rifles as prizes to be competed for by the members of our local corps. We understand that the rifle offered by Mr. W. Vansittart was received by the Hon. Leslie H. Ruthven, the commandant of the corps, on Tuesday, with a request that he would fix the time and place for the competition."

CAMBRIDGESHIRE.

A general review of all the Cambridgeshire corps is to take place on Parker's-Piece, at Cambridge, on Monday the 6th of August.

Mr. J. Gurdon Rebow, who recently provided the Colchester corps with the free use of a rifle range in Wivenhoe Park, has offered a silver cup, which is to be shot for in the first week in September.

DEVONSHIRE.

About 350 Rifle Volunteers, belonging to Plymouth, Devonport, and Stonehouse, under command of Major Duperier, were inspected on Friday at the Raglan Barracks, Devonport, by Major Hume, who expressed general satisfaction at their soldierlike appearance, and especially commended the company drill.

EDINBURGH.

EDINBURGH.—The 1st and 2nd Battalions of the Edinburgh Rifle Volunteers were reviewed in Bellville Park on Wednesday, by the general commanding the forces in Scotland. The battalions consisted of nine or ten companies each. Many of the companies—especially the Bankers, the Civil Service, and the four Artisan companies—showed a very full muster, and it was calculated that there were at least a thousand men on the ground.

The announcement of Her Majesty's pleasure to review the Volunteers of Scotland at Edinburgh on the 7th of August has given a renewed impulse to the zeal which the Scotch Volunteers have all the summer shown to acquire proficiency in military movements, as well as in the use of the rifle. Holyrood Park will afford space for brigading 12,000 to 15,000 Volunteers, while the hilly ground on the south will afford an excellent theatre for spectators. From the amount of preparation going on in all quarters, a large representation of the Volunteers north of the Tweed may be expected to muster on the 7th, although some disappointment is felt in the West of Scotland, where the largest numbers are enrolled, that Edinburgh has been chosen as the scene of the review.

ESSEX.

On Saturday afternoon the Chelmsford and Brentwood Volunteer Rifle Companies were reviewed in Boreham Park, the seat of Sir John Tyrell, by Lieutenant-General Sir Harry Smith. Some ball practice followed, a regimental sword and silver cup being awarded to the best shots, and the Volunteers were afterwards hospitably entertained at dinner by Sir J. Tyrell.

GLAMORGAN.

A competition open to the Volunteer Rifle Corps of Glamorgan and Monmouth took place on the practice-ground at Cardiff on Monday and Tuesday last. The prizes were a Lancaster rifle for the best shot at 400 yards, and a short Enfield for the best shot at 300 yards. The first prize was won by Private William J. Jenkins, of the Dowlais company (2d Glamorgan); the second by Sergeant Nethersole, of the Swansea company (3d Glamorgan). The winners made seven points each in five shots.

GLOUCESTERSHIRE.

GLOUCESTER.—A review of Volunteers will take place at Gloucester on Tuesday, the 18th of September. The town and Maisemore Hams are fixed upon as the site for this grand spectacle. The ditch which divides the two will be planked over, so that from 8000 to 10,000 Volunteers, being the number expected, can be accommodated. The announcement has excited great interest in the city and neighbourhood.

HAMPSHIRE.

THE 8TH HAMPSHIRE RIFLE VOLUNTEERS (Bitterne and Botley Companies) assembled on the drill ground at Bitterne, two miles from Southampton, at 1 o'clock, on Monday, on occasion of wearing their uniform for the first time. A good muster took place, in spite of the drenching rain, and, after going through a few evolutions, the corps marched to church, headed by the excellent band of the Southampton Rifle Corps, where a sermon was preached by the honorary chaplain, the Rev. J. Silvester Davies, which is to be published by request. On leaving the church they marched to Heathfield, the beautiful residence of their popular commandant, Captain Robert Richardson, to partake of a sumptuous collation to which he had invited them. The uniform of the 8th Hants is grey, with black and green facings.

PORTSMOUTH CIVIL SERVICE VOLUNTEER CORPS.—Agreeably to an order passed at a meeting of the committee held on Tuesday, the 24th July last, arrangements have been entered into for the formation of a strong Civil Service Volunteer corps, composed of the artisans in Portsmouth Dockyard. The number of members having already exceeded 100, application has been made for the approval of the Lords of the Admiralty for the formation of the corps. Immediately on the receipt of their Lordships' sanction, a meeting of the members will be held to elect by ballot a captain-commandant, and to consider the rules to be submitted to the Marquis of Winchester, the Lord-Lieutenant of the county, for the future guidance of the force. When it is remembered that upwards of 5000 able-bodied men are employed in our chief naval port, we may expect to find in the Civil Service Corps of Portsmouth a great accession to the military strength of the regular garrison of the place. The men are all of the right sort, full of bodily vigour and used to labour, and although we may expect to find a good sprinkling of honorary members enrolling themselves in the corps, yet the great mass of the artisans will be effectives. The proposed rules relating to the conditions of the corps are composed of those usually attached to the Volunteer movement. The enrolled members pay a subscription of sixpence per month for the artillery, and a shilling a month for the rifles, and also pay for the cost of their uniform and accoutrements. The admission of honorary members is secured by the payment of an annual subscription of not less than half-a-guinea. There are other rules relative to general committee meetings, the admission of future members, the resignation of members, the election duties of the committee, secretary, and treasurer, the discipline of the corps, &c., &c., all of which have been approved by the committee. It will be remembered that the artificers of Portsmouth Dockyard are no strangers to military discipline, for they were arranged into a "brigade" in 1847, and were drilled for some years during the summer months, and ultimately became a most effective body of men, and fit for any duty. For some reason, which we do not remember just now, this corps was disbanded, but we are happy to find that the available manhood of the dockyard is again about to assume an effective form, and be enrolled for the protection of the important interests of the great naval arsenal, with which, both as good citizens and workmen they are intimately connected, and bound to defend.

ISLE OF WIGHT.—The members of the different corps of Volunteers in the island mustered on their parade grounds at an early hour on Monday morning, some of them as early as 3 a.m., and proceeded to Mersley Down, near the centre of the island, for the purpose of battalion drill. The whole of the corps had mustered on the down by 6 a.m., and comprised:—The 1st and 3rd, or Ryde, Companies, with their splendid band, under the command of Captain Sir John Lees; the 2nd, or Newport, Company, under the command of Lieutenant A. H. Estcourt; the 4th, or Nunwell, Company, commanded by Sir Henry Oglander; the 5th, or Ventnor Subdivision, commanded by Lieutenant A. J. Hamborough; the 6th, or Sandown, Company, commanded by Captain Farnell; and the 7th, or Cowes, Company, under the command of Captain Graham. Colonel Dunsmure, late of the 42nd Highlanders, officiated as Lieut.-Colonel-Commandant of the whole force, assisted by Major Sir John Simeon; and at the close of the evolutions Colonel Dunsmure, addressing the corps, expressed his gratification at their general appearance, and the efficient manner in which they had gone through this, their first battalion drill.

KENT.

FOREST HILL ARTISAN CORPS.—The gentlemen composing the committee formed for the purpose of establishing an artisan company in connection with the 8th Kent Volunteers, called a meeting of the artisans residing in the neighbourhood of Forest Hill, at the new national school-rooms, on Wednesday, which was very numerously attended. The chair was taken by the Rev. J. M. Clarke, who stated his desire to see a more complete amalgamation of the working classes with the gentlemen forming the present corps. It was announced that 78 candidates were willing to join the corps.

LANARKSHIRE.

The 1st and 2nd Regiments of Lanarkshire Rifles, numbering upwards of 1300 were inspected on Tuesday last at Campsie, by Colonel M'Murdo, Inspector-General of Volunteers, and Major Nelson, Assistant-Inspector. In expressing his satisfaction with the movements of the force, Colonel M'Murdo said: "We have 138,000 men such as you; and I will tell you, because I studied the question, that if war should arise we shall have one in ten of the population capable of bearing arms, and that will produce 550,000 men to defend our homes. I ask for no other army. I ask for no other auxiliary to our gallant regular troops; but for the regular troops of the country to oppose an invading enemy, it is nonsense. We must depend upon the volunteers of the country. What I have seen to-night is the best guarantee that we have for the security of our nation in the event of danger."

LANCASHIRE.

Lieut.-Colonel Bourne has received a polite letter from the Earl of Derby, expressing a desire to witness a review of the Liverpool Volunteers in Knowsley Park. His lordship's wish will no doubt be gratified, for it is said that Her Majesty will be present. No day is fixed, as the convenience of all parties will be considered in making the arrangements. The Manchester Volunteers purpose, under Captain Brooks, to assemble on the 11th of August at Newton Heath, and expect the Volunteers from Liverpool to meet them. The gathering is to be on the race-course, at Newton-le-Willows, on the 11th of August. The sanction of the Secretary of State for War has been received, and also that of the lord-lieutenant of the county. Lieutenant-General Sir George Wetherall, K.C.B., commandant of the northern district, has consented to take the command.

MIDDLESEX.

THE 16TH (SOUTH-WEST) MIDDLESEX RIFLE VOLUNTEERS, commanded by Captain Murray, were inspected in Whitton Park, near Hounslow, on Thursday evening week, by Major-General Tremenheere, on which occasion a handsome silver bugle, the gift of the Duchess Dowager of Northumberland, was, at Her Grace's request, presented to the corps by General Tremenheere. Several manœuvres were executed in a very steady manner, and the presentation of the bugle was preceded by an appropriate address. The corps was then marched to Twickenham, and formed in front of the residence of the Duchess Dowager, where the proceedings terminated with several hearty cheers.

SUFFOLK.

IPSWICH.—On Monday the Ipswich Volunteers had a field day in the grounds of the "Chauntry," the seat of Sir Fitzroy Kelly, M.P. The Volunteers were hospitably entertained at luncheon by Sir Fitzroy, and afterwards marched amid a drenching rain to the review ground, where they were drawn up in line, and presented with a silver bugle by Mrs. Josselyn, wife of the Mayor of Ipswich. The bugle, which is handsomely chased, is valued at 30*l.* Colonel Ramsay, a veteran Indian officer, who commands the corps, made an appropriate reply, and three hearty cheers having been given for the Mayoress and the ladies of Ipswich, Colonel Ramsay and the officers, Sir Fitzroy Kelly, &c., the corps was reviewed amid continued torrents of rain, the gallant Volunteers being drenched to the skin. The evening closed with a dinner in the Corn Exchange, at which Colonel Ramsay presided, supported by Sir F. Kelly, M.P., Mr. J. C. Cobbold, M.P., the Mayor of Ipswich, Colonel Adair, Sir G. N. Broke, and a number of Volunteer officers from all parts of Suffolk.

SURREY.

THE SURREY MOUNTED RIFLES.—This corps, under the command of Captain Walter Meller, met at their head-quarters, Battersea Rise, on Saturday last, for marching out, and by kind permission of Major-General Sir Richard Dacres, commanding at Woolwich, were headed by the band of the Royal Horse Artillery. The route lay through

Digitized by Google

Clapham, Brixton, Dulwich, Camberwell, Peckham, and Deptford, to Greenwich. Throughout the march the corps was most enthusiastically received, and much admired for their soldier-like bearing and fine horses. The uniform resembles very much the light cavalry. At Greenwich the corps dined at the "Ship" (Quartermaine's); Major-General the Right Hon. Sir James Yorke Scarlett, K.C.B., in the chair. Several ladies honoured the corps with their presence. This corps is about to establish a troop at the West-end, with a local drill-ground, and it is expected that by this means a great addition will be made to this fine body of men.

7TH SURREY RIFLES.—On Saturday afternoon the members of the Lambeth and Southwark Corps assembled at the Sessions House, Newington Causeway, for a march out. Five companies were present, under the command of Major Beresford and the other officers of the corps. Shortly after 5 o'clock the men fell into the ranks, and, accompanied by the band of the regiment, proceeded to march, *viâ* Westminster Bridge, to the residence of Major Beresford at St. John's Wood. The martial appearance and soldierlike bearing of the men were acknowledged by the dense crowd of people, who cheered the Volunteers in a most hearty manner as they marched through the streets by fours.

On Saturday last the 1st Surrey Rifles assembled at Kennington, in a field kindly granted by Price's Patent Candle Company, and marched down the Clapham Road, Bedford Road, to Tooting Common, where they went through skirmishing drill for about an hour, and then proceeded through Balham to Clapham Common, where skirmishing drill under difficulties took place (in consequence of the assemblage of a great number of spectators). The order was then given to pile arms, and bread, cheese, and beer were distributed to the corps through the kindness of the officers and men of the Clapham company, under Captain Scrutton. The band played some airs, and then the corps marched home again, down Clapham Road, Stockwell, Vassall Road, and Camberwell New Road, where they were dismissed, after giving three hearty cheers for the lieutenant-colonel, Lieut., Col. Macdonald, late Bengal Artillery. The Major, W. P. Jones (late 5th Fusiliers) was also present, and the Adjutant-Capt. W. J. Freeman (late 16th Foot). The corps mustered about 250 strong.

WARWICKSHIRE.

BIRMINGHAM.—On Saturday afternoon the 12 companies forming the Birmingham Corps were reviewed in Calthorpe Park by Lord Leigh, the lord-lieutenant of the county. The various companies assembled at Bingley Hall, and marched to the park, where they went through a number of evolutions with considerable precision, the steadiness of the firing being not the least creditable part of the proceedings. Lord Leigh was accompanied by Captain Warlow, of the Government Small Arms Department; Ensign Hanbury Barclay, as aide-de-camp; Captain Baron Dickenson Webster, of the Warwickshire Yeomanry; and Captain Payne, of the 2nd Warwickshire Militia. Before quitting the park, his lordship expressed his gratification at the manner in which the corps had gone through the various evolutions. The companies were then re-formed and marched back to Bingley Hall, where Lieut.-Colonel Sanders formally took leave of the corps, with which he has been connected from its formation, the duties of this gallant officer in connection with his regiment calling him back to India. Major Mason, in the name of the Volunteers, then presented Lieut.-Colonel Sanders with a handsome breech-loading rifle, in acknowledgment of their appreciation of his great services in bringing the corps to its present state of efficiency.

STRATFORD-ON-AVON.—The 7th company of the Warwickshire Rifle Volunteers were presented, on Tuesday last, by the ladies of Stratford-on-Avon and its neighbourhood, with a silver bugle. The presentation took place in the beautiful grounds of Mark Philips, at Welcombe. There was a large number of spectators, amongst whom were many of the noblemen and gentlemen of the neighbourhood. A large number of invited guests, together with the Volunteers, partook of an elegant cold collation, which had been provided in a spacious marquee, erected for the purpose. The Hon. Colonel Scott, at the close of the proceedings, addressed the Volunteers, and testified to their great progress in drill, and the soldier-like way with which they had marched upon the ground. He said that, should an invasion take place, which seemed just now to be so much feared (he meant, if possible), that the Warwickshire Volunteers should be the first to respond to the call of their country.

WILTS.

On Wednesday last the handsome silver prize goblet, presented by Sir Alexander Malet, Bart., Her Britannic Majesty's Envoy at Frankfort-on-the-Maine, as a challenge cup, was shot for by the members of the Salisbury or 1st Wiltshire Rifle Corps, on the practice-ground at Laverstock, near that city. The contest excited an unusual amount of interest, and drew together a very large assemblage of the residents in the city and neighbourhood. Through the liberality of the mayor of Salisbury, Mr. William Woodlands, two other prizes were provided for the 2nd and 3rd best shots of the 1st and 2d classes—namely, a silver tankard, with handle and cover, and a silver pint cup with gold inside, both of exquisite workmanship and exceedingly beautiful. The members of the corps mustered on parade at the market-house at half-past 6 A.M., and thence marched to Laverstock, where the firing commenced at 8. Sir A. Malet was present, and fired the first shot of each round. The distances were 300 yards standing, and 500 and 600 kneeling, the men firing five rounds at each distance. At the termination of the shooting, which lasted until the evening, the following were announced to be the principal scores:—Mr. John Butler, 18 points; Mr. Henry Wilton, 13; Lieut. Pinckney, 12; and Mr. Cox (corporal), 12. The latter tw being ties, shot off at 600 yards, and the result was in favour of the lieutenant whose last shot hit the very centre of the bull's-eye.

YORKSHIRE.

THE 3RD WEST RIDING OF YORKSHIRE (BRADFORD) RIFLE VOLUNTEERS, consisting of five companies, commanded by Major S. C. Lister, with the Eccleshill subdivision attached, were inspected on the parade-ground at the Bradford barracks last Saturday afternoon by Colonel M'Murdo, the Inspector-General. There was a full muster of effective members of the corps, which is composed of a very intelligent and fine body of young men, and they executed the manœuvres through which they were put so as to earn the approbation of the gallant inspecting-officer.

In this great county events are constantly taking place, fully calculated to keep alive the great interest already awakened as to the importance of this popular movement. In York several energetic gentlemen have placed their hands deeply in their pockets, for the purpose of furnishing clothing and accoutrements for a great number of men. The consequence is that the local corps has received an addition to its strength of some 50 or 60 recruits; and the two companies being above the maximum strength, a third company has been formed, whose officers it was proposed to select yesterday (Friday) evening. At Leeds a special general meeting of the corps was held in the Coloured Cloth Hall Yard, on Saturday afternoon last to nominate officers for the Monk Bridge Company. Mr. F. W. Kitson as captain, and Mr. Talbot as lieutenant, were proposed and unanimously selected by the meeting. It was also announced that Lieutenant Cousins, of the third company had succeeded in raising, amongst a few gentlemen, the money to buy five rifles, of the value of 7*l.* each, as prizes to be shot for by the regiment. In Barnsley and district great efforts are being made, and in the town alone upwards of 50 persons have enrolled themselves as Volunteers. The Bradford Volunteers, commanded by Major S. C. Lister, were officially inspected by Major Harman, Assistant Inspector-General of Volunteers for the Northern District, on Saturday last. There were upwards of 250 members present, and notwithstanding that a heavy rain fell during the review, the different complicated manœuvres were gone through with such precision as to command the admiration of the inspecting officer.

LAND FOR RIFLE PRACTICE.—The following is the chief clause of the new Act for facilitating the acquisition by Rifle Volunteer corps of grounds for rifle practice:—"Any Rifle Volunteer corps may purchase or acquire by such grants as are hereinafter mentioned any land for rifle practice, and for the erection of butts and other accommodations for the use of the corps when practising with rifles, subject to the following restrictions: That the assent of Her Majesty's principal Secretary of State for the War Department for the time being, hereinafter called the said Principal Secretary, shall be obtained to the purchase of any land under the powers of this Act, or to the grant of any land by any person or body of persons, in pursuance of the powers hereinafter given: that, in addition to such assent, the sanction of Parliament shall be obtained in manner hereinafter mentioned, before it shall be lawful for any Volunteer corps to put in force such provisions of the Acts hereinafter incorporated as relate to the purchase and taking of lands otherwise than by agreement."

VOLUNTEER REVIEW BY THE QUEEN IN HYDE PARK.—On Monday, Mr. R. H. C. Ubsdell, of Portsmouth, had the honour of forwarding his painting of "The Volunteer Review" to Osborne, for the inspection of Her Majesty and His Royal Highness the Prince Consort. The painting was first submitted to His Royal Highness the Commander-in-Chief for approval. His Royal Highness pronounced it perfect, and stated that it met with his entire approbation. The painting is about 4 feet long, and 2½ high, and has been executed from drawings made on the spot.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, JULY 24.

[The following is substituted for the notice which appeared in the *Gazette* of the 13th inst. with reference to the appointment of Adjutant Pennymore:—]

West Middlesex Rifle Volunteer Corps—George Pennymore, Gent., to be Adjutant, from 10th of May, 1860.

6th Aberdeenshire Rifle Volunteer Corps—Samuel Rawson, Esq., to be Adjutant, from 4th of April, 1860.

2nd Battalion of Gloucestershire Rifle Volunteers—John George Don Marshall (late Captain of the 92nd Highlanders), to be Adjutant, from 12th of April, 1860.

1st Battalion Cumberland Rifle Volunteers—Major James Fairtlough, from the Westmoreland Militia, to be Adjutant.

20th Lincolnshire Rifle Volunteers—John Brown, Gent., to be Lieutenant; William Goodson, Gent., to be Ensign.

1st Battalion of Leicestershire Rifle Volunteers—Mansfield Turner, Esq., to be Lieut.-Colonel.

1st Company of Leicestershire Rifle Volunteers—Henry St. John Halford, Esq., to be Captain.

Staffordshire Rifle Volunteer Corps, 33rd Company—Joseph Smith Moseley, Esq., to be Captain; Bernard Gilpin, gent., to be Lieutenant; George Lee, gent., to be Ensign.

Wiltshire Volunteer Rifle Corps, 16th Company—James Edward Goddard Bradford, gent., to be Lieutenant; Edward Robert Ingin, Gent., to be Ensign.

1st Selkirkshire Rifle Volunteers—George Macdougal, Esq., to be Hon. Assistant-Surgeon.

1st Administrative Battalion of Shropshire Rifle Volunteers—Col. the Hon. William Noel Hill, late Colonel 13th Foot, to be Lieut.-Colonel Commandant.

2nd Administrative Battalion of Shropshire Rifle Volunteers—Major Thomas Heaton Lovett, late Major 98th Foot, to be Lieut.-Colonel.

City of Edinburgh Rifle Volunteer Corps—Ensign Robert Michael Ballantyne to be Captain, vice Farquhar Shand, resigned.

Memorandum.—The Christian name of Ensign Crerar, gazetted on on the 6th of July current, is Daniel, and not David.

North Riding of Yorkshire Rifle Volunteers—1st Battalion—The Right Hon. Alan Frederick, Earl Cathcart, to be Lieut.-Colonel.

15th North Riding of Yorkshire Rifle Volunteer Corps.—Richard Bowes, Gent., to be Honorary Assistant-Surgeon.

10th Derbyshire Rifle Volunteers—Edward Millar Wass, Gent., to be Ensign, vice Hubbersty, resigned.

Worcestershire Rifle Volunteers—6th Company—Edward Moore, Esq., to be Hon. Assist.-Surg. 13th Company.—Hilary Hill, Esq., to be Hon. Assist.-Surg. 18th Company.—Samuel Roden, Esq., M.D., to be Hon. Assist.-Surg.

Kent Artillery Volunteers—14th Corps—David Partridge, Gent., to be Captain; First Lieutenant Richard Piper Chaplin to be Captain; First Lieutenant William Andrews Hatton to be Captain, vice Thornton, promoted; Second Lieut. Anthony Blanchard Pike to be Captain; Second Lieut. Edward Montague Browne to be First Lieut., vice Chaplin, promoted; Henry George Balmerino Johnson, Gent., to be First Lieut., vice Hatton, promoted; John Thomas Roper, Gent., to be First Lieut.; Andrew Purvis, Gent., to be First Lieut.; Richard Eddy Chapell, Gent., to be Second Lieut., vice Pike, promoted; George Tomlinson, Gent., to be Second Lieut.; Joseph Prowse, Gent., to be Second Lieut., vice Browne, promoted; Thomas Robert Richardson, Gent., to be Second Lieut.; William Henry Judd, Gent., to be Second Lieut.; Hon. Assist.-Surg. William Woods Harding, to be Hon. Surg.

Kent Rifle Volunteers—33rd Company—The Earl of Brecknock to be Ensign.

Kent Artillery Volunteers—12th Company—The Commission of Second Lieut. Bruce, notice of which appeared in the *Gazette* on the 16th March last, has been cancelled.

6th Company of Cheshire Rifle Volunteers—Honorary Assistant-Surgeon John Davis Weaver to be Assistant-Surgeon.

Memorandum—Her Majesty has been pleased to accept the resignation of the commissions of Ensign Stephen Robinson, of the 12th Company, and of Lieutenant David Reynolds Davies, of the 15th Company of Cheshire Rifle Volunteers.

28th Company of Cheshire Rifle Volunteers—Thomas Byron Hollinworth, Gent., to be Ensign, vice Frodsham, resigned.

9th Lanarkshire Rifle Volunteers—Lieutenant James Syme to be Captain, vice James Robertson, promoted; Ensign Hugh Cowan to be Lieutenant, vice Syme, promoted; William Paul, Gent., to be Ensign, vice Cowan, promoted.

53rd Lanarkshire Rifle Volunteers—Alexander Brown, Gent., to be Ensign, vice William Sellar, resigned.

18th Glamorganshire Rifle Volunteers—The Christian names of Lieutenant Royds, whose commission bears date the 7th July, 1860, are Frederick Charles Alten, and not Frederick Charles Allen, as inserted in the *Gazette* of the 13th instant.

WAR OFFICE, PALL-MALL, JULY 27, 1860.

Kent Rifle Volunteers—25th Company—John Anthony Rucker, Gent., to be Captain, vice Blaxland, resigned.

3rd Denbighshire Rifle Volunteers—Townshend Mainwaring, Esq., M.P., to be Captain; William Cornwallis West, Esq., to be Lieutenant; Thomas Evans, Gent., to be Ensign.

6th Berks Rifle Volunteers—Francis Larken Soames to be Ensign, vice Suckling, resigned.

1st Kirkcudbrightshire Rifle Volunteers—The Reverend John Underwood to be Honorary Chaplain.

5th Kirkcudbrightshire Rifle Volunteers—James Gibson Starke, Gent., to be Ensign.

10th Essex Rifle Volunteers—William Bindon Blood, Esq., to be Ensign, vice Wood, promoted.

Glamorganshire Rifle Volunteers—4th Company—Thomas Aubrey Essery, Esq., to be Honorary Assistant-Surgeon.

2nd Hampshire Artillery Volunteer Corps—Second Lieutenant Edwin Galt to be Captain; Charles Mew Loughton, Gent., to be First Lieutenant; Albert Besant, Gent., to be Second Lieutenant; Mark Edwin Frost, Gent., to be Second Lieutenant, vice Galt, promoted.

16th Hampshire Rifle Volunteer Corps—William Gatty, Esq., to be Ensign; John Kersley Lipscomb, Gent., to be Honorary Assistant-Surgeon.

City of Edinburgh Rifle Volunteer Corps—Charles Henry Farquharson to be Captain; Robert Mossman to be Lieutenant; Henry Flockhart to be Ensign.

4th Cinque Ports Artillery Volunteers—First Lieutenant William Scrivens to be Captain; Second Lieutenant John Gibbs to be First Lieutenant, vice Scrivens, promoted; Edward Hayles, Esq., to be First Lieutenant.

Somerton or 24th Somerset Company of Volunteer Rifle Corps—Francis Henry Dickinson, Esq., to be Captain; George Tuson, Gent., to be Lieutenant; William Fraser, Gent., to be Ensign; Edmund William Valentine, Gent., to be Honorary Assistant-Surgeon.

1st Shropshire Artillery Volunteer Corps—William Field, Esq., to be Captain; Charles Dean, Gent., to be First Lieutenant; Arthur John Peele, Gent., to be Second Lieutenant; Edward Burd, Esq., M.D., to be Honorary Assistant-Surgeon; The Reverend F. W. Kittermaster to be Honorary Chaplain.

9th Shropshire Rifle Volunteers—Her Majesty has been graciously pleased to accept the resignation of the Commissions held by the under-mentioned Officers in this Corps:—Captain William Field, Lieutenant William Patchett, Ensign Arthur John Peele, Honorary Assistant-Surgeon Edward Burd, Honorary Chaplain the Reverend F. W. Kittermaster.

1st Corps of Northumberland Artillery Volunteers—Captain-Commandant Potter to be Major.

Royal Aberdeenshire Highlanders—Ensign Edward William Yeeles to be Lieutenant, vice Hay, resigned.

1st Administrative Battalion of Aberdeenshire Rifle Volunteers—William Templeton, Esq., M.D., to be Surgeon.

3rd Cambridgeshire (University) Rifle Volunteer Corps—The appointment of Ralph Leeson, Esq., as Adjutant, which appeared in the *Gazette* of the 10th July, should have been Ralph Leeson, Esq., late Captain 31st Regiment, to be Adjutant. Date of appointment 17th April, 1860.

6th Cambridgeshire Rifle Volunteers—The appointment of Edward Calthorpe, Esq., to be Captain, which appeared in the *Gazette* of the 13th July, should have been Everard Calthrop, Esq., to be Captain.

HOUSE OF COMMONS.—FRIDAY.

CANTON BOOTY.

Sir Michael Seymour wished to know what was the cause of the delay in the payment of the Canton Booty to the captors.

Lord Clarence Paget said, that the delay was caused by the gallant officer himself, he having sent in an addition to the original list of captors.

INDIAN STORES.

Sir De Lacy Evans asked the Secretary of State for War, whether he had not received from the Secretary of State for India in Council, a letter from the Bombay Government, dated the 25th day of February, 1860, with inclosed letter from the Inspector General of Ordnance in Bombay, dated the 30th day of November, 1859, together with copy of a letter from the Bombay Government, dated the 12th day of March, 1860, with inclosure from the Inspector General, dated the 15th day of December, 1859, all relating to stores sent from this country to India. And, whether there would be any objection to laying copies of this correspondence upon the table of the House, together with copies of any correspondence concerning the recall, by the Council of India, of certain storekeepers recently sent to India by the Secretary of State for War.

Mr. Sidney Herbert said that he was in possession of the correspondence, and would be glad if the gallant officer would move for it, because its production would have the effect of removing much misapprehension at present prevailing respecting the value and amount of the stores. He might add that the transaction in question occurred not only before he entered on his present office, but before a military Secretary of State existed.

COLCHESTER BARRACKS.

Mr. Papillion asked the Secretary of State for War how soon the new barracks at Colchester are likely to be commenced, and within what period he hopes to have them completed; whether he intends to put in order and arm the twenty-one towers between St. Osyth's Point and Aldborough, not one of which is at present armed; and what steps he proposed to take for the purpose of rendering more efficient the armament and defences of that part of the east coast.

Mr. Sidney Herbert replied that the barracks would be commenced during the existing financial year, and he hoped that in about eighteen months they would be in a habitable state. A sum had been taken in the present estimates for the defences of Harwich Harbour; but it could not be supposed that the Government would undertake extensive coast fortifications.

NEW ZEALAND.

Mr. Fortescue stated, in answer to a question from Lord A. Churchill, that it was not intended to reduce the military force at New Zealand.

EUROPEAN FORCES (INDIA) BILL.

The adjourned debate was resumed on the instruction to the committee moved by Sir James Elphinstone, namely, "That the Committee have power to make provision in the Bill for the future regulation, discipline, and patronage of the European Forces serving in India."

After some further discussion, the debate was adjourned to Monday.

RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

NOTICES TO CORRESPONDENTS.

We shall endeavour to answer the questions which our Correspondent "D" puts respecting the Report of the Organisation Committee. The Secretary of State is the responsible officer for everything relating to the Department. The heads of departments will all report to him. The Director of Supplies will be superior to the Commissary-General, the Storekeeper-General, and also the Military Train. The military officer whom it is desired to have in the House of Commons must be chosen from among the Members: Parliament is not likely to accede to any Government employé being made ex officio a Member of the House. We quite concur with our Correspondent as regards the officer in question; and we trust that in the House of Lords the Service may often have the benefit of his enlightened advocacy.

A BLUE JACKET's letter is very long and not very accurately written. He seems to think that no Coast-Guard time is allowed under the new scheme of retirement, and does not seem to be aware that Coast-Guard officers have a horse allowance. His depreciation, also, of the services of his brother officers afloat is in bad taste, and, if published, would only raise a host of correspondents on the other side. We refer him to our leader on the subject.

We regret that we have no room for verses. What persuasive force might be exercised on our columns by a really good poem we are as yet unable to determine.

FACTIS NON VERBIS.—We are afraid the *verba* will not affect the *facta*. The commission of officers will consider all the points referred to in your letter.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, JULY 28, 1860.

With reference to the debate of Wednesday last upon Sir John Pakington's motion, "for a Royal Commission to consider the present system of pay, promotion, and retirement in the Royal Navy," we are obliged to agree with the *Times* that the proposed Commission could have done no good. First, because, as appears from Sir Francis Baring's speech, and is quite notorious, the present unsatisfactory state of the Active List of naval officers is really in great measure traceable to the numerous promotions made after the last great war, the effect of which is now disappearing; and secondly, because, in the words of Lord Clarence Paget, "a Royal Commission would only raise hopes in the Navy that would infallibly be dashed to the ground."

We beg to refer our readers to the articles in this journal of 26th May and of 2nd and 23rd June last, upon the subject of Naval Retirement. In that last number we instituted a comparison between the schemes of the Duke of Somerset and Sir John Pakington, which was greatly to the advantage of the former. But as we find Sir John's supporters still harp upon the counting of mate's time, we must join issue with him plainly on this point, and grapple with the subject more closely. Lord Clarence Paget stated that "a reserved captain, who had served at sea above 20 years, would receive an addition of 6*s.* a day to his half-pay," or 16*s.* 6*d.*, under the Duke's scheme. But that is omitting all his mate's time. Well, then, we beg the profession to observe what Sir John Pakington himself proposed, namely, to give 16*s.* 6*d.* a day only to captains with upwards of 30 years' service, with mate's time included. The relative advantage or disadvantage of the two schemes lies in a narrow compass. No naval officer or civilian (whether Lord or ex-Lord of the Admiralty, or Member of Parliament) can be excused for not understanding it. If mate's time in the Service *averages* upwards of ten years, Sir John Pakington's is the better scheme, but not else. We have invited officers to test the two by their own cases; and we do so again. While we are perfectly aware that cases may be found, in which, during the war, an officer's mate's time might exceed this limit, we are equally certain that this is exceptional, and that upon an average the mate's time of officers eligible to become retired captains is much less. It must also be considered that towards these 20 or 30 years (the maximum service under the two schemes) coast-guard, mail and transport services are allowed to count three years as equal to two, under the Duke's scheme, while under the other these services were only to be reckoned as half time. We really cannot say more upon this point; it is simply impossible not to see that the present new scheme of retirement is, so far, much more liberal than that proposed by the late Board of Admiralty. We contrasted them in a tabular form in the ARMY AND NAVY GAZETTE of 23rd June; from which it will be seen, that while Sir John Pakington only gives retired captains their half-pay, or 10*s.* 6*d.*, till they reach 20 years' service (including mate's time, but counting coast-guard service, &c., as only half time), they get 14*s.* 6*d.* under 20 years' service (excluding mate's time, but counting three years in the coast-guard, &c., as equal to two), and 16*s.* 6*d.* (or the full-pay of a commander) after 20 years, under the new retirement.

When we descend to the retired commanders the relative advantages are even greater. A lieutenant with 15 years' service may now retire at 60 as a commander, with 11*s.* 6*d.* a-day; but in order to obtain 11*s.* by Sir John Pakington's scheme, he must have served 30 years, including his mate's time. Again, we say, there may be exceptional cases:—some lieutenants may have 15 years' service as mates and 15 after promotion, and so reach Sir John Pakington's standard; but we think the great majority would rather come under the Duke's. As for any plan whatever suiting every individual case, the thing is impossible; and we are glad that the Board of Admiralty are now considering what can be done for old Mates who are not yet promoted; and probably they may be able at the same time to modify their scheme, so as to deal advantageously with any exceptional cases of lieutenants and commanders whose service as mates may happen to have been unusually long. They might well make their whole scheme alternative, as regards service, for each rate of retired pay, between their own scheme and Sir John Pakington's: that is to say, a commander might be allowed to retire on the full pay of 16*s.* 6*d.*, with the rank of captain, after 20 years' service, excluding mate's time, or 30 years, including it; and lieutenants, in like manner, on 11*s.* 6*d.*, after 15 years' service, as such, or 30 years, including mate's time.

But the fact is, this is not the part of the Duke of Somerset's scheme that could reasonably be cavilled at. What is felt, but scarcely expressed, save in the bold leaders of the *Times*, is, that something should be done, in a full and comprehensive manner, for the retirement of old Admirals. We confess we do not understand their sensitiveness as to being removed from the Active List. The name of Lord Dundonald was not mentioned in the late debate; but he was so pointedly referred to that everybody knows who was meant. Now, we beg to ask, What difference can it possibly make to that most brave and most noble sailor, whether he is on a Retired, a Reserved, or a nominally "Active List" [*sic*]? We would rather have imagined that after 70, or even 60 years (except in rare cases of unusual vigour), officers would prefer being placed on a different list from more active men, who must be preferred before them and selected for service, whenever danger threatens. But we must pass from this point, to glance at some others brought forward in debate.

Sir John Pakington argued for a Commission, because one sat in 1840, with the Duke of Wellington presiding. This was the worst argument he could have used. What did that Commission do? Nothing; or it probably was the foundation of the various Orders in Council, passed from time to time to clear the Active Lists, of which Sir John complained, as being so inadequate, in the preamble of his scheme of retirement. Then he advocated a Commission because, especially, of what he called "the fact," that "there was hardly a class of officers in the Navy who were not more or less discontented with their position." Lord Clarence Paget called this "a premium on discontent"; and we must say that, considering the high position Sir John Pakington formerly held, and the credit he obtained at the Admiralty, it can scarcely add to his reputation to use such an argument, with the suspicious qualification that "he did not commit himself to the expression of an opinion as to whether all the complaints he had referred to were well-founded or not." We cannot suppose that Sir John, after what he did at the Admiralty, could be capable of trying to make political capital out of a motion to end in nothing. But Cæsar's wife should be above suspicion. No man who has been in office has a right to appeal to his successors, for an inquiry upon grounds which he cannot venture to say he thinks to be well founded. No Government with any self-respect should ever grant a committee or commission of inquiry unless something is really amiss. Sir John says, "If the complaints are not well-founded, they should be sifted and exposed." We say so, too. Let him state his cases—he need not mention names; let him say what he would recommend, and we need not wait for a Royal Commission. All that he does say, however, is that "the mean difference between the full and half-pay of paymasters of the Navy is 13*s.* 11*d.*, while, as regards masters, engineers, and others, it is only about 5*s.*" Well, then, does Sir John propose to raise the half-pay of the paymasters, or to lower their full-pay? Or would he raise the full-pay of the other officers mentioned, or lower their half-pay? He does not say:—"He would not go further into details." Nor does he say how much he would be prepared to add to the Navy Estimates, to better either class of officers.

Then, as to the officer who had held seven commands (lucky fellow!) and expended 4000*l.* in addition to his pay during that time. Each of these commands would on an average last for 3 years, and in 21 years that would be about 200*l.* per annum, in addition to the officer's pay. Well, if a man has a private fortune, does he not often spend, whatever may be his profession, as much as this and more, in addition to what he earns, in the elegancies and luxuries of life? If this gentleman had been in the Army, how much would his steps of promotion have cost him, and what besides would have been his necessarily extra expenditure? But we are met with the cry, Is the Navy then only for rich men? We say, no; but, if poor men enter it, they must suffer the disadvantages of poverty, as in other walks of life; though probably they will experience them in a less degree in the Navy, than in the Army, at the Bar, or in the Church. If this officer, instead of entering a ship as a cadet at 13 or 14, had remained at school till he was 18, and then gone to Oxford or Cambridge, how much of his 4000*l.* would have gone before he had ever earned a single penny? But we have dealt with this question fully in prior numbers; and Lord Clarence Paget says the pay of captains in line-of-battle ships is also to be considered by the Admiralty during the recess.

Sir J. Elphinstone's speech remains to be noticed briefly. He referred to the higher pay of captains in the American Service, compared with those in the British Navy. The senior captain in America had, he said, 1177*l.* per annum. For the honour of the country, and our own noble Naval Service, we beg to observe, that the corresponding officer in the Queen's Service is the "Admiral of the Fleet," with the handsome pay of 6*l.* a-day, or 2190*l.* a-year, and this pay he draws while on shore, which the American captain does not. There are no Admirals in the American Navy. They have five captains of squadrons or "flag officers" employed, whose pay is 4000 dollars, *i.e.*, about 1000*l.* a-year. We have 22 vice- and rear-admirals and commodores afloat, with pay of 1460*l.*, and 1095*l.* per annum, with 1095*l.* added to each for table-money, and two Captains of the Fleet besides, each with 1095*l.* a-year.

These are some of the facts which would come out before a Royal Commission; but they are facts which can be learned at the expense of half-a-crown for a Navy List, or by looking at the Navy Estimates, which are supplied to all Members of Parliament for nothing. We think nothing could be more ill-judged or more cruel to the members of a noble profession, than the granting of a Royal Commission to raise hopes that "would infallibly be dashed to the ground," and which "would only excite expectations of some grand scheme for increased pay that can never be fulfilled."

We are not the worse friends of the naval officer for being frank and plain-spoken in this matter.

We have no political ends to serve; we know something of the battle of life; and we write with a perfect conviction, that we are really forwarding the best interests of a glorious Service by speaking homely and honest truth. We trust all murmurs of discontent will now cease; but if not, we should as soon think of moving for a Royal Commission to inquire into the state of the weather when the farmers growl—as for one because of grumbling in the Navy, which we do "not know to be well founded."

It was suggested to Mr. Sidney Herbert, the other night, that the services in consideration of which colonelcies of regiments are conferred should be set forth in the Parliamentary Estimates, in the same manner as the grounds for giving good-service pensions are stated. Mr. Herbert promised to consider the matter before the next Estimates are prepared; but added that "there was an important distinction between the two cases of good-service pensions and colonelcies of regiments. Good-service pensions had always been given for service before the enemy, but colonelcies were bestowed for length of service, not necessarily before the enemy. If a different rule were adopted, there were excellent officers who in time of peace would be entirely excluded from promotion." We cannot at all agree with the Secretary of State in thinking there is a distinction between the two cases. Formerly it might have existed, when these pensions were given only for "distinguished service." They are now conferred for "distinguished or meritorious services;" and in the list of officers in receipt of them are to be found several who have never seen service in the field, and whose claim to the reward is entirely founded upon careers very meritorious but not distinguished. The colonelcies being sinecure offices, are or ought to be nothing more than the first-class of rewards for good service, and between them and the pensions there is a complete identity. If Parliamentary supervision be considered essential as regards the lesser reward, it surely is not out of place as regards the greater. Nor, looking to some late appointments, do we think it would be without a wholesome influence with respect to the proper bestowal of regiments. We have before expressed our views as to the principle upon which this patronage should be exercised, and we believe these views are adopted by the whole of the working men of the Army, as well as by the public, who take an interest in the good government of the Army. Real seniority and good service in the field ought to give the first claim; but we are afraid the authorities, unless pressure be brought to bear, will continue to sacrifice both to a fictitious seniority on the list, arising from money or luck in very many instances. Upon another ground we should much wish to see the present system altered. Of late it has been customary not to give an officer a regiment because he happened at the time to hold a Staff appointment. Now, it is to be presumed that he gives, in return for his pay as a Staff officer, the value of his time and professional ability to the country; and the pay should be considered simply as the proper remuneration for the work he gives. The regiment, on the other hand, is purely a reward for past service; and if his past service is of a character to entitle him to the reward, his claims should not be postponed because he continues to give value to the country, instead of being in inactivity. We trust to see some reform in the manner of bestowing this important patronage; and a real Military Reformer in Parliament could hardly do better service than by moving for a Select Committee to consider the whole subject next session.

There is no more unhappy man than he who has a grievance. He bores himself; he bores his friends; his continual friction against the irritable surface of authority case-hardens it; his approach freezes the laughing lake into asperate ice. Well founded or ill founded, the grievance is alike a moral nuisance, a thistle in the rose-bed. Why should it be there? It has, it is true, as much right there as any of the dewy, rosy-cheeked official flowers, so far as its natural rights are concerned; but it must expect to be harrowed, and hoed, and grubbed up, and thrown over the wall. There are a batch of them now quite ready for rising in our little garden, some very strong and bristly, others young and meek; but with the least encouragement every plot of ground would be overrun with them. The rays of the solar systems which revolve round Somerset House, Whitehall, and Downing Street must be carefully averted from them, or their growth would overwhelm the departments, already sore distressed by memorials, petitions, claims, correspondence, and applications of all sorts. The journals would share the same fate, if there stood not at the gates Cerberus and Atropos barking and snipping relentlessly. If they close an eye or a scissor-blade for an instant, they are nigh smothered by waves of ink and billows of paper foaming over their heads with mighty force and fury. But class grievances are matters of public import, and must be heard in quarters which are deaf to individual complaints. At this moment there is a question which affects a highly respectable and intelligent body of officers, attached to the Army in a civil rather than in a military capacity. Whether military store-keepers and store-clerks shall receive the honours of a salute, and several more substantial advantages, for which they are now applying to the authorities, is a matter which the War Office and the Horse Guards will have to decide. To the public the matter is of little consequence, except in so far as the conduct of the public service may be affected by the content or discontent of those officers; but to those officers and to the military service the subject under consideration is of considerable interest and importance. The relative rank of these officers is high. They wear, or wore—for it is difficult to understand their exact position—a blue uniform with red facings, not unlike that of the Artillery at a certain distance; the principals rank as lieut.-colonels; one excellent officer of the department has received the C.B. for his meritorious services; certain assistant-store-keepers rank relatively as majors in the Army. But the department is not well organised, nor are its rights and position at all defined as they ought to be: some military store-stations are under the charge of naval officers, others are in the hands of commissariat officers, others are given over to barrack-masters.

Whilst Mr. Secretary Herbert is engaged in considering the whole case stated by these gentlemen, an order comes out to withhold from the uniform of certain officers of the department the military salute which is generally given to officers, or to those who wear officers' uniform, the reason we suppose being that the store-keepers have not got Her Majesty's commission, which they are loudly asking for on the grounds, amongst others, that they are as much entitled to it—if Her Majesty pleases—as the officers of the Commissariat—*Exoritur clamor virorum!* And just at the moment when one would have thought the noise was at its loudest, a barrack-master who had once been in the Line, inflamed by we know not what, flings up his heels in the face of the kindred department, and calls its officers mere *gratte-papiers*, to whom, as ignorant of war as Michael Cassio, it would be absurd to give the salute or uniform, as well as insulting to all the warlike race of barrack-masters, who would thereby be put on a level with men whose sole business it was to count shot and shell, and take care of powder and bullets in a dormant state. The result can only be conceived by those who have seen our table this week. A general conflict on a grand scale, between all the barrack-masters who would marshal themselves "Ex-Linesmen" and the Store-keepers who would fight to the last under their doughty champions, after the fashion of the attack on the "Trois Mousquetaires," is impossible. We regret that we cannot give free scope to the controversy in the place where the occasion of it first made its appearance. Whatever may have been the war services of many of the individual officers of the barrack-masters' department, it is certain that the nature of their charge is not more warlike than that of the officers who have warlike stores under their hands, and who are obliged to accompany regular armies in the field in face of an enemy, as was the case during the Crimean war.

All the accounts we receive from China concur in representing everything as going on as well as possible as regards the British expedition. The whole of the troops had arrived with the exception of the Siege Train, and there was at hand a small Siege Train sufficient to commence with until its arrival. The army was in wonderfully good health, excellent spirits, and from the generals downwards full of mutual confidence. The expedition was about to start for the north, but at the date of our advices there appeared to be considerable doubt as to the French being ready in time. Indeed the accounts we hear on excellent authority of the state of our allies are not calculated to sustain their boasted superiority in organisation. They had no horses for their guns, next to no commissariat, and very few carriage animals for stores, &c. We understand that an offer made by Sir Hope Grant of a number of ponies was at first accepted by General Montauban, but afterwards rejected on the score of their expense, which was no more than that at which they had been supplied to the British Army. Let us hope it will not end in our allies expecting us to supply those deficiencies which it is their pride to say they experience generally to a much less extent than ourselves.

We understand that the number of new regiments of the Line to be added to the Army, in consequence of the extinction of the local European force in India, will be nine altogether, of which, three will be cavalry, and six infantry. In these regiments, promotion will not be regulated by the purchase system in operation in the rest of the Line. It will be more on the old Indian system of pure regimental seniority, tempered however by selection, especially in the higher ranks. We believe it is not at present contemplated to interfere with the organisation of the Bombay and Madras cavalry.

We understand that the order for the return of regiments from India has been countermanded, so far as regards the 1st battalion 5th Fusiliers, 1st battalion 24th, 37th, and 73rd Regiments; and that the usual drafts to reinforce these corps, which had been ordered to await their arrival at home, will now embark for India. We some weeks ago announced that the Indian Government intended to send home a cavalry regiment, either the 3rd Dragoon Guards or Inniskilling Dragoons, from the Bombay Presidency: but it is now very doubtful whether that intention will be carried out. As many of our correspondents are anxious upon the subject, we may add that it is not at all likely that any other cavalry regiment will return from India for some time.

The Government scheme for giving effect to the recommendations of the Commissioners on National Defences, although likely to be violently opposed by some sections of the House, may be considered as certain to be carried. Mr. Bright is to lead the Opposition, on the ground that we have already expended over 33,000,000*l.* on naval and military objects this year, while Mr. Lindsay is to move as an amendment:—"That as the main defence of Great Britain against aggression depends on an efficient Navy, it is not expedient to enter into a large expenditure on permanent land fortifications."

By the death of Lieut.-General Wemyss, the following promotions will take place. Major-General H. Colville, formerly of the Scots Fusilier Guards, to be Lieut.-General; Colonel G. Congreve, C.B., late 29th Regiment, Quartermaster-General in India, to be Major-General; Lieut.-Colonel C. C. Deacon, C.B., 61st Regiment, to be Colonel; and Major A. C. Anderson, Fort Major at Edinburgh, to be Lieut.-Colonel in the Army. The promotion of Lieut.-Colonel Deacon to the rank of Colonel is overdue, he having commanded a regiment for five years on the 11th of May last. Lieut.-Colonel Kelly of the 47th, and Lieut.-Colonel Holcombe, 1st Royals, are in the same position; and in all likelihood, therefore, Lieut.-Colonel A. J. Herbert, formerly of the 23rd Fusiliers, and now on the Staff at Corfu, will be promoted in consequence of the present vacancies, the commissions of Colonels Deacon, Kelly, and Holcombe, being ante-dated to the periods at which they respectively completed their five years' command as Lieut.-Colonels.

No appointment has yet been made to the Colonelcy of the Scots Greys, vacant by the death of Lord Sandys, and that of the 17th Regiment, since become vacant, is also unfilled. According to the ordinary routine Sir Richard Airey would stand next on the list for the infantry regiment; but his holding a Staff appointment may cause the postponement of his claims until his time as quartermaster-general is up, which will be in December next.

The late Major-General Mundy will be succeeded as Lieutenant-Governor of Jersey by Major-General R. P. Douglas, and the office of Inspector-General of Militia is thereby rendered vacant.

It will be noticed by our readers that Colonel Sterling, Lord Clyde's Military Secretary during a portion of the late operations in India, has been made a K.C.B., and is now Sir Anthony Sterling. His services fairly entitle him to this step from the third to the second class of the Bath.

We learn that it is not unlikely the Admiralty will so far yield as to make some allowance for time served as mate in the instance of each officer whose case comes within the range of the retirement scheme. We trust the allowance will be as liberal as it ought to be; but from what we hear we are not inclined to be very hopeful in this respect. It is probable that the first two years' service as mate will not count at all, but that an allowance will be made for every three years' service in the rank.

The following ships of the Channel squadron under the command of Vice-Admiral Sir Charles Fremantle, K.C.B., have left Bantry Bay for Holyhead:—Royal Albert, flag-ship, Donegal, Aboukir, Conqueror, and Centurion, where they will remain until fresh orders are issued from the Admiralty; and Rear-Admiral Erskine has proceeded to Queenstown with the Edgar, flag-ship, Trafalgar, Algiers, Mars, Diadem, and Mersey, where he will wait for directions to rejoin the Commander-in-Chief.

The return of target practice of the Aldershot division shows that the following average points were gained by the respective corps named in June last, viz.:—

55th Reg.	17·71	Royal Engineers ...	15·30
1st batt. 16th Reg ...	17·52	2nd batt. 17th Reg.	15·21
58th Reg.	16·76	2nd batt. 21st Reg...	14·84
45th Reg.	16·75	1st Rifle Brigade ...	14·45
1st batt. Cold. Gds.	16·72	Sussex Militia... ...	14·36
2nd batt. 19th Reg.	16·46	86th Reg.	14·21
2nd batt. 18th Reg.	16·20	2nd batt. 25th Reg...	13·66
2nd batt. 12th Reg.	15·66	41st Reg.	11·28

The percentage of marksmen in the 55th was 13; the 2nd battalion 19th, 10; the 2nd batt. 21st, 9; the 1st batt. Coldstream Guards, 8; and the other regiments in smaller proportions.

THE ORGANISATION OF THE ARMY.

The Select Committee appointed to inquire into the effects of the alterations in military organisation, regarding the War Office and Board of Ordnance, which were made in the year 1855, and also to inquire whether any changes are required to secure the utmost efficiency and economy in the administration of military affairs, have considered the matters to them referred, and have agreed to the following report:—

"Your Committee, and a former Committee, have prosecuted their inquiries, at broken intervals, in the last and in the present Parliament; but their attention has been concentrated on the union of the several war departments under the Secretary of State for War, and on the effects of this union, as now existing, on the military and civil administration of the Army.

"The first matter which arrested their notice was the patent under which the Secretary of State for War holds his appointment.

"On the 12th of June, 1854, Her Majesty in Council appointed a fourth Secretary of State, and divided the War from the Colonial Department.

"In December of that year the Commissariat was removed from the control of the Treasury, and was placed under the direction of the War Department.

"On the 6th of June, 1855, Her Majesty was pleased to revoke the letters patent constituting the Master-General and the Board of Ordnance, and to transfer to the Secretary of State for War the functions appertaining to the offices of the Ordnance.

"The Secretaryship at War was also consolidated with the Secretaryship of State for War, under a double commission; and a new patent was issued, bearing date 18th of May, 1855, committing to the Secretary of State for War the administration and government of the Army and Ordnance in the following terms:—

"'By these presents we do give and grant unto the said Baron Panmure, that from henceforth the administration and government of our Army and land forces of every kind, denomination, and description whatsoever, and also our ordnance, ammunition, arms, armouries, and other stores and provisions, and habiliments of war within our United Kingdom, shall be and the same are hereby wholly committed to and vested in, and shall from henceforth be exercised and exercisable by him the said Baron Panmure.'

"This, the supplementary patent, was revocable at pleasure, and contained a reservation of powers in the following terms:—

"'Excepting always so far as relates to and concerns the military command and discipline of our Army and land forces, as likewise to the appointments to and promotions in the same, and so far as by our Royal Commission the military command and discipline thereof shall have been, or shall from time to time be committed to, vested in, or regulated by our Commander-in-Chief of our forces, or our general commanding our forces in chief for the time being.'

"On the 14th of August, 1855, an Act received the Royal assent, vesting all the estates and powers of the Board of Ordnance in the Secretary of State for the War Department; but previously, *on the 23rd of May, 1855*, Lord Panmure, then Secretary of State for War, conveyed to Viscount Hardinge, then commanding-in-chief, Her Majesty's pleasure, 'that he (Lord Hardinge) should forthwith assume the command of the Royal Artillery and Royal Engineers, and in all respects conduct the military duties of these corps.'

"Lord Panmure adds,—'Should your Lordship desire a letter of service, in addition to this intimation of Her Majesty's pleasure, I will transmit it immediately.'

"It is observable that the notification of Her Majesty's will and pleasure as to the transfer of the military command of the Artillery and Engineers to the Commander-in-Chief was made by the Secretary of State for War, and a letter of service was at the same time offered to Lord Hardinge by the Secretary of State.

"The Duke of Wellington, when Commander-in-Chief, held his office by patent. The patent, duly attested by the Secretary of State, was during pleasure; the terms are general. The powers are confined to the United Kingdom. A copy is added to the Appendix.

"His Royal Highness the Duke of Cambridge is not Commander-in-Chief, he is General Commanding the Forces; he is not appointed by patent; he holds his present position under a letter from the Secretary of State for War, who on the 18th of July, 1856, notified to him Her Majesty's pleasure 'that His Royal Highness, being appointed to serve as a General, do obey such orders as he shall receive from Her Majesty, the Commander-in-Chief, or any other His Royal Highness's superior officer.'

"Since Lord Panmure ceased to hold the office of Secretary of State for War, two successors have been appointed, General Peel in 1858, and Mr. Herbert in 1859.

"In Lord Panmure's supplementary patent there were two reservations:—1. 'So far as relates to the military command and discipline of the Army'; 2. 'As likewise to the appointments and promotions in the same.'

"In General Peel's supplementary patent the first reservation only was inserted. The omission of the second reservation is explained in a letter of the 26th of May, 1859, signed by Sir Fitzroy Kelly and Sir Hugh Cairns, who were then the Queen's Attorney- and Solicitor-General.

"It appears that in the draught of Lord Panmure's supplementary patent, as settled by the former law officers, the first reservation relating to 'military command and discipline' was alone specified; the second, 'as likewise to the appointments and promotions in the same,' was inserted in red ink, in the handwriting of Sir Alexander Cockburn, then the Attorney-General; and this final alteration of the original draught was accidentally overlooked when General Peel's supplementary patent was prepared; and he held his office under the single limitation. Before he retired, the omission was discovered, and was about to be rectified; but the new supplementary patent had not been issued when Mr. Herbert was appointed his successor; and Mr. Herbert's supplementary patent is identical with Lord Panmure's, and contains the double limitation.

"Your Committee have gone at large into this question, because it lies at the root of the respective powers and relative position of the Commander-in-Chief and of the Secretary of State for War.

"The Secretaries of State hold their seals by patent, during the pleasure of the Crown. They exercise their powers interchangeably, although, for convenience, particular departments are assigned to each of them. They are the channels which convey the Royal pleasure throughout the body politic, both at home and abroad. The countersignature of one of them is necessary to give effect to the sign manual. Every commission in the Army is so countersigned. The patronage of the Crown, both in Church and State, is administered under this safeguard. To every public document signed by the Sovereign the signature of a Secretary of State is appended; and thus, while the Sovereign can do no wrong, the responsible adviser of every act is ascertained; and the Minister must answer for what the Crown has done.

"Heretofore there has been no limitation in the patent to the powers of a Secretary of State; he is removable at pleasure; but while he holds the seals of his office he is responsible for the acts of his Sovereign and administers the Royal authority and prerogative, which are delegated to him without reserve.

"It must be remembered, also, that each Secretary of State receives the seals of office from the hand of the Sovereign in council; when he surrenders office he gives back the seals; but while he holds them, even before the issue of his patent, he is in the enjoyment and full exercise of all his powers. It would appear, therefore, that the tenure of his office is by seals rather than by patent.

"This view is confirmed by the fact that the patents appointing Secretaries of State have uniformly been couched in general terms, simply nominating them to the office without limitation of powers. Such were the patents of the Secretary for War and Colonies before the division in 1854. Such is the patent of the Home Secretary now, and such also are the original patents of the Secretaries of State for War, including Lord Panmure, General Peel, and Mr. Herbert. But on the addition of the Board of Ordnance, in 1855, separate and supplementary patents were granted to them; and these patents, contain, for the first time, the special reservations which have been specified above.

"It may be questioned whether these supplementary patents are at all needed. They only indicate the pleasure of the Crown under seal, which, notwithstanding the patent, may always be conveyed in the ordinary manner through the Secretary of State; and they do not absolve the Secretary of State from his constitutional responsibility in regard to all matters where he is the Minister by whom and through whom the commands of the Queen are received and given. Your Committee will now proceed to the practical working of the present system, more especially with regard to the relative position and power of the Commander-in-Chief and of the Secretary of State for War. His Royal Highness the Duke of Cambridge was graciously pleased to attend your Committee, and gave his evidence with perfect frankness, and in the clearest manner. Lord Panmure, General Peel, and Mr. Herbert have also been examined; and on the testimony of these authorities, the highest and the best, a judgment must be formed on the question whether the Commander-in-Chief be sufficiently under the control of the Secretary of State for War.

"*Notwithstanding* the reservations in the patent, His Royal Highness admits that with respect to commands in chief, whether at home or abroad, with respect to the giving away of regiments, and with respect to promotions, the consent of the Secretary of State for War is invariably obtained before appointments of this description are submitted to Her Majesty.

"These matters are generally adjusted by personal communication between His Royal Highness and the Secretary of State; but if a difference of opinion should arise, which has not yet occurred, His Royal Highness declares that the decision must rest with the Secretary of State; 'because in the constitutional form the Secretary of State would advise Her Majesty to take his opinion, and not that of the Commander-in-Chief; and thus the matter must finally come to the decision of the Secretary of State, who is the responsible minister.'

"Again, with regard to the movement and distribution of the forces, both at home and abroad, His Royal Highness says that the Secretary of State is cognisant of every movement; that a schedule is sent to him, containing the scheme of new distributions; that he approves it or not, as he may think fit; and that the movements take place under his previous sanction.

"The reservations in the patent would seem to be inoperative. They have not introduced any change in the practical working of the system. There is nothing new in the control possessed by the civil authorities. Before the union of these various powers in the hands of the Secretary of State for War, they were confided to the Secretary of State for War and Colonies, to the Secretary of State for the Home Department, and to the Secretary at War. Heretofore these controlling powers were distributed; now they are united; and such was the stringent exercise of them, wherever expenditure was concerned, that in 1836 the Duke of Wellington declared, before the Commission on the Civil Departments of the Army, 'The Commander-in-Chief cannot at this moment move a corporal's guard from London to Windsor without going to the civil department for authority. He must get a route.'

"There are, however, two mattters of great importance contained in these reservations over and above the points already adverted to—namely, the discipline of the Army and the appointments to first commissions. They have been fully investigated by your Committee, and they require separate consideration.

"First, with respect to discipline, and usage concerning it, before the issue of the supplementary patent.

"Earl Grey deposes that while he was Secretary at War, from April, 1835, to August, 1839, he held himself to a great degree responsible for the exercise or for the abuse of the power of corporal punishment in the Army. In that period a question arose as to the Household Brigade in London wearing their side-arms. It was a matter immediately connected with discipline; but through the Secretary at War, Lord Hill, then Commander of the Forces, sought the decision of the Cabinet; and Earl Grey himself draughted the order that was adopted and issued by Lord Hill in conformity with their decision. At the same time it must be remarked that this question respecting side-arms affected public policy, and was not exclusively of a military character.

"Earl Grey further states that there were many questions immediately connected with discipline while he was Secretary at War, concerning which the authorities at the Horse Guards came to the War Office for advice and assistance. At a later period, when Earl Grey was Secretary of State for War and Colonies, and when the Duke of Wellington was Commander-in-Chief, his Lordship says that he was in constant communication with his Grace, and that 'over and over again' the duke held this language, 'I think such a thing should be done; the Government must decide; the Government are responsible; they must signify to me Her Majesty's pleasure, and whatever they order shall be done.'

"Lord Panmure, who had been Secretary at War, does not think that matters directly affecting the discipline of the Army could, under the old *régime*, have been forced by the Secretary at War on the Commander-in-Chief against his will; but he adds, 'Though the Secretary at War had no power, the Secretary of State for War and Colonies might have done it if he had chosen. The authority of the Secretary of State, I apprehend, is paramount at all times.'

"Mr. Herbert also was Secretary at War in 1845 and 1846, and from the end of 1852 to the beginning of 1854. The Duke of Wellington was Commander-in-Chief during the whole of the first period; Lord Hardinge was Commander of the Forces during the latter. When questions were pending in Parliament, such as corporal punishment, wearing of side-arms, and cases in which the military might come into collision with the population, the Secretary at War conferred with the Commander-in-Chief respecting them; and the arrangement of these matters, although affecting discipline, was concerted between him and the Duke of Wellington, or Lord Hardinge. It appears also that the good-conduct warrant, which Lord Grey had originated, was altered by Mr. Herbert, and adopted at his suggestion by the Duke of Wellington. Regimental schools were improved, and a central training school was established by Mr. Herbert when Secretary at War. The Duke of Wellington did not object to these suggestions, which touched discipline, as an excess of authority, or of interference on the part of the Secretary at War.

"Thus much on the head of interference with discipline by civil authorities before the existence of the new patent in 1855.

"It remains to be seen what has been the practice in this respect under the patent on the part of the Secretary of State for War.

"Lord Panmure was asked whether the Commander-in-Chief would resist the interference of the Secretary of State in any question of military discipline. His lordship answered that no such difference ever existed between himself and the Commander-in-Chief, and he did not think that any Secretary of State for War would interfere gratuitously with the discipline of the Army as exercised by the Commander-in-Chief; but he added that 'if there were anything in the conduct of the Commander-in-Chief which required the interference of the Secretary of State, the Secretary of State has not only *the right, but it is his* bounden duty to interfere. It was his business to trust to the Commander-in-Chief the administration of the discipline of the Army, and, except under very peculiar circumstances, not to interfere with that at all. And again, 'the Secretary for War, and through him, the Executive Government of the day, is responsible for all the acts of the Commander-in-Chief; but that the Government and the Secretary of State, putting confidence in the Commander-in-Chief, trust to him entirely, and without interference with the discipline of the Army.'

"General Peel also states that the Secretary of State for War is the person who must answer in the House of Commons any question which is put with regard to discipline; and in another part of his evidence he declares that he considers 'the responsibility of the Secretary of State only equalled by his power.'

"Mr. Herbert is of opinion that the reservation in his patent is effective to a great extent, as regards discipline, yet he says that he does interfere notwithstanding the reservation in the patent. But he does not complain of this reservation, because he thinks that the discipline of the Army depends on its being in the hands of a military man, to whom the country looks up, and because 'the civil officer does not interfere in matters not of a political nature, or in matters which do not imply some collision between the military and civil population.'

"Mr. Herbert, however, in another portion of his evidence, mentions a fact which is worthy of notice. In the course of a conversation which passed between the Commander-in-Chief and Mr. Herbert, on the subject of corporal punishment in the army, Mr. Herbert suggested that the plan of classification should be adopted. The Duke of Cambridge asked Mr. Herbert to put his ideas on paper, which Mr. Herbert did. The Duke sent the draught of a General Order in consequence, which did not fully carry out Mr. Herbert's suggestion. Mr. Herbert made certain alterations in it, which, after some communication, the Duke adopted, and His Royal Highness issued the order.

"Mr. Herbert says:—'This is exactly a case in which there must practically be a considerable departure from the reservation in the patent.' 'It was an important public question, and the Commander-in-Chief was anxious to have my assistance in carrying the proposed change into effect.' Mr. Herbert further declares his belief that His Royal Highness was glad to have a member of the Cabinet in the House of Commons responsible for the General Order; and he subsequently states:—'The ordinary discipline of the army ought, in my opinion, to be in the hands of military officers, and not civilians; but in cases which become public questions, the Commander-in-Chief will always be glad to have the assistance of the Secretary of State.'

"It would seem, therefore, that the reservation in the supplementary patent has not barred the constitutional control of the Secretary of State with respect even to the discipline of the Army.

"Your Committee will now turn to the second reservation in the patent, respecting 'appointments' in the Army.

"The question at issue on this head has reference principally to first appointments, that is to say, to first commissions in the cavalry and infantry, which constitute the patronage of the Commander-in-Chief. The first appoint-

Digitized by Google

ments in the Artillery and Engineers are open to competition on fixed rules; and the candidates who succeed undergo the test of a severe examination. But the first appointments in the cavalry and in the line, either by purchase or by gift, are at the disposal of the Commander-in-Chief, who has the sole power of nomination. The qualifications of the candidates are approved by the Secretary of State, and are tested by an examination before admission into the Army, whether they pass through the Military College at Sandhurst or not.

"The extent of this patronage is very great. The appointments to first commissions, from the 1st of January, 1853, to the 30th of June, 1859, were 3558 in number. Of these 1996 were by purchase, and 2825 were given away, Previous to the late war the commissions given away averaged about 60 a year, and there was one year, at the end of the war, in which there were only three. In this return first commissions in the cavalry are not distinguished from first commissions in the infantry. A cavalry commission was at the time more valuable than an infantry commission. The regulation price of an ensigncy is 450*l*. Assuming, therefore, that the 2825 commissions given away in six years and a-half were all ensigncies only, their money value amounts to the sum of 1,271,250*l*., if sold at the regulation price. But 1854 and 1855 were years of war, and a large proportion of the commissions given away may be ascribed to the necessary and sudden augmentation of the Army in that emergency; 1857-8, however, was the year of mutiny in India; in consequence of the raising of second battalions to meet the demands for reinforcements to India, 686 first commissions were given away in the course of that year by the Commander-in-Chief, the money value of which, assuming them to have been ensigncies only, is 308,700*l*.

"This is a large amount of patronage. The Duke of Cambridge says that it is exercised 'on principles which rest in the breast of the Commander-in-Chief for the time being;' but he adds 'that Commissions are only given away to such persons as are supposed to have—and I think it will be found in every case that they have—some claim upon the country.'

"His Royal Highness then enumerates various claims of young men from Sandhurst, of non-commissioned officers rising by merit from the ranks, of the sons of officers who have served with distinction in the Army, and of the relatives of those who have been killed in the service.

"It would seem in the first instance that this exercise of patronage at the Horse Guards is not interfered with by the Secretary of State. There is indeed a list of these first appointments sent to the Secretary of State before the names are submitted to Her Majesty for approval. Sir Edward Lugard, the Secretary for Military Correspondence in the War Department, and the immediate channel of written communications with the Horse Guards, gives a full account of this list, and of the manner in which it is treated by the Secretary of State.

"The form is this:—'The submission' paper to Her Majesty is always sent for the concurrence or the approval of the Secretary of State before it is laid before Her Majesty.' It is a list of names only, and the reasons for selection are not assigned. When Her Majesty has approved the list, the sign-manual is countersigned by the Secretary of State, and the appointment takes effect when it is published in the *War Office Gazette*, and it cannot be so gazetted without the concurrence of the Secretary of State.

"Sir Edward Lugard holds that the Secretary of State is thus rendered responsible even for first appointments, although the reasons for preference are not laid before him. He deprecates interference on the part of the Secretary of State, and wishes still to leave to the Commander-in-Chief the power of recommending for first appointments; but he says that there are several instances in which the submission paper has been altered. He mentions a case, in which a first appointment had been recommended by the Commander-in-Chief, and had received the approval of the Secretary of State. His Royal Highness, on discovering that a fraud had been practised on him, at once came to the Secretary of State, and brought the whole of the documents connected with the transaction; thereby proving, as Sir Edward Lugard infers, that His Royal Highness held himself responsible to the Secretary of State.

"Sir Edward Lugard goes further, and says, that if the facts attending the gift of the commission in question had been known to him when the name appeared in the submission paper, it would have been returned to the Commander-in-Chief, with the grounds of the objection; for with respect even to first commissions the Secretrry of State has supreme power; the submission paper comes from the Horse Guards, with a memorandum, asking for the approval of the Secretary of State; in his opinion the responsibility, even for first appointments, rests with the Secretary of State, and his interposition is supreme now.

"Sir Edward Lugard, having stated that it would be his duty to bring before the Secretary of State any recommendation for a first appointment which he thought objectionable, is pressed by the question whether the first appointment would not, in that instance, be controlled by the Secretary of State; and whether the interference in exceptional cases, for which he contends, is not at variance with the reservation in the patent. He says that, to this limited extent, he wishes the control to be left to the Secretary of State, and that, according to the usage of the War Office, the patent is no impediment; and states that upon the whole the line of demarcation at present existing between the two offices, as regards first appointments, is satisfactory, and works well for the public service.

"Mr. Herbert states that the Secretary of State has no voice in the selection for first commissions; that this branch of patronage at the Horse Guards is unchecked by the Secretary of State, that he has no means of forming a judgment on the subject; that the grounds of preference are not stated in the list, and that 'the Secretary of State does not pretend to exercise any control over selections made for first appointments.'

"But Mr. Herbert admits that it is the duty of Sir Edward Lugard to bring under the notice of the Secretary of State any objections which occur to him on examining the submission list; and if grave, the Secretary of State would point them out to the Commander-in-Chief.

"General Peel differs from Sir Edward Lugard with respect to the circumstances which brought the Commander-in-Chief to the War Department, when His Royal Highness discovered the deception which had been practised on him with respect to a first commission improperly obtained.

"General Peel says that His Royal Highness applied to the Secretary of State for the purpose of instituting prosecutions, which would entail expense. He adds, however, that if the circumstances of this case had come to his knowledge before the submission paper had been laid before Her Majesty, he should have communicated with the Commander-in-Chief, and have pointed out the reasons why the name ought to be withdrawn. He considers such interference not at variance with the reservation respecting first appointments.

"Mr. Herbert, when Secretary at War, with the entire concurrence of Lord Hardinge, introduced the sale of 100 first commissions, and the proceeds were carried to the 'Reserve Fund.'

"In 1858, none but ordinary sales of commissions were made. General Peel objects to extraordinary sales on principle, and thinks 'that in time of peace the number of commissions without purchase would be hardly sufficient to supply the persons who are entitled to commissions without purchase.' His Royal Highness the Duke of Cambridge also declares that he has the strongest opinion against the sale of first commissions, as adopted by Lord Hardinge and Mr. Herbert. 'The commission itself,' he says, 'is worth nothing.'

"Sir Edward Lugard, on the other hand, sees no objection whatever, quite the contrary, to the prevalence of sale, as a general rule, in circumstances such as those which led Lord Hardinge and Mr. Herbert to sell 100 first commissions in 1854.

"It has been already mentioned that the produce of these sales was applied to the 'Reserved Fund.' This fund is always fluctuating, and is under the sole control of the Secretary of State for War. It is used by him for the purpose of diminishing the dead weight of the Half-pay List, and is now employed in aid of the reduction of the cost of cavalry commissions. Every officer of cavalry who sells out receives from this fund the difference between the old and new price of his commission. The sum still in hand and available amounts to 160,000*l*. It is, moreover, constantly replenished by the difference on the sale of the commission between the less value, on account of short service, and the regulated price, which sum, with the cognisance of the Commander-in-Chief, is carried to the credit of the 'Reserved Fund.' But His Royal Highness has no voice in the disposal of the fund, though under the direction of the Secretary of State he has issued a public order notifying the new arrangement to which it is now applied.

"The Secretary of State contends that in practice this fund is of eminent advantage both to the Army and to the public. He argues that it stimulates promotion, and relieves the dead weight without any charge to the public. He admits, however, that Parliament, in the strict sense, is not cognisant of the existence of this fund; it is not voted; no account is rendered; no constitutional checks are imposed; the Secretary of State may apply it to any purpose he thinks fit: and Mr. Herbert says, 'that in principle there is no doubt the existence of this fund is wrong.'

"Your committee have endeavoured to discharge their duty by calling the attention of the House of Commons especially to this subject. It will be for the House to determine whether a large sum of money, raised by the sale of commissions, shall be applied even to useful purposes at the present moment, without Parliamentary sanction or direct Parliamentary knowledge.

"If this 'Reserved Fund' be permitted to continue for the sake of the useful purposes to which it may be applied, at least an account of the receipt and expenditure should be laid before Parliament every year, when the Army Estimates are presented; and this account should be submitted year by year to an independent official audit.

"For the purpose of obviating objections as to the large amount of patronage at the Horse Guards, and the number of first commissions given away, the Commander-in-Chief opened a plan, whereby henceforth there should be only one entrance into the Army, and that through the medium of a military college. His Royal Highness is of opinion 'that this would be the most desirable thing which could be introduced into the Service.' He gave the outline of a plan in great detail, which will be best explained by reference to the evidence and to the questions and answers specified in the margin. Mr. Herbert, who heard that evidence, and who took part in the examination of His Royal Highness, declared that, in his opinion, the advice given by the Duke of Cambridge was sound; that if it were adopted the whole dispute as to first commissions would be entirely at an end, and that one entrance into the Army, through the door of a military college, would terminate the controversy respecting patronage.

"He stated, further, that he had himself made the same proposal some years ago in the House of Commons; that he had a plan now before him submitted by the Council of Education; that, with the Commander-in-Chief, he was now considering it; and that, in the event of the fusion of the European Indian Army with the Queen's Army, many difficulties with respect to the enlargement of the patronage at the Horse Guards would be removed by the establishment of this military college.

"The plan being thus avowedly incomplete, and the details not yet being matured, your Committee do not think it expedient to pronounce a decided opinion on the subject; but the measure proposed is well worthy of the most careful consideration.

"The recruiting of the Army, which involves the expenditure of public money, has always been controlled by either the Secretary at War or by the Secretary of State. In 1857 three battalions of infantry were raised by one brevet-lieut.-colonel, who was brought back to full pay, by a lieut.-colonel who had sold out, and by a major who had also sold out; and by a return presented to the House of Commons it appears that each man in these three battalions was raised at a cost of more than 10*l*. per man, when the rate of bounty and kit in the open market was not more than 6*l*.; and the whole transaction appears to your Committee to have been irregular.

"Again, in the same year, a Canadian battalion was raised in Canada, composed of 197 English, 93 Scotch, and 307 Irish; and out of 865 rank and file, only 268 were Canadians. The cost of raising these men, and of bringing them, their wives and children, together with their officers, across the Atlantic to England, amounted to a charge of more than 15*l*. per man.

"Your Committee cite these instances as proofs that the best economy is not always exercised in the recruiting of the Army. At the same time it should be borne in mind that these regiments, raised under such exceptional circumstances, were raised at a moment of great emergency, and were of essential use in our garrisons abroad, when it would have been difficult to supply other troops for the Service; and in the case of the Canadian regiment, the determination to raise it rested on grounds of public policy.

"The strength of the Queen's Army, exclusive of Militia, both embodied and disembodied, is now about 230,000 men. With reference to recruiting, there must be added 16,000 Marines and the European Indian Army of 15,000.

"This is the peace establishment, and to maintain it, at least 10 per cent. of the whole force must be recruited annually to the extent of 26,000 men. Mr. Herbert expresses a confident belief that this number can be rated year by year by volunteering. The force of the Militia at this moment is 70,000 men, their quota being 120,000; and ballot has fallen into desuetude. In the event of war the Queen's army, the Marines, and the Militia must be largely and suddenly augmented. This subject has been submitted to the consideration of a Royal Commission; publicity has not yet been given to their Report. It is a grave question whether reliance can be safely placed in such an emergency, however large may be the bounty, on voluntary enlistment only. If volunteering failed, the danger to the State would be imminent; but the existing legal machinery for bringing ballot into operation is cumbrous in the extreme; and if in peace no provision be made for such an extremity, much precious time would be lost at the critical juncture, and the danger might be great.

"The transfer of the military command of the Artillery to the Horse Guards on the whole has worked well. Sir James Kempt, Sir Hussey Vivian, and Sir John Burgoyne before the Commission in 1837 protested strongly against placing the Engineers under the Horse Guards. Sir James Kempt's expressions were:—'The military and civil duties of the Ordnance corps, particularly of the Engineers, are so mixed up and blended together, that they could not be separated in the manner proposed without prejudice, in my opinion, to the public service. They would be placed under two masters; and a divided authority would, I apprehend, give rise at times to great jarring and inconvenience to the Government. 'Again,' he says, 'I believe that difficulties, and delays will arise in conducting public business under two masters. I think that a divided authority ought always to be avoided whenever it is practicable.' This is the substance also of the objections urged at the same time by Sir Hussey Vivian and Sir John Burgoyne. Sir John Burgoyne was not then the Inspector-General of Fortifications, to whom the separate command of the Engineers was confided. He was, however, in command of this corps when the transfer took place; and he has stated to your Committee that the evils which he anticipated from the change have been realised, and that experience has confirmed his early objections. He thinks it a pity that the transfer was made; he should very much prefer its being as it was before.

"Mr. Herbert also admits that the late transfer of the military command of the Engineers to the Horse Guards has not hitherto worked to his satisfaction, that harmonious action is wanting, that the corps is under two masters, and that the predictions of 1837, so far as the Engineers are concerned, have in some measure been verified.

"Mr. Herbert intends to apply a remedy:—'He thinks that he can make arrangements between the two departments, which will obviate the collision which has taken place hitherto.'

"Your Committee have inquired at considerable length, into the Commissariat, which is the connecting link between the civil and military administration of the Army. The evidence of Commissary General Smith presents a full and clear view of the changes which have been effected in this department, since it was transferred from the Treasury to the War Office. In the first instance, the severance from the Treasury was complete; but in 1856 the banking business of the Commissariat was retransferred to the Treasury, with the entire consent and approbation of the Commissary-in-Chief. It has worked practically well ever since, and Mr. Smith considers the new arrangement excellent. A more military character has been given to this department, and by a system which came into operation in October, 1858, non-commissioned officers are admitted from the army to the subordinate corps, and commissioned officers of the army are eligible to the superior appointments, if they think fit to volunteer. In the camps at Aldershot, the Curragh, Shorncliffe, and other places, all the bread in daily use is baked by the Commissariat artisans, to whom the regiments in camp furnish assistants. The beasts also are slaughtered and flayed in camp; and the effect is that in each camp there are trained men, accustomed to bake, to slaughter, and to distribute meat, sufficient for the supply of large bodies of men. Forage also, for cavalry, is daily distributed at Aldershot, for between 4000 and 5000 horses. Officers and men are acquiring a knowledge of the distribution of food and provender, which would be valuable to them in the field; and Mr. Smith, who has Crimean experience, is very confident that many defects which were then proved to exist in the system of the Commissariat have been rectified. Mr. Smith demurs with regard to the policy of the large transfer of Commissariat duties to the Military Train; he is of opinion that there should be no division of responsibility as to Commissariat transport. In the field the Commissary-General could not be responsible for the supply of food if he were dependent on another officer for the means of transport: and he impugns with much ability and force the new arrangement, by which, as he contends, with an army in the field, the Commissary-General would be dependent on the Commandant of the Military Train.

"Sir John M'Neill was present during the examination of the Commissary-in-Chief. Sir John had been sent to the Crimea to report on the Commissariat, and he imputes the miscarriages which occurred there very much to that department. The camp arrangements described by Mr. Smith, respecting baking, slaughtering, and the distribution of

Digitized by Google

forage were generally approved by Sir John, except that he would have been better satisfied if a certain number of soldiers from each regiment were thoroughly instructed as bakers and as butchers, and that remaining in the ranks of the regiments, not classed as supernumeraries, they should be competent to act for the regiment in their calling, in the event of being separated from the Commissariat corps.

"Sir John M'Neill's solution of the question, whether the Commandant of the Military Train, or the Commissary-in-Chief, should in the field have the exclusive power over the means of transport, is, 'that neither one nor the other should be trusted with it;' but that the French 'intendance' should be introduced into our military system. Were this view adopted, in addition to the Quartermaster-General and the Adjutant-General, in the field there would be a staff officer attached to head-quarters, whose special duty it would be to control and direct both the Commissariat and the Military Train, under the immediate orders of the General Commanding-in-Chief.

"It is worthy of notice that Captain Gordon, the principal military storekeeper at Woolwich, has arrived at this same conclusion from different premises. He, too, served in the Crimea as Ordnance Storekeeper, and from his experience at Balaklava and at head-quarters before Sebastopol, he is of opinion that a superior officer should be added to the staff abroad, who should control all the civil departments of the Army, both the commissary-general and the storekeeper. When he is reminded that the French system is very like this, he says that it is much better than our own; but it did not strike him at first in that light, though on reflection he sees the resemblance.

"Your Committee beg to direct serious attention to this suggestion. It bears directly on the causes of the sufferings of the British Army in the Crimea.

"Your Committee have passed under review all the principal branches of the civil service in the war department. They have called before them Sir Benjamin Hawes, the permanent Under-Secretary of State, and Mr. Godley, his permanent assistant. There are many imperfect arrangements which are susceptible of improvement; there are many defects which remain to be supplied. But when it is remembered with what haste and in what trying circumstances the consolidation of these departments was effected in 1854 and 1855, when the immense magnitude of the establishment is considered, and when the work done is brought to account, there is more reason to wonder at how much has been achieved than to complain of what remains still to be accomplished.

"Mr. Herbert has been present at this investigation. Already he has corrected some imperfections, which have been pointed out. He has declared his intention of amending others. The late Government appointed a committee of the Treasury to examine into the account branch of the War Department. The present Government reconstituted this committee. Their labours have hitherto been confined to Pall Mall, and have not yet reached the manufacturing establishments at Woolwich, Enfield, and Waltham Abbey. In the accountant's branch the subsidiary books were too much curtailed, and the Accountant-General was not consulted in the preparation of the Estimates. A clerk was specially appointed for the purpose, who was not connected with the Account Department. The subsidiary books, as settled by Mr. Anderson, of the Treasury, are now nearly perfected; and Mr. Herbert has decided that henceforth the Accountant-General shall take the principal part in framing the Estimates.

"The state of the account between the British Exchequer and Indian territory is most unsatisfactory. The account for the Persian expedition is not yet closed. The account of the first China war is hardly yet completed.

"The account of the second China war, which ended in 1856, is not yet balanced. There are four or five different accounts still open, with disputed balances to a large amount; and with respect to the new expedition to China, India, in the midst of great financial difficulties, has been required to make advances in the current year for all expenses incurred in taking up transports in India, in paying the men, and in providing cattle, horses, and other necessaries, as well as equipments for the Army.

"In the Estimates for the China vote of credit, just laid upon the table of the House, these advances are now included; but while Indian territory is overwhelmed with debt, it will be unseemly that Great Britain should make war on China out of Indian resources. The repayment of these advances ought to be prompt, and within the present financial year.

"The attention of the House must also be specially directed to the fact, that native troops having been sent from India to China on this last expedition, the whole British Army in China is now on the Indian scale of allowances. This scale is higher than British pay. In accordance with previous practice, no estimate has been presented to Parliament in detail on this account, and no vote has as yet been taken with respect to it. The money for these extras, in ordinary course, is not brought under the review of the House of Commons until it has been actually disbursed. It is drawn in the first instance from the commissariat chest at Hongkong. The commissariat chest has a capital of about 1,300,000*l.*, placed, like civil contingencies, at the disposal of the Government, subject to account, but not controlled in detail by previous estimate and vote. The effect of this is that a large portion of the expense of the China expedition is not submitted to the immediate control and cognisance of Parliament.

"On the other hand there is a sum of 60,000*l.* a year paid by territory to the British Exchequer for retired pay, pensions, &c. of officers and men invalided home from the Queen's army in India. This composition is fixed by Act of Parliament, and was computed when the army then serving in India was less than 30,000 men; and the commuted payment was considered at the time very favourable to the East India Company. Now, when 80,000 men is to be the British force permanently stationed in India, this composition of 60,000*l.* a year is quite inadequate. A Committee of Treasury has reported that instead of 60,000*l.* the annual contribution from India, on this account, should henceforth be something like 500,000*l.*

"The Act of George IV. ought to be repealed, and a new arrangement fixed by Act of Parliament with respect to this contribution, whenever the reorganisation of the British force in India shall be finally settled.

"There is also another Act of Parliament which is construed to provide that the depôts in England of regiments serving in India shall be paid by territory; the strength of these depôts has sometimes amounted to 25,000 men. It is now nearly 15,000 men, and India complains of being compelled to pay for so large a force while serving in England.

"This Act also requires revision, and the fit opportunity would seem to be the approaching legislative settlement respecting the European force to be maintained in India.

"It would be tedious, in this Report, to specify the various minute details in the conduct of the daily business of the War Office, which your Committee have closely investigated, and which are fully disclosed in the evidence of Sir Benjamin Hawes and Mr. Godley, and of Messrs. Anderson and Arbuthnot. It is admitted that the establishment of clerks requires revision and arrangement; that the number of temporary clerks, now 160, is much too large; that promotion ranging throughout the whole department, without reference to its subdivisions, is inexpedient; that the accountants and the book-keeping branches should be kept specially distinct from the rest of the establishment, and that no temporary clerks should be employed in these two branches, and that removals from this peculiar work should be rare and at long intervals.

"It is admitted also that the system of writing minutes on the passage of papers through different branches of the same office is carried to excess; that more frequent personal conference between the heads of departments would be advantageous; and that the political Under-Secretary might, with the best effect, bring these heads of departments together on fixed days, under his presidency, disposing promptly of questions of secondary importance, but reserving the doubtful and more important for the decision of the Secretary of State himself.

"All this is well known to Mr. Herbert. These changes are entirely within his power. Some of them are already accomplished; others are in progress of execution.

"For instance, the Medical Department is not under the roof of the War Office; its correspondence, which is principally with the Horse Guards, is separately recorded, but not in Pall Mall; and the Director-General of the Medical Department communicates with the Secretary of State by letter as if he belonged to another office. These letters, as Mr. Godley expresses it, 'are regularly entered and registered, and copied, and all the rest.' Mr. Herbert thinks that with respect to this correspondence some improvement is feasible; that it might be recorded with advantage in the War Department, and that it would be desirable to communicate by minute rather than by correspondence. After these admissions there can be no doubt that the necessary changes will be promptly made.

"The inquiries of the Treasury Committee are still proceeding in the office in Pall Mall, and the willingness of Mr. Herbert to perfect the great establishment now under his care, aided by the advice and researches of this Treasury Committee, affords the best pledge of the early adoption of every sound and reasonable improvement.

"This Treasury Committee has not yet extended its inquiries to the manufacturing establishments at Woolwich, Enfield, and Waltham Abbey. Want of time has hitherto prevented this most necessary investigation.

"Your Committee have gone at large into this inquiry. They have had before them Captain Gordon, the Storekeeper at Woolwich; Sir William Armstrong, and Mr. Anderson, the heads of the gun factory; Major Boxer, the superintendent of the Royal Laboratory; Colonel Tulloh, now at the head of the carriage department; and Colonel Dixon, the director of the small arm factory at Enfield. An abridgment of the evidence of these officers which goes into minute detail, would not be satisfactory; but the evidence itself is well worthy of attentive consideration. The scale on which these various manufactures are conducted is enormous. The number of labourers on day pay is nearly 10,000, the imprests for their wages have amounted to 40,000*l.* a month. In the gun factory alone the number of labourers has been doubled since November last, and now amounts to nearly 3000. There is no general cashier, no general paymaster. Each head of each department pays his own labourers, and fixes the rate of their wages without authority previously given. In some instances the public money passes through private banks to the credit of the heads of these departments, some of whom being officers, do not find security; and the number of the labourers employed is regulated only by the demands from the War Department for a certain amount of work to be executed within a given time. To present an idea of the cost of some portion of these manufactures it may suffice to state, that each 10-inch shell, with Moorsom's fuse, costs 14*s.* 3*d.*; each 8-inch shell, 9*s.* 10*d.*; and each 32-pounder shell (Moorsom's fuse included), 7*s.* 7¾*d.* This, too, at Woolwich, before shipment and conveyance for distribution. Having heard the evidence of these heads of the manufacturing departments, your Committee are in justice bound to state that, so far as they can judge from the oral testimony of these witnesses, the work is well done, and at a price, on the whole, advantageous to the public. But still the precautions taken as to the money payments and accounts are by no means satisfactory. Captain Gordon says, 'that the present system of several imprest accountants for so many sets of labourers ought not to be continued.' Sir Benjamin Hawes wishes to 'alter the system of keeping the accounts at Woolwich, to create a chief clerk, and to have one account;' and on this Mr. Herbert says, 'although in regard to production these manufactures are very efficient, there is an amount of control and check, with reference to financial matters, which might be introduced with advantage. I should have done so myself before this time; but as the Treasury Committee is about to examine into the state of the Woolwich departments, I would not make any changes before they make their report. They are far more competent to advise me than anyone else, and I might have made erroneous changes if I had made them before the report.'

"It is to be hoped that this inspection and report will not be much longer delayed. Your committee are convinced that an early change is necessary in the mode both of paying and of accounting in these large manufacturing establishments.

"The gun factory has been mentioned, and it is necessary to call particular attention to the evidence of Sir William Armstrong. 3000 men are now employed at Woolwich exclusively in the making of guns on Sir William Armstrong's principle, and under his superintendence. Sir William is the paid servant of the Government, receiving 2000*l.* a-year. He has also already received 6000*l.*, and his salary is to be continued for seven years from the present time.

"It appears that the Armstrong guns are of a construction so peculiar, and so much depending on the mode of putting them together, that it would not be safe to contract for them in the open market. The consequence is that they are made at Woolwich only, excepting a supply under contract from one single factory, and that factory is at Elswick. The effect of this exclusive supply is to give a close monopoly to the Elswick factory. Sir William Armstrong, while in the Government service, has large engineering works of his own at Elswick. A new factory has been set up at Elswick apart from the old concern, but in its immediate neighbourhood; and this new concern is conducted by two of Sir William's partners, with the addition of a third. Sir William has no share or interest in the new concern, but he has advanced them money on security, and has reserved to himself the right of joining them in the event of his leaving the public service.

"Two of the partners in the new concern are still Sir William's partners in the old factory. The contract for the supply of Armstrong guns from Elswick has been made with the new concern. The construction of these guns is a very refined process. The putting together requires to be very carefully done. Mr. Anderson, Sir William Armstrong's assistant at Woolwich, deposes that 'if these guns were made by contract, it would be necessary to have some inspectors constantly at the place where they were made, to see that they were properly put together; no inspection, after they had been put together, would be satisfactory.' Yet these guns are made by contract at Elswick. They come up from Elswick to Woolwich put together. There is no Government inspector at Elswick to watch their construction; but Sir William Armstrong says that the guns are manufactured at Elswick under his own inspection, and that he goes down there continually. But at Woolwich also there are 3000 men at work under his superintendence, and he admits that at Elswick he inspects guns made by his own partners in a neighbouring concern.

"Sir William Armstrong is well worthy of confidence, and has acted generously towards the public by the free surrender of his patent rights, but he is placed by these arrangements in a false position; he cannot watch two great concerns distant from each other more than 300 miles; he ought not to be the inspector of the work of his own partners, although the guns are proved on their arrival at Woolwich by an Artillery officer.

"This large and exclusive manufacture of Armstrong's guns is proceeding on the assumption that they are proved to be the best. But Mr. Anderson admits there would be a difficulty if Mr Whitworth's guns were proved to be better. Mr. Herbert says 'that when Armstrong's guns were first adopted, he had no competitor; and if we had waited until the great question should be decided what is the best possible gun to be made, it would not in this year, nor will it be in next year that we should commence to make that which other nations have got, and which we *should* then be without.'

"It is to be remarked that Sir William Armstrong and Mr. Anderson, who are at the head of the gun factory at Woolwich, are both civilians; and Mr. Anderson states that no artillery officer, no military authority, visits the establishment officially; Captain Cuffyn, R.N., and Sir Benjamin Hawes come down occasionally. Mr. Herbert also admits that this great gun manufacture is conducted without military supervision; but he adds, 'we are about to place a military officer as a captain instructor in that factory, as well as in others.' He then goes on to state that the want of an officer of the highest standing in connection with the artillery is a defect in the arrangements of the War Department. He says that, as an adviser, Colonel St. George, the Chairman of the Ordnance Committee, is very efficient; but he still thinks that there should be an artillery officer of high position to overlook all the *matériel*, and to aid the Secretary of State for War, by transacting a great deal of other business.

"The office of Director-General of Artillery was abolished in 1858; important duties had been specially assigned to this officer in a Memorandum by Sir George Murray when he was Master-General. The Director-General was personally responsible for all the artillery and the armament of all the fortresses. Lord Panmure had retained this appointment when the military command of the artillery was transferred to the Horse Guards, and the prudence of the abolition of the office is questioned by Sir John Burgoyne, Sir Edward Lugard, and Mr. Godley. It has, however, been done, and the vacancy leaves an opening for new arrangements which time and experience may prove to be necessary.

"It is a grave question whether the military element enters sufficiently into the composition of the governing body in the War Department.

"In the play of parties, and by force of the constitutional action of Parliamentary government, the Secretary of State for War must frequently be changed, and be often not a military man. The permanent staff of the department ought to be regulated with a view to this necessity. At this moment the Secretary of State for War, both the Under Secretaries, and the Assistant Secretary, are all civil servants. Mr. Godley does not think that the department, as now constituted, works satisfactorily; and he is of opinion, 'that in a great war it would be almost certain to break down.' Not unreasonably also he arrives at the conclusion 'that the time of peace is the moment for remedying the defects.' Mr. Godley offers a plan of reconstruction of the department according to his own views, by which a military officer of tried abilities and high standing should be placed at the head of each branch, but always in strict subordination to the Secretary of State. This plan is fully developed in Mr. Godley's evidence; injustice would be done to it by abridgment. He sums it up by saying that, in his view, the Secretary of State for War ought to be a statesman, assisted and advised by soldiers.

"Earl Grey takes a somewhat different view, although in the main he practically arrives very nearly at the same conclusion. Mr. Godley recommends a council; Lord Grey suggests a board, presided over by a Cabinet Minister, very

Digitized by Google

much on the model of the Board of Admiralty. But Lord Grey objects to the Secretary of State for War being the president of the board. He would abolish the office of War Secretary, and restore the ancient powers and full controlling authority to the Secretary of State for the Colonies. His lordship has formed no detailed plan for the constitution of the military board; but the outline would be a Cabinet Minister at the head, with four members at least, principally military officers, some holding their appointments for fixed periods; others, like the head of the board, removable on a change of Administration. The board, he says, should be represented in both Houses of Parliament, either by the chief, and one or two members of the board, or by one or two secretaries.

"But the question always returns—What, then, will be the position of the Commander-in-Chief, and what becomes of the reservations in the patent of the Secretary of State for War?

"Notwithstanding the reservations in the patent, His Royal Highness the Commander-in-Chief admits the supreme control of the Secretary of State over the Army. Mr. Herbert, in the presence of His Royal Highness, reiterated before your Committee an opinion previously expressed by him in the House of Commons, that the Commander-in-chief is an officer 'subordinate' to the Secretary of State for War. Mr. Herbert added that his experience in the office confirmed this opinion, and he appealed to the evidence given by the Duke of Cambridge himself before your Committee, in proof that His Royal Highness coincides in this opinion. Mr. Herbert is then pressed to state how he reconciles the powers which he exercises, with regard even to discipline and the movements of the Army, with the reservations in his patent. The answer is remarkable:—'I do not think that it is possible to reconcile them strictly; but, in fact, whatever you may put into a formal patent, the Minister who holds the purse-strings of the Army, and who represents it in the House of Commons, will always have the power in his hands.'

"Is this sound constitutional doctrine? The late Lord Grenville thought that it is, and recorded his opinion in a letter to the late Earl Grey, who assented to it. The terms of the letter are these (the letter was written in 1812): 'As to the Duke of York's situation, and the arrangement of the Army, I do not see how we can consent that the new reign by our advice should be established on the same footing as the former, that of keeping the military administration distinct and independent of the civil government. It is a bad principle even under an absolute monarchy; it is totally incompatible with the principles of a limited Crown.'

"Is there danger in this doctrine? May not the Army thus cease to be Royal, and become a Parliamentary Army? Lord Grey answers both these questions. He says, 'The whole notion of there being anything unconstitutional in bringing the Army more under the Ministry of the day seems to me to arise from a confusion between the powers exercised by responsible Ministers of the Crown and powers exercised by Parliamentary committees, or some mode of that kind. Undoubtedly it was very unconstitutional in the Long Parliament that all the powers of the State should be assumed by committees of the House of Commons; but that power over the Army should be exercised by a responsible servant of the Crown appears to me to be an absolutely essential principle of our constitution.' Lord Grey is then asked whether changes such as he recommends would not bring the Army more under the influence of the House of Commons than it had been in times past. Observe the answer:—'The truth is, that the House of Commons always has exercised, and always ought to exercise, a great control over the administration of the Army. It cannot be called on to provide for the expense of the Army without inquiring in what manner the money granted is applied.'

"Nay, the very existence of a standing army depends on the annual Mutiny Act. The Army would be disbanded *de facto* at the end of the year if the Mutiny Act were not renewed.

"Mr. Herbert also has dealt with this same subject in a striking manner. When asked whether there was not a divided authority between the Secretary of State and the Commander-in-Chief in matters of discipline under the patent, he denied the existence of any such division. In case of difference of opinion, the Commander-in-Chief, he says, must yield; and he illustrates the necessity by the course recently taken by His Royal Highness with respect to the proposed promotion of lieut.-colonels to the command of regiments by selection, instead of purchase or seniority. The Duke of Cambridge gave evidence before the Commission on Purchase in terms so strong, that he declared he could not undertake the duty of selection, if it were imposed on him. The Cabinet decided that the plan of selection should not be abandoned. The Duke of Cambridge was heard by the Cabinet, and stated his objections; but when he found that these objections did not prevail, he declared in the House of Lords, that although he saw great difficulties in the measure, he would do his utmost to carry the views of the Government into effect.

It was then suggested to Mr. Herbert that, to avoid conflict of opinion and division of authority, it might be expedient to vest in the Commander-in-Chief the entire command, both civil and military, of the British Army on his sole responsibility. Mr. Herbert said, 'In France they have a field-marshal as Minister of War, with committees under him, headed by general officers; but in a constitutional Government this appears to me to be impossible, because you must have the administration of the army made responsible to Parliament, and what is done must be done through some Parliamentary officer.' When asked whether he saw any constitutional objection to the subordination of the Commander-in-Chief to a civil officer in England, he replied that 'he saw a constitutional necessity for it,' and that in a Parliamentary form of Government this subordination is right.'

"General Peel takes a somewhat different view of the relative position of the Secretary of State for War and of the Commander-in-Chief. He contends that 'the Secretary of State is directly responsible for the administration of all that portion of the Army which is mentioned in his patent, and indirectly responsible for every act of the Commander-in-Chief.'

"This supplementary patent of 1855 constantly presents itself. While, however, it has been shown that the reservations in the supplementary patent have not prevented the occasional and necessary interposition of the Secretary of State in questions of discipline in which principles have been involved, nor diminished his responsibility by restraining his authority as regards the approval of the selection of officers for the higher and more responsible appointments and commands, your Committee are of opinion that the maintenance in some form of rules which shall regulate the authority of the Secretary of State, and define the extent of the departmental functions of the Commander-in-Chief, is advisable. At present the Secretary of State exercises over the first appointments and ordinary promotions of the Army none but a nominal supervision. In point of fact, so long as the fitness of the candidate is tested by an examination, there is nothing to supervise. Nor does he interfere in any way with the ordinary routine administration of the discipline of the Army. That is left to the military authorities, aided by the legal knowledge of a parliamentary officer—namely, the Judge-Advocate. The Army is thus enabled to feel assured that the patronage of the Army, as regards first commissions and the ordinary promotions and appointments, other than those which are self-regulated by purchase or seniority, will not be distributed with a view to political objects, or to the necessities of successive Governments. Nor will the discipline of the Army, as daily administered, vary in its character with each change in the civil department. Your Committee think that the introduction of any system which shall shake this reliance on the part of the Army would be prejudicial to the efficiency of the Service, by introducing doubt and dissatisfaction where confidence should exist.

"It appears from the evidence of Mr. Herbert that in his opinion some regulation is necessary, as pointing out to the Secretary of State the necessity of not invading the province of the officer who has the military command of the Army intrusted to him.

"Your Committee have shown that the introduction of the reservation into the patent is of late date, and did not exist in the patents of the Secretaries of State for War and Colonies; in their case, indeed, the necessity for it could not well arise, as the authority exercised by them was during peace of a very formal character, except as regarded the colonial military commands, and they took no part whatever in the detailed administration of the army, which was left in the hands of the Secretary at War, an officer who possessed, however, very limited powers. In his case the restriction existed, but not in a patent, as the Secretary at War was appointed by commission. His powers, however, were defined and limited by a document or minute drawn up and signed by Lord Liverpool, after obtaining the approval of His Majesty King George IV., a copy of which document will be found in the Appendix.

"Your Committee are of opinion that this document points out the best and most satisfactory form for regulating the authority of the Secretary of State, and for defining the extent of the departmental functions of the Commander-in-Chief.

"Your Committee have already expressed a doubt whether these supplementary patents are needed, the power of all Secretaries of State being alike, and each having the authority to transact the business of the other. But at any rate your Committee recommend that in whatever document the reservations now in these patents be recorded, the wording of them should be reconsidered, and the limitation be more accurately defined, in consonance with existing usage, so as to avoid the anomaly of usage and the exigencies of the service, necessitating the exercise by the Secretary of State of a direct authority beyond that which the reservations in his supplementary patent by its letter imply.

"Your Committee consider that there is public advantage in the first appointments and promotions being conducted by an officer independent of political pressure; Sir Edward Lugard, whose opinion is described by Mr. Herbert as invaluable in military affairs, states that he had a strong opinion, founded on experience, with reference to the relative pressure for political considerations upon the Secretary of State for the gift of commissions, or with reference to first appointments, as compared with pressure on the Horse Guards. He says, 'I consider that the pressure upon the Secretary of State would be very great; the political pressure upon the Horse Guards is *nil*; that continual letters have been received from members of both Houses of Parliament on subjects connected with promotions and appointments, and that I feel convinced that if the first appointments were with the Secretary of State, if he had more direct control, being a political officer, he would be obliged to give way in many instances where the Commander-in-Chief is not.

"It would be well if the War Office and the Horse Guards could be brought under the same roof. General Peel earnestly recommends this union. He says that it would be the greatest possible convenience and the greatest advantage to the Service if there were one building which could contain both offices so immediately connected. Though the distance which now divides them be small, yet the separation engenders the belief that they are two distinct departments. Public opinion confirms the error, and necessarily leads to divided action, if not to antagonism on the part of military men against the supremacy of the civil power.

"It is never prudent to push changes one inch beyond the length which is absolutely necessary; and therefore your Committee do not recommend that the existing practice should be altered with respect to the three instances in which alone the Queen's pleasure is now taken by the Commander-in-Chief. The first is in regard to the amount of force, when the Army Estimates for the year are under preparation. The decision on this point is taken in Cabinet by the confidential servants of the Queen. It is then communicated, in an official letter, to the Commander-in-Chief by the Secretary of State. His Royal Highness has no voice in the matter. His duty in taking the pleasure of the Sovereign is purely ministerial, and he is not responsible for the advice.

"The second instance is with regard to patterns of Army clothing, but where any change is contemplated which involves an increase of expense the previous consent of the Secretary of State for War is indispensable; and practically, no great change in uniforms can be made without his concurrence. The ancient usage is that the patterns shall be submitted for the approval of the Sovereign by the Commander-in-Chief; and your Committee see no adequate reason for disturbing the established usage in this respect.

"The third instance is with regard to promotions and appointments.

"On this matter of patronage your Committee have already reported at considerable length. In fact, the Secretary of State has now the power of exercising a veto on every promotion and appointment in the Army, excepting first commissions; and with respect even to these the existence of an indirect control has been clearly demonstrated.

"There is still a question of minor importance respecting courts-martial. The proceedings are transmitted, after the termination of each trial, to the Horse Guards, and thence to the Judge-Advocate-General. It is the duty of this civil officer, who is a lawyer and a Privy Councillor, to lay the report of these proceedings before Her Majesty, and to tender his advice as to the legality of the sentence, giving his opinion whether the proceedings have been conducted according to law. He then returns the proceedings to the Commander in-Chief, with a memorandum of the advice offered to Her Majesty; but this advice is strictly confined to the legality of the proceedings and of the sentence.

"Your Committee see no reason to desire an alteration of this practice. The Judge-Advocate General is generally a Member of the House of Commons; he is responsible for the advice given to the Sovereign, and no one is more competent to advise than a lawyer deemed worthy of elevation to the Privy Council.

"The last and the great question still remains to be considered—how is the Army to be governed? Earl Grey recommends a Board, with a Cabinet Minister at its head, but not the Secretary of State. He seeks to restore the supreme power to the Secretary of State for War and Colonies. This Board would be a new experiment. It undoes all that has been done. It throws aside all the advantages of growing experience and improved practice, which the last five years have not failed to afford. Instead of concentrating responsibility, it redistributes it. The machinery of Boards is known to be cumbrous and uncertain in its operation. It only works well when the head of the Board acts as if he alone were responsible. A Board, therefore, would be a retrograde measure which your Committee cannot recommend.

"A council is a board in a modified form, and the same objections apply, though in a less degree.

"Mr. Herbert has given a scheme for reorganising the War Department.

"He proposes that there shall be one Commander-in-Chief, as at present;

"A Parliamentary Under-Secretary, two permanent Under Secretaries, one of whom shall be a military officer, and also an Assistant Under-Secretary;

"A Director of 'materiel,' an officer of Artillery, to superintend the manufacture of all warlike stores;

"An Inspector-General of Fortifications, an officer of Engineers, as at present;

"A military officer to overlook the commissariat, the clothing, and all stores not called 'warlike stores,' to be called 'Director of Supplies;'

"A Director-General of the Medical Department, as at present;

"A Storekeeper-General, as at present;

"A Commissary-in-Chief, as at present;

"An Inspector of Militia and Volunteers, reporting to the Parliamentary Under-Secretary;

"An Accountant-General, having charge of the finance.

"The scheme thus proposed would secure an infusion of new military blood into the War Department, which would give vigour to the system and confidence to the Army.

"The Secretary of State would have around him professional advisers, whose opinions he might consult, either separately or collectively, according to his view of the exigencies of each case.

"On the whole, your Committee are of opinion that this scheme proposed by Mr. Herbert has the merit of reducing change to the *minimum*, while it promises an increase of real efficiency.

"Mr. Herbert has also declared it to be his opinion, if one or more of these military heads of departments had seats in the House of Commons, the public advantage would be great. When the Secretary of State is a civilian, unaided and unsupported by military colleagues in the House of Commons, he is exposed to serious difficulties, and his administration of the Army is inadequately defended. When he speaks on military subjects, his authority is questioned; when he answers professional questions, it is known that he retails the opinions of others rather than that he is pronouncing his own. His position in the House of Commons would be far different if he had by his side a colleague, a soldier of distinction, at all times ready to sustain his answers and to uphold his authority.

"'With reference to any difference that might arise as to the relations between the Secretary of State for War and the Commander-in-Chief, your Committee cannot do better than refer to the memorable observation of the Duke of Wellington. He thus sums up his evidence before the Commission of Military Inquiry in 1837:—'There can be no doubt that the officer at the head of the Army, if he wants to incur any expense would naturally go to the Secretary at War, and know from him whether he has any objection to incurring the expense proposed. He must know that if it be not approved by the civil authorities of the Army such expense will not be voted in Parliament, and will not be allowed. On the other hand, if the Secretary at War should think that any expense which was incurred ought to be discontinued, he would naturally inquire from the Commander-in-Chief whether he thought such expense might be discontinued without inconvenience to the Service. That is the way in which business is generally transacted. There may be such a rule as that referred to; but I have never myself thought much of such rules; they must be departed from when the Service renders a departure from them necessary These can be but general rules, as landmarks by which the official arrangement of the Service ought to be conducted. The best rule is the mutual good temper and forbearance of the parties.'"

By direction of the Secretary of State for War, Aldershot will be in future a distinct commissariat charge, and the senior commissariat officer will report direct to the War Office.

THE ILLUSTRATED HORSE-DOCTOR.*

Mr. Mayhew's volume will, we imagine, meet with a hearty welcome. It is just such a good, practical work on the veterinary art as most of us horse-using (and not unfrequently, we fear, abusing) Englishmen have long felt the need of.

We have always been at a loss to comprehend why veterinary surgeons should persist in involving their remarks in a sort of professional mystery, and why, whilst professing to write for general information, they should consider it desirable to adorn their pages with *'ossy* technicalities which can have no other effect than that of rendering their works unintelligible to a large body of readers. Veterinary-Surgeon Mayhew apparently reasons in the same way, for in his Preface he especially congratulates himself upon having written his book in plain language, and upon having "eschewed hieroglyphics and avoided technicalities;" "the meaning," he tells us, "has shaped the terms employed, and all the graces of style have been intentionally discarded." The result of this unusual mode of proceeding is that we have the valuable opinions and experience of a very able practitioner, embodied in a concise and readable book, which every farmer may understand, and which no horse-owner will peruse without pleasure and profit.

Another scarcely less novel, though perhaps even more satisfactory, feature in this work is the force with which the author argues in favour of humanity towards animals, "if not from any higher motive, because it is certainly the truest economy. To make this fact plain," he says, "is the intention of the present publication. To prove that horses are gifted with something beyond the mere sensation which is common to all moving things, is the object of the present work. To convince the public, by appealing to the eye and to the understanding, through the means of engravings and letterpress, that the equine race inherit higher feelings than the vast majority of mankind are prepared to admit, is the purpose of the book now in the hands of the reader. To demonstrate how closely Nature has associated man and horse in their liabilities and in their diseases; to induce men, by informing their sympathies, to treat more tenderly the timid life which is disposed to serve, and is also willing to love them, is the highest reward the author of the following pages can picture to himself." (Pref. p. xii.)

And a very laudable ambition, too, Mr. Mayhew; if no books were written with worse motives, our library shelves would be somewhat emptier.

Of late years, it is true, Mr. Rarey has convinced most of us, by ocular demonstration, that kindness is the best discipline. But until that gentleman's appearance there were very many among us who regarded the theory as Utopian perhaps, and charming but unpractical; while even now, in spite of Mr. Rarey and his system (which has scarcely done more towards training the horses than their owners, Mr. Mayhew's able reasoning on the subject will not be thrown away. With the strictly professional portion of the work we will not be so presumptuous as to meddle; if the name of the author is insufficient to recommend it, any remarks of ours will be equally thrown away.

Perhaps, if we are to take exception to any portion of this work, we might refer to one or two passages in which the author, with questionable taste, and still more questionable justice, hurls philippics at the higher classes. He only weakens a strong case; and although, perhaps, Mr. Edwin James, Mr. Ernest Jones, and a few ultra-radicals might delight to read how "gentility has no feeling either for itself, or with any of the many lives by which it is surrounded" (p. 91), they would probably confess, like ourselves, their previous entire ignorance of this singular fact; nor do we believe that it is generally known that "firmly as nature may have united man and horse, gentility would dissever them; it is not polite in society to speak of man's most patient companion and most faithful slave" (p. 121). We can only say that "gentility" is either very lax about enforcing her laws, or that we have not had the advantage of moving in that extremely select society, of whose grim etiquette Veterinary-Surgeon Mayhew speaks with such confident familiarity; or may not an explanation, perhaps, be found in the presumption that the rare, but commendable delicacy of Mr. Mayhew's genteel friends having suggested to them his possible dislike to "talking shop," they have always studiously avoided the subject in consequence?

Allons—these are blemishes, which we hope in future editions (and the work we cannot doubt will pass through several) Mr. Mayhew will be inclined to remove.

We must not close our remarks without commenting on the numerous woodcuts with which the volume is embellished. It is truly, as it professes to be, an Illustrated Horse-Doctor; and, if Mr. Mayhew has hitherto, as his publishers seem to insinuate in their Preface, hidden his light under a bushel, he has certainly made up for lost time in the work before us, and thrown it all upon his present volume with admirable effect; for although in some cases we consider the sketches a little extravagant and exaggerated, still, on the whole, they assist materially to a proper comprehension of the text, and add considerably to the value of this very useful work.

* *The Illustrated Horse-Doctor.* Being an accurate and detailed account, accompanied by more than 400 pictorial representations of the various diseases to which the equine race are subjected; together with the latest mode of treatment, and all the requisite prescriptions. Written in plain English. By Edward Mayhew, M.R.C.V.S., author of "The Horse's Mouth," "Dogs; their Management," &c. &c. (London: W. Allen & Co., 1860.)

MILITARY ABUSES.*

There is an aristocratic game much in vogue at Epsom and similar meetings, called "Aunt Sally." Probably very few of our readers will need to be reminded that the amusement consists in sticking up the wooden figure of a black doll, christening it "Aunt Sally," whoever that amiable and much-enduring lady may be, representing her nose by means of an inverted tobacco-pipe, and then setting to work to demolish that organ by throwing sticks at it, *ad infinitum*.

The "Army, the Horse Guards, and the People," very forcibly reminds us of this amusement.

"A Soldier," who has apparently acquired considerable proficiency in the art, makes up his mind that the Horse Guards and War-Office combined will make a good, hardy "Aunt Sally," sufficiently black; and, accordingly, having set up this image, he sticks into it, appropriately enough, a succession of pipe-clay noses, in the shape of Army abuses, and at these he discharges a quantity of sticks with various success, and in a manner which will always afford amusement, and generally satisfaction, to the lookers-on; for, if he misses the nose, he very seldom misses "Aunt Sally."

The first nose which he tries his skill upon is certainly not a very becoming feature in "Aunt Sally's" face, and is a very brittle one; indeed, for our own parts, we believe it to have been cracked long before our author began to throw at it,—we refer to the old Crimean story, that sad, old weary tale of mismanagement, and want, and misery, which of course "A Soldier," when he once begins, soon makes short work of. However, in spite of some very sensible reflections which he makes over the fragments, and fitting introduction as these two opening chapters form to those which follow, we are not sorry when we get to the end of them and come to a rather tougher subject, and one which promises much more amusement. Nor are we disappointed; the purchase system takes a good deal of throwing at (as we might have learned from the debate on the 6th of March last); and we hear a good many sharp, telling "thwacks," as the sticks fall thick and fast upon poor "Aunt Sally's" battered face; but we do not know that her nose is damaged very seriously after all—chipped and knocked about a good deal perhaps, but not wholly demolished. It is such hard work that our author gets a little exhausted, and throws his sticks about rather wildly; you must be on your guard or you may get an ugly crack from one of these stray sticks; see, there are my Lords Panmure and Grey limping away together from the effects of one of these random shots, and Mr. Sidney Herbert too is rubbing his shin and wondering if the skin is broken.

Joking apart, the pamphlet contains the opinions of an honest thinking man on two or three of the most important military questions, couched in language singularly vigorous and to the point. To the purchase system, and to a double military government, as at present exists, he is especially averse; and, although we think that several of his arguments admit of refutation, and others are somewhat one-sided, it would scarcely be fair to the author or interesting to our readers to discuss any of them separately—to take the text without the context; and we prefer, therefore, to leave the whole to the judgment of those who may devote themselves to a perusal of the pamphlet.

In the main we agree with the opinions advanced; and although, especially on the question of purchase, we consider our author to be, as we have before stated, somewhat bigoted; it is impossible not to concede the force and justice of a great part of his reasoning. We would point out to him, however, that the strongest supporters of the purchase system are ready to admit that there are very many and great objections to it; and that the essence of their special pleading in its favour is not, as he states at page 22, "that it works well"; but that as yet no plan has been proposed, which, everything considered, would be likely to work better. The purchase system is an anomaly, no doubt; and we know to our cost that it is bad. Since we have read this pamphlet we think it even worse than we did before; but damaging as are our author's arguments against it, he fails to show that the purchase scheme is inferior to either of its two rival systems of promotion—seniority and selection, or to propose a substitute combining the advantages of all the three, while it avoids their numerous imperfections. If "A Soldier" can suggest any such plan he will have rendered a very important and lasting service to the Army, and to the country at large. At present he appears much in the light of a doctor, who demonstrates to his patient in the most forcible manner that his complaint is a very serious one, and then walks out of the house without attempting to prescribe for him. It is always something, however, to find a doctor who does not flinch from telling his patient the true state of the case, and who is willing and able to do so in the plain and vigorous language of this little pamphlet; it may at least have the good effect of inducing him to pay more attention to his regimen; and it is looking on it in this light that we wish heartily to recommend "The Army, the Horse Guards, and the People," to our readers.

* *The Army, the Horse Guards, and the People.* By A Soldier. (London, 1860.)

An exceedingly good portrait of Lord Clyde has just been published by Mr. Mitchell. It has been taken from a most happy and successful painting made ere Sir Colin Campbell went out to India, by Mr. H. W. Philips; but it is in expression and in detail an exceedingly vigorous truthful likeness of the gallant soldier, who has suffered less than many a younger man from the campaign he has brought to such a successful termination.

SEAT OF WAR IN SICILY.

[From our own Correspondent.]

Naples, 21st July.—The position of public affairs is becoming more and more critical daily; and it does not require any supernatural power to perceive that the present state does not exhibit the elements of stability. The royalist party, desirous of impressing the public with the conviction that all is right, speaks in the ministerial journals of the constitution, the formation of a national guard, and the approaching elections, in a strain of laudation, and with a height of enthusiasm considerably above the market value of these boons (?), and contrasting strongly with the coldness and seeming ingratitude of the far more numerous popular party. The fact is, the people so completely distrust any promise emanating from the Bourbon family, that the late concessions, even were they greater, would not appear of certain duration; and as for the constitution, it displeases the high Bourbonists by its liberality, and the friends of reform by its containing two objectionable clauses, one of which reserves to the king unlimited control over the army, and another the right of creating peers. In the exercise of the latter it is supposed danger would arise to the liberties of the subject from the king's being able to command a majority in the upper house. That the public mind is far from being as calm and desirous of enjoying its new liberties insecurity as official organs represent, may easily be deduced from the well-known symptoms of popular discontent, a feeling which manifests itself here as in Palermo, in the tendency of men to group themselves together in the streets, to fill the cafés with animated talkers, and to surround them with crowds of eager listeners. Even were the secret police now in existence here, it would be impossible for them to take note, much less arrest everyone who expresses an opinion unfavourable to the present administration, so general has the enjoyment of freedom of speech become. A still more surprising novelty is the new-born liberty of the press; a liberty which, to judge from the tone of the opposition papers, politicians are determined to avail themselves of as long as it may last, the government in the meantime allowing plenty of rope, in the humane hope that journalists may hang themselves. The most daring of the daily papers is the Neapolitan *Punch*, yclept the *Brighella*; its former name of *Arlecchino* was suppressed by order of the minister of police, in which political caricatures appear daily.

Pictures of Garibaldi are to be seen at every turning, and at prices suited to the finances of the million, side by side with these, and to match, are likenesses of the King of Sardinia. The public sale of these, and of narratives of torture and suffering, professing to be those of prisoners lately liberated—and there is no reason to doubt their authenticity—are such a wonderful change from what would have been possible in Naples some time ago, that one can scarcely realise the fact that it is Naples, or that one's eyes and ears do not deceive. Since the removal of the deposed police, heavy patrols are constantly passing up and down the streets, the sentries are very numerous, and there is every appearance of complete military occupation.

On Sunday last, the 15th inst., a most wanton and cowardly attack was made upon the people by the soldiers, the particulars of which I subjoin as gathered from the account of the affair given in the columns of *Il Tuono*, one of the daily papers. It appears that the affray began at Porta Capuana, where a man and woman were only disputing; into this dispute a soldier rushed uninvited, and struck the male disputant in the face; this blow was naturally resented, whereupon the soldier drew his sabre and began a vigorous onslaught upon his unarmed antagonist. This was the starting of the general attack, which now began; soldiers, wherever they happened to be, drew their swords, and began cutting and slashing men, women, and children as they met them. From the Porta Capuana they branched off into different streets, pursuing the same courses, beating and wounding inoffensive citizens, until they finally reached the Royal Palace. The number of wounded exceeds one hundred, and of these forty went for treatment to the hospital of the Pellegrini, others to the hospital of Borgo Loreto, and the remainder were charitably received into private houses. Several deaths are spoken of. Of those received at the Ospedale dei Pellegrini, eleven were found to be mortally wounded, others though severely wounded have since been removed to their own houses. The names of those actually in hospital on the day following that of the dastardly attack, were the following—Antonio de Donato, Luigi de Magistris, and Luigi Russo, all three wounded in the Quartiere Mercato; Michele Avia, and Giuseppe Meglio, in the Quartiere S. Vicaria; Luigi Ruzzi, and Giovanni Salvi, in the Quartiere S. Giuseppe; Luigi Marco at Porto, Domenico Lubrano at S. Fernando, and Niccola Giutto at Montecalvario; Salvatore Lardo does not remember in what locality he was when wounded. The most melancholy case was that of a poor woman, who saw her child of eight or ten years murdered before her eyes, whilst she was endeavouring to save it from the ruffian soldiery. Several shops were broken into, and plundered of their contents. It must, however, in justice to some of the Neapolitan officers be mentioned that they endeavoured to restrain the violence of their men by every means in their power. On the evening of the 15th inst. a deputation, composed of citizens of note, waited upon D. Liborio Romano, the Minister of Police, and requested him to lay their complaints in reference to this outrage before the king; with which request he complied, and a council of state was held in consequence, the result of which was that a notification

Digitized by Google

has been made to the effect that the regiments complained of would be disbanded and punished, and that the process necessary for the carrying out of this determination had already begun. Rumour is busy with the future of Naples, and Garibaldi is confidently expected at no remote day. Meantime the national guard seem to present the sole spectacle of any public interest, and their patrols are followed by a mob of lazzaroni and half-naked children, huzzaing and cheering them as they pass along the streets. The most important aspect in which the establishment of this national guard can be regarded is that it supplies the townspeople with arms, which I am inclined to think would in case of an outbreak be used against rather than in favour of the present government. The chief office connected with the administration of the police has been rendered vacant this week by the appointment of D. Liborio Romano to another post, and the vacancy thus caused has been filled up by the appointment of S. Raffaele Farina, who has already issued a manifesto, copies of which are posted up in all directions; but it strikes me very forcibly that it will require more than manifestos from ministers of police to establish complete tranquillity. Naples has at present a very large garrison, and reinforcements arrive daily. Heavy patrols are constantly passing through the streets, exhibiting all the indications of a state of siege. It is a significant fact, and one worthy of note, that foreign subjects have already begun to post up on their doors notices of their respective nationalities, in anticipation of a rising of the townspeople, and some go the length of mentioning the 25th inst. as the day on which it is expected to occur. News arrived here yesterday from Sicily to the effect that an engagement has taken place between 500 of Medici's brigade and 3000 Neapolitan troops under Bosco; as usual, both sides claim the victory, but as the royal troops, instead of advancing, were content to take up their position in a town named Milazzo, near Messina, and as Garibaldi immediately on receipt of this intelligence left Palermo by steam for the scene of action, taking with him 3000 men, the affair is in all probability over by this time, although I cannot vouch for the certainty of the report that Garibaldi, after fifteen hours' hard fighting, captured the town and made prisoners of the whole force it contained. The only improbable part of the report is that the Neapolitans held out against an equal force for fifteen hours! *Apropos* of this subject, there is a story current here which, if true, almost carries one back to the days of chivalry. It seems that the Veloce, the steamer that deserted to Garibaldi a short time since, had on board a sword for Bosco, presented by the queen; this, of course, fell into the hands of the Sicilians when the ship was given up, but when its destination was made known to Garibaldi, he, without loss of time, forwarded it to its proper owner. In this and a thousand other instances Garibaldi has exhibited a loftiness of mind and generosity worthy of all praise and becoming to a just cause.

Obituary.

The colonelcy of another regiment, the 17th Foot, is rendered vacant by the death of Lieutenant-General Thomas James Wemyss. The gallant officer died on Thursday week at his residence at Bath. The deceased officer had nearly completed his sixtieth year of service in the Army, his commission as ensign being dated in October, 1800. He accompanied the Walcheren expedition in 1809, and the following year proceeded to the Peninsula as major of brigade to the brigade under Lord Howard, composed of the 50th, 71st, and 92nd Regiments, with which he served during the remainder of the war until its final embarkation at Bordeaux in 1814. During the war he was present in the different affairs during the retreat to the Lines near Lisbon; actions of Pombal, Redinha, and Foz d'Arouce; battle of Fuentes d'Onor, surprise of Marshal Gerard at Arroyo de Molinos, stormings of Fort Napoleon and the Bridge of Almaraz, action of Alba de Tormes, defence of Bejar, battles of Vittoria and the Pyrenees; at Maya, Lesaca, and Donna Maria, where he was severely wounded; the battles of Nivelle, Cambo, Nive, St. Pierre (again wounded), Hellette, Garris, St. Palais, Tarbes, Arriveriette, Orthes, Aire, and Toulouse, besides numerous minor affairs. Subsequently he served with his regiment, the 99th, in India, and served against the Kandians in Ceylon. In recognition of his military services he was in 1838 made a Companion of the Order of the Bath, and had received the silver war medal and seven clasps for Fuentes d'Onor, Vittoria, Pyrenees, Nivelle, Nive, Orthes, and Toulouse. In further acknowledgment of his professional services the gallant veteran was in May, 1854, appointed colonel of the 17th Regiment of Foot. The deceased general's commissions bore date as annexed:—Ensign, 14th Oct., 1800; lieutenant, 1st March, 1804; captain, 30th Nov., 1806; major, 21st June, 1813; lieut.-colonel, 21st Jan., 1819; colonel, 10th Jan., 1837; major-general, 9th Nov., 1846; and lieut.-general, 20th June, 1854. General Wemyss was a distinguishedly gallant soldier in the field, and was always observed to display an ample share in the noble bearing of the chivalric Barnes, under whom he so worthily acted as Major of Brigade. Such was his character in the field: his services at home were of a highly important and useful character in conducting for twelve years, in times of very considerable difficulty, the military arrangements necessary for the support of the civil power in the vastly populous district around Manchester, and including the whole of Lancashire. After this service he was paid the distinguished compliment of being appointed to a command in Ireland, when the partially insurgent movement of 1848 took place.

Commander Frederick Holland (1846), on reserved half-pay, died on the 21st inst. By the death of Commander Holland, Commander John Barnes (1847) is advanced to the half-pay of 10*s.* per diem.

The death of Mr. James Rusden, Master (1851), has been announced. Mr. Rusden was serving at the time of his demise in the steam-frigate Mersey, belonging to the Channel fleet.

The Navy has lost another popular and well-known officer in Rear-Admiral William Frederick Lapidge, on the reserved half-pay list. The death of this excellent officer took place at Devonport on the 17th inst., where he had long resided. The late Rear-Admiral entered the Service in 1803, served in the expeditions to Copenhagen and Walcheren, and he was actively employed until the peace in 1815, and since then he never lost an opportunity to serve afloat. Admiral Lapidge was connected by marriage with the family of the late Sir William Elliott, R.N.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Bent—July 23, at Athlone, the wife of Captain Bent, 1st Battalion 25th Regiment, of a son.

Cadman—July 8, at Tapton Mount, near Sheffield, the wife of W. E. Cadman, Esq., 5th West York Regiment, of a daughter.

Cassidy—July 17, at Fermoy, the wife of John Cassidy, Esq., Captain 68th Light Infantry, of a daughter.

Cookson—July 19, at Anglesey, near Gosport, the wife of Major William Cookson, Durham Militia Artillery, of a son.

MacLean—July 17, at the Barracks, Omagh, county Tyrone, Ireland, the wife of Captain A. MacLean, of a daughter.

Robson—July 22, at Farnham, the wife of Henry Robson, Esq., Captain 12th Regiment, of a son.

Stormont—July 20, at No. 9, Upper Grosvenor Street, the Viscountess Stormont, of a son.

Walker—July 14, at Banks of Clouden, Kirkcudbrightshire, the wife of Major Walker, of Crawfordton, Dumfriesshire, of a daughter.

Ward—July 20, at Dawley Lodge, Hayes, Middlesex, the wife of Lieutenant C. Y. Ward, H.M.'s Indian Navy, of a daughter.

MARRIAGES.

Batty—Stebbing—July 24, at St. James's, Piccadilly, by the father of the bride, the Rev. Robert Braithwaite Batty, M.A., Fellow of Emmanuel College, Cambridge, elder son of the late Lieut.-Colonel Batty, of the Grenadier Guards, and of Ridgmount Place, Ampthill Square, and grandson of the late Sir John Barrow, Bart., to Beatrice, eldest daughter of the Rev. Henry Stebbing, D.D., rector of St. Mary's, Upper Thames Street.

Biggs—Saunders—July 19, at St. Luke's Church, Cheltenham, by the Rev. Morley B. Saunders, brother of the bride, James A. M. Biggs, Lieutenant H.M.'s Bengal Army, youngest son of the late Major-General J. A. Biggs, Bengal Artillery, to Augusta Katherine, youngest daughter of the Rev. James T. C. Saunders, of Cheltenham.

Clements—Hall—July 24, at St. Jude's Church, Southsea, by the Rev. T. R. Brownrigg, the incumbent, William Henry Clements, Royal Marines, to Mary, second daughter of the late Lieutenant John Hall, Royal Navy.

Dashwood—Fowler—July 19, at Rathmblyon Church, by the Rev. Luke Fowler, James Edd. Dashwood, Esq., son of Vice-Admiral Dashwood, to Anne Mildred, daughter of Robert Fowler, Esq., of Rahinston House, county Meath, Ireland.

Farquhar—Fisher—July 18, at St. Mark's Church, Pennington, Hampshire, by the Rev. William Lambert, uncle of the bride, Thomas Farquhar, Esq., M.D., H.M.'s Bengal Army, to Charlotte, daughter of the late Captain A. S. Fisher, H.M.'s 72nd Highlanders.

Festing—Todd—July 24, at St. Mark's, Albert Road, by the Rev. George Arthur Festing, M.A., curate of Ashbourne, Derbyshire, Henry Blathwayt Festing, Esq., eldest son of Captain Festing, K.H., Royal Navy, of Fern Cottage, Exeter, to Mary Eliza, eldest daughter of R. J. S. Todd, Esq., of Glocester Road, Regent's Park.

Heathcote—Lang—July 21, at St. George's, Hanover Square, Michael Edensor Heathcote, of H.M.'s 22nd Regiment, only brother of John Edensor Heathcote, Esq., of Apedale, and Longton Halls, county Stafford, and Grenville Street, London, to Maud, third daughter of James Lang, Esq., of Greenford, Middlesex.

Helsham—Clark—July 18, at the church of the Holy Trinity, Hurstpierpoint, Sussex, by the Rev. the rector, Carey H. Booner, M.A., Hector Helsham, M.D., of Yarmouth, Isle of Wight, to Amelia, fourth daughter of John Clark, Esq., R.N., of Hurstpierpoint, lately of Yarmouth.

Hunter—Dodgson—July 24, at St. John's Episcopal Church, Perth, by the Rev. William Blatch, Lieut.-Colonel James Hunter, H.M.'s Indian Army, to Alexa, eldest daughter of the late Rev. John Dodgson, of Comely Bank, Perth.

Lanchester—Dimsdale—July 21, at St. George's, Hanover Square, by the Rev. A. B. Whatton, F. W. Lanchester, of Bognor, Sussex, Solicitor, to Caroline, widow of the late Henry F. Dimsdale, of the 11th Hussars.

Lyon—Patten—July 24, at St. George's, Hanover Square, by the Right Rev. the Lord Bishop of Sodor and Man, assisted by the Rev. R. Greenall, M.A., Thomas Henry Lyon, of Appleton Hall, Cheshire, to Vanda, daughter of Colonel Wilson Patten, of Bank Hall, Lancashire.

Prendergast—Malcolm—July 24, at St. George's, Hanover Square, by the Rev. J. Young, vicar of Eatington, Warwickshire, Captain Lenox Prendergast, Scots' Greys, to Marion, eldest daughter of the late Neill Malcolm, Esq., of Poltalloch.

Quin—Stewart—July 25, at the Congregational Church, Holloway, by the father of the bride, Rear-Admiral Michael Quin, of Albion Villas, Albion Road, to Elizabeth, eldest daughter of the Rev. Alexander Stewart, of Palmer House, Holloway.

Smith-Neill—Wood—July 25, at St. James's, Dover, by the Rev. W. E. Light, M.A., William James Smith-Neill, Esq., Royal Artillery, of Barnweill and Swindrige-Muir, Ayrshire, eldest son of the late Brigadier-General Neill, C.B., H.E.I.C.S., to Jessie Gideon, youngest daughter of George Leighton Wood, Esq., Bath.

Tucker—Abbott—July 25, at the district church of St. James's, Croydon, by His Grace the Archbishop of Canterbury, assisted by the Rev. Charles Dallas, vicar of Farncombe, St. George Tucker, Esq., Bengal Civil Service, to Frances Margaret, only daughter of Major-General Sir Frederick Abbott, C.B., Lieut.-Governor of the Royal Indian Military College, Addiscombe.

DEATHS.

Carmichael—June 14, at Government House, Madras, Jane Theophila, aged 25, the beloved wife of D. F. Carmichael, Esq. (Civil Service), Private Secretary to His Excellency Sir C. E. Trevelyan, K.C.B.

Davis—June 1, at British Honduras, Lieutenant W. Davis, 2nd West India Regiment.

Hallifax—July 21, at Southsea, Henry Fitzwilliam, eldest son of the late Brigadier R. D. Hallifax, 75th Regiment, aged 22.

Holland—July 21, at the Victoria Hotel, Euston Square, Captain Frederick Holland, R.N., of Ashbourne Hall, Derbyshire, aged 45.

Horton—July 24, aged 78, Lieut.-Colonel Horton, of Leamington, and of Moseley Hall, Staffordshire, a Deputy-Lieutenant of the county and an old Peninsular officer.

Hunter—June 8, at Neemuch, Bombay Presidency, Rosina Burnley, the beloved child of Captain W. Francis Hunter, H.M.'s 2nd Bombay Light Cavalry, aged 9 months.

Lyster—July 25, at the R. N. Hospital, Plymouth, aged 24, Catherine Isabella, second daughter of Captain Henry Lyster, Superintendent of the R. N. Hospital and R. W. Victualling Yard, Plymouth.

Poley—July 25, Mary Philippa, aged 9 months, the elder twin daughter of Captain Weller Poley, of 33, Eastbourne Terrace, Hyde Park.

Row—March 21, at sea, in the Bay of Bengal, Lieutenant George Home Row, H.M.'s 75th Foot, son of J. Row, Esq., late Inspector-General of Hospitals, Bengal, aged 25.

Rusden—July 14, at Bantry Bay, on board H.M.S. Mersey, James Rusden, Esq., Royal Navy.

Silver—July 24, at Duncan Terrace, Islington, John Bye Silver, surgeon, late of the Bombay Army, eldest son of the late Rev. Samuel Silver, vicar of All Saints', Fulbourne, Cambridgeshire.

Smith—July 20, at Green Royd, near Ripon, Yorkshire, Sarah Bradney, the wife of Captain William Slayter Smith, Adjutant of the Yorkshire Regiment of Hussar Yeomanry, and formerly of the 13th Light Dragoons and 10th Hussars.

Stephen—July 5, at the Boschetto, Malta, after a protracted illness, Sarah Elizabeth, wife of James Stephen, Esq., M.A., Naval Instructor, Royal Navy, and daughter of J. V. Allen, Esq., Royal Engineer Department.

His Royal Highness the General Commanding-in-Chief has directed that in future there shall be the distance of a hand's breadth between the pouch and knapsack of the infantry soldier, instead of four fingers' breadth, as at present, between the pouch and elbow.

General officers commanding brigades are permitted to give leave of absence to field and regimental staff-officers for 14 days, as they have hitherto been allowed to do with

Advertisements.

CENTRAL ASSOCIATION FOR IMPROVING THE CONDITION OF THE WIVES AND FAMILIES OF SOLDIERS AND SAILORS.

Patron—Her Majesty the Queen.

Vice-Patrons.

His Royal Highness the Duke of Cambridge, K.G., &c., Commander-in-Chief;

His Grace the Archbishop of Canterbury.

President—The Earl of Shaftesbury.

Chairman of Committee—Wm. Angerstein, Esq., M.P.

Besides the ordinary demands on the Association, the embarkations of the season are now going on, and more than 800 women, left behind the regiments ordered out to quell the Indian mutiny, are now proceeding to be reunited to their husbands. Three years' separation has forced these poor creatures through sad straits, and now, when clothing and preparations for a long voyage are needed, their private means are utterly exhausted. True, Government gives to each a small grant, but the Emigration Commissioners (who make the arrangements) require much more.

The Committee hope the generous public will not let this juncture pass without strengthening their hands for this most necessary occasion. The funds are very low.

Subscriptions and donations will be thankfully received by the Treasurer, Hon. A. Kinnaird, M.P.; at Messrs. Ransom, Bouverie, & Co.'s, 1, Pall Mall East, S.W.; and by the Hon. Secretary, Captain S. F. Jacson, at the office, No. 7, Whitehall, S.W.

Subscriptions and Donations since January 1, 1860.

July 10th, 1860. PETER MORRISON, Managing Director.
Prospectuses and forms sent free on application.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

MONEY.—Noblemen, Officers in the Army, Persons holding Government Appointments, Clergymen, and other Gentlemen, can have ADVANCES upon their notes from a private channel without life insurance or delay, and with secrecy.—Apply to Mr. HUDSON, 28A, Regent Street, Piccadilly, W.

RIFLE CORPS TENT.—FREDERICK EDGINGTON, Inventor and Sole Manufacturer of this celebrated Tent, without a pole in the centre, from 4*l.* Marquees and Flags lent on hire. Address, THOMAS ST., OLD KENT ROAD, LONDON, S.E.
No connection with any other house.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

THE INCOMPARABLE BEDS, FOR AIR OR HOT OR COLD WATER (AYCKBOURN'S PATENT).—These Beds may be filled with air or hot or cold water, they require no tossing about (or making as it is termed), are easily washed, are light and portable, may be packed in a carpet bag, and therefore invaluable to EMIGRANTS, YACHTSMEN, NAVAL AND MILITARY OFFICERS AND TRAVELLERS. They form in an instant Six or more Swimming Belts, and will stand any climate. No Emigrant should leave this country without one or more of these Beds.
Beds, 6 feet long by 3 feet wide, price 3*l.*, and 7*s.* 6*d.* extra for every 6 inches additional width. Pillows, 20*s.* Inflating Apparatus, 2*s.* 6*d.* Will be forwarded on receipt of Money Order by BENJAMIN GEORGE, corner of Ware Street, near the Canal Bridge, Kingsland Road, N.E.

SKAIFE'S PATENT PISTOLGRAPH (Price Ten Guineas), "The greatest photographic discovery of the age," with hundreds of its chromo-crystal productions, including Hyde Park equestrians, and jewellery guinea portraits of babies, "the most beautiful instantaneous pictures which photography has yet produced."—*Brighton Gazette.* Now on view at SKAIFE'S Pistolgraph Depôt, 47, Baker Street, Portman Square, London, W. Articled pupils received at a moderate premium.

GUSH & FERGUSON, Artists and Photographers, beg respectfully to invite the Nobility and Gentry to view their First-Class PORTRAITS, in Oil and Water-Colours.
GALLERY, 179, REGENT STREET, W.
